18 if we otherwise decided that it would be okay for  
19 cisgender males to play with cisgender females, would I  
20 envision there being a safety reason to ban those  
21 cisgender males?

22 BY ATTORNEY BROOKS:

23 Q. All I asked had nothing to do with gender  
24 identity. Do you agree that the introduction onto the

1 field or the court in or have been spoken of its contact  
2 or collision sports in the female division of natal  
3 males who have gone through all or a significant part of  
4 male typical pubertal development could raise legitimate  
5 concerns about safety for the natal females?

6 ATTORNEY BLOCK: Same objections as the  
7 previous two questions.

8 THE WITNESS: So any person who's gone  
9 through a male puberty would that, per se, make me  
10 invoke a safety concern, if that's the question ---.

11 BY ATTORNEY BROOKS:

12 **Q. Could that in your mind raise the given safety**  
13 **concerns?**

14 A. So I would not --- the word legitimate I'm not  
15 addressing, but I'm not aware of that in and of itself  
16 being a safety concern.

17 **Q. You state in paragraph 22 of your rebuttal**  
18 **report that, quote, transgender athletes and women have**  
19 **been competing in NCAA and secondary school athletics**  
20 **for many years at this point. Let me ask you if you are**  
21 **aware of any instance in which natal males have competed**  
22 **in the female category in any contact or collision sport**  
23 **in either the NCAA or high school division?**

24 ATTORNEY BLOCK: Objection to form.

1 **Q. I apologize if I asked something early in the**  
2 **morning, but it's faster than trying to dig back into**  
3 **the transcript. Do you have any opinion as to whether**  
4 **it is reasonable to exclude a natal male with a male**  
5 **gender identity from a high school girls basketball**  
6 **team?**

7 ATTORNEY BLOCK: Objection to form.

8 THE WITNESS: So ask that again a little  
9 bit slower.

10 BY ATTORNEY BROOKS:

11 **Q. Do you have have any opinion as to whether it is**  
12 **reasonable to exclude a natal male with a male gender**  
13 **identity from participation in a girls high school**  
14 **basketball team?**

15 ATTORNEY BLOCK: Objection.

16 THE WITNESS: I do not have an expert  
17 opinion on that subject.

18 BY ATTORNEY BROOKS:

19 **Q. Do you have a personal view?**

20 A. I don't know that I --- there it would get more  
21 complicated depending on context.

22 **Q. You don't have a simple yes or no personal view**  
23 **on that question?**

24 A. I don't.

1 THE WITNESS: So can I identify  
2 transgender girls or women specifically and specific  
3 instances of participation? I cannot.

4 BY ATTORNEY BROOKS:

5 **Q. What was your basis for asserting that such**  
6 **athletes have been competing in the NCAA and secondary**  
7 **school athletics for many years?**

8 ATTORNEY BLOCK: I'm sorry. Is the  
9 question about collision sports? Because you are  
10 quoting something that is not about collision sports.

11 ATTORNEY BROOKS: Let me break that out.  
12 Thank you.

13 BY ATTORNEY BROOKS:

14 **Q. Do you have a view as to whether --- I shouldn't**  
15 **say a view. Do you have any information as to whether**  
16 **transgender athletes have been competing in the women's**  
17 **division of NCAA or secondary school athletics in any**  
18 **contact or collision sports for many years?**

19 A. That information on the validity is that they  
20 have had access because there has not been a ban.

21 **Q. But whether they have done so you do not have**  
22 **any information?**

23 A. But I cannot point to specific instances,  
24 exactly.

1 **Q. And do you have a view whether it is reasonable**  
2 **to exclude a natal male with a female gender identity**  
3 **from participation in a high school girls basketball**  
4 **team?**

5 ATTORNEY BLOCK: Objection to form.

6 THE WITNESS: So do I have a view on  
7 participation of a cisgender girl in the girls category?  
8 Sorry. Say it again.

9 BY ATTORNEY BROOKS:

10 **Q. I said do you have a view on whether it is**  
11 **reasonable to exclude a natal male with a female gender**  
12 **identity from participation in the high school girls**  
13 **basketball team?**

14 ATTORNEY BLOCK: Objection to form.

15 THE WITNESS: So that is a transgender  
16 girl, got it. So --- and the question is do I have a  
17 view on --- I apologize. Go back.

18 BY ATTORNEY BROOKS:

19 **Q. I can do it again.**

20 A. Yes, do it again. Sorry.

21 **Q. Do you have a view as to whether it is**  
22 **reasonable to exclude a natal male with a transgender**  
23 **identity from participation in the girls high school**  
24 **basketball team?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: And it is do I have a view on excluding --- as an expert am I opining on that? I'm not. I'm opining as a scientist on what the data are.

BY ATTORNEY BROOKS:

**Q. Do you consider a policy that excludes natal males with a male gender identity from the girls basketball team to be, quote, discriminatory?**

ATTORNEY BLOCK: Objection to form and scope.

THE WITNESS: So as an expert I'm not taking a position on excluding cisgender males from the female category, if I answered that correctly.

BY ATTORNEY BROOKS:

**Q. My question was simply do you consider such a policy to be a discriminatory policy?**

ATTORNEY BLOCK: Objection to form and scope.

THE WITNESS: So are you asking me as an expert to define discrimination?

BY ATTORNEY BROOKS:

**Q. I will direct you to paragraph 27 of your rebuttal report. And there you wrote Doctor Carlson has not offered cogent explanation for why alleged safety**

definition or am I acting as an expert to define these words, and I think we are kind of in that situation.

BY ATTORNEY BROOKS:

**Q. But I'm asking you about your expert reports in the litigation. You must have meant something. What did you mean by nondiscriminatory when you submitted this expert report?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So when I'm using the word nondiscriminatory I am using it to mean something that isn't using some other indicator --- well, I'm really just using it in the broadest sense to something that is including people.

BY ATTORNEY BROOKS:

**Q. Using it in the broadest sense, discriminating between one category and another is --- could be a good thing or a bad thing.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: As an expert I --- that is way outside my scope. But simply as an English speaker, yes, discrimination could be good or it can be bad, yes.

BY ATTORNEY BROOKS:

**Q. And for instance, if you are --- well, you said**

**concerns based on average differences in size and strength should be addressed within an across the board exclusion of transgender women as opposed to tailored nondiscriminatory policies.**

**Do you see that?**

A. I do.

**Q. So understanding discriminatory, however you did understand it when you wrote that, do you consider a policy that prohibits natal males with a male gender identity from participating on the girls basketball team to be a discriminatory policy?**

ATTORNEY BLOCK: Same objections.

THE WITNESS: Right. So I'm not defining --- I'm not defining discriminatory here. I'm --- right. So if you are asking as an expert to define discriminatory, that I can't do.

BY ATTORNEY BROOKS:

**Q. Well, if you don't know what discriminatory means, what do you mean when you referred to a tailored nondiscriminatory policy?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I guess I have to circle back initially to --- I mean we can do that for any word here, right, where I could have like my own personal

**you don't prescribe to minors, so --- but if you are dealing with a 19-year-old who says and you concluded I need gender affirming hormone, and I will use the term you prefer, if that individual's hormones and biology are female then gender affirming hormones are going to consist, among other things, perhaps of administering testosterone.**

**Correct?**

A. Yes, typically we would have have ---.

**Q. And if that individual's biology and hormones endogenous were male, then the gender affirming hormones would include among other things estrogen or estrogen analog.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: If that person had typically --- typically a male hormone profile, right, to move toward a more feminine profile that typically would include estrogens or some other agents that were other than testosterone, yes.

BY ATTORNEY BROOKS:

**Q. So speaking scientifically and not in civil rights terms, if I may, you as a scientist, as you decide which regimen of hormones to administer to this**

1 individual have to discriminate between those who are  
2 endogenously male and those who are endogenously female  
3 in deciding which regimen you prescribe.

4 Correct?

5 ATTORNEY BLOCK: Objection to the form.

6 THE WITNESS: We have to make a decision.

7 And so if you are trying to get me to say that  
8 discrimination can be defined as making decisions, I'm  
9 with you and yes.

10 BY ATTORNEY BROOKS:

11 Q. Okay.

12 Let me just run down a few items to make sure.  
13 You have not personally engaged in any research  
14 regarding sports physiology, have you?

15 A. I'm trying to think if there's anything. I  
16 don't believe I have.

17 Q. You yourself haven't personally engaged in any  
18 research or published any papers --- that's a compound  
19 question. You, yourself, haven't engaged in any  
20 research relating to sports medicine or sports injuries,  
21 have you?

22 A. I have not engaged in any research with regard  
23 to sports injuries. And the answer to the first part of  
24 that gets a little muddled because some of the papers

1 can have --- those actually can have a sports context.

2 Q. Have you done any research on the impact of  
3 testosterone suppression on athletic performance or any  
4 measurement of strength?

5 A. So the second piece of that is I have not done  
6 any research that specifically used strength as an  
7 endpoint in my own studies. To the second piece of  
8 those --- I forgot what ---.

9 Q. Athletic performance?

10 A. Athletic performance, there it gets a muddled  
11 thing. The research that I have done can be applicable  
12 in that context.

13 Q. Well, that is if your endpoint is hematocrit  
14 count, to use the right term, you're saying that might  
15 have implications for athletic performance? Is that  
16 your point?

17 A. That is correct, yes.

18 Q. But you have not done any research in which any  
19 measurement of athletic performance is an endpoint?

20 ATTORNEY BLOCK: Objection to form.

21 THE WITNESS: Again, I have to think  
22 about how to say that because some of the --- part of  
23 the problem is that papers that we're looking at include  
24 quite a bit of literature on components that may be

1 that I have written about physiology and transgender  
2 people could apply to sports medicine.

3 Q. Have you, yourself, ever participated in  
4 devising any athletic training regimes for individuals  
5 of either sex?

6 A. I've not been involved in devising any training  
7 regimes.

8 Q. Have you done any research with related to male  
9 physiology --- I'm sorry, male physiological advantages  
10 relevant to athletics before, during or after puberty?

11 A. So there I have --- none of the research that I  
12 have done to date has been specifically looped as ---  
13 well, I can't even say that. So research that I have  
14 done with regard to observing physiology among my  
15 subjects can be applicable to sports medicine in some  
16 context.

17 Q. On what publications, if any, of yours do you  
18 believe relate to male physiological advantages in  
19 athletics before, during or after puberty?

20 A. Well, just off the top of my head, without  
21 looking at it exhaustively, I have a paper on  
22 hematocrit, which is the oxygen-carrying cells in  
23 people. In transgender people I have a paper on  
24 testosterone levels with different treatments. So those

1 applicable --- that may be applicable in sports  
2 medicine, whether it is muscle strength and muscle size  
3 or blood cell counts and such. And so that more  
4 expansively than my research is in that category.

5 Whereas, if I'm trying to be focused and narrow, then  
6 I've got those two studies, the one by Roberts and the  
7 one by Harper. And my papers are not those.

8 BY ATTORNEY BROOKS:

9 Q. You don't have any information about numbers of  
10 children in West Virginia who suffer from any DSD, do  
11 you?

12 A. No, as --- I guess I have to say no there in  
13 terms of actual surveys of kids in West Virginia, I know  
14 some brought statistics. West Virginia is big enough  
15 that you would predict that the statistics would  
16 generally apply, but that is as smart as I could get on  
17 the subject.

18 Q. And you are --- I think you effectively answered  
19 this, but to be clear for the record you are not opining  
20 that BPJ suffers from any DSD?

21 ATTORNEY BLOCK: Objection to the form.

22 THE WITNESS: So the --- here too we get  
23 into --- into an evolving area of definitions where you  
24 could envision if some of the specific genetics that are

associated with being transgender became identified, would we in the medical world start to label those instances as DSD? It's possible. So that is just ---.

BY ATTORNEY BROOKS:

**Q. Thus far no such indicators have been identified.**

**Correct?**

A. I can't even --- I can't even say that definitively. It is an area of active conversation in terms of --- in terms of boarder setting in the medical community right now.

**Q.** However, I think my question is easier. You're not offering an opinion --- any opinion that BPJ suffers from any DSD, are you?

A. So I don't have --- so to be clear first I don't know the --- BPJ's specific medical condition. I wasn't brought in to evaluate that and I have not. So I can't actually render an opinion on any of the medical story there.

**Q.** And you don't know whether any child or typical XY chromosome — pardon me, you don't know whether any child with XY chromosomes who suffers from a DSD has ever sought to compete in female athletics in West Virginia up until the present?

was marked for identification.)

— — —

BY ATTORNEY BROOKS:

**Q.** Now, Dr. Safer, to be fair, I see that you are the last listed author on a fairly lengthy list of authors. And maybe that does and maybe that doesn't have significance in terms of how in depth your involvement in this paper was. Let me ask. Was this a paper of which you had some significant input?

A. I had significant input. I can tell you that in the medical and scientific community the first author typically did the work and the last author is the senior author and supervisor. And the middle authors are actually the ones where you ---.

**Q. Okay.**

I was aware of the significance of the first.  
I was not aware of the significance of the last. Okay.  
That is helpful. All of the authors here, if I'm  
correct, are colleagues within the Mount Sinai Clinic or  
division that you supervise.

**Am I correct?**

A. All of the authors were in those positions at some point, which is how we came together to write the paper.

ATTORNEY BLOCK: Objection to the form.

THE WITNESS: So the question is do I know of an instance of a specific individual with XY chromosomes and a DSD connected to that who has specifically participated in sports in West Virginia?

BY ATTORNEY BROOKS:

**Q. Who has sought to participate in female athletics in West Virginia?**

A. Right, so who has sought to participate in female sports in West Virginia. I cannot give you a specific instance, that is true. I can say, though, knowing the percentage of people who have DSDs and the size of the State of West Virginia that you would predict it would be true, but that would be again as smart as I could be on one subject.

ATTORNEY BROOKS: Let me mark as Safer Exhibit 15 what was previously designated as Tab 53, an article by Dr. Safer and others entitled the Mount Sinai Patient Center Preoperative Criteria Meant to Optimize Outcomes are Less of a Barrier to Care than WPATH SOC 7 Criteria Before Transgender Specific Surgery. And yes, that is a mouthful.

— — —

(Whereupon, Exhibit 15, Dr. Safer Article,

**Q.** And the paper I should say for the record is dated 2020. And let me see if I correctly understood what the paper is about. If we — in this paper you compare the eligibility of patients who are seeking vaginoplasty under the WPATH Standard of Care 7 criteria versus the criteria actually used by your clinic.

**Am I correct?**

A. Yes.

**Q. And just so we're clear, vaginoplasty is a surgery that is only done on biological male, natal male individuals.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So a vaginal plasty is the genital reconstruction surgery to create a vagina in a person. When we are using it as a gender affirming surgery, then we are using it on people who have what would be considered typically male anatomy in that circumstance but the surgery could also be used on somebody with typically female anatomy requiring construction for whatever their circumstance may be.

BY ATTORNEY BROOKS:

**Q.** That said, the subjects discussed in this paper are all individuals who are seeking the surgery for

1 **gender affirming purposes rather than, for instance,**  
2 **because of a severe DSD.**

3 **Correct?**

4 A. The people in this circumstance are all people  
5 seeking the surgery for gender affirming purposes and  
6 not those for DSD or for other purposes, reconstruction  
7 of vaginas for accidents and cancers. I mean there is  
8 quite a range.

9 **Q. And the result as summarized in the abstract is**  
10 **that of 139 patients who were identified as subjects of**  
11 **this study, 63 qualified for surgery immediately based**  
12 **on the Mount Sinai criteria.**

13 **Correct?**

14 A. Yes.

15 **Q. Whereas only 21 of those would have qualified**  
16 **based on the criteria set out in the WPATH Standard of**  
17 **Care Version 7?**

18 A. Yes.

19 **Q. Three times as many individuals qualified for**  
20 **immediate surgery under the standard used by your clinic**  
21 **as opposed to the standards set out in the WPATH**  
22 **Standard of Care?**

23 A. That's correct.

24 **Q. When did your clinic begin approving surgery for**

1 BY ATTORNEY BROOKS:

2 **Q. It is not the case, is it, that every patient**  
3 **who was qualified for surgery by your clinic had been**  
4 **demonstrated to satisfy the WPATH criteria for**  
5 **eligibility?**

6 A. It is --- so there were --- the patients just as  
7 stated who qualified by our criteria but not by WPATH  
8 criteria, there is such a group that existed, exactly,  
9 yes.

10 **Q. Okay.**

11 **And specifically, according to your criteria,**  
12 **three times as many patients are eligible according to**  
13 **WPATH criteria?**

14 ATTORNEY BLOCK: Objection to form.

15 THE WITNESS: It's not so much the three  
16 times. It is the pace. Some of this relates to pace  
17 and efficiency.

18 BY ATTORNEY BROOKS:

19 **Q. Dr. Safer, your clinic, according to this paper,**  
20 **approved for surgery 42 patients who were at that time**  
21 **not eligible according to WPATH criteria.**

22 **Correct?**

23 ATTORNEY BLOCK: Objection to form.

24 THE WITNESS: No. So the reality is we

1 **patients who are not eligible under the WPATH Standard**  
2 **of Care?**

3 ATTORNEY BLOCK: Objection to form.

4 THE WITNESS: Yeah, so to be clear, the  
5 patients in our program qualify by both criteria. The  
6 paper is simply pointing out that our process is more  
7 efficient and patient friendly, but it's not to say that  
8 we were not informed by WPATH criteria also. And I  
9 think I need to expand even a little bit further. Part  
10 of the point of the paper is that it includes --- it  
11 includes efforts to know benefit to the patient that end  
12 up being time consuming and therefore are a waste of  
13 energy in contrast to our approach, which is actually  
14 more conservative than WPATH's approach. We actually  
15 look at more things but we do so in a more efficient  
16 fashion and that is actually the point of the paper.

17 BY ATTORNEY BROOKS:

18 **Q. Well, let me clarify one thing you just said.**  
19 **According to this paper, it is not the case, is it, that**  
20 **every patient for whom your clinic approved surgery was**  
21 **at that time qualified according to the WPATH criteria?**

22 ATTORNEY BLOCK: Objection to form.

23 THE WITNESS: Wait. Say it again. Could  
24 you repeat that?

1 still live in the universe that everybody else lives in,  
2 so we are --- so this paper proposes a more appropriate  
3 and a more patient appropriate model, but it is not the  
4 case that we actually sent people to surgery who would  
5 not be approved by WPATH.

6 BY ATTORNEY BROOKS:

7 **Q. Well, were you personally involved in developing**  
8 **and approving Mount Sinai's criteria?**

9 A. Let me look at the role here. Yes, I definitely  
10 had a role in developing our criteria.

11 **Q. Let me ask you to look at page 168, column one,**  
12 **call your attention quite a bit to table one. And if I**  
13 **understand correctly, table one is designed to help us**  
14 **compare and contrast what is required by the WPATH**  
15 **criteria for surgical readiness versus the Mount Sinai**  
16 **criteria for surgical readiness.**

17 **Correct?**

18 A. That is correct, yes.

19 **Q. And the WPATH requires a letter of support from**  
20 **the patient's hormone provider confirming the hormone**  
21 **regimen and the length of time of hormone therapy.**

22 **Correct?**

23 A. That is how it is written, yes.

24 **Q. And farther down, under mental health it says**

1 that it requires two letters of support from mental  
2 health providers?

3 A. It does, yes.

4 Q. And it gives on page 157 a definition who is a  
5 qualified mental health professional down towards the  
6 bottom of the second column. I'm going to ask you to  
7 find that language if you could?

8 A. Uh-huh (yes), yes.

9 Q. You say, many define licensed mental health  
10 providers having one or more of the following  
11 credentials, the LCSW, Licensed Clinical Social Worker.

12 Is that right?

13 A. LCSW is Licensed Clinical Social Worker, yes.

14 Q. And MD, DO that is a medical doctor, a doctor of  
15 --- what does the O stand for?

16 A. Osteopathy.

17 Q. There we go. A psychiatrist, a Ph.D., yes, that  
18 was surprising to me. Surely not just any Ph.D.?

19 A. Right, that's referring to a Ph.D. clinical  
20 psychologist.

21 Q. Okay.

22 Or any Master's level for above counseling  
23 degrees. But then you go on to say that in your  
24 evaluation based on SOC-7 criteria. That's the WPATH

1 but I will quote it the most significant of the Mount  
2 Sinai criteria is the removal of the requirement of two  
3 independent psychiatric evaluations. And that is in  
4 column two of page 169, at the end of the first full  
5 paragraph. The first full paragraph, column two, the  
6 final sentence.

7 A. I'm in which column? Sorry.

8 Q. Column two.

9 A. Oh, column two. Sorry.

10 Q. The first full paragraph, final sentence.

11 A. The most significant deletion from the Mount  
12 Sinai criteria is the removal of --- yes, I see that.

13 Q. And you stated at the top of column one on the  
14 same page that, quote, finding two mental health  
15 providers to do independent evaluations is  
16 time-consuming, expensive and difficult.

17 Right?

18 A. Just trying to find that exact wording. Yes.

19 Q. So in your own clinic's practice, while WPATH  
20 calls for two letters from independent mental health  
21 providers, you concluded that because it was hard to get  
22 two independent evaluations your clinic would simply  
23 dispense with the requirement of any independent mental  
24 health review.

1 criteria?

2 A. That's the WPATH criteria, yes.

3 Q. We included the above degrees with the following  
4 exclusions, mental health providers with lower than  
5 Master's level training and unlicensed mental health  
6 providers of any type, NPs and PAs without mental health  
7 credentials, physicians who are not psychiatrists or  
8 mental health providers who are still in training. Do  
9 you see that language?

10 A. I do.

11 Q. So under the definition used in your clinic you,  
12 yourself, do not qualify as a mental health  
13 professional.

14 Correct?

15 A. That is correct.

16 Q. So at no point have you relied on your own  
17 opinion for any mental health evaluation for  
18 eligibility?

19 A. That's correct.

20 Q. Okay.

21 I just wanted to understand that clearly. So  
22 back to mental health data. In says in the WPATH column  
23 that two letters of support from mental health providers  
24 are required. In this paper you state on the next page,

1 Correct?

2 ATTORNEY BLOCK: Objection to form.

3 THE WITNESS: No, that is not quite  
4 correct. Part of the difference for our operation is  
5 that we have --- we have expertise in-house and we have  
6 --- if you notice, looking at the table, a longer list  
7 of requirements actually than WPATH does, which includes  
8 a social work component. And that actually is the ---  
9 that's the source of actually yet a second pair of eyes,  
10 as it were. And so it is not the case that we are ---  
11 that we're providing less of a screen, we are actually  
12 providing more of a screen. It's just that we are  
13 operating in a more efficient manner for the patient.  
14 BY ATTORNEY BROOKS:

15 Q. Let's flip back to column one. A few more lines  
16 down it says for our analysis patients who otherwise met  
17 WPATH SOC 7 criteria received one letter of support from  
18 the CTMS mental health provider. Right? You would  
19 agree with me, would you not, that the only letter of  
20 support for a mental health provider required by your  
21 protocols is from a mental health provider within your  
22 employment?

23 ATTORNEY BLOCK: Objection to not reading  
24 the complete sentence.

THE WITNESS: So yes. So maybe let me just --- show me the wording again.

BY ATTORNEY BROOKS:

**Q. Yes. For our analysis --- and I'm beginning at perhaps eight lines down.**

A. Our analysis, yes.

**Q. Patients who otherwise met WPATH SOC 7 criteria received one letter of support from the CTMS mental health provider doing the assessment, period, closed quoted.**

**Do you see that?**

A. I do, yes.

**Q. As the term is generally understood in your field, a CTMS mental health provider is not independent --- let me use the correct terminology, is not an independent mental health provider?**

A. So in a clinic setting I don't know that the word independent actually has the same meaning as in some other context. So even a WPATH requirement isn't necessarily that it would be an unaffiliated person or I don't know what you were thinking independent might mean here, so I don't want to put words in your mouth or conjecture too much. But when we say independent we just mean two different people.

A. I do.

**Q. And you understand well documented gender dysphoria to be referring to a general diagnosis under the DSM-V criteria?**

A. So for WPATH's purposes I think they are specifically referring to the DSM diagnosis.

**Q. In your clinic you are willing to approve for this --- I'm not sure how to actually say the word vaginoplasty surgery, individuals who do not suffer from persistent well documented gender dysphoria.**

**Correct?**

ATTORNEY BLOCK: Objection to the form.

THE WITNESS: So if you look, the list of the criteria for Mount Sinai, then the phrasing is a confirmation that this person --- for all intents and purposes, that this person is transgender and with the language and evolution we use that word gender dysphoria and we also use the new word that will replace gender dysphoria, gender incongruence, as the terms I referenced before, transgender.

BY ATTORNEY BROOKS:

**Q. And the effect of that is you do not require a diagnosis of gender dysphoria under the terms of DSM-V. Correct?**

**Q. But in fact, the letter of support from the CTMS mental health provider that you refer to in this paragraph at the top of column one of page 169 actually plays no role in your determination as to whether this patient is eligible for surgery.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So yes. I'm confused by the question.

BY ATTORNEY BROOKS:

**Q. I'm confused by the text. The final paragraph --- sentence in that paragraph reads these letters of support were used to satisfy third payor requirements to cover surgery and were not part of the CTMS assessment?**

A. Oh, yeah, that's a good point. The literal letter is because we are all in-house the opinion of the person is, of course, important and so the screen takes place. But the need to create --- the bureaucratic of creating a specific letter is one of the burdens that we are suggesting could be removed.

**Q. In table one, let me find this. Under mental health WPATH SOC-7 requires, quote, persistent, well documented gender dysphoria.**

**Do you see that?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So the --- yeah, if we had our druthers, which is I think you are asking, and we did not --- and we weren't simply satisfying a third party payor, would we insist on that formal DSM-V criteria for a person we otherwise know to be transgender? We would not.

BY ATTORNEY BROOKS:

**Q. And in fact, you do not.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Well, as a practical matter, like I said, we live in a universe where we end up doing both what we suggest is the necessary approach and we end up, because we still live in the universe that we live in, satisfying the other approach even though we're suggesting that it's cumbersome.

BY ATTORNEY BROOKS:

**Q. Dr. Safer, you testified earlier that, in fact, in 42 patients your clinic determined they were surgery eligible even though they did not satisfy the SOC criteria listed in column one of table one?**

A. Right. So they are not --- so they would be --- they theoretically would be eligible without having

1 satisfied the --- some of those specific WPATH criteria  
2 that we discussed. But in practice nobody went to  
3 surgery without covering both sets of criteria.

4 **Q. Isn't the precise results reported by this paper**  
5 **that 42 patients were deemed surgery approved who did**  
6 **not qualify under WPATH criteria?**

7 A. But I guess the bottom line of the paper is that  
8 if we followed our --- our rules alone, we would  
9 actually cover more details and be more conservative in  
10 our approach if a longer list of criteria and we would  
11 do so more quickly. That's all the paper says. It  
12 doesn't say that we have --- that we have actively  
13 defied the existing universe and sent people to surgery  
14 without covering the criteria that are generally being  
15 used by doctors.

16 **Q. And by the way, the surgery we're talking about,**  
17 **vaginoplasty, in the context where it is being used for**  
18 **gender affirming purposes, invariably includes**  
19 **castrating the individual.**

20 **Correct?**

21 ATTORNEY BLOCK: Objection to form and  
22 foundation.

23 THE WITNESS: So a vaginoplasty is a  
24 genital reconstruction surgery, which in this context is

1 A. Well, it is the circumstance that some people  
2 more so outside of New York, some transgender people  
3 still do not have access to care for --- to gender  
4 affirming care and do get some of their treatment by  
5 alternative means. And if there is an insistence on a  
6 documented 12-month continuous hormone therapy  
7 requirement, then those people might not be able to be  
8 approved for surgery.

9 **Q. I need to ask you to clarify what you mean by**  
10 **obtaining by alternate means?**

11 A. We have people getting hormones from internet  
12 providers. We have people inappropriate --- well, I  
13 apologize, I don't want to make a value judgment there,  
14 but we have people getting hormones from friends or  
15 connections of theirs, things outside the system.

16 **Q. So you have some people come to you who have**  
17 **effectively self-diagnosed and self-prescribed ---**

18 ATTORNEY BLOCK: Objection.

19 BY ATTORNEY BROOKS:

20 **Q. --- hormone therapies?**

21 ATTORNEY BLOCK: Objection to form.

22 THE WITNESS: So when we are seeing  
23 people for surgeries, then it is no longer a matter of  
24 self-diagnosis because we see them ourselves with our

1 taking the existing typically --- typical male genitalia  
2 and reconfiguring it into typically female genitalia.  
3 And in that --- in the procedure the testes are removed.

4 BY ATTORNEY BROOKS:

5 **Q. They're not reconfigured?**

6 A. They are not reconfigured.

7 **Q. Let me ask you 169, column one, it says about**  
8 **two-thirds of the way down, at the end of the paragraph**  
9 **that begins medical requirements for the Mount Sinai**  
10 **CTMS? I want to direct your opinion --- your attention**  
11 **to the final sentence.**

12 A. So which paragraph, column one.

13 **Q. Column one, the paragraph that begins halfway**  
14 **down, medical requirements?**

15 A. Yes.

16 **Q. Now, let's jump to the end. The Mount Sinai**  
17 **criteria also removed the 12-month continuous hormone**  
18 **therapy requirement for the vaginoplasty which**  
19 **complicates matters for people who have received hormone**  
20 **therapy from non-medical providers.**

21 **Do you see that language?**

22 A. I do.

23 **Q. Explain to me the reference for people who have**  
24 **received hormone therapy from non-medical providers?**

1 internal team. But there are people who have  
2 self-prescribed their hormones or obtained them by  
3 nonconventional means, that part, yes.

4 BY ATTORNEY BROOKS:

5 **Q. And when people come in who have obtained**  
6 **hormones by nonconventional means and taken them without**  
7 **prescription necessarily, you chose to remove the**  
8 **requirement for 12 months properly prescribed continuous**  
9 **hormone therapy rather than insisting that the patients**  
10 **undergo control of hormone therapy for 12 months before**  
11 **you operate on them?**

12 ATTORNEY BLOCK: Objection to form.

13 THE WITNESS: So to clarify, again, these  
14 are --- we are proposing that this would be the  
15 protocol. In practice, we have not been able to do  
16 this, that is we have had to do both. But in our  
17 experience, as a program we don't see any benefit to a  
18 supervised --- a supervised regimen, that is we are not  
19 --- I'll just leave it there.

20 BY ATTORNEY BROOKS:

21 **Q. WPATH in table one requires that all psychiatric**  
22 **symptoms be, quote, well controlled.**

23 **Correct?**

24 A. They use that language, yes.

**Q. And the language under the CTMS column is rather different. Among other things it says no suicide attempt in the last six months. Do you see that?**

A. Let me find it. We're in the table, right?

**Q. We are in the mental health section under CTMS column?**

A. Yes.

**Q. No suicide attempt in the last six months. But if the patient tried to commit suicide seven months ago, that's okay?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So the point here and the distinction is that the WPATH criteria are too vague, and so what you are observing with the Mount Sinai criteria is they're much more granular. And rather than leaving something to some subjective interpretation we define some of the specifics to make it clearer on what the guidelines should be.

BY ATTORNEY BROOKS:

**Q. You refer here in your guideline to no suicide attempt in the last six months. If a patient has entertained suicidal thoughts but made no attempt in the last six months, did that patient potentially satisfy the Mount Sinai criteria?**

**Q. Dr. Safer, you testified earlier, and I think I'm using the word that you used that if your clinic had its druthers they would be following or making decisions strictly based on the criteria that are laid out in this paper, Exhibit 15, under the heading of Mount Sinai CTMS.**

Correct?

A. Yes.

**Q. And can I infer from that that you, yourself, don't view the WPATH SOC-7 as setting out scientifically established best practices but rather recommendations on which you use different?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: No, I would not say that. So SOC-7 sets out the guidelines as things were understood in 2011 and 2012, and we have learned --- we've learned and things have evolved since then in terms of the care of transgender people.

BY ATTORNEY BROOKS:

**Q. Did you have any participation in the development of the SOC-7 guidelines?**

A. I had very minimal participation. I helped review some articles that informed those guidelines.

**Q. Those guidelines --- did you have any**

A. So that kind of decision would be at the discretion of the reviewing mental health professional, the psychiatrist or the psychologist, and so you can certainly envision different circumstances. So even going back to your example of seven months, you could envision that something like that might be considered, depending upon the person, too unstable even though they technically met criteria. This isn't just a check box. It is more a guideline. And similarly, to your point about a suicidal ideation, there are different tiers of them. And I won't claim to be an expert on the specifics there, but my mental health professionals are more concerned about some of those than others.

ATTORNEY BROOKS: Take a break.

VIDEOGRAPHER: The current time reads 3:35 p.m. Eastern Standard Time.  
OFF VIDEOTAPE

---  
(WHEREUPON, A SHORT BREAK WAS TAKEN.)

---  
ON VIDEOTAPE

VIDEOGRAPHER: We are back on the record.  
The current time is 3:55 p.m. Eastern Standard Time.  
BY ATTORNEY BROOKS:

**familiarity with the process of how they were being drafted?**

A. I'm trying to think if I can say things usefully. I was not close enough to the process that we would want --- that I would want to start commenting on.

**Q. Do you know whether they addressed issues on which opinions within the drafting committee differed?**

A. I can't comment on SOC-7. We are literally writing SOC-8 now.

**Q. And on that are there issues that the SOC-8 is addressing on which opinions significantly differ?**

A. Yes.

**Q. So it's not that every aspect of the guidelines are unanimously agreed by every member?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So with medical guidelines in general there isn't --- that unanimity wouldn't be a thing. They're referred to as consensus documents rather than unanimous documents.

BY ATTORNEY BROOKS:

**Q. And what that tells us is that there is --- that reasonable people differ on at least some aspects of what is set forth in the document?**

ATTORNEY BLOCK: Objection to form.

Page 206

THE WITNESS: In all guidelines, including these, members of the committee even differ in terms of how things are framed and when consensus is obtained, but not unanimity.

BY ATTORNEY BROOKS:

**Q. How many gender performing surgeries or gender affirming surgeries were performed in your clinic in 2021?**

A. In 2021, all --- there were, according to the New York Times, about 9,000 total surgeries performed at Mount Sinai hospitals, including everything we do. So that wouldn't just be vaginoplasty. That would include chest reconstruction surgeries, revisions of older surgeries, et cetera.

**Q. Well, you quote the New York Times. Where did they get the information?**

A. I suppose the sources is us.

**Q. You believe that number to be approximately accurate?**

A. I think that's right.

**Q. I don't trust the New York Times, but you have a pass. And now 2021 may or may not have been affected by COVID in terms of patients presenting and wanting surgery. Has there been a clear trend in numbers of**

Page 208

**involved as a result of gender affirming surgeries performed by your clinic in the last year?**

A. So do I know some of the financial elements?

**Q. Correct.**

A. So I do know some of the financial elements, but nothing that the hospital would allow me to share.

**Q. Your counsel can designate it as confidential later on, so it doesn't become public, but you are obliged to answer the question.**

ATTORNEY BLOCK: I'm not ---.

BY ATTORNEY BROOKS:

**Q. I'm entitled to understand your financial interest in the area of your testimony.**

ATTORNEY BLOCK: We are not representing him in the context of any legal dispute with Mount Sinai.

ATTORNEY BROOKS: I am entitled to understand the expert's financial interest. And I suggest to you, Counsel, that you'd rather have me questions asked here where you can designate it as confidential than at trial in a public courtroom.

ATTORNEY BLOCK: It's not up to me.

ATTORNEY BROOKS: You can confer if you want, because that would be the alternative. If you

Page 207

**surgeries performed by your clinic over the last five years?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So there is definitely an increase in the number of surgeries at Mount Sinai over the past five years. Unfortunately, expectation is the challenge. We opened the program in 2016, so roughly those five years. And certainly the first few years were quieter as the reputation grew. In 2020, numbers were down because we had to divert resources to taking care of people with COVID. Our group, including myself, literally dropped what we were doing for a period of time to go become COVID hospital employees, and so there was a dip there in 2021 as a little bit of a rebound element to it.

BY ATTORNEY BROOKS:

**Q. Are you able to give me any average total receipts of your clinic or the hospital as a whole and associated physicians from gender affirming surgeries performed within 2021?**

A. I'm sorry, say that again.

**Q. Let me just ask this again. Do you have any knowledge as the total --- as to the total receipts of your clinic or the wider hospital and physicians**

Page 209

want to step out and confer with your witness, you should do so.

ATTORNEY BLOCK: It's not up to me to say what he can and can't say in contravention with an agreement with his employer, and so I think if you want to like obtain like a Protective Order, you know, with him.

ATTORNEY BROOKS: We have a Protective Order in place, Counsel.

ATTORNEY BLOCK: I know, I'm not representing him in that capacity, though. So if you want to interface with his attorney through Mount Sinai then you can, but I don't have an attorney/client relationship with him for purposes of any employment disputes.

ATTORNEY BROOKS: Are you instructing the witness not to answer?

ATTORNEY BLOCK: No, I'm not.

ATTORNEY BROOKS: Are you refusing to answer?

THE WITNESS: I wouldn't be able to answer without including the hospital lawyers.

BY ATTORNEY BROOKS:

**Q. Can you tell me ---?**

Page 210

1 ATTORNEY TRYON: This is Dave Tryon. I'm  
2 sorry ---.

3 ATTORNEY BROOKS: Go ahead.

4 ATTORNEY TRYON: May I just also say that  
5 I think if the witness is not willing to disclose his  
6 financial interest here, that that would be grounds to  
7 disqualify him as a witness, which on behalf of the  
8 state I would likely pursue. So I would respectfully  
9 request that he answer the question.

10 ATTORNEY BLOCK: Dave, on what basis is  
11 that grounds to --- he has disclosed everything required  
12 by the rules. You're asking for --- he has no financial  
13 interest in this litigation.

14 ATTORNEY BROOKS: We don't need to argue  
15 the motion right now. The motion seems likely, the  
16 motion will be briefed, but we don't --- we got no Judge  
17 here, we're not going to be deciding ---.

18 ATTORNEY BLOCK: If you want to file a  
19 subpoena as a third-party subpoena for that information  
20 with a Court Order, than you're free to do so. He is  
21 appearing here as an expert witness on his expert  
22 testimony. So you have plenty of discovery tools to  
23 obtain that information. And we're not his counsel for  
24 that.

Page 212

1 **receives for patients who are seeking gender affirming  
2 surgery in the clinic?**

3 A. We don't characterize it that way. There's a  
4 --- there's a wide range of reimbursements or lack of  
5 reimbursements across medicine. And gender affirming  
6 care includes quite that entire range actually, from  
7 mental health, which is under reimbursed, to the  
8 surgeries which are --- where there's more money.

9 **Q. I've been waiting to hear the flip side of that.**

10 A. So yes, so we have that, so I don't think I  
11 could give --- I wouldn't --- even were I allowed by the  
12 hospital to give you the specifics, I don't know that I  
13 would be able to do that on a per patient basis.

14 **Q. Can you tell me your total personal income in  
15 2021 from --- in any way related to your work in  
16 connection with your employment at Mount Sinai?**

17 A. So is this something that I'm answering?

18 ATTORNEY BLOCK: I'm sorry, could you  
19 restate the question?

20 THE WITNESS: He's asking for my ---  
21 you're asking for my salary?

22 BY ATTORNEY BROOKS:

23 **Q. I'm asking for your total income, in any way  
24 --- in 2021 in any way associated with the clinic at**

Page 211

1 ATTORNEY BROOKS: I do have discovery  
2 tools, including asking him questions at this  
3 deposition. I've attempted to do so. You have not  
4 instructed him not to answer. The witness has refused  
5 to answer. The record is clear.

6 BY ATTORNEY BROOKS:

7 **Q. Let me ask you about personally. Does your own  
8 income or any bonus you receive depend on any part of  
9 the overall revenues of your plan?**

10 A. It does not.

11 **Q. And does your personal income consist strictly  
12 of a salary or also a salary plus fees associated with  
13 surgeries performed?**

14 A. Exclusively a salary.

15 **Q. And your income depends in no way on how many  
16 surgeries, you yourself perform?**

17 A. That --- well, I don't perform surgeries I'm not  
18 an endocrinologist.

19 **Q. Pardon me.**

20 A. But that's right, it's not revenue based.

21 **Q. It's not revenue based in any way?**

22 A. In any way. That's right.

23 **Q. That is helpful. Do you have any understanding  
24 as to the average revenues per patient that your clinic**

Page 213

1 **Mount Sinai?**

2 A. So we're running into --- so I'm simply on  
3 salary, but the specifics of that are also something  
4 where I would need to include the Mount Sinai lawyers,  
5 because that's part of their practice, and I would have  
6 to defer to them.

7 **Q. You decline to answer the question about your  
8 own personal income?**

9 A. Yes.

10 ATTORNEY BROOKS: I won't take time to  
11 speak upon it, but I will object.

12 BY ATTORNEY BROOKS:

13 **Q. I read in some document that your spouse is an  
14 employee of Parexel --- if I'm pronouncing that company  
15 correctly.**

16 **Is that still the case?**

17 A. Yes.

18 **Q. And does that company derive any revenues from  
19 the sales, testing, clinical trials of any  
20 pharmaceutical that is used to suppress puberty or is  
21 used as a cross sex hormone?**

22 A. I don't know the answer. Parexel is a very  
23 large back office organization supporting clinical  
24 research with many clients. And so you can envision

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p style="text-align: right;">Page 214</p> <p>1 some connection buried in there, but I don't know</p> <p>2 specifics.</p> <p>3 <b>Q. Fair enough.</b></p> <p>4 ATTORNEY BROOKS: Let me have 54.</p> <p>5 BY ATTORNEY BROOKS:</p> <p>6 <b>Q. Let me ask you to turn to paragraph 18 in your</b></p> <p>7 <b>expert report, and there in the first sentence you write</b></p> <p>8 <b>although the detailed mechanisms are unknown, there is a</b></p> <p>9 <b>medical consensus that there is a significant biologic</b></p> <p>10 <b>component underlying gender identity, closed quote.</b></p> <p>11 <b>Do you see that?</b></p> <p>12 A. No, I might have pulled the wrong thing out.</p> <p>13 Which ---?</p> <p>14 <b>Q. It's the expert report not the rebuttal?</b></p> <p>15 A. Expert report. And it's which paragraph?</p> <p>16 <b>Q. Paragraph 18?</b></p> <p>17 A. Oh, sorry.</p> <p>18 <b>Q. This is why lawyers number their paragraphs.</b></p> <p>19 A. That is wise. All right. Paragraph 18.</p> <p>20 <b>Q. I'm just calling your attention --- and I have</b></p> <p>21 <b>read into the record the first sentence of that</b></p> <p>22 <b>paragraph.</b></p> <p>23 A. I see it.</p> <p>24 <b>Q. And picking up on our earlier discussion about</b></p>                                                                                                                                                                       | <p style="text-align: right;">Page 216</p> <p>1 THE WITNESS: So both of the papers</p> <p>2 reference reviews with larger bibliographies that</p> <p>3 reference yet other papers that support the statement.</p> <p>4 And when we're talking about what's informing the</p> <p>5 statement, of course, is not limited to the specific</p> <p>6 papers referenced, so that's part of the reason why I</p> <p>7 gave that example, for example, the endocrine society's</p> <p>8 formal statements on the project, which is a consensus</p> <p>9 view of more people than myself, of course.</p> <p>10 ATTORNEY BROOKS: Let me mark as</p> <p>11 Exhibit 16, an article by Aruna Saraswat and others</p> <p>12 entitled Evidence Supporting the Biological Nature of</p> <p>13 Gender Identity from 2015 of which Dr. Safer is one of</p> <p>14 the co-authors.</p> <p>15 ATTORNEY WILKINSON: Tab 54.</p> <p>16 ---</p> <p>17 (Whereupon, Exhibit 16, Aruna Saraswat</p> <p>18 Article, was marked for identification.)</p> <p>19 ---</p> <p>20 BY ATTORNEY BROOKS:</p> <p>21 <b>Q. And Dr. Safer, is that a paper that you --- I</b></p> <p>22 <b>guess I see by placement --- had supervisory</b></p> <p>23 <b>responsibility for?</b></p> <p>24 A. Yes.</p>                                                                                                |
| <p style="text-align: right;">Page 215</p> <p>1 <b>consensus. When you say there is a medical consensus,</b></p> <p>2 <b>do you mean that all experts in the field agree or do</b></p> <p>3 <b>you mean that in your view this is a majority opinion?</b></p> <p>4 ATTORNEY BLOCK: Objection to form.</p> <p>5 THE WITNESS: So when I guess similar to</p> <p>6 when we talked about guidelines if the question is, is</p> <p>7 there unanimity, then there is never unanimity, so there</p> <p>8 you go.</p> <p>9 BY ATTORNEY BROOKS:</p> <p>10 <b>Q. Okay.</b></p> <p>11 A. I can be a little stronger, though, because the</p> <p>12 mainstream medical organizations have various statements</p> <p>13 in this space. So for example, the endocrine society,</p> <p>14 which is the largest international organization of</p> <p>15 endocrinologists does actually have a statement where</p> <p>16 the sum of the modeling for gender affirming care is</p> <p>17 prefaced with statements that support this.</p> <p>18 <b>Q. In providing the basis for your opinion that</b></p> <p>19 <b>there is such a consensus, you cite only two papers and</b></p> <p>20 <b>those only papers that you had written yourself.</b></p> <p>21 <b>Did you consider those papers written by</b></p> <p>22 <b>yourself to adequately document the existence of the</b></p> <p>23 <b>medical consensus?</b></p> <p>24 ATTORNEY BLOCK: Objection to form.</p> | <p style="text-align: right;">Page 217</p> <p>1 <b>Q. Let me --- I learned something in this</b></p> <p>2 <b>deposition, so that is good.</b></p> <p>3 <b>Let me call your attention to page two and</b></p> <p>4 <b>column two, and in the very bottom paragraph ---.</b></p> <p>5 ATTORNEY BLOCK: I'm sorry, did you mean</p> <p>6 200?</p> <p>7 ATTORNEY BROOKS: I did mean 200. I</p> <p>8 apologize. That is also the second page.</p> <p>9 BY ATTORNEY BROOKS:</p> <p>10 <b>Q. In the bottom --- first column bottom paragraph</b></p> <p>11 <b>it states, quote, however it is important to note that</b></p> <p>12 <b>most transgender individuals develop a gender identity</b></p> <p>13 <b>that cannot be explained by atypical sexual</b></p> <p>14 <b>differentiation, closed quote.</b></p> <p>15 A. So this is column two.</p> <p>16 <b>Q. Column one. If I misspoke I apologize.</b></p> <p>17 A. I could have misunderstood at this hour.</p> <p>18 <b>Q. At the bottom paragraph?</b></p> <p>19 A. However it is important to note, I'm there, yes.</p> <p>20 <b>Q. All right.</b></p> <p>21 <b>Can you explain to me what is meant by the</b></p> <p>22 <b>statement that most transgender individuals have a</b></p> <p>23 <b>gender identity that cannot be explained by atypical</b></p> <p>24 <b>transgender differentiation?</b></p> |

1 A. So that is referencing, in this context at the  
2 time that this was written, the anatomy, genitals,  
3 reproductive structures.

4 **Q. And let me just --- for purposes of terminology,**  
5 **you said at the time this was written. This is about**  
6 **seven years ago, six years ago?**

7 A. 2015, yes.

8 **Q. And if you look at the page one, column one**  
9 **abstract. This paper is using the term disorders, in**  
10 **sexual development, and that DSD.**

11 **Do you see that?**

12 A. I do.

13 **Q. That was a term that you were comfortable with**  
14 **most recently?**

15 A. It was a terminology that I was using that  
16 recently, yes.

17 **Q. The point here, on page 200, column one, that we**  
18 **were just looking at is, in fact, most transgender**  
19 **individuals do not suffer from any identifiable DSD.**

20 **Is that what this is saying?**

21 A. From a physically identifiable DSD, that is what  
22 this is saying, yes.

23 **Q. Physically, genetically, hormonally,**  
24 **identifiable by any physical measurement.**

1 **Correct?**

2 ATTORNEY BLOCK: Objection to form.

3 THE WITNESS: So you have to be careful  
4 to be not too broad, and part of the reason is the line  
5 there is actually blurring. So when I'm sitting here  
6 and talking in 2022 I recognize that there is a  
7 potential for some blurring in that line. But in 2015  
8 it was certainly understood to be how you're saying it.  
9 BY ATTORNEY BROOKS:

10 **Q. Well, it remains true today, does it not, that**  
11 **the overwhelming majority of transgender individuals do**  
12 **not suffer from any identifiable atypicality**  
13 **genetically, physically or hormonally.**

14 **Correct?**

15 A. Well, that's not how I would say it, because  
16 gender identity is a biological phenomenon and so one  
17 would predict that as we identify certain correlates or  
18 even explanations, than we will have things in that  
19 space. But if we're talking about how things were  
20 defined in 2015, being transgender was defined as  
21 somebody where their gender identity was not aligned  
22 with the rest of their biology, and there was no  
23 apparent, physical variation either in terms of their  
24 anatomy or their chromosomes in terms of their genitals,

1 in terms of their reproductive anatomy or in terms of  
2 their chromosomes. So that is how it was defined at the  
3 time.

4 **Q. Well, today, and using identifiable to mean you,**  
5 **Doctor safer, are able to identify it now, not**  
6 **hypothetically in the future, it remains true that the**  
7 **overwhelming majority of transgender individuals do not**  
8 **suffer from any current identifiable, physical**  
9 **chromosomal or hormonal irregularity.**

10 **Correct?**

11 A. I would say that right now in 2022, it would be  
12 true to say that a transgender person does not have an  
13 identifiable genital difference almost by definition or  
14 a --- or an internal reproductive organ difference  
15 almost by definition. Chromosomal I can't say, because  
16 we actually don't check. And hormonal gets even grayer  
17 than that, because it could be the case that there are  
18 hormonal exposures, for example, in utero that explain  
19 at, least some people as being transgender.

20 **Q. As you sit here today, you don't know of any**  
21 **chromosomal test that can identify an individual as**  
22 **transgender, do you?**

23 A. Is there a --- there --- as I sit here today  
24 there are no tests to identify somebody who is

1 transgender.

2 **Q. And that includes genetic tests?**

3 A. There's no scan and there are no blood tests and  
4 there are no genetic tests.

5 **Q. And no hormonal tests?**

6 A. That's right. There are no hormonal tests right  
7 now to identify a transgender person.

8 **Q. As you sit here today and based on your whole**  
9 **knowledge of the field, there is no biological test from**  
10 **some mental professionals, as they can do, but there is**  
11 **no biological test that will tell you in advance which**  
12 **prepubertal child who is suffering from gender dysphoria**  
13 **would persist and which would desist as they enter**  
14 **adolescence?**

15 A. So I would have to challenge how you're stating  
16 that a little bit just so that we are cleaner in terms  
17 of how we think. So we're thinking right now in terms  
18 of identifying kids who are transgender. We use various  
19 terminologies, so that --- we've have been using the  
20 term gender dysphoria we're going to be shifting to more  
21 gender incongruence, but we're trying to identify people  
22 who are transgender and who may require intervention  
23 later.

24 Recognizing further that only a subset of

1 transgender people would require a medical or surgical  
2 intervention. And so if the question is can --- is  
3 there a test now in 2022 to determine in an prepubescent  
4 kid who says they're transgender or people who suspect  
5 may be transgender on whatever they're saying, no, there  
6 is no test to know that is true or not and to know if  
7 they'll think that later or not, and to know if they'll  
8 want treatment or not.

9 **Q. So it is your opinion that there is consensus**  
10 **that there is a biological basis for transgender**  
11 **identification, but as of 2022 you don't know with any**  
12 **confidence what that biological basis is.**

13 **Correct?**

14 ATTORNEY BLOCK: Objection to form.

15 THE WITNESS: I would say that it is  
16 complicated and there may even be more --- there might  
17 be multiple explanations for people being transgender.  
18 We see that with other biological entities like  
19 diabetes, for example. So the idea that we don't know  
20 what it is, is also a little too narrow.

21 BY ATTORNEY BROOKS:

22 **Q. You don't know any one identifiable biological**  
23 **cause with any confidence that state within a scientific**  
24 **knowledge?**

1 A. No. That's not quite true. We know that ---  
2 and it's not even the biology of being transgender even  
3 though that is how I just framed it. It is even one  
4 step back which is the biology of gender identity. We  
5 all have gender identity, and how is that determined and  
6 what is that biology. And we know there --- and we know  
7 then that some transgender people have that particular  
8 biology not aligned with some of their other biology.

9 So going back to what you just asked, that we  
10 don't know any mechanisms is not quite true. That is  
11 people that looks to be true that exposure to androgen,  
12 male hormones in utero can have some influence on some  
13 people as to their identity.

14 **Q. Well, if there is not yet any test that is**  
15 **predictive of gender identity in a prepubescent child,**  
16 **then as a matter of science it follows that you don't**  
17 **actually know any causal relationship, any biological**  
18 **basis, is that not true?**

19 A. No, that wouldn't be quite sure. We can't test  
20 for somebody deemed transgender, and we can't test  
21 gender identity with a test. But like I said, that at  
22 least in some circumstances the androgen exposure in  
23 utero, in a mother's womb, could be part of the  
24 explanation for some people. Maybe isn't all the

1 explanation for some people.

2 **Q. It could be, but no science has been done to**  
3 **prove that that is a fact, has it?**

4 A. So it isn't really a hypothetical, that is we do  
5 have --- we do have data that support it, but it doesn't  
6 lead us to a test.

7 **Q. If it is not testable, then it is a hypothesis,**  
8 **not a fact, isn't it, not of science.**

9 **Correct?**

10 ATTORNEY BLOCK: Objection to form.

11 THE WITNESS: No, that is using testing  
12 two different ways. So in a scientific study, then a  
13 hypothesis is something that you have based on a certain  
14 --- based on certain data, but then you test to see how  
15 true it might be. But when I was using the word test,  
16 I'm talking about like a blood test or something that we  
17 could actually do on a given individual to know their  
18 circumstance with regard to their gender identity.

19 BY ATTORNEY BROOKS:

20 **Q. Let me ask you to look at the paper that I've**  
21 **marked as Exhibit 16, Evidence Supporting the Biological**  
22 **Nature. Is that that which you have in front of you?**

23 A. I do, yes.

24 **Q. And on the first page you refer under the result**

1 **that begins by discussion of a seminal study by**  
2 **Meyer-Bahlburg. Do you see that? Second column,**  
3 **beginning of the results section.**

4 A. Yes.

5 **Q. And is it your contention that the**  
6 **Meyer-Bahlburg study provides evidence of a biological**  
7 **basis for transgender identification?**

8 A. What the Meyer-Bahlburg study does is it  
9 provides evidence of a biological basis for gender  
10 identity.

11 **Q. Well, specifically the study, the Meyer-Bahlburg**  
12 **study --- let me have that so we are not shooting in the**  
13 **dark. Exhibit 17 is a paper from 2005 from Professor**  
14 **Heino Meyer-Bahlburg, entitled Gender Identity Outcome**  
15 **in Female Raised 46, comma XY persons with penile**  
16 **agenesis, and it continues. It's a long document?**

17 ATTORNEY WILKINSON: Tab 14.

18 ---

19 (Whereupon, Exhibit 17, 2005 Paper by  
20 Professor Heino Meyer-Bahlburg, was marked  
21 for identification.)

22 ---

23 BY ATTORNEY BROOKS:

24 **Q. I believe the level of questions that I will be**

1 asking, however, are the ones that you will know off the  
2 top of your head given the importance of this study in  
3 the field. The study concerned exclusively children who  
4 are born with what's referred to as a 46 XY condition.

5 Right?

6 A. Yes.

7 Q. And that is long recognized as a DSD?

8 A. No, 46 XY is the classic male chromosome  
9 pattern.

10 Q. Yes. Pardon me. So these are individuals with  
11 typical male pattern chromosomes?

12 A. Yes.

13 Q. Who, however, for some reason have had a  
14 developmental disorder or defect affecting their  
15 genitals?

16 A. Who have had some sort of alteration or  
17 development of their genitals, exactly.

18 Q. And the study concerns the results of efforts to  
19 raise such genetically male children as female in some  
20 cases after surgical procedures to feminize them and in  
21 some cases absent surgical procedures.

22 Correct?

23 A. The study really relates to the gender identity  
24 of those where there is an attempt to raise them as

1 can be summarized as follows. One, the majority of 46  
2 XY individuals with presumably normal male prenatal  
3 hormonal milieu, comma, non-hormonal anatomic  
4 abnormalities of the genitals, comma, and female gender  
5 assignment at birth or in early childhood have not  
6 changed gender to male. Do you see that?

7 A. I do see it.

8 Q. And one thing, and I understand the  
9 qualifications that you've just described this is not  
10 recording a carefully structured study performed by  
11 Doctor Meyer-Bahlburg but rather a review of case  
12 histories.

13 Right?

14 A. Exactly.

15 Q. But his conclusion from his review of those is  
16 that the majority of genetically presumably normal male  
17 individuals who were raised female, and I believe it's  
18 fair to summarize in most cases after feminizing genital  
19 surgery, adhered to a female gender identity at least to  
20 the data we have?

21 A. Yes, so I don't know whether they actually all  
22 had surgery or not.

23 Q. They did not all have surgery.

24 A. Right or even the larger number. I don't know.

1 females.

2 Q. And the results, if I understand the study, were  
3 mixed, that is that some of the individuals who were  
4 raised as females nevertheless came to identify as male  
5 and some of the individuals who were raised as females  
6 came --- persisted in identifying as female.

7 Correct?

8 A. It is not actually as clean as you're saying it.  
9 So we should look at some of the specifics and we might  
10 need to point out to specific sentences, but this too is  
11 a survey of --- a survey of studies, to be clear, it's  
12 not its own isolated study, and then there --- in none  
13 of these studies were they systematic or, you know, I  
14 guess I will just use the word systematic in  
15 ascertaining that all of the people who were being  
16 raised female and ascertaining all of the gender  
17 identity of those people. But what they are really  
18 observing is that the numbers that they mention of the  
19 people who they were trying to raise female who had male  
20 gender identity were whatever the numbers were. I don't  
21 know if that makes sense, but you'll follow as  
22 necessary.

23 Q. If you turn to page 432 it begins under the  
24 heading discussion. It begins, quote, the main findings

1 I would have to go through.

2 Q. Fair enough.

3 A. But the --- and it was his opinion at the time  
4 he was writing this that the majority who were reared  
5 female were living as female, although we don't know  
6 their gender --- but now this is me stepping out, saying  
7 we don't know their gender identity, nobody asked. The  
8 reason why this paper is interesting is even in the  
9 circumstance where they were being so passive in how  
10 they were collecting the data, such a large fraction of  
11 these individuals were so clear in their male gender  
12 identity that they actually identified themselves  
13 against the protocols.

14 Q. And that seemed to be evidence that --- of a  
15 biologic basis of gender identity congruent with their  
16 male genetics.

17 Correct?

18 A. That --- for these people, that's right. That  
19 is with or --- with their chromosomes.

20 Q. Right.

21 A. Which you would predict. If we think about ---  
22 if we recognize --- if we think that by survey a half a  
23 percent or even a full percent of people are transgender  
24 that would mean that 99 percent of people are cisgender.

And so if you take a population of people with certain chromosomes, 99 percent of them are going to be cisgender and will have a gender identity incongruent with their chromosomes.

**Q. The study includes no individuals who were raised with a gender identity inconsistent with their male chromosomes who came to identify or later perceived themselves as identifying as female.**

**Correct?**

A. Well, we don't know that because they were --- they're all XY individuals who were being raised female. And somebody who had a female gender identity who is transgender among them would never be identified as transgender in this case.

**Q. So my question was a little more specific. The study simply doesn't include any individual who had male chromosomes who was raised male who came to identify as female?**

A. That's correct. All of these people who are XY chromosome people raised female.

**Q. And you would agree with me, would you not, the study provides some evidence that external forces such as feminizing surgery or how their parents treat the child can have some influence on the formation of gender**

**identity?**

A. I can't say that because the study really doesn't go there. The study is only passive observation and all --- the only thing I would say with some confidence is that some fraction of these individuals who are so clear in their gender identity that despite nobody even looking for that sort of thing, because that wasn't even a consideration when these --- when these cases occurred, they --- the individuals spontaneously announced to the authorities around them, parents and doctors, that they were wrong, that the parents and doctors were wrong.

**Q. And that, in your view, provides at least some evidence of a genetic basis for gender identity congruent with chromosomal sex?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: No. It provides some evidence of a biological basis for gender identity that can't be manipulated externally.

BY ATTORNEY BROOKS:

**Q. Well, considering that the study included no examples of any individual who adopted a transgender identity inconsistent with how they were raised, the study simply can't provide any information about**

**biologic basis of transgender identification, can it?**

A. Wait. I think say that again.

**Q. The study includes no individuals who adopted a gender identity, a transgender identity apart from social transition and, therefore, can provide no information one way or the other about whether there is or is not a biologic basis for transgender identification?**

A. So not quite. So the --- because remember the point is that gender identity, period, universally, has a biological basis. It's not that we --- and to be clear, I don't even know that we won't find and some people even wonder if we will find a gene that associates a gene with transgender, per se. But I'm not even saying that. If there's --- I'm only saying that we will find let's say genes associated with gender identity and not everybody will have them aligned with the rest of their biology. So I just want to preface with that.

And in this particular review, they're taking people who have XY chromosomes exclusively. So therefore, if one --- if a certain fraction of them were to have female gender identity despite assuming different development they would have had male --- they

would have had other male biology, those are the people we would have categorized as transgender using current definitions. And those individuals would not have been apparent in this study they were being raised female anyway.

**Q. And my point was that, therefore, that this study can't provide any information about whether there is or isn't a biological basis for transgender identification?**

A. So yes. I guess how you are framing that is where I'm pushing back. So the point of this study is as evidence of there being a biological basis of gender identity period, having nothing --- not necessarily for being transgender. In fact, I don't even know if there --- yeah, I don't even know if that would be the model. The model would be somebody who has a certain gender identity, a certain other biology, and then that combination is what we are calling transgender.

**Q. You also referenced a paper by Doctor Reiner. And let me have that.**

ATTORNEY BROOKS: And I will mark that as Exhibit 18, 2004 Discordant Sexual in Some Genetic Males With Cloacal Exstrophy Assigned to Female Sex at Birth.

ATTORNEY WILKINSON: Tab 71.

1 ---  
2 (Whereupon, Exhibit 18, Paper by Doctor  
3 Reiner, was marked for identification.)  
4 ---

5 BY ATTORNEY BROOKS:

6 **Q. And Dr. Safer, you are well familiar with this**  
7 **paper.**

8 **Am I correct?**

9 A. I am, yes.

10 **Q. And this is the only other paper that you cite**  
11 **for the assertion that gender identity has a biological**  
12 **basis.**

13 **Am I correct?**

14 A. No, there are a range of categories of papers,  
15 but these are two of my favorite papers in the first  
16 category, which is the category of attempting to  
17 manipulate gender identity externally.

18 **Q. Dr. Bahlburg in his paper, on page 433 of**  
19 **Exhibit 14, in column one ---.**

20 A. Yes. Let me get there.

21 **Q. Yes. 433, column one.**

22 A. 433, column one.

23 **Q. He says about two inches off the bottom,**  
24 **referring to the Reiner and Gearhart paper of 2004,**

1 A. No.

2 **Q. So let's summarize this study if I may. I'm**  
3 **turning to page 334.**

4 A. And extending that too, part of his frustration  
5 wouldn't be my frustration because I am not looking for  
6 those particular endpoints, that is for my purposes for  
7 determining whether gender identity is a biological  
8 basis Reiner and Gearhart's paper is actually quite  
9 strong.

10 **Q. Let's look at the first page in the summary up**  
11 **front. It refers to this paper dealt with 16 --- under**  
12 **methods, 16 genetic males.**

13 **Correct?**

14 A. Yes.

15 **Q. And these were all males who suffered from ---**  
16 **uses the word in the second line of the background as**  
17 **severe developmental disorders affecting their genitals.**

18 **Correct?**

19 A. That's how it is phrased here. Where am I  
20 seeing that?

21 **Q. The second line of the background says severe.**

22 A. Severe phallic inadequacy, yes, I see that.

23 **Q. Which is to say not --- absent or severely**  
24 **disformed penis?**

1 **which I believe is this paper, he says, quote, it has**  
2 **serious methodological flaws. Do you agree with that**  
3 **statement?**

4 A. Let's read what he is criticizing. All these  
5 papers have their weaknesses. All right. So the  
6 remainder of that --- so the remainder of the paragraph  
7 is --- details the complaints for Doctor Meyer-Bahlburg,  
8 where his --- which I focus as a social science  
9 researcher that they didn't do various assessments that  
10 would make it --- that would make standard people doing  
11 some of this research able to replicate some of the  
12 items in the paper. And I will --- so while Doctor  
13 Meyer-Bahlburg may be frustrated and be complaining  
14 about that, he is not actually attacking the veracity of  
15 their results.

16 **Q. Well, the point was serious methodological flaws**  
17 **is you are not really able to evaluate the veracity of**  
18 **the results.**

19 **Correct?**

20 A. Not necessarily.

21 **Q. Do you agree with Doctor Meyer-Bahlburg's**  
22 **evaluation that the methodology of the study reported by**  
23 **Reiner and Gearhart suffers from serious methodological**  
24 **flaws?**

1 A. That's what that means, yes.

2 **Q. Okay.**

3 **But these are individuals who are genetically**  
4 **male, and more than that, on page 334, column two,**  
5 **two-thirds of the way down it says the testes were**  
6 **histologically normal in all 14 when examined?**

7 A. I'm on column two.

8 **Q. It is column two.**

9 A. I apologize.

10 **Q. You can kind of see where my finger is pointing**  
11 **here.**

12 A. And this is under ---.

13 **Q. Under methods and the paragraph that begins**  
14 **parents to be educated?**

15 A. Testes were histologically normal in all 14.  
16 I'm there, yes.

17 **Q. So we had individuals who were genetically male**  
18 **that had normal testes and had severe deprivation of**  
19 **their penis or it was absent?**

20 A. Yes.

21 **Q. And what was done to these 14 subjects, looking**  
22 **just above that, is that they were assigned a female sex**  
23 **surgically by means of orchiectomy and construction of**  
24 **vulva.**

1 **Right?**

2 A. Yes.

3 **Q. And orchiectomy is another medical term for what**  
4 **the layman thinks of as castration?**

5 A. As removing the testes.

6 **Q. And construction of the vulvi is creating a ---**  
7 **I'm not sure what the right term is, a pseudo vagina?**

8 A. It wouldn't be a pseudo vagina, but creating a  
9 vagina.

10 **Q. It says that --- just immediately following the**  
11 **description of the surgery 14 of these 16 --- looking**  
12 **back at the results paragraph and the abstract, 14 of**  
13 **these 16 were assigned female but later declared**  
14 **themselves male despite the surgery, despite being**  
15 **raised as female.**

16 **Right?**

17 A. Right, 8 of the 14 who were assigned female.

18 **Q. I'm sorry, I misread that. Thank you. Eight of**  
19 **the 14 who were assigned female nevertheless declared**  
20 **themselves male at some stage?**

21 A. That's correct.

22 **Q. And the two who had been raised as males, even**  
23 **though they suffered the same type of phallic**  
24 **developmental defect, remained identifying as males.**

1 **Correct?**

2 A. Yes.

3 **Q. There was an --- whatever assignment was made,**  
4 **this was made to infants. It wasn't made or based on**  
5 **any choice or reported sense on the part of the child?**

6 A. That's exactly right, yes.

7 **Q. So several of these individuals, specifically**  
8 **six, who were assigned female at least throughout the**  
9 **period identified by this study adhered to a female ---**  
10 **living out the female gender identity?**

11 A. Actually it was five because one of the children  
12 refused to have contact with the surgeons when some of  
13 these conversations began to take place.

14 **Q. So we know that five --- we don't know what that**  
15 **person was thinking, feeling or identifying --- but we**  
16 **know that five ---?**

17 A. They were angry.

18 **Q. They were angry. Whichever that came out, I'd**  
19 **be angry, so ---**

20 A. Yes.

21 **Q. --- so 5 of the 14 subjects who were assigned**  
22 **female and surgically transitioned and socially**  
23 **transitioned continued to at least physically identify**  
24 **as female?**

1 A. As of when they wrote the paper they were still  
2 identifying as female as far as I remember. That's  
3 right.

4 **Q. And it would be your position that visibly**  
5 **identifying as female doesn't necessarily mean that they**  
6 **were generally transgender?**

7 A. That --- we don't know that because that wasn't  
8 asked.

9 **Q. Is it your view that if you had these children**  
10 **who were surgically transitioned, socially transitioned**  
11 **visibly identifying as female, that if you had simply**  
12 **asked them you would have found out the undoubted truth**  
13 **about their gender identity?**

14 ATTORNEY BLOCK: Objection to form.

15 THE WITNESS: So it is true that as  
16 people develop and assuming that there are good language  
17 skills and that there aren't other developmental, mental  
18 developmental reasons or other mental health reasons why  
19 people would not be clear, that people are able to  
20 articulate their gender identity. Certainly adults do  
21 so apparently quite reliably and older teenagers the  
22 same, so depending on age. But yes, there would be a  
23 point in time when you could simply ascertain that by  
24 asking.

1 BY ATTORNEY BROOKS:

2 **Q. Dr. Safer is that fundamentally a medical**  
3 **question or a psychology/mental health question? The**  
4 **question of the reliability of a patient's self report?**

5 A. I don't know that I separate it that way. I say  
6 that based on the data we slowly develop overtime of  
7 transgender people where we see that any absence of  
8 other confounding items along the lines that I said,  
9 people at a certain stage in maturity who tell you a  
10 certain thing about their gender identity are consistent  
11 in that regard.

12 **Q. This study, the Reiner Gearhart study,**  
13 **Exhibit 18, concerns --- looks at the effect of trying**  
14 **to raise individuals in a gender identity discordant**  
15 **with their chromosomal sex.**

16 **Correct?**

17 A. It is discorded with quite a number of things,  
18 but yes, chromosomal is one of your hard data points.

19 **Q. This study does not look at the question about**  
20 **whether and when or how any sort of intervention might**  
21 **encourage development of a gender identity consistent**  
22 **with one's genetics sex; does it? It simply does not**  
23 **look at this issue?**

24 A. Say that again, sorry.

**Q. This study does not address the question of whether or how or at what developmental stage therapeutic interventions might encourage the development of a gender identity consistent with one's chromosomal sex?**

A. The study is --- the way I'm interpreting the study is it's looking at our inability to manipulate gender identity. And it's just that. And I'm a little fuzzy on the rest of what you're asking me.

**Q. Well, the study looks at efforts to manipulate gender identity away from chromosomal from the identity normally associated with one's chromosomal sex. In this case the male sex.**

**Right?**

A. It does.

**Q. This study simply does not look at efforts to manipulate gender identity towards alignment with the identity normally associated with a subject's chromosomal sex?**

A. I think I'm following you now. So you're suggesting that if we took a transgender person and tried to manipulate their gender identity to align with some of the rest of their biology?

**Q. I'm not suggesting that I'm simply saying this**

**study.**

A. That particular instance. Yes.

ATTORNEY BROOKS: 15. It is one of the previous marked ones, if that matters. All right.

I will not show you that document. Let me ask the court reporter how many --- how much time we have left on the clock.

COURT REPORTER: I have 5:52, five hours and 52 minutes.

ATTORNEY TRYON: I didn't hear that. Could you repeat that?

ATTORNEY BROOKS: We've got an hour and eight minutes according to the clock of the court reporter here, and I believe that our friend in the ether is calculating separately.

VIDEOGRAPHER: Correct. And it sounds like the same. I have to do the math.

ATTORNEY BROOKS: Okay.  
BY ATTORNEY TRYON:

**Q. Are you familiar Dr. Safer with a paper recently published by Lisa Littman of Brown University looking at the surveying 100 teens or young adults --- actually surveying a hundred individuals who report having de-transitioned and gone from identifying as transgender**

**to identifying in a manner consistent with their genetic sex?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So I'm aware of Dr. Littman having written a second paper. But I'm not facile, I guess.

BY ATTORNEY BROOKS:

**Q. You haven't read that paper?**

A. I have not read the paper. I probably did read it, but I would not be able to be quizzed on it.

**Q. Then I won't quiz you on it. I always tell witnesses I don't know is the easiest way out of a line of questioning.**

**Are you --- let me ask you this, does your clinic have any procedure in place to track outcomes on patients on whom you perform gender conforming surgery long term?**

A. We're actually in the --- we have a couple of processes, so I guess the short answers are yes and we're going to be more rigorous going forward.

**Q. Do you have any knowledge as to how many patients on whom your clinic has performed surgery have after that surgery committed suicide?**

A. I don't off the top of my head know that.

**Q. Do you believe that your clinic possesses reasonably complete information on that question?**

A. I actually don't think our information is sufficiently complete currently, and that actually is an area where we're going to develop more vigorously, because I would actually like to know that.

**Q. Do you know whether any patients on whom your clinic has performed surgery has subsequently sought to de-transition and take on or revert to, whichever way you want to see it, a gender identity that's aligned with their chromosomal sex?**

A. So it's a complicated question. And actually I just want to go back to the first part where you were talking about suicide.

To be clear, the rigor I'm talking about is not suicide focused, because I actually am not anticipating that that is --- that that is happening or is happening more than with being seen in a general population, but for all encompassing that we do definitely need that.

But back to your current question ---.

**Q. Let me jump back to suicide for a moment. Are you aware of studies coming out of DeVry University and Amsterdam suggesting that post-surgical transgender populations continues to experience elevated rates of**

Page 246

1 **complete suicides compared to controlled populations?**

2 ATTORNEY BLOCK: Objection to form.

3 THE WITNESS: So I'm aware that  
4 transgender people have more mental health morbidity  
5 than other populations. Once corrections are made for  
6 other confounding factors I don't know that we would  
7 have --- that we're very clear yet on those data  
8 including ---.

9 BY ATTORNEY BROOKS:

10 **Q. When I refer to a published study coming out of**  
11 **DeVry University of Amsterdam showing high rates of**  
12 **suicidality in postsurgical transgender patients, you**  
13 **believe you're familiar with that literature?**

14 A. I guess it would fall in the same category as  
15 Littman's second paper.

16 **Q. Okay.**

17 A. Where I'm familiar with the fact that they're  
18 doing surveys and I'm familiar with the broad outlines,  
19 but could not ---

20 **Q. Okay.**

21 A. --- comment on specific studies without it being  
22 in front of me.

23 **Q. And have any patients on whom your clinic has**  
24 **performed surgery subsequently decided to de-transition**

Page 248

1 **have to stop, even though I have so many more**  
2 **interesting questions.**

3 ATTORNEY BROOKS: So Dave, I will stop  
4 and I will turn the witness over to you.

5 ATTORNEY BLOCK: Could we take a break  
6 now?

7 ATTORNEY BROOKS: Of course, it is a good  
8 time for sure.

9 ATTORNEY BLOCK: Thanks. Can we go off  
10 the record?

11 VIDEOGRAPHER: The time is 5:03 p.m.  
12 Eastern Standard Time.

13 OFF VIDEOTAPE

14 ---

15 (WHEREUPON, A SHORT BREAK WAS TAKEN.)

16 ---

17 ON VIDEOTAPE

18 VIDEOGRAPHER: We are back on the record.  
19 The current time reads 5:25 p.m. Eastern standard Time.

20 ATTORNEY BLOCK: This is Josh Block on  
21 behalf of the Plaintiff. We have conferred off the  
22 record, including with counsel from Mount Sinai, and  
23 Doctor Safer can answer the two questions he declined to  
24 answer before provided that we mark those portions of

Page 247

1 **and assume a gender identity aligned with their**  
2 **chromosomal sex?**

3 A. I don't --- I don't know. There is absolutely  
4 the case that there are people who stop their treatment  
5 at different levels, so it has definitely been my  
6 experience that I have patients who I've put on hormone  
7 treatments who have stopped those hormone treatments.  
8 And there are also, among our patients --- I don't know  
9 if any of the patients where we performed the original  
10 surgery they actually were opting for a different  
11 surgery, but we definitely have patients who have come  
12 to us, who had a surgery done elsewhere who were looking  
13 for a degree basically what you're calling a reversal,  
14 to the degree that that's possible. So that such a  
15 thing does exist. So the point about saying that they  
16 have a different gender identity, that would --- that is  
17 not typically how the patients come saying it. They  
18 don't say, oh, it turns out my gender identity is not  
19 that. It's more often society is not treating me well,  
20 this isn't working out. That's the more --- that's the  
21 --- that's the typical scenario. I mean, yes, we  
22 definitely have seen that circumstance.

23 **Q. Dave Tryon, who is with us remotely as Counsel**  
24 **for West Virginia, I have promised him an hour, so I**

Page 249

1 the deposition transcript confidential, and all counsel  
2 for Defendants have agreed with that.

3 ATTORNEY BROOKS: And this is Roger  
4 Brooks, and yes, I confirm that all counsel for  
5 Defendants have agreed to that.

## EXAMINATION

BY ATTORNEY TRYON:

Q. Hello, Dr. Safer. Thanks for your time today. So I am David Tryon. I represent the State of Virginia. I'm appointed by the Attorney General's Office. And I wanted to start out by looking at --- asking you to take a look at your Rebuttal Report. I don't recall what exhibit number that is. If you could tell us what it is marked?

ATTORNEY WILKINSON: Exhibit 2.

ATTORNEY TRYON: Exhibit 2.

ATTORNEY WILKINSON: Tab 51.

THE WITNESS: I have that in front of me.

BY ATTORNEY TRYON:

**Q. Could you take a look at paragraph six, please? Do you have that in front of you?**

A. Yes.

Q. Great. Now, in here it says in the second or maybe third sentence as reflected in the same source cited by Doctor Brown dimorphous sexual characteristics in men and women are produced by a combination of genes, prenatal androgen exposure to sex hormones. And I'd

1 **like to focus on that particular clause. Can you**  
 2 **explain what prenatal androgen exposure to sex hormones**  
 3 **is?**

4 A. Yes. That references --- I guess to me it's  
 5 more or less exactly what it says, which is that the  
 6 developing fetus is exposed to various hormones and  
 7 other factors and androgen is specifically the male ---  
 8 is typically what we consider to be the male sex  
 9 hormone, although everyone has some. And then prenatal  
 10 just means and in utero or in the mother's womb.

11 **Q. So androgen for males is testosterone.**  
 12 **Is that right?**

13 A. Androgen in general is that category of hormones  
 14 that we think of as typically male, even though, like I  
 15 said, we all have them. And one of the androgens is  
 16 testosterone. And with adults it is the one that we are  
 17 talking about most of the time, of course.

18 **Q. Okay.**

19 **So as I understand it, your suggestion is that**  
 20 **that prenatal exposure to testosterone can have an**  
 21 **impact even after birth.**

22 **Is that right?**

23 ATTORNEY BLOCK: Objection to form.

24 THE WITNESS: So all factors --- well, I

1 genitalia so that all babies born with what --- with a  
 2 penis and with a urethra that is the part for which you  
 3 urinate, that's up inside the penis and having the  
 4 gonads, which would typically be testes in the scrotum,  
 5 all of that happens in response to testosterone.

6 BY ATTORNEY TRYON:

7 **Q. And then that also triggers a question I had.**  
 8 **You had previously said in your original report a**  
 9 **person's genetic makeup and internal and external**  
 10 **reproductive anatomy are not useful indicators of**  
 11 **athletic performance and have not been used in a league**  
 12 **competition for decades.**

13 **My question on that is, when you say a person's**  
 14 **genetic makeup doesn't their genetic makeup trigger**  
 15 **whether or not they are going to --- a person's genetic**  
 16 **makeup will determine whether or not they're a boy or a**  
 17 **girl, and therefore if they're a boy that would trigger**  
 18 **their generation of more testosterone than a girl.**

19 **Is that a fair statement?**

20 ATTORNEY BLOCK: Objection to form.

21 THE WITNESS: Yeah, no, that's --- so I  
 22 think I need to walk that back a little bit. Why don't  
 23 we --- can we do it like piece by piece or have you  
 24 restate parts?

1 don't want to overstate it, but factors that occur to  
 2 which a fetus is exposed in the womb have impact on the  
 3 development of that fetus, of that person when they are  
 4 born, and so androgens, including testosterone, would be  
 5 part of that, so yes.

6 BY ATTORNEY TRYON:

7 **Q. So are you aware of studies addressing the**  
 8 **impact of prenatal exposure to testosterone as it**  
 9 **impacts people after their birth?**

10 ATTORNEY BLOCK: Objection to form.

11 THE WITNESS: I think I need you to be  
 12 specific about which studies.

13 BY ATTORNEY TRYON:

14 **Q. Are you aware of any study that addresses the**  
 15 **effect of prenatal testosterone upon boys after they're**  
 16 **born?**

17 ATTORNEY BLOCK: Objection to form.

18 THE WITNESS: So the ---.

19 BY ATTORNEY TRYON:

20 **Q. Or men?**

21 A. So I can --- I guess --- I have to --- kind of  
 22 two answers. Exposure to prenatal androgens, kind of  
 23 generally because it is not always, testosterone explain  
 24 the development of what we consider to be typically male

1 BY ATTORNEY TRYON:

2 **Q. I will restate it. So when you say a person's**  
 3 **genetic makeup, what does that mean?**

4 A. Mostly in this context I'm referencing their  
 5 chromosomes that's the specific that in the further past  
 6 was actually being used to identify people which we no  
 7 longer do. It's not sufficiently reliable.

8 **Q. Does the --- you have an X Y chromosome that is**  
 9 **typically considered to mean that you're a male.**

10 **Correct?**

11 A. The XY chromosome is typically considered to  
 12 mean that you're a male, correct.

13 **Q. And that would mean that you would be generating**  
 14 **more testosterone than if you have an X chromosome.**

15 **Right?**

16 ATTORNEY BLOCK: Objection to form.

17 THE WITNESS: So the presence alone of  
 18 that XY pattern is insufficient to know with certainty  
 19 that you're producing more testosterone and that is part  
 20 of the point of I'm saying it is that biological sex is  
 21 more complex, and you could have the gene for the testes  
 22 that produce testosterone elsewhere, and then you  
 23 wouldn't have that pattern and you still would be  
 24 producing the testosterone or vice versa.

Page 258

1 BY ATTORNEY TRYON:

2 **Q. Okay.**

3 **Well, let's go back to prenatal testosterone.**  
 4 **So you're not --- if I understood what you're saying**  
 5 **before, you're not aware of any studies that show**  
 6 **whether or not prenatal testosterone would have --- let**  
 7 **me just start that over again.**

8 **Are you aware of any studies that address**  
 9 **whether prenatal testosterone has impact on sporting, on**  
 10 **athletics in children after birth?**

11 A. Correct. That would be right to say that there  
 12 are no studies of which I'm aware that can associate  
 13 prenatal testosterone with athleticism. And I don't  
 14 know what levels we're even talking. Like an adult  
 15 level? What's your question there?

16 **Q. My next question is, have you heard of the**  
 17 **Journal of Sports Science and Medicine?**

18 A. I guess you would have to show it to me.

19 **Q. Okay.**

20 **Have you ever heard the name Jim Goldby or**  
 21 **Jennifer Mays?**

22 A. No.

23 ATTORNEY TRYON: Jake, could you bring up  
 24 the Exhibit that I sent to you today, which is the

Page 260

1 **conclusion on page 449?**

2 A. So can we move the pictures because they're  
 3 blocking.

4 **Q. Can you see it?**

5 A. We're getting there. And then is there a way to  
 6 move that? Oh perfect. Yes.

7 **Q. Okay.**

8 **The conclusion says, current paper provides**  
 9 **initial support from an association between prenatal**  
 10 **testosterone levels and mental toughness, optimism, goal**  
 11 **orientations, coping strategies and hostility, period.**  
 12 **Findings tentatively suggest that the mentioned**  
 13 **psychological characteristics may be partially**  
 14 **biologically predetermined.**

15 **Do you see that?**

16 A. I do see it, yes.

17 **Q. Do you have any reason to believe whether that's**  
 18 **true or not true?**

19 ATTORNEY BLOCK: Objection. I just  
 20 object to asking him about a conclusion when he just has  
 21 a little snippet of that and hasn't reviewed the  
 22 article. And I'm not even sure if it has been cited in  
 23 the other expert reports.

24 THE WITNESS: I certainly can ---.

Page 259

1 General Sports Science and Medicine?

2 ATTORNEY WILKINSON: Do you see anything?

3 THE WITNESS: I don't see anything. Oh,  
 4 that's too small. Okay. That's okay.

5 ATTORNEY TRYON: Okay.

6 And this will be Exhibit --- what Exhibit  
 7 are we on Jake, do you know?

8 VIDEOGRAPHER: This is 19.

9 ---

10 (Whereupon, Exhibit 19, Article, was  
 11 marked for identification.)

12 ---

13 ATTORNEY TRYON: I'm sorry, 19?

14 VIDEOGRAPHER: Correct.

15 BY ATTORNEY TRYON:

16 **Q. Okay.**

17 **I take it from your earlier answers, you**  
 18 **probably never seen it before.**

19 **Is that right?**

20 A. I certainly don't recall. I don't want to state  
 21 definitively I've never seen it either, but it's  
 22 certainly not a paper that I'm going to know off the top  
 23 of my head.

24 **Q. Well, let me ask you to take a look at the**

Page 261

1 BY ATTORNEY TRYON:

2 **Q. Go ahead.**

3 A. I certainly cannot say if that conclusion has  
 4 any logic to it without knowing the study.

5 **Q. Understood. Is it possible since this**  
 6 **particular study suggests there is an impact on adults**  
 7 **by prenatal testosterone? Is it that prenatal**  
 8 **testosterone could also have a DSD explanation for why**  
 9 **should boys at 11 years old have more athletic ability**  
 10 **than girls?**

11 ATTORNEY BLOCK: Objection to form.

12 THE WITNESS: So speaking --- yeah,  
 13 speaking as an expert, I can't give you an expert  
 14 comment there without seeing their study.

15 BY ATTORNEY TRYON:

16 **Q. Okay.**

17 **So you just can't say one way or the other.**  
 18 **Correct?**

19 ATTORNEY BLOCK: Objection to form.

20 THE WITNESS: I mostly wouldn't want to  
 21 comment on their study. I will only make the  
 22 observation that the data of which I am aware do not  
 23 show differences for prepubertal children, if that was  
 24 part of your question.

BY ATTORNEY TRYON:

**Q. And so the performance data that Dr. Handelsman pointed out showing that there are some damages given before puberty, you reject those?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So those broad cross-sectional studies don't get at input, whether they are referencing biological explanations versus societal explanations.

BY ATTORNEY TRYON:

**Q. Okay.**

**Whether it's societal or biologic explanations, Handelsman still demonstrated that there is an advantage for pre-pubescent males over females in athletics.**

**Right?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: No, neither Dr. Handelsman in his paper --- he doesn't actually say that. And if you --- I think we looked previously at one of the figures where specifically the range of outcomes, if you were to repeat the study, included the girls doing better than the boys.

BY ATTORNEY TRYON:

**Q. Well, that was only one of them. That was not**

the medical community right now. The detailed explanations for the specific biology are not known if that's where you're going.

BY ATTORNEY TRYON:

**Q. Assuming there is actually a biological component, as you say, to gender identity, that says nothing about whether a biological male identifying as a female should, as a public policy matter, be allowed to participate on a girls athletic team in high school and middle school.**

**Right?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So the way that I would say that is even if we recognize that there is a biological explanation for gender identity, that does not --- well, I don't know that then I can go on to make an expert statement, honestly, because that gets outside my purview and in terms of --- my lane is just simply to say that.

BY ATTORNEY TRYON:

**Q. Got it. Can you look at your rebuttal report and look at page two?**

A. I have my rebuttal in front of me and I'm on page two.

**it. That was one of the charts. The other chart showed that there was an advantage, right?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: The other --- yeah, let me think with that one. Right. We are not getting into what the causality is, then the other charts did show the boys doing better. And again, the caveat remains what is not --- what is not demonstrated there is that there is --- that that is a biological thing versus simply the very longstanding societal and cultural environments.

BY ATTORNEY TRYON:

**Q. And you've contended that there's a biological component to gender identity.**

**Correct?**

A. Yes.

**Q. Which we have not been able to identify in this deposition.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So it is not quite --- well I actually don't know what's been identified in the deposition. The data are included in my --- in the papers that I referenced that are what are convincing to

**Q. Paragraph 4B?**

A. I have that in front of me.

**Q. You say --- great. You say circulating testosterone is the primary known biological driver of average differences in athletic performance. Do you see that?**

A. I do.

**Q. You say it is primary so what are the other biological drivers of average differences in athletic performance?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So when I --- so we're talking about circulating testosterone --- let me just look at this. Right. The truth is, is that it may --- that the only candidates that we have so far are testosterone at puberty and testosterone in the moment.

BY ATTORNEY TRYON:

**Q. So it's --- according to you, it's testosterone at puberty and circulating testosterone are the only biological drivers of average differences in athletic performance.**

**Is that right?**

A. So excuse me. I'm actually --- so this is the president of the hospital.

Page 266

1 ATTORNEY BLOCK: I'm sorry. Can we go  
2 off the record for a minute and take a break. The  
3 president of the hospital is returning his previous  
4 call.

5 VIDEOGRAPHER: Going off the record. The  
6 current time is 5:48 Eastern Standard Time.  
7 OFF VIDEOTAPE

8 ---  
9 (WHEREUPON, A SHORT BREAK WAS TAKEN.)

10 ---  
11 ON VIDEOTAPE

12 VIDEOGRAPHER: Back on the record. The  
13 current time reads 5:54 p.m. Eastern Standard Time.  
14 BY ATTORNEY TRYON:

15 Q. My last question was according --- according to  
16 you, testosterone at puberty and circulating  
17 testosterone are the only biological drivers of average  
18 differences in athletic performance.

19 Is that right?

20 A. Right, they are the only ones that are known.

21 Q. And in paragraph 4C, looking on page three ---  
22 let's move over to page three, at the top of the page,  
23 your statement is there is no basis to expect that  
24 transgender girls who receive puberty delaying

Page 268

1 components of the educational process, institutions may  
2 adopt policies designed to emphasize inclusion and to  
3 provide the most athletic opportunities to the greatest  
4 number of people. You see that.

5 Right?

6 A. I do.

7 Q. So these policies you referred to are designed  
8 to emphasize inclusion and to provide the most athletic  
9 opportunities to the greatest number of people, what's  
10 the source of that policy? Did you come up with that or  
11 did you see it someplace else?

12 ATTORNEY BLOCK: Objection to the form.

13 THE WITNESS: So the question is how am I  
14 aware? Yeah --- I apologize. You can hear that I'm  
15 confused on your question.

16 BY ATTORNEY TRYON:

17 Q. I'll try and do better. You said intuitions may  
18 adopt policies designed to emphasize inclusion and to  
19 provide the most athletic opportunities to embrace a  
20 number of people. And those policies that you're saying  
21 there, is that a policy that you read about somewhere or  
22 something you are just suggesting? What's the source of  
23 that?

24 ATTORNEY BLOCK: Objection to form.

Page 267

1 medication followed by gender affirming hormones would  
2 have an athletic advantage. There's a comma. But if we  
3 just put a period there, is that your opinion?

4 A. That is correct. Yes, that is my opinion.

5 Q. Let me ask you the converse. You say there is  
6 no basis to expect that transgender girls who receive  
7 puberty delaying medication followed by gender affirming  
8 hormones would not have an athletic advantage, period.  
9 Would you agree with that statement?

10 A. No.

11 Q. Do you have any --- excuse me, any performance  
12 data from an actual athletic event that support your  
13 opinion?

14 A. I do not have any data from an actual athletic  
15 performance study for that. No, I do not in that  
16 context, in that specific instance.

17 Q. Let me ask you to look at your report. Turn to  
18 paragraph 45.

19 A. So my report, paragraph 45. All right. I have  
20 that in front of me.

21 Q. Great. Finally, unlike elite international  
22 competition, schools and colleges often provide athletic  
23 competition as part of a broader educational mission.  
24 In that context, when scholastic athletics are

Page 269

1 THE WITNESS: So an operative word in  
2 this is may adopt policies, so this isn't referencing a  
3 specific policy that I would give you right this moment,  
4 if that's what you are asking.

5 BY ATTORNEY TRYON:

6 Q. So right, just aside from education --- this  
7 whole paragraph is talking about education, but you're  
8 not an expert on education or teaching methodology, are  
9 you?

10 A. I certainly am not.

11 Q. And you don't have any degrees in education or  
12 training in teaching methodology, do you?

13 A. I do not.

14 Q. And you have no degrees or training in pedagogy?

15 A. I have no degree in pedagogy. I will be careful  
16 how absolutely I do not, because that's not my ---  
17 that's not where I am representing myself to be an  
18 expert. I am involved in some education, but at the  
19 scholastic level not, so let's just say no.

20 Q. And you have no expertise as to whether sports  
21 or how sports are used as part of educational systems.

22 Right.

23 A. Correct. That is not the expertise. The how  
24 and my decisions among this are not my expertise.

1 **Q. Do you have any idea how many schools actually**  
2 **have sports programs?**

3 ATTORNEY BLOCK: Objection. I couldn't  
4 hear the full question. You cut out.  
5 BY ATTORNEY TRYON:

6 **Q. Sorry. Do you have any idea how many schools**  
7 **have sports programs?**

8 A. I could not give you a number, no.

9 **Q. Are you aware that some colleges do not have**  
10 **athletic programs?**

11 A. I guess I'm vaguely aware. If you're asking me  
12 as an expert than I wouldn't comment on that as an  
13 expert, but as a human in society I certainly am aware  
14 that that is a thing.

15 **Q. Okay.**

16 **And do you have any idea what percentage of**  
17 **kids are in athletic programs in schools versus those**  
18 **that are not that are still students?**

19 A. No, I would not be your source for that data  
20 point.

21 **Q. So when you are expressing this opinion in**  
22 **paragraph 45 that's not an expert opinion there, is it?**

23 ATTORNEY BLOCK: Objection to form.

24 THE WITNESS: So right, I guess it's a

1 expressing an opinion in paragraph 45, expert or  
2 otherwise. I'm simply stating the background situation.  
3 BY ATTORNEY TRYON:

4 **Q. Okay.**

5 **But --- okay. I would ask you to turn to**  
6 **paragraph 37 of your report.**

7 A. All right.

8 I have that in front of me.

9 **Q. This is talking about the International Olympics**  
10 **Committee. Right? Let me move back to paragraphs 35**  
11 **and 36.**

12 A. Yes, this is the International Olympic  
13 Committee. This relates to the International Olympic  
14 Committee.

15 **Q. So this 2021 framework, do you believe that you**  
16 **understand this framework?**

17 A. I think you'll have to ask more specific  
18 questions because I might understand parts and I might  
19 have questions about parts.

20 **Q. Very good. First of all, it says the 2021**  
21 **framework further provides that, quote, any restrictions**  
22 **arising from eligibility criteria should be based on**  
23 **robust and peer-reviewed research that, A, demonstrates**  
24 **a consistent, unfair, disproportionate competitive**

1 bit confusing here, because it's not my expert opinion  
2 that --- well, I'm certainly aware as an individual that  
3 this is a priority and when I sit on --- when I sit on  
4 committees where we discuss relative priorities, there  
5 are experts present who discuss these priorities. But  
6 if I'm speaking to you as an expert, then I --- then I  
7 can't be the representative expert in that space.

8 BY ATTORNEY TRYON:

9 **Q. Right. Well, I'm just asking, in paragraph 45,**  
10 **given your lack of expertise and education, you are not**  
11 **giving an expert opinion in paragraph 45.**

12 **Is that a correct statement?**

13 ATTORNEY BLOCK: Objection, asked and  
14 answered.

15 THE WITNESS: So I'm simply --- I'm  
16 raising all of the issues that we know exist, but then  
17 I'm not providing an expert opinion in terms of the  
18 relative priorities among these circumstances that  
19 exist.

20 BY ATTORNEY TRYON:

21 **Q. Let me just ask you very clearly is paragraph 45**  
22 **an expert opinion of yours?**

23 ATTORNEY BLOCK: Objection to form.

24 THE WITNESS: I don't think I'm even

1 **advantage with performance and/or an unpreventable risk**  
2 **to the physical safety of other athletes. You see that**  
3 **part, right?**

4 A. I do, yes.

5 **Q. Do you understand what the word disproportionate**  
6 **means in this context?**

7 A. To a degree.

8 **Q. Okay.**

9 **What do you understand it to mean when it says**  
10 **a disproportionate competitive advantage in performance?**

11 A. The IOC is aware that there's quite a wide range  
12 of advantages with different body types and different  
13 biology, and so they use language like disproportionate  
14 when they want to talk about something that's --- that's  
15 --- that's systematically associated with one  
16 circumstance in a way that they think would violate the  
17 rules, whatever they might be, for a specific sport.

18 **Q. That's pretty ambiguous. I have no idea what**  
19 **that means. Let me see if we can narrow it down. Is a**  
20 **disproportionate competitive advantage in performance**  
21 **--- would 20 percent be a disproportionate competitive**  
22 **advantage?**

23 ATTORNEY BLOCK: Objection to form.

24 THE WITNESS: So that's --- I can't

Page 274

1 answer that, because it depends on context, and I'm not  
2 the person who wrote the specific language in that  
3 document, so that is the quote from the document. But  
4 in terms of --- I don't --- I think we go someplace we  
5 don't want to go if we try to over define the specific  
6 word disproportionate.

7 BY ATTORNEY TRYON:

8 **Q. So it's just not something that you or I could**  
9 **look at and reach any kind of conclusion to tell them**  
10 **what that means sitting here today.**

11 **Is that right?**

12 A. I think if we look at a specific sport, I think  
13 that if it was limited to just the two of us we might  
14 need more expertise to make a decision.

15 **Q. Well, let's say if we talked about the one mile**  
16 **--- running one mile, is that something that we could**  
17 **then determine what disproportionate competitive**  
18 **advantage and performance would mean?**

19 ATTORNEY BLOCK: Objection to form.

20 THE WITNESS: It would depend on context.  
21 And if we're talking about at the elite level which is  
22 what the IOC references and we limited --- even then if  
23 we limit it just to you and to myself, we would want  
24 more expertise.

Page 276

1 THE WITNESS: I, as an expert, cannot  
2 give you a blanket explanation of what would  
3 specifically consist of --- what would specifically meet  
4 that definition. When they wrote the statement they  
5 didn't actually even have specific guidance, that is  
6 simply the spirit of a guideline --- the spirit of what  
7 a specific guideline should consider when that guideline  
8 is made.

9 BY ATTORNEY TRYON:

10 **Q. Do you know what they meant when they said**  
11 **unfair?**

12 A. So the --- it's kind of the same circumstance.  
13 That is the purpose of this statement is to be global  
14 guidance for the experts in the specific sport when they  
15 might develop guidelines relevant to their specific  
16 sport. So for example, the group with expertise in that  
17 one mile run that you're referencing should think in  
18 this context. That's all this is doing.

19 **Q. And some of the sporting organizations have come**  
20 **up with some very specific rules.**

21 **Correct?**

22 A. Some of the sporting federations have come up  
23 with specific rules, yes.

24 **Q. And as I recall, some of them require a certain**

Page 275

1 BY ATTORNEY TRYON:

2 **Q. Right. Okay.**

3 **So we don't know what the IOC meant by this in**  
4 **any particular context do we?**

5 ATTORNEY BLOCK: Objection to form.

6 ATTORNEY TRYON: Actually, let me redraw  
7 this question.

8 BY ATTORNEY TRYON:

9 **Q. You as an expert would not be able to give me an**  
10 **expert opinion on what disproportionate competitive**  
11 **advantage in performance of the one mile run would be;**  
12 **right? You could not give me an expert opinion on that.**

13 **Fair statement?**

14 A. If you break the words out in that --- in that  
15 fashion then it does become difficult. If you ask me  
16 what the entire statement after the letter A is  
17 referencing, I can at least explain some of the thought  
18 process for the IOC there.

19 **Q. Well, my question is simply, you as an expert,**  
20 **are you able to tell me what --- able to define for me**  
21 **what would be a consistent, unfair disproportionate**  
22 **competitive advantage in performance in a one mile run**  
23 **for the IOC?**

24 ATTORNEY BLOCK: Objection to form.

Page 277

1 **level of circulating testosterone.**

2 **Is that right?**

3 A. Some of the sporting federations use a certain  
4 level of circulating hormone as part or all of their  
5 roles.

6 **Q. And some of them use the level that you've**  
7 **mentioned that you were involved in setting, which was 5**  
8 **Nmol --- say it for me. Nmol something.**

9 A. Nmol/Ls per liter. Yes, some of them use that  
10 nmol/L per liter threshold.

11 **Q. Did they --- where did they get that 5 nmol/L**  
12 **quantity, do you know?**

13 ATTORNEY BLOCK: Objection to form.

14 THE WITNESS: So I do know where that  
15 number comes from originally for World Athletics, which  
16 is the first one to put that number out. And that  
17 number comes from studies of some Olympic athletes in  
18 some races where there was for at least certain  
19 distances a demonstrable difference between people who  
20 had --- and specifically people in the female category  
21 who had lower numbers of testosterone than that and  
22 higher numbers of testosterone than that.

23 BY ATTORNEY TRYON:

24 **Q. You were on that committee.**

**Right?**

A. I was on the group that wrote that World Athletics policy, yes. Not on the group that did that study.

**Q. And so how did you finally come up with the number of five as opposed to four or six or three or seven?**

A. The number five discriminates in terms --- in terms of there being some demonstrated advantage or improved outcome is really what it was, for those with higher numbers versus those with lower numbers. That was not true necessarily with a lower testosterone threshold. That is a difference was not as apparent and that's really the entire logic pattern there.

**Q. Well, earlier you just said it could have been --- you didn't think there was that much difference between five and six. That was your testimony earlier as I recall.**

**Right?**

ATTORNEY BLOCK: Objection.

THE WITNESS: As an endocrinologist I can tell you that those difference --- that that's right that to --- the difference between five and six would be hard to demonstrate.

BY ATTORNEY TRYON:

**Q. So how did you settle on five instead of six or five or six instead of four?**

A. So I guess the inputs are that there needed to be a line so that there's ability to enforce something. There needed to be a rule. And the choice of five, mostly, is what I've been saying already, which is --- it's a clean number where there's at least some distances, there's a demonstrable difference in outcomes at that level --- above and below that level.

**Q. So are you saying that there is a value of having a hard rule?**

ATTORNEY BLOCK: Objection to form.

BY ATTORNEY TRYON:

**Q. Maybe I should say having a clean rule?**

A. So as an expert I'm not --- that wasn't my role on the committee to determine that there needed to be a rule, but that is certainly the logic pattern of the committee that there ought to be a rule. That is not my expert opinion.

**Q. Okay.**

**But different organizations are free to come up with different conclusions of about what their rules ought to be.**

**Right?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So the different International Athletic Federations were to make use of data such as it exists to make their own rules for participation in their sports.

BY ATTORNEY TRYON:

**Q. And different organizations came up with very different rules.**

**Right?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: So most of the international federations still do not have rules, actually. And honestly, that's mostly a logistics situation where some of these organizations are too small to put the data together or the committees together to make rules.

BY ATTORNEY TRYON:

**Q. Those that do have rules have different rules.**

**Correct?**

A. Those that do have rules have had different conversations in the space. I don't know that I could systematically go through all of them, but there is some variation, yes.

**Q. Some require --- have a Level 5 nanomoles per liter and some still have ten.**

**Right?**

A. So I'd have to go back and look. You would have to show me. World Athletics has five for sure. And that's the one where I'm most familiar because I was actually sitting in the room helping draft that. The IOC in the past had used ten as a line, but that just sits there right now as a --- as a number someone might adopt. I actually don't know off the top of my head if anybody has adopted that for their formal rules.

**Q. What was the scientific basis for the ten nanomoles per liter?**

A. The logic for ten at the time is it is the bottom of the male range. That's its history.

**Q. Okay.**

**So it sounds to me like there is room for reasonable discussion about what the appropriate rule ought to be?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: The way I would say it is as different athletic organizations obtain data, they might use those data to determine differences, including if the --- if our best measure is testosterone,

Page 282

1 different thresholds of testosterone.

2 BY ATTORNEY TRYON:

3 **Q. Would it be appropriate to use performance data**  
4 **as well to make those decisions?**

5 A. The best data in my opinion are actual outcomes  
6 within a given sport.

7 **Q. What do you mean by outcomes, performance? Are**  
8 **we saying the same thing?**

9 A. I don't know if we're saying the same thing. So  
10 the studies that I reference are the Roberts study and  
11 the Harper study, where they actually look at specific  
12 athletic endeavors and measure those as opposed to the  
13 studies where they're simply sitting in a physiology lab  
14 measuring somebody move an arm back and forth and  
15 thinking that it might associate with some actual  
16 athletic performance.

17 **Q. Somebody moving their arm back and forth with**  
18 **weights, that's not athletic?**

19 A. It's --- again, it would --- right, that's ---  
20 that's only --- that's what we would call a surrogate  
21 endpoint where you are simply looking at something that  
22 might correlate with what you want, but --- but you  
23 don't know it until you test it. It ends up being what  
24 we call hypothesis generating. That is how we would say

Page 284

1 **Q. In those two studies did they check the**  
2 **circulating testosterone in the individuals in these**  
3 **studies?**

4 A. I'd have to look. I think we did look earlier  
5 today with regard to the Harper study, and I don't think  
6 she's referencing testosterone levels at all. Again,  
7 I'd have to go back and look to be sure. We were  
8 talking about whether they were self-reported. And the  
9 --- with the Robert study I would have to go back and  
10 look at that one, too. I'm feeling like the answer is  
11 no, but we can look there if you want.

12 **Q. Yeah, we don't need to. I'm pretty sure that we**  
13 **just talked about how long they had been in the therapy**  
14 **rather than actual measurements.**

15 **Well, let me move on. I know we don't have a**  
16 **lot of time left.**

17 **So you said you're familiar in your expert**  
18 **report you are familiar with HB-3293.**

19 **Is that right?**

20 ATTORNEY BLOCK: Objection to form.

21 THE WITNESS: So yes, I'm somewhat  
22 familiar.

23 BY ATTORNEY TRYON:

24 **Q. Have you read the whole thing?**

Page 283

1 it in a scientific way.

2 **Q. And the same would hold true with the level of**  
3 **circulating testosterone, you would want to actually**  
4 **test that in real life to see how people's circulating**  
5 **testosterone actually translates into performance of an**  
6 **actual athletic contest.**

7 **Right?**

8 A. That's right. So the data that were used to  
9 determine the five nanomole per liter cut point are  
10 passively collected data. And if somebody did a study  
11 looking at that threshold and found that there was,  
12 let's say, no difference, then that rule might be  
13 discarded.

14 **Q. And so far, other than Roberts and Harper, if I**  
15 **recall correctly, those are the only two that you know**  
16 **of.**

17 **Right?**

18 ATTORNEY BLOCK: Objection to form.

19 THE WITNESS: Those are the only two  
20 studies that have gone that extra step and looked at an  
21 actual athletic activity with an outcome that is part of  
22 that athletic activity and not what I was just  
23 referencing, as a surrogate endpoint.

24 BY ATTORNEY TRYON:

Page 285

1 A. I don't think I've read the whole thing, no.

2 **Q. When did you first hear of HB-3293?**

3 A. I probably first heard of it when the --- when I  
4 received contact from the ACLU to serve as an expert  
5 witness.

6 **Q. Do you recall if that was before or after it was**  
7 **passed?**

8 A. I don't recall. I would have to speculate that  
9 it would be after, because that would --- I mean that  
10 would make sense that that is true, but I don't recall,  
11 so I wouldn't be able to answer that.

12 **Q. Okay.**

13 **So we would refer to this as State Women's**  
14 **Sports Law and there's other types of laws like this**  
15 **throughout the country.**

16 **Are you aware of that?**

17 ATTORNEY BLOCK: Objection to form.

18 THE WITNESS: So I'm aware that there are  
19 attempts at legislation and some actual legislation  
20 passed to block transgender athletes in various  
21 permeations, including transgender women in several  
22 states. I'm aware of that, yes.

23 BY ATTORNEY TRYON:

24 **Q. Are you aware then House Bill 3293 the word**

Page 286

1 **transgender does not appear at all?**

2 A. House Bill --- that's this one?

3 **Q. That is this one.**

4 A. I was not aware that the word transgender does  
5 not appear at all.

6 **Q. Are you tracking the other bills out there that  
7 are similar to House Bill 3293?**

8 A. I am not personally tracking the other bills,  
9 no.

10 **Q. Can you take a look at the Handelsman report  
11 that you have in front of you. I don't recall the  
12 exhibit number.**

13 ATTORNEY WILKINSON: I think Exhibit 13  
14 --- oh, sorry, it's Exhibit 4, I think.

15 THE WITNESS: I don't see.

16 ATTORNEY WILKINSON: I can give you that.

17 THE WITNESS: The stack got big.

18 ATTORNEY TRYON: We can just bring it ---  
19 if you can't find it we can bring it up on the screen?

20 THE WITNESS: Okay.

21 I was given another copy, so we're good.  
22 I have it in front of me.

23 BY ATTORNEY TRYON:

24 **Q. Okay.**

Page 288

1 for example gender identity. And the phrasing  
2 characteristic defined binary form is not necessarily  
3 true for each component of biological sex.

4 **Q. So you disagree with the statement in the  
5 Handelsman report, is that --- did I state that fairly?**

6 A. Right. I would characterize the statement as  
7 not exhaustive.

8 ATTORNEY TRYON: Let me ask the court  
9 reporter if I have any time.

10 COURT REPORTER: I have six minutes and  
11 58 --- six hours and 58 minutes.

12 ATTORNEY TRYON: Well, I guess with my  
13 last two minutes I'll just say thank you for your time  
14 and I appreciate it. And I don't have any other  
15 questions. I don't know if any of the other Defendants  
16 do. I doubt it. But go ahead. If they do, go ahead.  
17 Kelly?

18 ATTORNEY MORGAN: This is Kelly Morgan.  
19 I don't have any questions. Thank you so much.

20 ATTORNEY TRYON: Roberta? Susan, you're  
21 next.

22 ATTORNEY GREEN: This is Roberta Green on  
23 the behalf of the SSAC. No questions. Thank you.

24 ATTORNEY DENIKER: Dr. Safer, this is

Page 287

1 **On the second page?**

2 A. On the second page.

3 **Q. Okay.**

4 **Under fairness and segregation in sports.**

5 **Do you see that section?**

6 A. I do.

7 **Q. In the third full paragraph underneath there ---  
8 oh the formatting there is a little different than the  
9 copy that I have. Let's see. There's a paragraph that  
10 starts the terms sex and gender. There it is. The  
11 terms sex and gender are often confused as  
12 interchangeable. Now, I want you to focus on this next  
13 sentence. Sex is an objective specific biological  
14 state, a term with distinct fixed facets notably  
15 genetic, chromosomal, gonadal, hormonal and phenotypic  
16 including genital sex, each of which has a  
17 characteristic defined binary form. Did I read that  
18 correctly?**

19 A. You read that correctly, yes.

20 **Q. Do you agree with that statement?**

21 A. I don't agree with that statement completely,  
22 no.

23 **Q. What specifically do you find objectionable.**

24 A. It's missing some components of sex, including,

Page 289

1 Susan Deniker. I have no questions. Thank you for your  
2 time today.

3 ATTORNEY TRYON: We are finished.

4 VIDEOGRAPHER: This concludes this  
5 deposition. The current time reads 6:31 p.m. Eastern  
6 Standard Time.

7 \*\*\*\*\*

8 VIDEOTAPED DEPOSITION CONCLUDED AT 6:31 P.M.

## STIPULATION

(It is hereby stipulated and agreed by and between counsel for the respective parties that reading, signing, sealing, certification and filing are not waived.)

## PROCEEDINGS

VIDEOGRAPHER: Good morning. We're now on the record. My name is Jacob Stock. I'm a Certified Legal Video Specialist employed by Sargent's Court Reporting Services. Today's date is March 16th, 2022 and the current time is 9:06 a.m. Eastern Standard Time. This video is being taken place remotely by video conference. The caption of this case is in the United States District Court for the Southern District of West Virginia, Charleston Division, B.P.J., et al. V. West Virginia State Board of Education, et al. Civil Action Number 2:21-CV-00316. The name of the witness is Deanna Adkins. Will the attorney present state their names and the parties they represent for the record?

ATTORNEY BROOKS: Roger Brooks taking the deposition with Alliance Defending Freedom and

Page 16

Swaminathan also from Lambda Legal also on behalf of Plaintiff.

ATTORNEY HARTNETT: And this is Kathleen Hartnett from Cooley on behalf of the Plaintiff.

ATTORNEY BARR: Andrew Barr, also from Cooley on behalf of the Plaintiff.

ATTORNEY REINHARDT: This is Elizabeth Reinhardt, also with Cooley, also for Plaintiff.

ATTORNEY BLOCK: Josh Block from ACLU on behalf of Plaintiff.

VIDEOGRAPHER: If that is everybody, then can I ask the notary to swear in the witness?

---

DEANNA ADKINS, M.D.,  
CALLED AS A WITNESS IN THE FOLLOWING PROCEEDING, AND  
HAVING FIRST BEEN DULY SWORN, TESTIFIED AND SAID AS  
FOLLOWS:

---

VIDEOGRAPHER: And at this time the notary may be dismissed and we can begin.

ATTORNEY BROOKS: Thank you, ma'am.

NOTARY:

Thank you. Have a good day everybody.

---

Page 15

representing the intervenor.

ATTORNEY HOLCUMB: Christina Holcumb for intervenor.

ATTORNEY DUCAR: Timothy Ducar for intervenor.

ATTORNEY CSUTOROS: Rachel Csutoros for intervenor.

ATTORNEY TRYON: David Tryon at the Attorney General's Office in West Virginia, and I represent the State of West Virginia.

ATTORNEY MORGAN: Kelly Morgan with Bailey and Wyant on behalf of West Virginia Board of Education and Superintendent Burch.

ATTORNEY DENIKER: Good morning, everyone. Susan Deniker representing Defendant Harrison County Board of Education and Superintendent Doris Stutler.

ATTORNEY GREEN: Roberta Green, Shuman McCuskey Slicer. I'm here on behalf of West Virginia Secondary School Activities Commission.

ATTORNEY BORELLI: And this is Tara Borelli with Lambda Legal on behalf of the Plaintiff, B.P.J..

ATTORNEY SWAMINATHAN: This is Sruti

Page 17

## EXAMINATION

---

BY ATTORNEY BROOKS:

**Q. For convenience --- good morning, Dr. Adkins,**

---

**A. Good morning.**

**Q. --- and thank you for your time here today.**

ATTORNEY BROOKS: For convenience, let me start out by marking three exhibits. As Adkins Exhibit Number 1, I would like to mark the Declaration and expert report of Deanna Adkins, which in the file will be made available to the court reporter is tab two. And I have copies for the witness and for counsel. I would also like to mark as Adkins Exhibit 2 what we have provided as tab three, which is the CV of the witness, Deanna Adkins.

---

(Whereupon, Adkins Exhibit 1, Report of Deanna Adkins, M.D., was marked for identification.)

(Whereupon, Adkins Exhibit 2, Curriculum Vitae, was marked for identification.)

---

THE WITNESS: If you don't mind, it's

Deanna (corrects pronunciation).

ATTORNEY BROOKS: Deanna. I certainly don't mind. I want to get that right. Sorry about that.

THE WITNESS: Thank you.

ATTORNEY BROOKS: And I would like to admit as Exhibit 3 the rebuttal report submitted by Dr. Adkins. I will provide copies of that to the witness. Just write the number on it.

THE WITNESS: Thank you.

ATTORNEY BROOKS: We'll have occasion to come back to those.

---

(Whereupon, Adkins Exhibit 3, Rebuttal Report, was marked for identification.)

---

BY ATTORNEY BROOKS:

**Q. Dr. Adkins, let me ask you to find amongst the three documents I have given you Exhibit 2, which is your Curriculum Vitae.**

VIDEOGRAPHER: Counsel, do you want that pulled up on the shared screen?

ATTORNEY BROOKS: That's up to the remote. You should certainly make it available.

**professionally competent in using the American Psychiatric Association Diagnostic and Statistical Manual to make child and adolescent mental illness or psychiatric diagnoses generally outside the scope of gender dysphoria?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: In pediatrics, we're trained to make some of the diagnoses that are appropriate for a pediatrics provider to treat.

BY ATTORNEY BROOKS:

**Q. So is that a --- do you consider yourself generally competent in making diagnosis of child or adolescent mental illness according to the standards of DSM-V?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: For the things I was trained in and have continued to get CME in, I do.

BY ATTORNEY BROOKS:

**Q. And you do not have any training in sports physiology, do you?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Nothing specific.

BY ATTORNEY BROOKS:

**Q. You would consider that to be outside your field**

Obviously, everybody here in the deposition room has it.

BY ATTORNEY BROOKS:

**Q. Dr. Adkins, let me ask you to turn to page two of Exhibit 2, your Curriculum Vitae. And you have there a list headed professional training and academic career. Do you see that?**

A. Yes.

**Q. Am I right that you have done either residencies or fellowships in the field of pediatrics and endocrinology?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I've done both, yes, residency and fellowship in pediatrics followed by endocrinology, yes.

BY ATTORNEY BROOKS:

**Q. And you have not done either a residency nor a fellowship in psychiatry. Have you?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: No.

BY ATTORNEY BROOKS:

**Q. And you don't have any degree in child or adolescent developmental psychology, do you?**

A. No.

**Q. Do you consider yourself trained and**

**of professional expertise. Am I right?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: There is probably some overlap given that physiology and endocrinology are very important and tied and interlinked, but I couldn't tell you since I don't know where the overlap might be.

BY ATTORNEY BROOKS:

**Q. You yourself have not done any research related to sports physiology, have you?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Not myself, no.

BY ATTORNEY BROOKS:

**Q. Nor have you done any research relating to the impact of hormones on athletic capability?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Not personally.

BY ATTORNEY BROOKS:

**Q. Do you consider yourself to be an expert in any sense in the question of what is or is not fair?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Well, that's a broad question. That's ---.

BY ATTORNEY BROOKS:

**Q. Do you consider yourself an expert in the**

1 **concept of fairness?**

2 ATTORNEY BORELLI: Objection.

3 THE WITNESS: I believe that I can  
4 recognize fairness and have a concept that would be  
5 appropriate for someone of my age.

6 BY ATTORNEY BROOKS:

7 **Q. Do you believe that you have expertise and**  
8 **fairness beyond that from ordinary human experience?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: I would have to see what  
11 that would look like to say yes or no to that question.

12 BY ATTORNEY BROOKS:

13 **Q. All right.**

14 **Let's look at your list of publications, which**  
15 **is on page three of Exhibit 2, your curriculum vitae.**  
16 **And under the --- the page three and continuing onto**  
17 **page four is a section titled Refereed Journal.**

18 **Correct?**

19 A. Yes.

20 **Q. And by Refereed Journal --- we'll both have to**  
21 **remember that. And also the court reporter may from**  
22 **time to time tell one of us to slow down. These all**  
23 **just ordinary parts of the process, just forgetting to**  
24 **speak up or to go slow enough to be transcribed.**

1 **Q. Thank you.**

2 A. Roughly.

3 **Q. Roughly?**

4 **I see an article here, number three on the**  
5 **list, Tejwani, from Tejwani, et al, and you are one of**  
6 **the authors shown from year 2017. Do you see that?**

7 A. Yes.

8 **Q. And that relates to disorders of sexual**  
9 **development.**

10 **Am I correct?**

11 A. Yes.

12 **Q. And am I correct that that article has ---**  
13 **doesn't speak at all to the questions of gender.**

14 **Does it?**

15 ATTORNEY BORELLI: Objection to form.

16 THE WITNESS: That, no.

17 BY ATTORNEY BROOKS:

18 **Q. Not correct?**

19 A. I'm sorry, no, it doesn't speak.

20 **Q. Just to be clear for the record, the Tejwani et**  
21 **al. article which you are a co-author does not speak at**  
22 **all to questions of gender identity.**

23 **Correct?**

24 ATTORNEY BORELLI: Objection, form.

1 **Can you explain for the record what you mean by**  
2 **refereed journal, what the significance of that heading**  
3 **is?**

4 A. Yes. So for those journals they are reviewed by  
5 an editor, and those are peer reviewed as well.

6 **Q. So these --- this would be the list of your**  
7 **publications that would --- you would consider to be**  
8 **peer reviewed publications?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: Looking at the date on the  
11 front of this one, yes.

12 BY ATTORNEY BROOKS:

13 **Q. And that date is January 21st of this year,**  
14 **2022.**

15 **Right?**

16 A. Yes.

17 **Q. And have you had any peer reviewed publication**  
18 **appear since January 21st of this year?**

19 A. I have one that is --- that's in press for next  
20 month.

21 **Q. And what is the title of that?**

22 A. I would have to review the title in my e-mail.  
23 It's Clinical Simulation for Education of Nurse  
24 Anesthesia in Gender Affirming Care.

1 THE WITNESS: Correct.

2 BY ATTORNEY BROOKS:

3 **Q. And I see here a Lapinski, et al. article, the**  
4 **4th item, from 2018, entitled Best Practices in**  
5 **Transgender Health: A Clinician's Guide for Primary**  
6 **Care.**

7 **Do you see that?**

8 A. Yes.

9 **Q. Am I correct that that article does not report**  
10 **on any regional research by the authors?**

11 ATTORNEY BORELLI: Objection to form.

12 THE WITNESS: I believe that's true.

13 BY ATTORNEY BROOKS:

14 **Q. Are you the author of any peer reviewed papers**  
15 **that report original clinical research relating to**  
16 **gender identity or for transgender therapies?**

17 ATTORNEY BORELLI: Objection to form.

18 ATTORNEY BROOKS: I don't know who spoke  
19 to the witness.

20 THE WITNESS: So gosh, I have a lot of  
21 things that are in process. Let me give it a second.

22 ATTORNEY BORELLI: Take the time you need  
23 to review that to answer the question fully.

24 THE WITNESS: Could you repeat the

1 question?

2 BY ATTORNEY BROOKS:

3 **Q. Yes. Are you the author of any published peer**  
4 **reviewed papers that report original clinical research**  
5 **relating to gender identity or transgender therapies?**

6 ATTORNEY BORELLI: Objection to form.

7 THE WITNESS: The item on number six  
8 would be the closest. And it is talking with patients  
9 about the gender identity and their experience of  
10 transgender care, yes.

11 BY ATTORNEY BROOKS:

12 **Q. The --- that paper in particular is essentially**  
13 **calling for research.**

14 **Am I correct?**

15 ATTORNEY BORELLI: Objection to form.

16 THE WITNESS: Yes.

17 BY ATTORNEY BROOKS:

18 **Q. It is not reporting on accomplished clinical**  
19 **research, is it?**

20 ATTORNEY BORELLI: Objection, form.

21 THE WITNESS: So in that study we  
22 actually did interview individuals as part of the study,  
23 so it has --- it's done as a --- oh, Lord, words. I'm  
24 going to find the word in a second. Not in like ---

1 particular patient, person.

2 BY ATTORNEY BROOKS:

3 **Q. Let me take you again to Exhibit 2 and page two**  
4 **---**

5 ATTORNEY MORGAN: May I interrupt for a  
6 moment.

7 ATTORNEY BROOKS: I'm sorry. Who's  
8 speaking?

9 ATTORNEY MORGAN: Sure. This is Kelly  
10 Morgan. I'm having a terrible time understanding the  
11 witness. So before we go on is there any way to see if  
12 we can --- it sounds extremely muffled. I'm only  
13 catching like maybe half of the words.

14 ATTORNEY BROOKS: Most --- most of the  
15 voice is coming through very clear on our end. I'm  
16 going to move speaker so that paper shuffling is not as  
17 likely to shuffle it. Beyond that, I think everybody in  
18 this room will agree that we're speaking slowly and  
19 clearly and, frankly, loudly. So I'm not sure there's  
20 more we can do.

21 ATTORNEY BORELLI: And Kelly, for what it  
22 is worth, I think I caught maybe half of your words. I  
23 wonder if there is a connection issue on your end that  
24 might be worth investigating.

1 more of a public health-based research approach where  
2 you do not actual like counting of things like you would  
3 do sort of --- search, but more around interviewing and  
4 looking at quantitate versus qualitative. That's the  
5 word I'm looking for. It's a qualitative study which is  
6 typically done in public health programs or other public  
7 health research.

8 **Q. All right.**

9 **Am I correct, Dr. Adkins, that you, yourself,**  
10 **have not treated nor personally examined Plaintiff,**  
11 **B.P.J.?**

12 ATTORNEY BORELLI: Objection, form.

13 THE WITNESS: That's correct.

14 BY ATTORNEY BROOKS:

15 **Q. And you don't have any direct knowledge as to at**  
16 **what Tanner stage B.P.J. began puberty blockers.**

17 **Am I correct?**

18 A. I don't recall seeing that in any of the  
19 documentation.

20 **Q. And you don't have any knowledge as to how**  
21 **B.P.J.'s physiology or athletic capabilities compare to**  
22 **a genetic female of a similar age, do you?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: I haven't assessed the

1 ATTORNEY HARTNETT: I will just say for  
2 the record, and others should speak up too because we  
3 obviously want all counsel to hear the deposition. I  
4 have been able to hear Mr. Brooks, the witness, and the  
5 objections have been a bit more faint, but we have been  
6 able to make them out so far.

7 ATTORNEY TRYON: This is Dave Tryon. I  
8 share Kelly's frustration. I'm having difficulty  
9 understanding the witness, so ---.

10 ATTORNEY BROOKS: And similarly, Dave,  
11 when we hear you, you're a little bit more muffled than  
12 some of the other voices. So the issue, perhaps the  
13 mics and speakers on the other end, but there's nothing  
14 more we can do at this end.

15 ATTORNEY GREEN: This is Roberta Green,  
16 and I'm also having trouble hearing. And I'm  
17 considering maybe --- you know, maybe muting my computer  
18 and calling in on my phone and see if I can hear better.  
19 I think when the doctor looks down to look at documents  
20 we lose some of that. So I'll report in if calling in  
21 on my phone is a breakthrough, but I appreciate you all.  
22 Thank you.

23 ATTORNEY DENIKER: Yes. Thank you. I'm  
24 also having trouble. And I'm curious if the court

Page 30

1 reporter is having trouble. And if she's not, that's  
2 good, but I just want to make sure that we --- that  
3 everybody can hear.

4 COURT REPORTER: So my biggest issue is  
5 people not saying their names when they're speaking. So  
6 we just had a bunch of people and I really have no idea  
7 who is sayin anything. I don't know who is making the  
8 objections. And ma'am, with the mask on, it is hard to  
9 understand you at times. I'm really like having to  
10 really focus in on you. And the objections are coming  
11 in quick. And I mean, there are definitely some  
12 challenges, but I don't know.

13 ATTORNEY BORELLI: Well, in case this is  
14 helpful, so this is Tara Borrelli with Lambda Legal on  
15 behalf of the Plaintiff. I am the person defending the  
16 deposition, so the objections will be coming from me, in  
17 case that's helpful going forward.

18 COURT REPORTER: Yes.

19 ATTORNEY HARTNETT: This is Kathleen  
20 Hartnett for the Plaintiff from Cooley. I was the first  
21 person that spoke after someone raised the issue. I  
22 believe Miss --- Ms. Morgan had raised the issue of the  
23 ability to hear. And I would just say for the record  
24 this is an in person deposition that was scheduled where

Page 32

1 to protect her health.

2 ATTORNEY BROOKS: And we did agree to  
3 proceed in whatever way the witness wanted when it comes  
4 to that, so we'll all just have to live with that as  
5 part of these days.

6 May we proceed?

7 ATTORNEY TRYON: Yes.

8 BY ATTORNEY BROOKS:

9 **Q. If you have Exhibit 2 and on page two of that we**  
10 **have professional training and academic career, which**  
11 **towards the bottom includes your current two**  
12 **appointments associated with Duke University.**

13 **Am I correct?**

14 A. Three.

15 **Q. I apologize. I see that. One is you're an**  
16 **Associate Professor of Pediatrics.**

17 **Correct?**

18 A. Correct.

19 **Q. And you are the Director of the Duke Child and**  
20 **Adolescent Gender Care Clinic?**

21 A. Correct.

22 **Q. And you are a Co-Director of the Duke Sexual and**  
23 **Gender Health and Wellness Program.**

24 **Correct?**

Page 31

1 we had proposed it to be remote if parties saw fit to do  
2 that. We're not objecting to it being in person. We're  
3 --- obviously they're defending. And all parties had  
4 the ability to attend in person if they chose to.

5 ATTORNEY BROOKS: And I --- I will ---  
6 this is Roger Brooks taking the deposition. I will  
7 suggest that we just agree by voice acclamation that  
8 we're not going to cycle through all the names and try  
9 to identify all the people who have chatted with us  
10 about their reception and simply move on with the  
11 deposition unless anybody objects to that.

12 ATTORNEY MORGAN: I have no objection to  
13 that. This is Kelly Morgan. But is there any  
14 possibility that the witness would be able to remove her  
15 mask if everyone else is masked other than the  
16 questioner? Like I --- I'm not having trouble hearing  
17 anyone else other than the witness, and it just seems to  
18 get muffled.

19 ATTORNEY BORELLI: I'm sorry, but I --- I  
20 don't believe that's going to be an option. I mean,  
21 this --- this is partly why a remote deposition would  
22 have been our --- our preference, but Dr. Adkins  
23 obviously has to take precautions because she is  
24 continuing to see and treat patients. And so she needs

Page 33

1 A. Correct.

2 **Q. What is the total compensation you receive in**  
3 **connection with those three appointments with Duke**  
4 **University?**

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: Well, you want a number or  
7 ---?

8 BY ATTORNEY BROOKS:

9 **Q. I do.**

10 A. I'm going to have to give an approximation.

11 **Q. And that's fine?**

12 A. Approximately, \$173,000 per year.

13 **Q. And that is your total compensation on a W-2**  
14 **from Duke University?**

15 A. No. Duke University only pays me \$20,000 per  
16 year. I work for the private Diagnostic Clinic, which  
17 is our private practice, and they pay me the balance.

18 **Q. Okay.**

19 **And do you receive any other compensation in**  
20 **connection with your work with patients in connection**  
21 **with the Duke Child and Adolescent Gender Care Clinic?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: No.

24 BY ATTORNEY BROOKS:

**Q. Can you tell me what you earned in speaking fees in 2021, approximately?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: In 2021? Is that what you said?

BY ATTORNEY BROOKS:

**Q. I did.**

A. Let's see. I'm losing track of dates. I think only like \$500.

**Q. And what were the total expert fees that you received in 2021 in connection with serving as an expert in litigation?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Nothing.

BY ATTORNEY BROOKS:

**Q. And in 2021 did you receive any payments for any reasons from any pharmaceutical company?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: No.

BY ATTORNEY BROOKS:

**Q. Let me ask you to look at Exhibit 1, which is your expert report. And if you would turn --- if you would turn to paragraph 37 of that report, paragraph 38. And there you say when a child is born a sex assignment**

**Correct?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I have been aware that ultrasonographers often tell people what they think they are. And I'm also the one that has to tell the parents that it is different when they're born and it is not exactly accurate.

BY ATTORNEY BROOKS:

**Q. That is as a result of the quality of imaging on ultrasound sometimes the wrong call is made on that?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Possibly the quality of imaging, the skill of the person. There are also sometimes variations that aren't easily visible on ultrasound.

BY ATTORNEY BROOKS:

**Q. You're are aware, are you not, that the genetic sex of infant is, in fact, determinable by genetic testing as early as the first trimester of pregnancy?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: The typical testing for that is chromosomes, which are broad view and not specific for the hundreds of genes that can change the sex of the individual.

**is usually made based on the infant's externally visible genitals. This designation is then recorded and usually becomes the sex designation listed on the infant's birth certificate. Do you see that language?**

A. I do.

**Q. And as a trained physician, can you tell us how a sex assignment is usually made based on the infant's external visible genitals?**

A. Yes. In most cases the external genitals will have a form that looks typical to a male versus typical to a female. And if there is a question, then I get consulted, if there's something different.

**Q. And by typical to a male, for instance, you mean what?**

A. So male external genitalia at birth typically has a phallic structure, penis that is, of a certain length most of the time. And then there's scrotum and then there are usually testicles, although sometimes they can be up or down in the scrotum.

**Q. And do you, yourself, have children?**

A. I do.

**Q. And you're aware that for quite a number of years now, in fact, parents often learn of the sex of their child before birth.**

BY ATTORNEY BROOKS:

**Q. Well, my question was you are aware, are you not, that the chromosomal sex of the infant is determinable as early as the first trimester of pregnancy?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I'm sorry. I didn't hear you say chromosomal. I thought you said biological. I apologize.

BY ATTORNEY BROOKS:

**Q. I can't swear what I said the first time.**

ATTORNEY BROOKS: Let's ask the reporter to read back the second question I asked. Is the court reporter muted perhaps?

COURT REPORTER: One minute.

ATTORNEY BROOKS: Okay.

COURT REPORTER: You said genetic testing. Do you want me to read the whole question?

ATTORNEY BROOKS: I do.

COURT REPORTER: You are aware, are you not, that the genetic sex of an infant is determinable by genetic testing as early as the first trimester of pregnancy?

ATTORNEY BORELLI: Objection to form.

1 COURT REPORTER: And again I just want to  
2 say that the witness is hard to understand. There is  
3 definitely a lot of muffling words coming through, you  
4 know, just like in the sentence there might be two words  
5 that I just have to like really --- I'm just struggling  
6 over here with this mask. I can't see your lips moving,  
7 so it's really hard, but --.

8 THE WITNESS: I'll slow down, but I was  
9 sick earlier this week, and I'd really rather not share  
10 that with anyone in the room. And I don't think that  
11 they would like that, so ---.

12 BY ATTORNEY BROOKS:

13 **Q. Don't consider yourself pressured to take off**  
14 **your mask. Just do what you can to speak clearly into**  
15 **the microphone.**

16 ATTORNEY BORELLI: Thank you. And we  
17 just moved the mic closer to the witness as well, so we  
18 --- we hope that that will help make a difference.

19 ATTORNEY HARNETT: Excuse me. This is  
20 Kathleen Hartnett from Cooley. I would like to ask  
21 whether the videotaping that's happening now will allow  
22 further transcription after the deposition?

23 VIDEOGRAPHER: Yes, that's --- the  
24 videotape is picking up everything that --- I'm having

1 ATTORNEY BORRELLI: Objection to form.

2 THE WITNESS: I'm not able to answer the  
3 question yes or no.

4 BY ATTORNEY BROOKS:

5 **Q. You would agree that the genetic sex of an**  
6 **infant is determined at the instant of conception?**

7 ATTORNEY BORELLI: Objection to form.

8 THE WITNESS: The actual Y chromosomes  
9 are at that time, yes.

10 BY ATTORNEY BROOKS:

11 **Q. That's not something that a doctor has any**  
12 **choice or could change at the time of birth?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: The chromosomes, no.

15 BY ATTORNEY BROOKS:

16 **Q. And you understand what I think we all learned**  
17 **in perhaps sixth grade biology that an individual with**  
18 **two X chromosomes, provided that there is no chromosomal**  
19 **abnormality, is female female and an individual free of**  
20 **abnormalities who has an X and a Y chromosome is male.**

21 **Correct?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: Free of any abnormalities,  
24 yes.

1 no troubles on my side, so it's picking up all of the  
2 audio and everything.

3 ATTORNEY HARNETT: Thank you very much.

4 VIDEOGRAPHER: You're welcome.

5 ATTORNEY BROOKS: And rather than  
6 re-reading the question, I'm just going to forget all  
7 that and ask you a new question.

8 BY ATTORNEY BROOKS:

9 **Q. You are aware, are you not, that the chromosomal**  
10 **sex of an infant nowadays can be determined as soon as**  
11 **the first trimester of pregnancy?**

12 ATTORNEY BORELLI: Objection to form.

13 THE WITNESS: You can obtain the baseline  
14 chromosomes, yes.

15 BY ATTORNEY BROOKS:

16 **Q. And that will tell you the chromosomal sex of**  
17 **that infant?**

18 ATTORNEY BORELLI: Objection, form.

19 THE WITNESS: The --- not really a term  
20 that is really precise as there's hundreds of genes that  
21 can change that.

22 BY ATTORNEY BROOKS:

23 **Q. So you are not able to answer my question yes or**  
24 **no?**

1 BY ATTORNEY BROOKS:

2 **Q. And you also understand that in humans, like all**  
3 **mammals, a gamete from a male and a gamete from a female**  
4 **are necessary to create a fertilized egg in a new**  
5 **individual?**

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: Can you read the very first  
8 part of the question again, please?

9 BY ATTORNEY BROOKS:

10 **Q. You understand that in humans, as in all**  
11 **mammals, a gamete from a male and a gamete from a female**  
12 **are necessary to create a fertilized egg and a new**  
13 **individual?**

14 ATTORNEY BORELLI: Same objection.

15 THE WITNESS: Yes.

16 BY ATTORNEY BROOKS:

17 **Q. Now, if you look at paragraph 41 in your**  
18 **declaration ---**

19 A. Yes.

20 **Q. --- in paragraph 41 you state, quote, biological**  
21 **sex, biological male or female are imprecise and should**  
22 **be avoided. Do you see that?**

23 A. Yes.

24 **Q. And it is your view that the terms biological**

1 **male, biological female and biological sex are so**  
 2 **imprecise as to be not useful from a medical point of**  
 3 **view?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: In my practice we have to  
 6 be more careful than that because I see quite a lot of  
 7 individuals where that wouldn't be a very precise  
 8 answer.

9 BY ATTORNEY BROOKS:

10 **Q. My question is is it your expert opinion, are**  
 11 **you offering expert opinion in terms of biological sex,**  
 12 **biological male and biological female are so imprecise**  
 13 **as to not be medically useful?**

14 ATTORNEY BORELLI: Objection, form.

15 THE WITNESS: Yes.

16 ATTORNEY BROOKS: Let me mark as Exhibit  
 17 4 what is tab 5, and that is the Endocrine Society  
 18 Guidelines dated 2017, but the number of authors. The  
 19 first name is Wiley Hembree.

20 ---

21 (Whereupon, Adkins Exhibit 4, 2017

22 Endocrine Society Guidelines, was marked  
 23 for identification.)

24 ---

1 that date range, yes.

2 BY ATTORNEY BROOKS:

3 **Q. Have you met Dr. Cohen-Kettenis?**

4 A. No.

5 **Q. And she is associated with a highly respected**  
 6 **institute in Amsterdam.**

7 **Am I right?**

8 A. I am not certain. I would have to look that up.

9 **Q. You don't know. You weren't invited to serve on**  
 10 **the committee that drafted these guidelines, were you?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: There is an invitation  
 13 extended to all Endocrine Society members. I did find a  
 14 time. That was early in my work with this at that time.

15 BY ATTORNEY BROOKS:

16 **Q. If you look down on page one, about five lines**  
 17 **from the bottom ---.**

18 A. Say it again.

19 **Q. Page one, five lines from the bottom?**

20 A. Yes.

21 **Q. Actually, let's go two more up and begin a**  
 22 **sentence. There's a sentence that begins they require a**  
 23 **safe and effective hormone regimen that will, one,**  
 24 **suppress endogenous sex hormone secretion determined by**

1 ATTORNEY BROOKS: I'm handing that to the  
 2 witness and to opposing counsel.

3 BY ATTORNEY BROOKS:

4 **Q. Dr. Adkins, this is a document that you cite in**  
 5 **your expert report.**

6 **Correct?**

7 A. Correct.

8 **Q. And with which you are quite familiar?**

9 A. Correct.

10 **Q. Do you know Dr. Hembree?**

11 A. I spoke with him on the phone.

12 **Q. You would agree, would you not, that he's been**  
 13 **prominent in the field of transgender medicine for**  
 14 **decades?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: His publications, yes.

17 BY ATTORNEY BROOKS:

18 **Q. And another author is Peggy Cohen-Kettenis. Do**  
 19 **you see that? She's the second author.**

20 A. Yes.

21 **Q. And likewise, she has been prominent in the**  
 22 **field for at least 20 years?**

23 ATTORNEY BORELLI: Objection.

24 THE WITNESS: I've seen publications in

1 **the person's genetic/gonadal sex. Do you see that?**

2 A. I do.

3 **Q. And do you think you understand what's referred**  
 4 **to by the term genetic/gonadal sex?**

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: Yes.

7 BY ATTORNEY BROOKS:

8 **Q. And what is your understanding of what that**  
 9 **refers to?**

10 A. So that would include both the chromosomes as  
 11 mentioned before, the broad XY, and it should include  
 12 all of the other genetic mutations as well as what  
 13 actual gonads are present in the person.

14 **Q. And this committee, these prominent researchers**  
 15 **at least considered genetic/gonadal sex to be a**  
 16 **meaningful and readily understandable binary**  
 17 **classification.**

18 **Correct?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: That's not clear there and  
 21 it is different from what you said before.

22 BY ATTORNEY BROOKS:

23 **Q. I try to make each question somewhat different**  
 24 **from the one before, so yes. Let me ask a new question.**

**This committee considered --- the committee that drafted these guidelines considered genetic/gonadal sex to be a meaningful and readily understandable classification.**

**Correct?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Yes. They didn't use the word chromosomal sex. And they included gonads which are also a part of the broad development of human reproductive biology.

BY ATTORNEY BROOKS:

**Q. And in fact, you, yourself, quoted this language in your expert report, did you not?**

A. Yes.

**Q. And genetic sex, in your understanding, what is the meaning of genetic sex?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Well, in most patients, in most people, it is whether you received an X or a Y chromosome and all of your body parts include an XY containing or an XX containing cell. There are cases where you can have mosaicism or different parts of a human at different sex chromosomes where a part is XX, a part is XY, part is XO. And then there is also some mutations that can occur in lots of other locations that

BY ATTORNEY BROOKS:

**Q. The relationship between chromosomal sex and gonads are not separate things that can vary in healthy individuals, are they?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: Well, I have healthy individuals who have XY chromosomes and external genitalia that are completely female.

ATTORNEY BROOKS: Let me mark as Exhibit 5 the prior edition guidelines put out by the Endocrine Society in 2009, eight years earlier.

---

(Whereupon, Adkins Exhibit 5, 2009

Endocrine Society Guidelines, was marked for identification.)

---

BY ATTORNEY BROOKS:

**Q. And the primary author is on --- the first author on the 2009 guidelines are the same individuals, Dr. Hembree and Cohen-Kettenis?**

**Correct?**

A. Correct.

ATTORNEY BORELLI: Objection, form.

BY ATTORNEY BROOKS:

can determine whether or not a patient's, you know, likely to have the rest of their human development appear as what we would more typically see in a male human or a female human.

BY ATTORNEY BROOKS:

**Q. Well, in every human individual who is healthy and free of disorder of sexual development, genetic sex and gonadal sex are --- directly correspond.**

**Correct?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Typically, yes.

BY ATTORNEY BROOKS:

**Q. So in a healthy individual free of genetic defect every individual who is chromosomally XX is going to have female gonads and female genitalia.**

**Correct?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: My only concern is I would not use defect as a language. There's --- you know, we see variation across humans and we --- you know, there are variations that are normal and variations that are typical versus rare. So I would not call it necessarily a defect, maybe a variation would be the word I would use.

**Q. In fact, you, yourself, were familiar with and regularly consulted these guidelines.**

**Am I correct?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: Prior to 2017?

BY ATTORNEY BROOKS:

**Q. Correct.**

A. I used these guidelines.

**Q. And did you find them to be incomprehensible?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: No.

BY ATTORNEY BROOKS:

**Q. If you look with me on page marked 3134, which is the third page of the document, second column three quarters of the way down is the definition of --- under the heading of definitions is a definition of transsexual or transsexual people.**

**Do you see that?**

A. I see it.

**Q. It says there that a transsexual person refers to a biological male who identifies as or desires to be a female --- a member of the female gender or vice versa.**

**Do you see that?**

1 A. Yes.

2 **Q. And so in 2009 these prominent authors in the**  
3 **field considered biological male to be a scientifically**  
4 **useful and adequately clear term for them to use in**  
5 **these guidelines issued by the Endocrine Society.**

6 **Correct?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: It's written that way in  
9 this paper, yes.

10 BY ATTORNEY BROOKS:

11 **Q. And you in that time period 2009 to just 2017**  
12 **used these guidelines and were able to understand them.**

13 **Correct?**

14 ATTORNEY BORELLI: Objection, form.

15 THE WITNESS: You know, I would have to  
16 spend some time looking to see what else is in here. It  
17 has been a long time since I've used these particular  
18 and pulled out. And it is a single location. It can  
19 sometimes be misleading if you're aware --- if you've  
20 read many medical articles.

21 BY ATTORNEY BROOKS:

22 **Q. So you don't recall whether you found these**  
23 **guidelines to be comprehensible and useful for your**  
24 **purposes in the years between 2009 and 2017?**

1 much about binary.

2 BY ATTORNEY BROOKS:

3 **Q. Is it your belief that the underlying biology**  
4 **has changed since 2009?**

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: Our understanding of a lot  
7 of things in this area is growing rapidly. It's a rapid  
8 area of research.

9 BY ATTORNEY BROOKS:

10 **Q. Let me ask you to turn in this document to page**  
11 **3141.**

12 A. Same document, 3141?

13 **Q. Yes.**

14 A. Thank you.

15 **Q. And here we're in a discussion of the use of**  
16 **GRNH analogs, which is to say puberty blockers.**

17 **Am I correct?**

18 A. Which section?

19 **Q. Well, the heading is 2.3, evidence, and it is**  
20 **talking about in the second paragraph treatment with**  
21 **GRNH analogs?**

22 ATTORNEY BORELLI: Counsel, can we give  
23 the witness one moment to look at this?

24 ATTORNEY BROOKS: Of course.

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: Generally they were useful.  
3 BY ATTORNEY BROOKS:

4 **Q. If you look just a little lower is --- the next**  
5 **definition is transition.**

6 **Do you see that?**

7 A. Yes.

8 **Q. And it refers to a period of time during which**  
9 **transsexual persons change their physical, social and**  
10 **legal characteristics to the gender opposite that of**  
11 **their biological sex.**

12 **Do you see that?**

13 A. I do.

14 **Q. And again, these authors used the term**  
15 **biological sex, did they not?**

16 A. They did.

17 **Q. And they indicated their understanding that**  
18 **biological sex is binary in referring to opposite of a**  
19 **biological sex.**

20 **Correct?**

21 ATTORNEY BORELLI: Objection, form.

22 THE WITNESS: In this older version they  
23 do use more binary terms. As you know, language changes  
24 over time. In the new guidelines they don't talk as

1 ATTORNEY BORELLI: Thank you.

2 THE WITNESS: Yes, that appears to be  
3 what is discussed in this section.

4 BY ATTORNEY BROOKS:

5 **Q. Here the authors in the 2009 Endocrine Society**  
6 **guidelines describe the effect of treatment with puberty**  
7 **blockers.**

8 **Correct?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: Yes.

11 BY ATTORNEY BROOKS:

12 **Q. And they say among other things that, quote, in**  
13 **girls breast development will become atrophic and menses**  
14 **will stop. And they continue, quote, in boys**  
15 **verilization will stop and testicular volume will**  
16 **decrease.**

17 **Do you see those quotes?**

18 A. I do.

19 **Q. Again, in 2009, the Endocrine Society didn't**  
20 **think there was ambiguity or imprecision as to what is a**  
21 **girl and what is a boy for purposes of development in**  
22 **puberty, did they?**

23 ATTORNEY BORELLI: Objection to form.

24 THE WITNESS: As I said, the language

Page 54

1 would be different and likely is different in  
2 conversations around this because it is not as precise  
3 as I would use or my colleagues would use.

4 BY ATTORNEY BROOKS:

5 **Q. In 2009 the Endocrine Society in publishing**  
6 **these guidelines didn't think there was any ambiguity or**  
7 **imprecision as to what is a girl and what is a boy for**  
8 **purposes of the effect of puberty.**

9 **Correct?**

10 ATTORNEY BORELLI: Objection to form.

11 THE WITNESS: I would have to read the  
12 article up to this point to see what their  
13 clarifications are with regard to those phrases.  
14 Oftentimes in the beginning of articles they will  
15 clarify what they mean by a particular phrase, and  
16 taking it out of context is a little bit difficult for  
17 me to just say it is true right here on the spot.

18 ATTORNEY BORELLI: I would also just  
19 object to the extent that we're asking about select  
20 definitions without having given the witness an  
21 opportunity to review the entire definition and section  
22 of the document and asking her to draw conclusions about  
23 the larger document.

24 ATTORNEY BROOKS: Counsel, I think that

Page 56

1 **prescribe cross sex hormones for a patient in patients**  
2 **who are free of any disorder of sexual development you**  
3 **don't have any trouble determining which patients need**  
4 **testosterone as a cross sex hormone versus which**  
5 **patients need estrogen as a cross sex hormone, do you?**

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: My mouth is getting dry. I  
8 don't have any trouble with that.

9 BY ATTORNEY BROOKS:

10 **Q. And that's because absent rare and unusual**  
11 **disorders of sexual development it's really easy for all**  
12 **of us to tell girls from boys, isn't it?**

13 ATTORNEY BORELLI: Objection to form.

14 THE WITNESS: With regard to their sex  
15 assignment at birth, yes.

16 BY ATTORNEY BROOKS:

17 **Q. Now, you've mentioned a couple times when I**  
18 **asked you questions about the 2009 guidelines that**  
19 **perhaps a language that's used has changed.**

20 **Am I right?**

21 A. Yes.

22 **Q. You are not contending that how human biology**  
23 **works has changed?**

24 ATTORNEY BORELLI: Objection, form.

Page 55

1 you are supposed to under the Rules to confine your  
2 objections to stating objection.

3 BY ATTORNEY BROOKS:

4 **Q. In your practice today with respect to**  
5 **individuals who do not suffer from any disorder of**  
6 **sexual development you don't have any trouble telling**  
7 **girls from boys, do you?**

8 ATTORNEY BORELLI: Objection to form.

9 THE WITNESS: I do not have trouble  
10 deciding who was assigned female at birth versus those  
11 who were assigned male at birth.

12 BY ATTORNEY BROOKS:

13 **Q. We have already talked about how that assignment**  
14 **is done based on observation of genitalia, which depend**  
15 **on underlying genetic sex.**

16 **Right?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: So the typical manner of  
19 assignment we have discussed. Sometimes those things  
20 change over time with --- absent of course a difference  
21 of sex development or intersex conditions. Typically  
22 they would match.

23 BY ATTORNEY BROOKS:

24 **Q. And if you are, for instance, getting ready to**

Page 57

1 THE WITNESS: Our understanding of human  
2 biology at this time is accelerating greatly, especially  
3 in the area of genetics. We can now look at someone's  
4 whole exome, whole chromosome, and it's --- I mean in  
5 this timeframe there's an amazing amount of information  
6 that's become more clear.

7 BY ATTORNEY BROOKS:

8 **Q. So is it your --- are you asserting that the**  
9 **more recent Endocrine Society policy statement should be**  
10 **accepted as a more precise Scientific statement?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: The goal is for that to be,  
13 yes, when you are writing those. And it's also been  
14 sometimes since this was published as well.

15 BY ATTORNEY BROOKS:

16 **Q. Since the 2017 guidelines?**

17 A. Correct.

18 **Q. But in general, is it your view the more recent**  
19 **statements of the Endocrine Society that touch on issues**  
20 **of the definition of gender and sex are --- we should**  
21 **consider more accurate or reliable than earlier**  
22 **statements?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: In the correct context,

yes. Sometimes when they're taken out of context and applied to not the exact same population, they may or may not be as precise.

BY ATTORNEY BROOKS:

**Q. They may or may not be. That is you don't maintain that generally more recent statements of the Endocrine Society relating to definitions of gender and sex are more reliable than earlier statements?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: Their goal and our goal as a community is to be as precise as possible. Sometimes that works and sometimes it doesn't.

ATTORNEY BROOKS: Let me mark as Exhibit --- what are we at, 6. Exhibit 6. What is tab 4 in the materials provided to the court reporter, an article Lapinski, et al., which Dr. Adkins is a coauthor from 2017. Pardon me, 2017.

---  
(Whereupon, Adkins Exhibit 6, 2017 Lapinski Article, was marked for identification.)

BY ATTORNEY BROOKS:

**Q. And this is your only or perhaps one of only two**

**Do you see that?**

A. Yes.

**Q. And the paragraph continues on to page 692 and the language I want to call your attention to is there, but of course feel free to look at the paragraph?**

ATTORNEY BORELLI: Counsel, for clarity of the record, I'm showing that the heading is on page 689.

ATTORNEY BROOKS: Correct. That's where the paragraph begins and then there's a two-page table breaks up the paragraph and now we're on 692.

ATTORNEY BORELLI: Thank you.

THE WITNESS: Just that paragraph.

BY ATTORNEY BROOKS:

**Q. Yes.**

A. Okay.

**Q. In 2017, writing a guide for clinicians as to what you considered to be best practices in transgender health you and your coauthors thought that it was clear and useful to refer to, quote, the opposite biological sex, closed quote, did you not?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: The language would be reflective of the original publications.

**peer reviewed articles on which you were an author that relate to transgender patients.**

**Correct?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I'm going to refer back to my ---.

BY ATTORNEY BROOKS:

**Q. Please do, and that's Exhibit 2.**

A. I apologize --- I'm sorry. I was thinking of the book chapter. Yes, I was thinking of the book chapter I've written there. So those are also peer reviewed. So if you just falling manuscript of joint articles, that's true, but I also have one book chapter published and one that is in process.

**Q. Well, at any rate, this article was published in 2017, the same year as the more recent guidelines from the Endocrine Society.**

**Correct?**

A. Correct.

**Q. And in this article --- let me ask you to turn to page 692. And looking at a paragraph that actually runs over from 689 because of a long intervening table. Paragraph is headed understanding the meaning of transitioning for transgender patients.**

BY ATTORNEY BROOKS:

**Q. Dr. Adkins, what do you mean by that answer?**

A. When you're putting something into a journal article and you're reporting that original article's information, it would be inappropriate to change the language. So the original report that states this particular information used those words.

**Q. Well, you didn't put this in quotation marks in your article, did you?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: We don't necessarily have to put them in quotation marks. In medically referred journals you can just put the reference.

BY ATTORNEY BROOKS:

**Q. And in fact, there is no footnote to this, is there, there is no reference?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Not right at the end of that sentence.

BY ATTORNEY BROOKS:

**Q. What that sentence says to get it into the record, I'm referring to sexual orientation, it says, quote, this fluctuation tends to occur more commonly with individuals who are attracted to the opposite**

**biological sex before transitioning, closed quotes.**

**Have I read that language correctly?**

A. Correct.

**Q. And publishing this guideline for clinicians in 2017, is it your testimony that even if you thought that language was inaccurate and confusing you would not have clarified it?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I can't change what the publication states. It would be inappropriate for me to make a statement that was different from what the publication states. And there are people that fall on the binary and people who fall in the middle, and that particular study investigated people who identified on each end of the binary spectrum of individuals identification of gender identity.

BY ATTORNEY BROOKS:

**Q. So you believe as a scientist and an author that writing in 2017, even if you thought the term biological sex was misleading and inaccurate, you --- it was nevertheless appropriate for you to use that term in a best practices guide that you were writing for clinicians?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: S I have seen that policy and also seen the policies that are presented by the NIH which uses sex assigned at birth as well as gender identity and in addition, as variables that should be included in their research.

BY ATTORNEY BROOKS:

**Q. My question is precise. Are you familiar with the NIH policy that requires grant supported research in sales or clinical work to, quote, consider sex as a biological variable?**

ATTORNEY BORELLI: Objection, form.

Counsel, if you are going to continue questioning her about the policy, we'd request a copy be placed in front of the witness.

ATTORNEY BROOKS: At the moment I'm just asking the witness if she's familiar with that policy.

ATTORNEY BORELLI: My objection stands.

THE WITNESS: I haven't read the entire policy. I have seen that within the documents that you have presented, so I can't accurately state if it is true.

BY ATTORNEY BROOKS:

**Q. Have you, yourself, ever submitted any grant proposal that was subject to that NIH policy?**

THE WITNESS: So if you would read the entirety of the article, I would hope that we would be clear and it would be understood in that isolated paragraph, again I, have to use what language was used in the original publication. Otherwise, I'm misrepresenting the original publication and I would not want to do that.

BY ATTORNEY BROOKS:

**Q. Well, if you thought the original publication was in accurate and misleading you wouldn't want to cite and rely on it, would you?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: As it's stated, it's not inaccurate. And if you infer things from a sentence it could be misleading. If you read it straight for what it says, it's accurate to what the report gave in the initial publication.

BY ATTORNEY BROOKS:

**Q. Are you familiar, Dr. Adkins, with a NIH policy that requires research supported by NIH grants that involves animal or human clinical work to consider what NIH refers to as, quote, sex as a biological variable, closed quote?**

ATTORNEY BORELLI: Objection, form.

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I have submitted NIH grants.

BY ATTORNEY BROOKS:

**Q. And in that connection did you take some steps to assure that your grant proposal would comply with that policy?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: All of my grants applications had sex assigned at birth as a variable that we report.

BY ATTORNEY BROOKS:

**Q. Let me show you another more recent Endocrine Society policy statement. This is tab eight. It will be Exhibit 7.**

---

**(Whereupon, Adkins Exhibit 7, 2021 Endocrine Society Scientific Statement, was marked for identification.)**

---

THE WITNESS: Before we start this questioning is it possible for me to take a break?

ATTORNEY BROOKS: It certainly is. At any time that you want to, you just say so.

1 VIDEOGRAPHER: Going off the record. The  
2 current time reads 10:08 a.m.  
3 OFF VIDEO

4 ---  
5 (WHEREUPON, A PAUSE IN THE RECORD WAS HELD.)  
6 ---

7 ON VIDEOTAPE  
8 VIDEOGRAPHER: We're back on the record.  
9 Current time reads 10:21 a.m. Eastern Standard Time.

10 ATTORNEY BROOKS: And this is Roger  
11 Brooks resuming the questioning. I have put in front of  
12 the witness what is marked Exhibit 7, which is a, quote,  
13 scientific statement from the Endocrine Society that is  
14 entitled Considering Sex as a Biological Variable in  
15 Basic and Clinical Studies: An Endocrine Society  
16 Scientific Statement, closed quote. Do you see that?

17 A. Pardon me. Yes.

18 Q. So this is --- document, this statement is from  
19 2021, just last year. And four more years --- recent  
20 four more years of science available as compared to the  
21 2017 guidelines we looked at earlier.

22 Correct?

23 A. It is that --- yes, as far as the date goes, I  
24 mean, one would think they would be up-to-date.

1 yes, there are some folks there who do a nice job.

2 Q. And maybe four lines from the bottom of that  
3 block I see a reference to the National Institute of  
4 Mental Health.

5 Do you see that?

6 A. Yes.

7 Q. And that's a highly respected governmental  
8 research laboratory.

9 Correct?

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: Yes.

12 BY ATTORNEY BROOKS:

13 Q. And let me ask you to turn here in this document  
14 to the second page, which is page 220. And this is, in  
15 fact, the beginning of the text after the abstract on  
16 the previous page. And there it begins, quote, sex is  
17 an important biological variable that must be considered  
18 in the design and analysis of human and animal research.  
19 The terms sex and gender should not be used  
20 interchangeably. Sex is dichotomous with sex  
21 determination in the fertilized zygotes stemming from  
22 unequal expression of sex chromosomal genes, closed  
23 quote.

24 Do you see that language?

1 Q. And let me just ask, obviously the Endocrine  
2 Society is a large organization, but do you know, either  
3 personally or by reputation, any of the authors listed  
4 on this document?

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: Excuse me. Walter Miller  
7 by reputation.

8 BY ATTORNEY BROOKS:

9 Q. And Walter Miller is at the University of  
10 California, San Francisco, according to the footnote  
11 there?

12 A. Let's see. That's what it looks like.

13 Q. And just looking down, the University of  
14 California, San Francisco, is a highly prestigious  
15 research institution, is it not?

16 A. It has a good reputation.

17 Q. And farther down, halfway down the block of  
18 institutions that these authors are associated with, I  
19 see University of California, Los Angeles. Do you see  
20 that?

21 A. Yes.

22 Q. And UCLA, to use its abbreviation, is also a  
23 highly respected research university, is it not?

24 A. You know, there is some variability there. And

1 A. I do.

2 Q. Do you understand the meaning of the word  
3 dichotomous?

4 A. I do.

5 Q. What does it mean?

6 A. Two options.

7 Q. There are two options. And do you think you  
8 understand the significance of the statement that,  
9 quote, sex is an important biological variable?

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: I understand that it ---  
12 yes.

13 BY ATTORNEY BROOKS:

14 Q. In fact, I believe you testified earlier that in  
15 the human body every body part, every cell either has XX  
16 chromosomes or XY chromosomes depending on the  
17 chromosomal sex of the individual.

18 Is that right?

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: Some individuals have a  
21 mixture.

22 BY ATTORNEY BROOKS:

23 Q. And those would be genetic abnormalities.  
24 Am I correct?

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: Again, I don't like the  
3 word abnormalities. It is a variation in presentation  
4 of a human.

5 BY ATTORNEY BROOKS:

6 **Q. You would agree, would you not, that any**  
7 **deviation from having either XX or XY chromosomes is**  
8 **widely considered to be an abnormality?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: Again, I don't prefer that  
11 language.

12 BY ATTORNEY BROOKS:

13 **Q. Dr. Adkins, I didn't ask you what you prefer. I**  
14 **understand your preference. My question is you would**  
15 **agree, would you not, within the scientific community it**  
16 **is widely held view that any chromosomal arrangement**  
17 **other than having XX or XY is abnormal?**

18 ATTORNEY BORELLI: Objection, form.

19 THE WITNESS: Not in my experience in my  
20 group of people that I practice with, they would not  
21 describe it that way.

22 BY ATTORNEY BROOKS:

23 **Q. Would you agree that sex is determined to use**  
24 **the language that I have directed you to, quote, in the**

1 determined in fertilized zygote. That doesn't  
2 necessarily equal sex that's assigned at birth.

3 BY ATTORNEY BROOKS:

4 **Q. Absent any disorder of sexual development, the**  
5 **determination the zygote that you just described will,**  
6 **in fact, dictate 100 percent reliability the sex**  
7 **observed at birth.**

8 **Correct?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: Well, I can't --- you know,  
11 in medicine we don't say anything is 100 percent. If  
12 you use the absent any --- any difference of sex  
13 development even an unknown one that we might not know  
14 about, that --- that is what we know to be true.

15 BY ATTORNEY BROOKS:

16 **Q. You mentioned earlier that dichotomous means**  
17 **there are two alternatives and only two alternatives.**

18 **Right?**

19 ATTORNEY BORELLI: Objection, form.

20 BY ATTORNEY BROOKS:

21 **Q. That's just what the word means?**

22 ATTORNEY BORELLI: Same objection.

23 THE WITNESS: That's what the word means.

24 BY ATTORNEY BROOKS:

1 **fertilized zygote, closed quote?**

2 A. I'm sorry. Can you re-read the question or  
3 repeat the question?

4 **Q. Yes. I'm referring to the language that**  
5 **references sex determination in the fertilized zygote.**  
6 **And my question is do you agree that the sex of an**  
7 **individual is determined, quote, in the fertilized**  
8 **zygote, closed quote?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: Again, they're not being  
11 very specific in that particular sentence about what  
12 they mean by sex.

13 BY ATTORNEY BROOKS:

14 **Q. You're not able to say whether this opening**  
15 **language in this 2021 statement from the Endocrine**  
16 **Society is in your view accurate or in accurate?**

17 ATTORNEY BORELLI: Objection to form.

18 THE WITNESS: Taking one statement, I  
19 can't. This is a very long document.

20 BY ATTORNEY BROOKS:

21 **Q. I'm asking you now, do you agree or disagree the**  
22 **sex is determined in the fertilized zygote?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: XX and XY components are

1 **Q. And in this important statement from the**  
2 **Endocrine Society published just last year drafted by a**  
3 **whole committee of prominent endocrinologists they say**  
4 **that sex is an important biological variable, closed**  
5 **quote. Do you disagree with this statement from the**  
6 **Endocrine Society?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: In reading that particular  
9 statement I would agree if they had used the word sex  
10 assigned at birth or something more precise in that  
11 sentence.

12 BY ATTORNEY BROOKS:

13 **Q. Well, what they said precisely is sex is a**  
14 **biological variable. Do you see that language?**

15 A. Yeah.

16 **Q. Do you agree with that?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: So in the context of  
19 medicine, when we're talking about sex and we're talking  
20 about --- that's very imprecise. I really think that it  
21 is --- I would --- it's hard for me to use that word  
22 because it is imprecise, as I have mentioned before.

23 BY ATTORNEY BROOKS:

24 **Q. So you think this statement from last year from**

1 the Endocrine Society in its opening language is so  
2 imprecise that you can't tell me whether you think it is  
3 accurate or not?

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: I would have to read the  
6 entirety of the report and take it within context as I  
7 would with any other language used.

8 BY ATTORNEY BROOKS:

9 **Q. Sitting here right now, you're unable to answer**  
10 **my question as to whether you think it is an accurate**  
11 **statement that sex is a biological concept?**

12 ATTORNEY BORELLI: Objection, form.

13 THE WITNESS: Sex is a biological  
14 concept, yes.

15 BY ATTORNEY BROOKS:

16 **Q. And let me take you, in fact, to page 221 of**  
17 **this document, first column. And there you will see a**  
18 **heading that begins biological sex, the definition of**  
19 **male and female.**

20 **Do you see that?**

21 A. Yes.

22 **Q. And it begins sex is a biological concept. And**  
23 **you just said that you think that's a scientifically**  
24 **true statement.**

1 **Q. In the first paragraph under the heading**  
2 **biological sex, directing your attention to the**  
3 **statement did you discuss the statement sex is a**  
4 **biological concept. Do you see that language?**

5 A. I do.

6 **Q. And you believe that to be a scientifically**  
7 **accurate statement?**

8 ATTORNEY BORELLI: Objection to form.

9 THE WITNESS: Yes.

10 BY ATTORNEY BROOKS:

11 **Q. And in the next sentence this Endocrine Society**  
12 **statement tells us that, quote, all mammals have two**  
13 **distinct sexes, closed quote. Do you believe that is**  
14 **true or scientifically inaccurate?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: Excuse me. I'm sorry. I'm  
17 trying to find that language.

18 BY ATTORNEY BROOKS:

19 **Q. Third line of that paragraph, all mammals have**  
20 **two distinct sexes. My question is do you believe that**  
21 **is inaccurate or accurate scientific ---?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: I still think it is  
24 imprecise.

1 **Right?**

2 ATTORNEY BORELLI: Objection, form.  
3 Could --- could she have an opportunity to read this  
4 section before we continue questioning?

5 ATTORNEY BROOKS: Yes. But I'll ask you  
6 not to coach the witness. I have not denied any  
7 requests, but the witness should make them, not counsel.

8 ATTORNEY BORELLI: The objection stands.  
9 It is appropriate to ask that a witness be able to read  
10 a section of a document before being asked to opine  
11 about the larger meaning of the document.

12 ATTORNEY BROOKS: I believe the witness  
13 threw some more language in this paragraph so that's a  
14 good idea.

15 BY ATTORNEY BROOKS:

16 **Q. If you will tell us when you have read that**  
17 **paragraph.**

18 A. Yes. Sorry.

19 **Q. You have?**

20 A. No, I will tell you.

21 ATTORNEY TYRON: Jake, could you scroll  
22 down a bit, please?

23 THE WITNESS: Okay.

24 BY ATTORNEY BROOKS:

1 BY ATTORNEY BROOKS:

2 **Q. Have you finished your answer?**

3 A. Yes. Sorry. My allergies are making me ---.

4 **Q. Any time you need a drink.**

5 A. Yeah. Sorry about that.

6 **Q. Few lines down it says, quote, the classical**  
7 **biological definition of the two sexes is that females**  
8 **have ovaries and make larger female gametes, eggs,**  
9 **whereas the males have testes and male smaller gametes,**  
10 **sperm. Do you see that language?**

11 A. I do.

12 **Q. Do you agree that is a fair statement of the**  
13 **classical biological definition of the two sexes?**

14 ATTORNEY BORELLI: Objection, form.

15 THE WITNESS: When you use the word  
16 classical it describes what you would see typically, so  
17 I agree with that statement. It allows for there to be  
18 some variations that may not be classical.

19 BY ATTORNEY BROOKS:

20 **Q. And it is accepted as a classical definition**  
21 **because it is accurate in the overwhelming percentage of**  
22 **cases.**

23 **Is that true?**

24 ATTORNEY BORELLI: Objection, form.

1 THE WITNESS: So you know, as I mentioned  
2 before in my papers that I submitted, it --- you know,  
3 the percentage of people with differences of sex  
4 development is low and those would be the individuals  
5 that would not follow typically within this.

6 BY ATTORNEY BROOKS:

7 **Q. And those individuals are the overwhelming**  
8 **majority.**

9 **Correct?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: They are the majority.

12 BY ATTORNEY BROOKS:

13 **Q. Well more than 99 percent.**

14 **Correct?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: I would have to do the math  
17 but that sounds accurate.

18 BY ATTORNEY BROOKS:

19 **Q. Let me ask you to turn to page 228. In the**  
20 **second column, the final paragraph begins on that page,**  
21 **it reads, quote, sex is an essential part of vertebrate**  
22 **biology, but gender is a human phenomenon, semicolon.**  
23 **Sex often influences gender, but gender cannot influence**  
24 **sex. Do you see that language.**

1 A. What is the first word in the sentence again so  
2 I can find it?

3 **Q. It's on the second column, the final paragraph.**

4 A. Okay.

5 **Q. I'm really just calling your attention to the**  
6 **first sentence.**

7 A. Yep, read it.

8 **Q. Is there anything in that sentence that you**  
9 **believe to be inaccurate scientifically?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: Again, I think they're  
12 imprecise as primates have gender roles and gendered  
13 activity, so it's not exactly precise.

14 BY ATTORNEY BROOKS:

15 **Q. Anything else about that statement that you want**  
16 **to say is less than scientifically accurate?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: You know, again they use  
19 the word sex without being very specific as to sex  
20 assigned at birth. That's my only other caveat.

21 BY ATTORNEY BROOKS:

22 **Q. If we read that to refer to what the Endocrine**  
23 **Society determined used in the 2017 Endocrine Society**  
24 **statement that we looked at, that is, quote,**

1 **genetic/gonadal sex, then do you you consider this**  
2 **statement to be accurate?**

3 ATTORNEY BORELLI: Objection, form.

4 THE WITNESS: That's not what it says, so  
5 I'll ask you to repeat the question for me.

6 BY ATTORNEY BROOKS:

7 **Q. If we assume hypothetically --- I will ask you**  
8 **to assume that sex as used in this Endocrine Society**  
9 **2021 document, has the meaning that you, in fact,**  
10 **explained from the term used in the 2017 Endocrine**  
11 **Society document that is, quote, genetic/gonadal sex,**  
12 **closed quote, then you believe this to be --- the**  
13 **language that I have read to you from the 2021 document**  
14 **to be accurate?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: So I believe when I  
17 answered that question --- I believe when I answered  
18 that question sex, gonadal, you know, those are two  
19 parts of it. They have not included the full range of  
20 hormonal or external genitalia to be specific. In my  
21 line of work I would need all of that information to  
22 really pin down things.

23 BY ATTORNEY BROOKS:

24 **Q. So your testimony now is that the term**

1 **genetic/gonadal '17 guidelines is too imprecise for you**  
2 **really to understand?**

3 ATTORNEY BORELLI: Objection, form.

4 THE WITNESS: I think you asked that  
5 question before.

6 BY ATTORNEY BROOKS:

7 **Q. And I thought you had said you did understand.**  
8 **You seem to be changing your testimony.**

9 ATTORNEY BORELLI: Objection.

10 THE WITNESS: You can read it back to me  
11 if you --- I think that there's multiple things that are  
12 left out of that particular phrase to describe, you  
13 know, individuals. I can't say something that is, you  
14 know, in my experience and in the literature and in  
15 patients with intersex conditions that are --- that  
16 could be different from that. There --- yeah.

17 BY ATTORNEY BROOKS:

18 **Q. If we for a moment focus on individuals who do**  
19 **not suffer from any disorder of sexual development, then**  
20 **do you believe the following quote from Endocrine**  
21 **Society 2021 document is true, and that is, quote, sex**  
22 **is an essential part of vertebrate biology, but gender**  
23 **is a human phenomenon, semicolon, sex often influences**  
24 **gender, comma, but gender cannot influence sex, closed**

1 quote?

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: Trying to think, make sure

4 --- I can't think of an instance right now that makes me  
5 disagree with that statement.

6 BY ATTORNEY BROOKS:

7 **Q. Let me take you to the first column on page 228**  
8 **and there's a heading there that says considering sex**  
9 **and/or gender as variables in health and disease.**

10 **Do you see that?**

11 A. No. What page are you on?

12 **Q. 228 ---**

13 A. Yes.

14 **Q. --- first column, the heading towards the bottom**  
15 **of the page.**

16 A. Okay.

17 **Q. And here they're specifically mentioning sex on**  
18 **one hand and gender on the other. Do you see that?**  
19 **This paragraph begins, quote, women and men differ in**  
20 **many physiological and psychological variables.**

21 **Do you see that?**

22 A. Yes.

23 **Q. Do you believe that to be a scientifically**  
24 **accurate statement?**

1 **Q. Dr. Adkins, do you believe it to be true or**  
2 **false that women and men as women and men differ from**  
3 **each other in many physiological and psychological**  
4 **variables?**

5 ATTORNEY BORELLI: Objection to the form.

6 THE WITNESS: So women and men are a  
7 gender assignment, not the biological sex which you  
8 mentioned before. And gender is not necessarily a way  
9 that I would necessarily think is a scientifically  
10 precise way to place that if you're talking about this  
11 particular statement.

12 BY ATTORNEY BROOKS:

13 **Q. Is it your belief that the Endocrine Society in**  
14 **this document in the terms women and men is referring to**  
15 **gender identity other than biological --- what does the**  
16 **word physiological mean to you as a doctor?**

17 A. The method of function and interaction of all  
18 the parts of the body.

19 **Q. It refers to biology, not to the statement of**  
20 **mind or identity.**

21 **Correct?**

22 ATTORNEY BORELLI: Objection to form.

23 THE WITNESS: I would just agree with  
24 that statement.

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: I think if I were to add  
3 typical, it's saying there is variability.

4 BY ATTORNEY BROOKS:

5 **Q. Well, it is saying specifically that women and**  
6 **men differ from each other in physiological and**  
7 **psychological ways.**

8 **Correct?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: That's what it says.

11 BY ATTORNEY BROOKS:

12 **Q. And do you believe that to be a scientifically**  
13 **true statement?**

14 ATTORNEY BORELLI: Objection, form.

15 THE WITNESS: Again, you know, you have  
16 to interpret these in their context of what they are  
17 saying. Statements.

18 BY ATTORNEY BROOKS:

19 **Q. Do you believe it to be true or false that women**  
20 **and men differ in many physiological and psychological**  
21 **variables?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: All people are different.

24 BY ATTORNEY BROOKS:

1 BY ATTORNEY BROOKS:

2 **Q. Let me ask you to turn to page 229.**

3 **Q. The first full paragraph begins, quote, despite**  
4 **the fact that biological sex is such a fundamental**  
5 **source of interest specific variation in anatomy and**  
6 **physiology, much basic and clinical science has tended o**  
7 **focus studies on one sex, typically male, closed quote.**

8 **Do you see that language?**

9 A. I do.

10 **Q. And do you understand what is meant by**  
11 **intraspecific variation? Let me offer a suggestion. Do**  
12 **you understand it to refer to variations within the**  
13 **human species?**

14 ATTORNEY BORELLI: Objection to form.

15 THE WITNESS: I think you know again in  
16 context I would need to intraspecific --- intraspecific  
17 could be between me and you. Isolated in this one  
18 sentence, I would need to take a moment to see if it  
19 better explains it if I were to read further.

20 BY ATTORNEY BROOKS:

21 **Q. Do you disagree or agree that biological sex is**  
22 **a fundamental source of variation in anatomy and**  
23 **physiology within the human species?**

24 ATTORNEY BORELLI: Objection, form.

1 THE WITNESS: I'm sorry. I got  
2 sidetracked in my brain. Could you please read the  
3 question?

4 BY ATTORNEY BROOKS:

5 **Q. Yes, I can. Do you agree or disagree that**  
6 **biological sex is the fundamental source of variation in**  
7 **anatomy and physiology within the human cease species?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: There is lots of other  
10 parts of physiology that are completely unrelated to  
11 your reproductive system that is more fundamental.

12 BY ATTORNEY BROOKS:

13 **Q. Dr. Adkins, do you agree or disagree that**  
14 **biological sex is a fundamental source of variation in**  
15 **anatomy and physiology with human species?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: It is one of the variables  
18 within variations.

19 ATTORNEY BROOKS: Let me mark as Exhibit  
20 8 an infographic, if I can use that term. Exhibit 8?

21 VIDEOGRAPHER: Excuse me, Counsel. You  
22 cut out right after Exhibit 8. I didn't hear which  
23 document that was.

24 ATTORNEY BROOKS: It is tab 9 and it is a

1 A. Okay.

2 **Q. In the box at the top it says, and I quote, sex**  
3 **is a biological classification included in our DNA.**  
4 **Males have XY chromosomes and females have XX**  
5 **chromosomes. Sex makes us male or female. Do you see**  
6 **that language?**

7 A. I do.

8 **Q. And it continues, every cell in your body has a**  
9 **sex making up tissues and organs like your skin, brain,**  
10 **heart and stomach. Each cell is either male or female**  
11 **depending on whether you are a man or a woman, closed**  
12 **quote.**

13 **Do you see that?**

14 A. I do.

15 **Q. And then it continues under that with a**  
16 **definition of gender. So my question is --- begins**  
17 **here, the opening statement in this NIH publication says**  
18 **that sex is a biological classification. Do you agree**  
19 **or disagree with that?**

20 ATTORNEY BORELLI: Objection, form.

21 THE WITNESS: You know, there is a whole  
22 literature on --- on this --- the differences in --- in  
23 sex. I --- so biological as opposed to another type of  
24 classification, I agree with that statement.

1 one page infographic, if I may, put out by the National  
2 Institute of Health titled How Sex and Gender Influence  
3 Sex and Disease.

4 ---

5 (Whereupon, Adkins Exhibit 8, NIH  
6 Sex/Gender Infographic, was marked for  
7 identification.)

8 ---

9 BY ATTORNEY BROOKS:

10 **Q. And first let me ask, Dr. Adkins, are you**  
11 **familiar with the National Institute of Health as an**  
12 **organizations?**

13 A. Yes.

14 **Q. That is a government research institute?**

15 A. Yes.

16 **Q. And major grant --- major source of grants,**  
17 **grant making in the health sciences?**

18 A. Yes.

19 **Q. And are you --- were you aware that it has**  
20 **within it an Office of Research on Women's Health?**

21 A. No.

22 **Q. Do you see that this is published by the**  
23 **National Institute of Health, Office of Research on**  
24 **Women's Health?**

1 BY ATTORNEY BROOKS:

2 **Q. It says a little further along that, quote,**  
3 **every cell in your body has a sex, closed quote. Do you**  
4 **agree or disagree with that?**

5 ATTORNEY BORELLI: Objection to the form.

6 THE WITNESS: I agree. And each cell can  
7 be different.

8 BY ATTORNEY BROOKS:

9 **Q. Are you saying that within an individual --- a**  
10 **specific individual each cell can have a different sex?**

11 A. Yes.

12 **Q. This NIH publication tells us that, quote, each**  
13 **cell is either male or female, closed quote. And I take**  
14 **it you simply believe the NIH is wrong about that?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: I think that the nuances  
17 are something that you can't publish in a one-page  
18 documentation when they're not talking about an entire  
19 population.

20 BY ATTORNEY BROOKS:

21 **Q. Under this initial box is a heading that says**  
22 **examples of sex and gender influences. Do you see that?**

23 A. I do.

24 **Q. And it has various categories of things that may**

1 be influenced on one end by sex, which is defined in  
2 this document as a biological classification, and  
3 gender. Do you see that structure of this document?

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: Yeah.

6 BY ATTORNEY BROOKS:

7 Q. And it says if we go down to cardiovascular risk  
8 one of the differences that is identified as based on  
9 sex is that, quote, blood vessels in a woman's heart are  
10 smaller in diameter and much more intricately branched  
11 than those of a man, closed quote. Do you see that?

12 A. Under cardiovascular risk, yeah. Okay.

13 Q. And the NIH gives this as an example of a  
14 physical measurable biological difference that depends  
15 on biological sex.

16 Correct?

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: Well, actually the words  
19 they're using are gender --- gender words, not the words  
20 we would use for sex, you know, female or male or a  
21 variation in between. So I would --- if I were editing  
22 this document, I probably wouldn't have used the word  
23 woman.

24 BY ATTORNEY BROOKS:

1 Q. And if we use the term --- substitute the term  
2 females for women and girls and say females are more  
3 likely to injure their knees when playing sports, do you  
4 believe that to be a scientifically accurate statement?

5 ATTORNEY BORELLI: Objection to form.

6 THE WITNESS: You have to leave some  
7 room. Again, in medicine we're not like 100 percent.  
8 But I agree that portions of females that are typical in  
9 research have been reported to have more frequent knee  
10 injuries.

11 BY ATTORNEY BROOKS:

12 Q. Okay.

13 Let me ask you to find your report, Exhibit 1,  
14 and let's turn to paragraph 15. And there you wrote,  
15 quote, a person's gender identity refers to a person's  
16 inner sense of belonging to a particular gender such as  
17 male or female. And you continue every one has a gender  
18 identity, closed quote. Do you see that language?

19 A. I do.

20 Q. Let me direct your attention to the Endocrine  
21 Society guidelines from 2007, which is Exhibit 4. And  
22 we're going to come back --- if you can make a stack of  
23 most of these, but the 2017 guidelines we will come back  
24 to with some frequency. But we're ---

1 Q. You would have said a female?

2 A. Typical female.

3 Q. Because what --- how the blood vessels in your  
4 heart are structured depend on your sex, not on your  
5 gender identity. Am I correct?

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: There is many variables  
8 that can affect these things and what --- that is one of  
9 them.

10 BY ATTORNEY BROOKS:

11 Q. To your knowledge, gender identity is not a  
12 variable that affects how the blood vessels in one's  
13 heart are structured, does it?

14 ATTORNEY BORELLI: Objection, form.

15 THE WITNESS: Not that I'm aware of.

16 BY ATTORNEY BROOKS:

17 Q. Under the last item here is knee arthritis. Do  
18 you see that heading?

19 A. Yes.

20 Q. I'm sure we'll have the same terminology  
21 discussion, but the language there says, quote, women  
22 and girls are more likely to injure their knees when  
23 playing sports, closed quote. Do you see that language?

24 A. I do.

1 A. Keeping it on top?

2 Q. --- keeping it on top.

3 A. Okay.

4 Q. And there I want to call your attention to page  
5 3873.

6 A. 3873.

7 Q. Right. And in the second column there's a  
8 section headed introduction. And it begins with a  
9 historical review of the concept of gender. And I'm  
10 going to ask you a question beginning with the language  
11 that is two inches from the bottom, two and a half  
12 inches from the bottom that begins these early  
13 researchers. So if you want to kind of glide through  
14 what comes before that, let me know and I'll begin my  
15 questioning.

16 A. Yes, I'll look over it. Thank you.

17 I have read that section.

18 Q. I want to call your attention to a sentence  
19 which my understanding is contrasting against or the  
20 history that begins, quote, some experience themselves  
21 as having both a male and female gender identity whereas  
22 others completely renounce any gender classification,  
23 closed quote. Do you see that language?

24 A. I do.

Page 94

1 **Q. And in your expert opinion, is that an accurate**  
2 **statement?**

3 ATTORNEY BORELLI: Objection, form.

4 THE WITNESS: In my clinical experience I  
5 have met individuals who are --- identify as agender  
6 which would in my mind be similar to this definition,  
7 but I typically ask the patient what their gender means  
8 to them.

9 BY ATTORNEY BROOKS:

10 **Q. Well, do you have any opinion as to whether some**  
11 **individuals experience both a male and female gender**  
12 **identity?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: I have patients that do  
15 that, yes.

16 BY ATTORNEY BROOKS:

17 **Q. And I think you said that --- I don't want to**  
18 **puts words in your mouth. Do you have an opinion**  
19 **whether some individuals report not having any gender,**  
20 **not fitting any gender classification?**

21 ATTORNEY BORELLI: Objection, form.

22 THE WITNESS: I do have patients that  
23 match that description.

24 BY ATTORNEY BROOKS:

Page 96

1 ATTORNEY BROOKS: Let me mark as Exhibit  
2 9 what is tab 10, and that is a one-page statement from  
3 a World Health Organization's website titled Gender and  
4 Health.

5 ---

6 (Whereupon, Adkins Exhibit 9, World  
7 Health Organization Webpage, was marked  
8 for identification.)

9 ---

10 THE WITNESS: Thank you.

11 BY ATTORNEY BROOKS:

12 **Q. Are you familiar with the World Health**  
13 **Organization as an organization?**

14 A. I am.

15 **Q. And do you consider the World Health**  
16 **Organization to be generally a respected source of**  
17 **information on medical and health topics?**

18 ATTORNEY BORELLI: Objection to form.

19 THE WITNESS: My general experience so  
20 far to date is they're reliable.

21 BY ATTORNEY BROOKS:

22 **Q. Well, I will represent to you that this document**  
23 **came off of a World Health Organization website and the**  
24 **web address is at the bottom of the page. I see on the**

Page 95

1 **Q. And this goes on the next sentence to say,**  
2 **quote, there are also reports of individuals**  
3 **experiencing a continuous and rapid involuntary**  
4 **alternation between a male and female identity, closed**  
5 **quote.**

6 **Do you see that?**

7 A. I do.

8 **Q. And do you believe that to be an accurate**  
9 **statement?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: I have not had that  
12 clinical experience. I would have to rely on the, you  
13 know, medical report with that in particular, and I  
14 would probably look at the evidence that was available  
15 ---

16 BY ATTORNEY BROOKS:

17 **Q. Well ---**

18 A. --- prior to making a decision.

19 **Q. --- do you as a practitioner consider it**  
20 **reasonable to rely on that assertion in this 2017**  
21 **Endocrine Society statement guideline?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: I would rely on it to be  
24 something I should at least consider.

Page 97

1 **copy in front of you --- I'll stand by my representation**  
2 **of why mine has it ---.**

3 A. Okay.

4 **Q. This document titled Gender and Health begins**  
5 **gender refers to the characteristics of women, men,**  
6 **girls and boys that are socially constructed, closed**  
7 **quote. Do you see that?**

8 A. I do.

9 **Q. And is that a definition of gender per se that's**  
10 **consistent with how you are used to seeing the term**  
11 **used?**

12 ATTORNEY BORELLI: Objection, form.

13 THE WITNESS: So you know, social  
14 constructs change regularly, so I would say that, you  
15 know, that wouldn't be completely inclusive of current  
16 socially constructed genders, in my experience.

17 BY ATTORNEY BROOKS:

18 **Q. Well, let me direct --- why don't you read that**  
19 **whole first paragraph, which is just three sentences,**  
20 **because I think the World Health Organization raises**  
21 **exactly that point. So I'll ask you to read that?**

22 A. Sure. Sure.

23 ---

24 (WHEREUPON, WITNESS REVIEWS DOCUMENT.)

1 ---

2 THE WITNESS: Okay.

3 BY ATTORNEY BROOKS:

4 **Q. So extending into that paragraph, that**  
 5 **three-sentence paragraph, just that explanation of the**  
 6 **concept of gender fit with how you are used to seeing**  
 7 **the term used in your professional experience?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: So in reading that, my  
 10 understanding of what they are using those specific  
 11 words, men, women, girls and boys are examples. They  
 12 don't comment on other societies. Just so --- in that  
 13 assessment, yes.

14 BY ATTORNEY BROOKS:

15 **Q. All right.**

16 **If we skip down to the third paragraph it**  
 17 **begins gender interacts with but is different from sex,**  
 18 **which refers to the different biological and**  
 19 **psychological characteristics of females, males and**  
 20 **intersex persons, such as chromosomes, hormones and**  
 21 **reproductive organs, closed quote. Do you see that**  
 22 **language?**

23 A. I would like to read it, too, though, if you  
 24 don't mind.

1 **Q. Sure.**

2 A. Yeah. Okay. I have read it.

3 **Q. So first, backing up to the statement, opening**  
 4 **paragraph, that gender is socially constructed, do you**  
 5 **believe that to be an accurate statement?**

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: Gender is a social  
 8 construct, yes.

9 BY ATTORNEY BROOKS:

10 **Q. And then in the third paragraph it states that**  
 11 **gender identity refers to a person's deeply felt**  
 12 **internal and individual experience of gender. Do you**  
 13 **see that?**

14 A. I do.

15 **Q. So gender identity refers to an individual's**  
 16 **experience in relation to gender, which is a social**  
 17 **construct.**

18 **Right?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: I see it, and I would ask  
 21 you to read the question one more time. I just want to  
 22 make sure I'm answering you accurately.

23 BY ATTORNEY BROOKS:

24 **Q. As I think I see in this document really the**

1 **question is as you understand it ---.**

2 A. I think that you have to also include ---.

3 COURT REPORTER: Excuse me. I need to  
 4 interrupt. Excuse me. I'm sorry to interrupt, but  
 5 Counsel, your full question didn't come through on this  
 6 end.

7 ATTORNEY BROOKS: I'll re-ask it. Pardon  
 8 me.

9 ATTORNEY BORELLI: Actually, why don't we  
 10 just address one housekeeping matter. Would you be able  
 11 to identify for the record the URL that appears on your  
 12 copy and whether there is a date of the document or date  
 13 of access just so we have it on the record?

14 ATTORNEY BROOKS: There is no date of  
 15 access. That access is within the last two months. The  
 16 address is  
 17 www.who.int/health-topics/gender#tabequalstab, underline  
 18 one.

19 ATTORNEY BORELLI: Thank you.

20 ATTORNEY BROOKS: I'm glad it wasn't one  
 21 of these four line ones.

22 BY ATTORNEY BROOKS:

23 **Q. And I will re-ask my question.**

24 A. Okay.

1 **Q. The question is, Dr. Adkins, is it consistent**  
 2 **with your understanding that gender identity refers to a**  
 3 **person's individual experience of gender, which is in**  
 4 **turn a social construct?**

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: That doesn't sound to me to  
 7 be a full explanation. Just doesn't sound accurate to  
 8 me. I'm having a hard time.

9 BY ATTORNEY BROOKS:

10 **Q. Then let me not take more time on that.**

11 A. Okay.

12 **Q. You would agree that gender is a social**  
 13 **construct that can change over time.**

14 **Am I right?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: Gender --- so it's a social  
 17 construct, it's true. Gender is, you know, how you ---  
 18 I mean, it's complicated. It involves more things than  
 19 --- and so, you know, if you're talking about gender  
 20 expression, that's different. Someone's gender as they  
 21 understand it for their gender identity is different. I  
 22 mean, I have patients who are assigned a particular sex  
 23 and the family and the physicians assign a gender that  
 24 is more typically correlated with that sex. And then

1 over time those individuals sometimes don't identify  
2 with that gender, and they may change their gender  
3 marker, for example, because their identity really just  
4 doesn't match what we assigned them at birth. I'm not  
5 sure how to give a clearer answer. I'm trying.

6 BY ATTORNEY BROOKS:

7 **Q. Well, so if an individual comes into your office**  
8 **and asserts a gender identity of, let's say, man or**  
9 **both, either one of those, how can a clinician verify**  
10 **whether that individual is accurately understanding his**  
11 **own or their own subjective feelings?**

12 ATTORNEY BORELLI: Objection, form.

13 THE WITNESS: And you know, a gender  
14 again is something that's assigned at birth and it is  
15 what you work with in your life, and so you know, I  
16 would ask them and they could tell me how they were  
17 proceeding in life with regard to their gender  
18 behaviors. That would be how I would probably assess  
19 their gender.

20 BY ATTORNEY BROOKS:

21 **Q. How do you ascertain whether that individual who**  
22 **claims identity of man or both is telling you, the**  
23 **clinician, the truth?**

24 ATTORNEY BORELLI: Objection, form.

1 to form.

2 THE WITNESS: That is how I recall that.

3 BY ATTORNEY BROOKS:

4 **Q. Paragraph right?**

5 A. Yeah. I want to reserve the right to look at it  
6 to be certain. That sounds correct to me at this  
7 moment.

8 **Q. And what does clinically significant distress**  
9 **that impairs important areas of functioning look like in**  
10 **a child?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: Yeah. So you know, it  
13 depends on what they are coming in with. I mean, for  
14 some of my patients, you know, who are, you know,  
15 hyperthyroid, for example, their brain's run really  
16 fast, they can't focus during school, and that would be  
17 impairment in their ability to do their main job, which  
18 is to be in school and learn. So that's one area where  
19 you can have some impairment in their --- it varies from  
20 patient to patient and in each thing we're talking  
21 about.

22 BY ATTORNEY BROOKS:

23 **Q. The example you just gave was impairment**  
24 **resulting from a hyperthyroid condition.**

1 THE WITNESS: So in general, you know,  
2 in pediatrics we have a parental report, and it depends  
3 on the clinical situation. We may or may not have  
4 another health provider's report or a mental health  
5 provider's report. If we have questions, we start to  
6 dig deeper and look at other areas.

7 BY ATTORNEY BROOKS:

8 **Q. Let me call your attention to paragraph 19 in**  
9 **your expert report, Exhibit 1. And there you refer to**  
10 **DSM-V definition of gender dysphoria.**

11 **Do you see that?**

12 A. What paragraph?

13 **Q. Paragraph 19?**

14 A. Yeah.

15 **Q. And you mention that among other things the**  
16 **diagnostic criteria under DSM-V for gender dysphoria**  
17 **includes, quote, clinically significant distress. Do**  
18 **you see that?**

19 A. I do.

20 **Q. And in fact, it includes clinically significant**  
21 **distress that, quote, impairs important areas of**  
22 **functioning, closed quote.**

23 **Am I correct? Do you recall that in DSM-V?**

24 ATTORNEY BORELLI: Objection. Objection

1 **Am I correct?**

2 A. Correct.

3 **Q. What I asked was impairment due to ---**  
4 **attributable to what gender dysphoria looks like in a**  
5 **child.**

6 A. Oh.

7 ATTORNEY BORELLI: I don't want to  
8 interrupt. I think there may have been a misreading of  
9 the language in the paragraph, and I just want to make  
10 sure the record is correct that the final sentence of  
11 that paragraph says in order to be diagnosed with gender  
12 dysphoria, incongruence must persist for at least six  
13 months and be accompanied by clinically significant  
14 distress or impairment in social, occupational or other  
15 important area of functioning.

16 BY ATTORNEY BROOKS:

17 **Q. I, on the other hand, will ask a question that I**  
18 **believe is more closely tracked to the DSM-V language,**  
19 **which is what is clinically significant distress that**  
20 **impairs important area of functioning look like in a**  
21 **young child?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: Okay. I misheard you. I'm  
24 sorry. I didn't hear the gender dysphoria part. I

apologize. So in patients with gender dysphoria sometimes it can be anxiety that keeps them from going to school. Sometimes it can be anxiety that keeps them from using public restrooms. Sometimes it is depression so that they can't get out of bed to function. Sometimes it's just feeling really uncomfortable and --- with how they are being treated and what they're allowed to do in a way that makes it more difficult for them than a person without gender dysphoria.

BY ATTORNEY BROOKS:

**Q. In your practice is a full diagnosis of gender dysphoria under the DSM-V criteria a precondition for recommending or supporting social transitioning?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So in my practice the majority of my patients have socially transitioned before they come to see me in order to improve their gender dysphoria. In general, that is something that their family and their mental health provider decides. Each individual patient is different and we talk through whether that is appropriate for each patient.

BY ATTORNEY BROOKS:

**Q. In your practice is a full DSM-V diagnosis of gender dysphoria a precondition for recommending social**

**prescribing puberty blocker for believed gender dysphoria?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: Well, in the way that you stated it, you're saying that the patient already has gender dysphoria, so yes.

BY ATTORNEY BROOKS:

**Q. In your practice is the full diagnosis of gender dysphoria under the DSM-V criteria a precondition for prescribing puberty blockers as a therapy for gender dysphoria or gender incongruity?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Yes.

BY ATTORNEY BROOKS:

**Q. And in your practice is a full diagnosis of gender dysphoria according to the DSM-V criteria a precondition for prescribing cross sex hormones?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: They are used to relieve dysphoria. Typically that would be what we would use them to do, is to relieve that dysphoria so they would have that diagnosis. On occasion in my practice the incongruence does not necessarily cause dysphoria per se, and yet they still have significant issues that are

**transition?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: No.

BY ATTORNEY BROOKS:

**Q. And in your practice is a full DSM-V gender dysphoria diagnosis a precondition for prescribing puberty blockers?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I use puberty blockers for more than one indication.

BY ATTORNEY BROOKS:

**Q. Let me ask a better question. In your practice is a full DSM-V gender dysphoria diagnosis a precondition for prescribing puberty blockers as a treatment for gender dysphoria?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So my patients are evaluated by mental health providers outside the clinic and inside the clinic. The objective of using puberty blockers can be used to relieve dysphoria and give them time to consider their gender identity.

BY ATTORNEY BROOKS:

**Q. In your practice is a full diagnose of gender dysphoria under the DSM-V criteria a precondition for**

impairing their ability to move forward in their lives in a happy, healthy way. And I might use medications such as gender-affirming hormones in those cases.

BY ATTORNEY BROOKS:

**Q. So if I understand correctly, you're saying that at least some cases in your practice you are willing to prescribe cross sex hormones for individuals who do not suffer from gender dysphoria according to the criteria spelled out in DSM-V?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Every patient is different. Most of my patients have gender dysphoria. All of them have a transgender identity, and I would treat either of those.

BY ATTORNEY BROOKS:

**Q. I think this question can be answered yes or no. Do you prescribe cross sex hormones for some patients who do not suffer from gender dysphoria according to the DSM-V criteria?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I don't think so. I mean, gender-affirming hormones --- I use hormones for a lot of different things. Whether you call them gender affirming or not is --- you know, what is kind of a

1 thing here. I mean, for people with Klinefelter's, who  
 2 are clinically significantly depressed because they have  
 3 low testosterone, I prescribe testosterone to improve  
 4 their mood, their libido, their muscle strength. For  
 5 people who have dysphoria or who have a transgender  
 6 identity, I do prescribe those medications. I think  
 7 that to be precise in my answers I cannot say it as a  
 8 yes or no answer.

9 **Q. Let me ask you to turn to paragraph ten of your**  
 10 **report. There you say I have treated approximately 500**  
 11 **transgender and intersex young people in my career.**

12 **Do you see that?**

13 A. No, that's not how it's written.

14 **Q. I apologize. I was reading to you the second**  
 15 **sentence of paragraph ten, and I believe I read that**  
 16 **---**

17 A. Okay.

18 I'm sorry. I was starting at the beginning.

19 **Q. I understand.**

20 A. Yes.

21 **Q. And let's break that out. Of those 500,**  
 22 **approximately how many suffered from some form of DSD?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: So the --- that I know of,

1 about paying for that sort of thing because they don't  
 2 think it is appropriate to do. So I can't evaluate them  
 3 unless they have a symptom of an intersex condition.  
 4 Those can present even into your 30s and not be evident  
 5 until you are trying to get pregnant. So I think to be  
 6 accurate, that's ---.

7 **Q. To your knowledge, almost all of the children**  
 8 **that you have treated for gender dysphoria did not show**  
 9 **signs of any intersex condition or disorder of sexual**  
 10 **development?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: To best of my knowledge.

13 BY ATTORNEY BROOKS:

14 **Q. Let me call your attention to page three of your**  
 15 **report, which is on page five. And you say there in the**  
 16 **second sentence, quote, all of my patients have suffered**  
 17 **from persistent gender dysphoria.**

18 **Do you see that?**

19 A. Uh-huh (yes).

20 **Q. Now, I just don't understand that because a few**  
 21 **minutes ago you explained to me that some of your**  
 22 **patients suffer from gender dysphoria and some of them**  
 23 **don't. So can you explain to me what you meant by that**  
 24 **statement?**

1 because we don't evaluate every person necessarily for  
 2 an intersex condition, probably --- gosh, it's hard to  
 3 estimate. So I think at least 60 in my clinic and then  
 4 probably in the hospital at least 10, 15 a year. At  
 5 least one a month or so.

6 BY ATTORNEY BROOKS:

7 **Q. Of the 500 transgender intersexual young people**  
 8 **that you treated in your career, how many would you**  
 9 **estimate suffered from some form of disorder of sexual**  
 10 **development?**

11 ATTORNEY BORRELLI: Objection, form.

12 THE WITNESS: Off the top of my head I  
 13 can think of one. I have reviewed a referral for a  
 14 second one. Gosh. With that many patients, that's the  
 15 best I can do. Sorry.

16 BY ATTORNEY BROOKS:

17 **Q. And I take it then that the overwhelming**  
 18 **majority, almost all the children that you have seen and**  
 19 **treated for gender dysphoria did not suffer from any**  
 20 **disorder of sexual development?**

21 A. So at the time of my evaluation of them they  
 22 weren't showing any signs of an intersex condition. I  
 23 don't necessarily test for intersex conditions on every  
 24 person that comes in. Insurance is really kind of funny

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: Yeah. I learn more and  
 3 more every day about the patients who come into my  
 4 clinic. I did state that most of my patients have  
 5 gender dysphoria. I am finding individuals currently in  
 6 my practice who aren't necessarily to the point of  
 7 having that clinically significant criteria that is  
 8 mentioned in the --- for dysphoria that have a  
 9 transgender identification. The majority I would say do  
 10 have dysphoria.

11 BY ATTORNEY BROOKS:

12 **Q. You would now say the majority rather than all?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: I can't think of --- yeah,  
 15 I would say the majority. There would be a very rare  
 16 instance and that's why I mentioned it before.

17 ATTORNEY BORELLI: Counsel, just a quick  
 18 question about timing and a potential break because  
 19 we've been going for a little while.

20 ATTORNEY BROOKS: Right. I'm inclined to  
 21 go --- like from my experience, if you stop early for  
 22 lunch, then it's an awful long afternoon. So I'd be  
 23 inclined to go until 12:30 or so and then break for  
 24 lunch.

Page 114

1 ATTORNEY BORELLI: Does that work for  
2 you? Would you like a break now before we later break  
3 for lunch or what is best for you, Dr. Adkins?

4 THE WITNESS: Well, since I'm not a  
5 breakfast eater, I would prefer to go a little bit  
6 earlier if we can.

7 ATTORNEY BROOKS: We can do it. I just  
8 warn you it gets to be a long afternoon.

9 THE WITNESS: I understand.

10 ATTORNEY BROOKS: Let me finish up the  
11 line of questioning. Well, should we target noon to  
12 stop for lunch?

13 THE WITNESS: That's fine. Thank you.

14 BY ATTORNEY BROOKS:

15 **Q. Let me take you back to the Endocrine Society**  
16 **statement on --- back to the biological variable, which**  
17 **is Exhibit 7. If you would find that, please. And I'll**  
18 **ask you to turn to page 225, second column towards the**  
19 **bottom with the heading that reads biological basis of**  
20 **diversity and sexual/gender development and orientation.**

21 **Do you see that?**

22 A. I do.

23 **Q. And it reads at the beginning given the**  
24 **complexities of the biology of sexual determination and**

Page 116

1 is giving them psychological symptoms that we see, which  
2 is really common in medicine. We see lots of different  
3 medical conditions caused psychological symptoms. I  
4 already mentioned one with hypothyroidism.

5 **Q. In the overwhelming number of cases, transgender**  
6 **identification is not associated with any physical**  
7 **disorder that you as a doctor have become aware of?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: I'm sorry. I got  
10 distracted. Can you repeat it?

11 BY ATTORNEY BROOKS:

12 **Q. Yes. In the overwhelming majority of patients**  
13 **that you have seen, the transgender identity is not**  
14 **associated with any physical disorder that you are aware**  
15 **of.**

16 **Correct?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: I mean, I'm going to need a  
19 minute to think because I have seen so many patients  
20 that I don't --- I guess it sort of depends on how you  
21 define that, right. I am --- distress is physical and  
22 psychological. The difference is physical in that  
23 they're biologically assigned sex and those  
24 characteristics associated are different from their

Page 115

1 **differentiation, comma, it is not surprising that there**  
2 **are dozens of examples of variations or errors in these**  
3 **pathways associated with genetic mutations that are now**  
4 **well known to endocrinologists and geneticists. In**  
5 **medicine these situations are generally termed disorders**  
6 **of sexual development or differences in sexual**  
7 **development, closed quote.**

8 **Do you see that?**

9 A. Yes.

10 **Q. Now, in your opinion, a transgender identity is**  
11 **not a disorder.**

12 **Am I right?**

13 A. It is a normal variation, in my opinion, of huma  
14 --- of humans in general.

15 **Q. It's not a mental disorder?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: So you know, they have in  
18 the past included it in the DSM, which is categorized as  
19 those sorts of things. As far as like psychological,  
20 there's such over lap between psychological and the  
21 physical --- I guess the best word I can use, but that  
22 it's hard to --- it's hard to say. You know, I think  
23 people are moving more towards that it is more of a  
24 medical problem that is occurring within the person that

Page 117

1 gender identity. So it's a bit of a mixture.

2 BY ATTORNEY BROOKS:

3 **Q. Many individuals who suffer from disorder of**  
4 **sexual development do not experience gender identity**  
5 **that is discordant with their chromosomal sex.**

6 **Correct?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: Some do, yes. That is true  
9 for some.

10 BY ATTORNEY BROOKS:

11 **Q. Many individuals who experience a transgender**  
12 **identity --- I'm sorry. Many individuals who suffer**  
13 **from a disorder of sexual development do not experience**  
14 **a gender identity that is discordant with their**  
15 **chromosomal sex.**

16 **Correct?**

17 ATTORNEY BORELLI: Objection to form.

18 THE WITNESS: So there's, you know, like  
19 100 different variations. Some are more likely to have  
20 questions about their gender identity than others. It  
21 varies by diagnosis.

22 BY ATTORNEY BROOKS:

23 **Q. Okay.**

24 **But my question is a high level one. It is**

1 true, is it not, that many individuals who suffer from a  
2 disorder of sexual development do not experience gender  
3 identity that is discordant with their chromosomal sex?

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: In the medical literature  
6 the reports vary. Some of the conditions are 90 of them  
7 their identity matches with their chromosomal sex and in  
8 some cases it's like 30 to 40 percent.

9 BY ATTORNEY BROOKS:

10 Q. And as you have testified, many individuals who  
11 experience transgender identity do not suffer from any  
12 identified disorders of sexual development?

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: I answered that question  
15 already, yeah.

16 BY ATTORNEY BROOKS:

17 Q. The answer is yes?

18 A. Yes, I answered the question already.

19 Q. For clarity I would like you to answer it again.

20 ATTORNEY BORELLI: Objection, form.

21 THE WITNESS: Can you repeat it then?

22 BY ATTORNEY BROOKS:

23 Q. Yes. Many individuals who experience a  
24 transgender identity do not suffer from any known

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: I don't know B.P.J.. I

3 have not evaluated B.P.J.. I can't say that about  
4 B.P.J..

5 BY ATTORNEY BROOKS:

6 Q. And in fact, you don't know whether any child  
7 who is chromosomally XY but suffers from a disorder of  
8 sexual development has ever sought to compete in female  
9 athletics in West Virginia, do you?

10 ATTORNEY BORELLI: Objection to form.

11 THE WITNESS: There are so many people  
12 who have competed or tried to compete over the years. I  
13 have not seen a documentation specifically of West  
14 Virginia. It's common in athletics.

15 BY ATTORNEY BROOKS:

16 Q. You are not aware of a single case that has ever  
17 occurred in West Virginia of a chromosomally XY child  
18 seeking to compete in female athletics based on a ---  
19 let me ask that question again. You're not aware of any  
20 specific instance in which an X --- chromosomally XY  
21 child who suffers from a disorder of sexual development  
22 has sought to compete in female athletics in West  
23 Virginia up to the present?

24 ATTORNEY BORELLI: Objection to form.

1 disorder of sexual development?

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: In my experience that is  
4 true.

5 BY ATTORNEY BROOKS:

6 Q. You have no knowledge as to the number of  
7 children who suffer from a disorder of sexual  
8 development who presently attend schools or colleges in  
9 West Virginia, do you?

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: I can only rely on the  
12 prevalence that's recorded in the medical literature and  
13 then assume that West Virginia has the population base  
14 that is similar to those medical reports.

15 BY ATTORNEY BROOKS:

16 Q. You, yourself, don't have any actual knowledge  
17 either way on that.

18 Correct?

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: I have not been given a  
21 list of the number of individuals, no.

22 BY ATTORNEY BROOKS:

23 Q. And you are not opining that B.P.J. suffers from  
24 any disorder of sexual development, are you?

1 THE WITNESS: So some people die with  
2 chromosomes XY and look completely female and never  
3 knew. So I can't say that anyone could definitely say  
4 that, including myself.

5 BY ATTORNEY BROOKS:

6 Q. Well, my question was you are not aware of any  
7 case of an XY individual who suffered from a disorder of  
8 sexual development seeking to compete in female  
9 athletics in West Virginia.

10 Right?

11 ATTORNEY BORELLI: Objection to form.

12 THE WITNESS: Correct.

13 BY ATTORNEY BROOKS:

14 Q. And so let me ask you --- a substantial portion  
15 of your expert report goes into all sorts of detail  
16 about disorders of sexual development.

17 Correct?

18 A. Correct.

19 Q. In your understanding, what is the point? What  
20 does that have to do with any opinion you are offering  
21 about issues in this case?

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: So the folks who have  
24 differences of sex development have really been our tool

Page 122

1 within medicine to understand gender identity and how it  
 2 developed over time, especially when there may be some  
 3 difference in the effects of the chromosomes, the  
 4 hormonal expression and the biological external  
 5 reproductive genitalia. And it elicits --- kind of  
 6 shows us that there can be some variations that identity  
 7 that you might have --- I'm sorry, sex that you might  
 8 assign at birth based on one of these categorical things  
 9 or a mixture of them may not be exactly what a person  
 10 identifies at birth.

11 For example, there are individuals who  
 12 are born who never had any hormones, they don't have  
 13 external genitalia at all when they're born, and so how  
 14 do you decide what sex to assign that person and thus  
 15 what gender to assign that person, and so it --- it  
 16 helps us understand that there are lots of different  
 17 things that go into determining a gender identity and  
 18 you may not know it right at birth, certainly not at  
 19 conception, but you may begin to understand it as the  
 20 person grows older.

21 And so it's important to know that  
 22 because when there are differences between those two  
 23 things it can cause significant distress and harm to the  
 24 individual as they get older if those two are not

Page 124

1 **is unreasonable to the extent that it prevents even a**  
 2 **single transgender youth from playing in a division**  
 3 **consistent with their gender identity?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: I'm sorry. That wasn't  
 6 clear. Can you ---?

7 BY ATTORNEY BROOKS:

8 **Q. Are you offering an opinion that the West**  
 9 **Virginia law is unreasonable to the extent it prevents**  
 10 **even a single transgender youth from playing in the**  
 11 **division consistent with their gender identity?**

12 ATTORNEY BORELLI: Objection, form.

13 THE WITNESS: Yes.

14 BY ATTORNEY BROOKS:

15 **Q. Are you offering an opinion that West Virginia**  
 16 **does not have a strong interest in ensuring fair and**  
 17 **safe competition for females in their schools and**  
 18 **universities?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: I think that would require  
 21 me to have to, you know, talk with them about that and  
 22 understand a little bit better. I would hope it would  
 23 be every one that they were trying to keep safe.

24 BY ATTORNEY BROOKS:

Page 123

1 matching.

2 BY ATTORNEY BROOKS:

3 **Q. Let me take you to paragraph 28 of your expert**  
 4 **report. At the end of that paragraph you state I know**  
 5 **from experience with my patients that it can be**  
 6 **extremely harmful for transgender youth to be excluded**  
 7 **from the team consistent with their transgender**  
 8 **identity. Do you see that?**

9 A. It actually says with their gender identity.

10 **Q. If I misspoke, I apologize. For the record, let**  
 11 **me just do it again. Quote, I know from experience with**  
 12 **my patients that it can be extremely harmful for**  
 13 **transgender youth to be excluded from the team**  
 14 **consistent with their gender identity, closed quote.**

15 **Do you see that language?**

16 A. I do.

17 **Q. Let me just ask were you a varsity high school**  
 18 **or college athlete yourself?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: I was.

21 BY ATTORNEY BROOKS:

22 **Q. Now, let me ask what you understand to be the**  
 23 **significance of that statement, that is are you offering**  
 24 **an opinion in this litigation that the West Virginia law**

Page 125

1 **Q. Are you offering an opinion that West Virginia**  
 2 **law is not a reasonable measure to ensure fair and safe**  
 3 **competition for females in schools and colleges?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: Again, the language is ---  
 6 it's not really clear with the female who uses the word  
 7 female. It's like using the word sex. It's just not  
 8 clear.

9 BY ATTORNEY BROOKS:

10 **Q. Dr. Adkins, I used the word female because**  
 11 **earlier in one of these papers where it said woman you**  
 12 **said it would work if they said female as a sex**  
 13 **indicator to be distinguished from gender identity.**

14 **Do you recall that testimony?**

15 A. I do.

16 **Q. Let me ask the question again using the term**  
 17 **female in the way that you meant in that earlier**  
 18 **testimony. Are you offering an opinion that the West**  
 19 **Virginia law is not a reasonable measure to ensure fair**  
 20 **and safe competition for females in schools and colleges**  
 21 **in West Virginia?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: Yes.

24 BY ATTORNEY BROOKS:

**Q. Can you tell me the examples that you had in mind when you said I know from experience that it can be extremely harmful for transgender youth to be excluded from the team consistent with their gender identity?**

A. I can.

**Q. Please do.**

A. I have patients who have participated in sports with the teams that they identify as. Their fellow students only know them as the gender that they identify with and that they express. If they were asked to participate on a team that matched their sex assigned at birth, then these individuals would, for one, would be on the boys' team and then everyone in school would know that they were transgender. They don't have to know that. It is not any of their business.

Once they are identified as transgender, they are at high risk for being bullied, harassed, sexually assaulted, and leaving school, which leads to poor jobs, poor insurance, homelessness. There are any number of reasons that I would want my patient to be able to participate on the team that identifies with their gender identity to keep them healthy.

**Q. Dr. Adkins, your answer said if they were required to play on the team corresponding to their I'll**

**say chromosomal sex, their natal sex, which suggests you have not actually seen it happen. Is there a single case you can point me to in which you have observed a patient harmed by being excluded from the team consistent with their gender identity?**

A. Yes.

**Q. Can you tell me that area?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Well, one of my patients who had been on middle school sports teams that matched their gender identity was then asked to change. And they didn't feel comfortable going with the other individuals because their identity would be discovered, their --- individuals would know that they were transgender. No one at the time knew and still to this day don't know because they chose not to participate rather than be on the team that didn't match their gender identity.

BY ATTORNEY BROOKS:

**Q. And when and what state did these events occur?**

A. North Carolina.

ATTORNEY BORELLI: Objection to form.

BY ATTORNEY BROOKS:

**Q. That's where, when? That's your Counsel's**

**objection.**

A. North Carolina in --- for this particular patient, three years ago. I have patients that come in every day who this applies.

**Q. Dr. Adkins, given that you're testifying under oath and trying to be accurate, is it true that you have patients come in every day that this applies to?**

ATTORNEY BORELLI: Objection, form.

BY ATTORNEY BROOKS:

**Q. Aren't we getting a little carried away here?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I do like to be precise.

BY ATTORNEY BROOKS:

**Q. Thank you.**

A. In clinic, most days when I'm in clinic I see a patient who doesn't participate in athletics because of the requirement that they go to participate in an area that is for their assigned sex at birth. Most days I'm in a gender clinic.

**Q. And what you state in your document, in your report here, is that you know from experience that being excluded from the team consistent with their gender identity can be, quote, extremely harmful to transgender youth. You have described to me students who choose not**

**to participate in athletics. Beyond that, can you give me examples of extreme harm that has resulted from such policies?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: You know, some of that would require a bit of speculation because I wouldn't know what would happen to those individuals if they remain in the sport.

BY ATTORNEY BROOKS:

**Q. I'm not asking you to speculate.**

A. So can you re-ask the question so I can kind of figure out how to answer it better.

**Q. I'll re-ask it and maybe that you're not able to answer it, but can you identify for me specific extreme harm that individual patients have suffered as a result of not being able to participate in the team consistent with their gender identity?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So I have had patients who have no longer participated in sports, gained weight, become obese and developed type two diabetes. I have seen that around --- I can think of at least two examples. And then, you know, that's a chronic life long disease that can lead to amputation and all kinds

Page 130

1 of other harms. And let's see, what other things.

2 I have seen patients with --- who were no  
3 longer happy at their school and because the time that  
4 they were identified as transgender were asked to leave  
5 their sport, their friend groups changed. And you know,  
6 it's tough in school. There are kids who have --- and  
7 that kind of can push them down the slope of suicidal  
8 ideation and depression and those sorts of things. I  
9 mean, I have to think longer for other examples. Those  
10 are two.

11 BY ATTORNEY BROOKS:

12 **Q. Rather than starting something else, should we**  
13 **break now for lunch?**

14 ATTORNEY BORELLI: That works.

15 VIDEOGRAPHER: Going off the record. The  
16 current time reads 11:54 a.m. Eastern Standard Time.  
17 OFF VIDEO

18 ---  
19 (WHEREUPON, A PAUSE IN THE RECORD WAS HELD.)

20 ---

21 ON VIDEO

22 VIDEOGRAPHER: We're back on the record.  
23 Current time reads 12:57 p.m. Eastern Standard Time.

24 BY ATTORNEY BROOKS:

Page 132

1 **recently the NCAA policy for a decade at the collegiate**  
2 **level was that XX --- XY individuals, males, to use that**  
3 **terminology, could compete based on gender identity in**  
4 **women's divisions only after they had suppressed**  
5 **testosterone for at least a year?**

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: I don't know the details of  
8 NCAA. I just don't.

9 BY ATTORNEY BROOKS:

10 **Q. Are you aware generally that some athletic**  
11 **leagues have a requirement that biological males may**  
12 **compete in women's athletics based on gender identity**  
13 **only after suppressing testosterone for some period of**  
14 **time?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: I have heard that there are  
17 individuals who are allowed to participate based on  
18 their gender identity and that there's some comment  
19 about hormone suppression.

20 BY ATTORNEY BROOKS:

21 **Q. And do you have college-age transgender patients**  
22 **yourself?**

23 A. I do.

24 **Q. Does your statement that we looked at in**

Page 131

1 **Q. Okay.**

2 **Dr. Adkins, welcome back from lunch. On we go.**  
3 **We're going to have a long afternoon. Let me mark as**  
4 **Exhibit 10 what we have previously identified as tab 16,**  
5 **which is an article dated January 10, 2022 from the**  
6 **Washington Post entitled A Transgender College Swimmer**  
7 **is Shattering Records, Sparking a Debate Over Fairness.**

8 ---  
9 (Whereupon, Adkins Exhibit 10, 1/10/22  
10 Washington Post Article, was marked for  
11 identification.)

12 ---

13 BY ATTORNEY BROOKS:

14 **Q. Dr. Adkins, let me just ask generally, you're**  
15 **aware of recent events in the news involving Leah**  
16 **Thomas's competition in NCAA swimming.**

17 **Correct?**

18 ATTORNEY BORELLI: Objection, form.

19 THE WITNESS: I am aware of various  
20 pieces of that.

21 BY ATTORNEY BROOKS:

22 **Q. And I'm not going to try to turn you into an**  
23 **expert on Lia Thomas, but you're just aware of that**  
24 **narrative. Are you generally aware that at least until**

Page 133

1 **paragraph 28 of your report that it can be extremely**  
2 **harmful for transgender youth to be excluded from the**  
3 **team consistent with their gender identity hold true in**  
4 **your opinion at to collegiate level? And I was quoting**  
5 **from paragraph 29.**

6 ATTORNEY BORELLI: To clarify, you just  
7 said 29 --- 28, paragraph 28?

8 ATTORNEY BROOKS: It is paragraph 28. I  
9 apologize.

10 ATTORNEY BORELLI: Thank you. I can't  
11 remember if I lodged an objection. Objection to form.

12 THE WITNESS: And the question was?

13 BY ATTORNEY BROOKS:

14 **Q. The question was does your assertion in**  
15 **paragraph 28 of your report that you know from**  
16 **experience the patients --- that it can be extremely**  
17 **harmful for transgender youth to be excluded from the**  
18 **team consistent with their gender identity apply to**  
19 **college-age individuals as well as high school or**  
20 **younger individuals?**

21 ATTORNEY BORELLI: Objection, form.

22 THE WITNESS: In my experience, that ---  
23 yes.

24 BY ATTORNEY BROOKS:

**Q. Do you have any opinion as to whether a policy that requires biologically male athletes to suppress testosterone for a certain period of time or to a certain level of testosterone prior to competing in women's or girls' athletics is reasonable or unreasonable?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So you're asking me if that's my opinion? I'm sorry. Could you just repeat the question?

BY ATTORNEY BROOKS:

**Q. Do you have an opinion --- do you have an opinion as to whether a policy that requires biologically male athletes to suppress testosterone either for a certain period of time or down to a certain level before they can be eligible to compete in women's athletics based on gender identity is reasonable or unreasonable?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: It gets tricky. I am --- you know, when you start throwing in sort of people with PCOS and people with intersex conditions and --- it gets tricky. So it's harder for me to answer.

I think the question was do I have an

THE WITNESS: I think you misunderstood the answer that I gave. It would really depend on a specific case.

BY ATTORNEY BROOKS:

**Q. Well, let's look at a specific case. I have put in front of you Exhibit 10, this Washington Post article from January 10, 2022 about Lia Thomas, who, according to the headline, is shattering records. Let me ask you to turn in that article to page three. And there it --- if we look at the third paragraph, the one that begins her fastest 200 yard freestyle, and the second sentence --- or the third sentence says that's the fastest time by any female college swimmer this year, .64 seconds faster than Olympian Torri Huske. And it continues, quote, Thomas has also posted the nation's best 500 yard freestyle, timed this season at four minutes, 34.06 seconds, nearly three seconds faster than Olympian Brooke Forde.**

**Do you see that?**

A. Uh-huh (yes).

**Q. And these records were set after Lia Thomas had qualified under the NCAA requirement of testosterone suppression for one year. So my question on the specific sport for you is, is it your view that a policy**

opinion if it's reasonable or not reasonable? Is that the question?

BY ATTORNEY BROOKS:

**Q. That is.**

A. Okay.

In some cases it might be reasonable and some cases it might not be reasonable.

**Q. If we put on one side and exclude from consideration individuals who suffer from any form of disorder of sexual development, do you believe that a policy that requires biologically male athletes to suppress testosterone either for a certain period of time or down to a certain level before they can be eligible to play in women's athletics based on gender identity is reasonable or unreasonable?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So you know, for those who are assigned male at birth, it depends on where they are, you know, and what sport they're doing and what's involved. There are a number of caveats that could be thrown in there along those lines.

BY ATTORNEY BROOKS:

**Q. Is it you don't know what you think about that?**

ATTORNEY BORELLI: Objection to form.

**that permits Thomas to compete in the women's division against competitors who are biologically female is fair?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So you will note in the paragraph above it also says that her time slowed down once she had this happened and she was suppressing her testosterone. You know, I --- I don't want to use that word. There are so many things that go into athletic performance and your time that's not totally related to your sex assignment at birth or your current hormonal status, practice, you know, training, whether you had an opportunity to get started at a young age, a lot of variables that aren't related to their current hormones.

BY ATTORNEY BROOKS:

**Q. Do you have an opinion as to whether a policy that permits Lia Thomas to compete against those born female in swimming is fair?**

ATTORNEY BORELLI: Objection to form.

Counsel, I think we're starting to get outside the scope. The witness can answer this question if she can, but we're treading on that territory.

THE WITNESS: So in that there are very few transgender individuals who are involved and there are lots and lots and lots of opportunities for those

1 assigned female at birth to compete, I think it is fair.

2 BY ATTORNEY BROOKS:

3 **Q. And let me call your attention two paragraphs**  
 4 **down where it begins everybody wants, and quoting**  
 5 **Michael Joyner, who identifies as a physiologist at the**  
 6 **Mayo Clinic. Are you familiar with the reputation of**  
 7 **the Mayo Clinic?**

8 A. Yes.

9 **Q. It is a high reputation.**

10 **Am I correct?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: In general, people think it  
 13 has a good reputation.

14 BY ATTORNEY BROOKS:

15 **Q. If you read this paragraph, Dr. Joyner says,**  
 16 **quote, everybody wants to maximize each individual's**  
 17 **opportunity to participate and be as inclusive as**  
 18 **possible, one of the researchers, Michael Joyner, a**  
 19 **physiologist at the Mayo Clinic, said in an interview.**  
 20 **And his quote continues, but how do you balance that**  
 21 **inclusion at the individual level with the fairness to**  
 22 **the entire field? That's really the split the baby**  
 23 **question, closed quote.**

24 **Do you see that language?**

1 A. I do.

2 **Q. Do you agree that the question of fairness that**  
 3 **Dr. Joyner addresses there is, in fact, a tough question**  
 4 **on which reasonable people could disagree?**

5 ATTORNEY BORELLI: Objection, form. And  
 6 counsel, I need to renew my objection as to scope.

7 ATTORNEY BROOKS: You can have a standing  
 8 objection as to scope, but I can pursue this line of  
 9 questioning.

10 THE WITNESS: I would like to take a  
 11 moment to read the whole article, please.

12 ATTORNEY BORELLI: Counsel, can you point  
 13 me to the portion of the report where she offers  
 14 opinions about things?

15 ATTORNEY BROOKS: She has offered the  
 16 opinion in the report that denying participation is  
 17 extremely harmful. She has testified on the record that  
 18 in her view, a policy that permits even one transgender  
 19 individual from playing according to their gender  
 20 identity, that she has an opinion, but she is offering  
 21 an opinion that that is an unreasonable policy. I  
 22 intend to examine that thoroughly. Scope is not tightly  
 23 limited on expert depositions, I assure you.

24 ATTORNEY BORELLI: I'm going to stand on

1 my objection. We'll see where the line of questioning  
 2 goes and we'll confer again if we need to.

3 ATTORNEY TRYON: This is Dave Tryon. I  
 4 would ask that if there are further speaking objections  
 5 or discussions about scope, it be done outside the  
 6 presence of the witness.

7 BY ATTORNEY BROOKS:

8 **Q. Let me ask you this without taking the time ---**  
 9 **without reading the entire document, do you agree or**  
 10 **disagree with Doctor Joyner that the question of whether**  
 11 **a biologically male individual such as Lia Thomas should**  
 12 **be permitted to compete in the women's division against**  
 13 **biological females is a tough question that reasonable**  
 14 **people can differ?**

15 ATTORNEY BORELLI: Objection to form.

16 ATTORNEY BROOKS: That's enough. That's  
 17 all you may say.

18 ATTORNEY BORELLI: Excuse me. Counsel,  
 19 the witness has ---.

20 ATTORNEY BROOKS: You may say objection  
 21 to form.

22 ATTORNEY BORELLI: The witness has ---  
 23 the witness asked to read the entire document.

24 ATTORNEY BROOKS: I am asking a question

1 free and apart from the document. And I'm entitled to  
 2 do that.

3 ATTORNEY BORELLI: I'm not persuaded that  
 4 this is free and apart from the document.

5 ATTORNEY BROOKS: I will make it 100  
 6 percent apart from the document.

7 ATTORNEY BORELLI: Can you please restate  
 8 the question to do that? Thank you.

9 BY ATTORNEY BROOKS:

10 **Q. Dr. Adkins, do you agree that the question of**  
 11 **whether a biological male such as Lia Thomas should be**  
 12 **permitted to compete against biological females in the**  
 13 **collegiate level is a tough question on which reasonable**  
 14 **people can differ?**

15 ATTORNEY BORELLI: Objection, form.  
 16 Counsel, you just put an article ---.

17 ATTORNEY BROOKS: That's enough of the  
 18 speaking objection. I can take the article back away  
 19 from the witness. My question makes no reference to the  
 20 article.

21 ATTORNEY BORELLI: Your question makes  
 22 reference to ---.

23 ATTORNEY BROOKS: Counsel, that's enough  
 24 speaking objections. You are violating the Federal

Rules.

ATTORNEY BORELLI: I strongly disagree with that characterization. I don't think that's correct. You're asking questions about a subject of the article. Physically removing the article from the witness doesn't remove that question from the subject of the article.

ATTORNEY BROOKS: I don't have to show the witness every article about a topic. The witness is aware of Lia Thomas. I'm asking a question about Lia Thomas and competitive swimming. The witness can answer.

ATTORNEY BORELLI: I stand on my objection.

ATTORNEY BROOKS: You can do so.

THE WITNESS: Sorry. Thank you.

You know, everybody has their opinion based on their experience and their knowledge and they're allowed to state that and confer with others about it. Whether or not it is reasonable is a whole other question, and that involves perspective and background. So with that caveat, I could see people having different opinions on this particular matter.

BY ATTORNEY BROOKS:

**harmful for patients, deeply harmful, for transgender youth to be excluded from the team consistent with their gender identity. In your view is a policy that requires transgender youth who are biologically male to suppress testosterone before they can be eligible to compete on a team consistent with their gender identity extremely harmful to youth?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I was trying to catch up with you with finding the page.

BY ATTORNEY BROOKS:

**Q. That was a complicated question. I will ask it again.**

A. Thank you.

**Q. In your view is a policy that requires a biological male who experiences a female gender identity to suppress testosterone prior to becoming eligible to compete in the women's division extremely harmful?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Suppression of the testosterone for my practice isn't the --- you know, the harm. It is the exclusion that does most of the harm. I think I answered that.

BY ATTORNEY BROOKS:

**Q. Thank you.**

ATTORNEY BROOKS: Can we mark as Exhibit 11 a document previously identified as tab 17, article from the publication named Out Sports that is dated January 9, 2022.

---

(Whereupon, Adkins Exhibit 11, 1/9/22 Out Sports Article, was marked for identification.)

---

BY ATTORNEY BROOKS:

**Q. Dr. Adkins, have you heard the name Iszac Henig?**

A. No.

**Q. Did you hear any news items that a transgender male competing in the female division that is genetic female, male identity, transgender male competing in the female division, beat Lia Thomas, a transgender female competing in the female division, in certain races? Have you heard that?**

A. No.

ATTORNEY BORELLI: Objection, form.

BY ATTORNEY BROOKS:

**Q. All right.**

**You stated in paragraph 28 that it can be**

**Q. Let me try to --- in light of what you just said, let me ask a better question. In your view, is a policy that excludes a biological male who identifies as a woman from competition in the women's division unless and until that biological male has suppressed testosterone extremely harmful?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: So the sex assigned at birth for this person would be male and would need time to suppress testosterone, which takes time and leads to limitations in participation of sports, in competition. I think that disadvantages most athletes if they have to take time off for any kind of medical treatment for their preparation. In that fashion it would be harmful to the athlete.

BY ATTORNEY BROOKS:

**Q. And I believe you testified you don't have any simple single opinion as to whether it would nevertheless be reasonable despite being harmful to that athlete?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: I don't think that's what I said.

BY ATTORNEY BROOKS:

Page 146

**Q. All right.**

Then I'll ask a different to avoid unclarity. Do you have an opinion as to whether, despite the harm that you have described, a policy that requires suppression of testosterone in order for such an individual to be eligible to compete in a women's division is reasonable?

ATTORNEY BORELLI: Objection to form.

THE WITNESS: That's complicated. I apologize for not answering yes or no. I just --- sometimes you get lost in your question. So I don't think it's reasonable to ask them not to participate. They need time to practice and participate like all their peers that are practicing and competing at the time.

BY ATTORNEY BROOKS:

**Q. So your testimony as you sit here today is that even as a biologically male athletes, natal male athletes who have not suppressed testosterone at all, it is not reasonable to exclude them from participation in the women's division?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: To those who are assigned female at birth, you're again going to cause them harm

Page 148

THE WITNESS: For an assigned male at birth, suppressing testosterone, so we're clear because you used the word they in that particular question, I think it is unreasonable for them to be taken out of their sport. I think it causes harm. We see evidence that it causes harm with regard to depression, anxiety, suicidality. It also causes metabolic harm, changes in the performance.

ATTORNEY BROOKS: Let me mark this Exhibit 11, an article by Duke Professor Doriane Lambelet Coleman, Michael Joyner and Donna Lopiano, the Duke Journal of Gender Law and Policy.

— — —

(Whereupon, Adkins Exhibit 11, Duke  
Journal of Gender Law and Policy  
Article, was marked for identification.)

— — —

VIDEOGRAPHER: Counsel, I didn't fully catch which document that was? Did you say it was tab 19?

ATTORNEY BROOKS: It is tab 19, that's correct.

VIDEOGRAPHER: Thank you.

BY ATTORNEY BROOKS:

Page 147

by not allowing them to participate and not be affirmed in their gender. That --- part of it is a big part of what it means to improve their overall health and what we do to care for these individuals. You're also marking them by saying that they are, you know, transgender and that is going to cause all kinds of kerfuffle and people are not nice to them. It can cause extreme harm to them in that way.

BY ATTORNEY BROOKS:

**Q. In the beginning of your answer you referred to individuals identified as female at birth.**

A. Assigned female at birth.

**Q. And I think that your answer was speaking to individuals who are assigned male at birth.**

A. Applies to both.

ATTORNEY BORELLI: Objection, form.

BY ATTORNEY BROOKS:

**Q. Then let me re-ask my question because I asked about individuals assigned male at birth. As to those individuals, is it your opinion that a policy that requires them to suppress testosterone prior to becoming eligible for participation in the women's division or high school level girls division is unreasonable?**

ATTORNEY BORELLI: Objection, form.

Page 149

Q. Dr. Adkins, let me ask whether you have before now been aware of this article by Duke Professor Coleman and others?

A. I have heard of an article, yes.

**Q. Do you know Professor Coleman?**

A. I met Professor Coleman once.

**Q. And have you ever seen this article before today?**

A. I haven't looked at it.

Q. Probably my questioning about it will be very short. Let me ask you to turn to page 88. At the very bottom of page 88 is a sentence that runs over into 89 that reads as follows. If elite sport were coed or competition were open, even the best female would be rendered invisible by the sea of men and boys who would surpass her, closed quote. Do you see that language?

A. I do.

**Q. Do you have the expertise to evaluate whether that is true or false?**

ATTORNEY BORELLI: Object to form.

THE WITNESS: The --- well, again, you are picking one sentence out of a whole article. And I know that Dr. Coleman has actually called into question some of the information from this report in particular.

1 And without knowing which things I can't really rely on  
2 this document to say whether it's true. And that's not  
3 --- that's her expertise.

4 BY ATTORNEY BROOKS:

5 **Q. Well, that's my question. Do you believe that**  
6 **it is within your expertise to evaluate that sort of**  
7 **question about sporting performance?**

8 ATTORNEY BORELLI: Object to the form.

9 THE WITNESS: Again, you are picking one  
10 sentence. I have some professional experience with  
11 assisting people in improving their physiology with  
12 regard to, you know, muscle mass, fat mass. Sport would  
13 be outside what I would have to say --- this  
14 specifically.

15 BY ATTORNEY BROOKS:

16 **Q. I'm not sure that was a compete sentence, let me**  
17 **ask a follow-up question. Is it the case that it is ---**  
18 **you consider it outside your professional expertise to**  
19 **evaluate the truth or falsity of this supposed assertion**  
20 **that, quote, if elite sport were coed or competition**  
21 **were open, even the best female would be rendered**  
22 **invisible by the sea of men and boys who would surpass**  
23 **her, closed quote?**

24 ATTORNEY BORELLI: Object to form.

1 information regarding this. I don't think that there's  
2 a way to answer that question with the data that we have  
3 at this time.

4 BY ATTORNEY BROOKS:

5 **Q. Is it true in your practice that most of your**  
6 **biologically male patients present at your clinic let's**  
7 **say after age 13?**

8 ATTORNEY BORELLI: Object to form.

9 THE WITNESS: Most of my patients who are  
10 assigned which at birth did you say?

11 BY ATTORNEY BROOKS:

12 **Q. Male.**

13 A. After age what again?

14 **Q. I chose 13.**

15 ATTORNEY BORELLI: Same objection.

16 THE WITNESS: I would agree with that.

17 BY ATTORNEY BROOKS:

18 **Q. And implications of that are that those**  
19 **individuals have already experienced --- well, let me**  
20 **ask it differently. In your experience or based on your**  
21 **training, either one, on average what Tanner stage are**  
22 **boys at by the time they have finished their 13th year?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: So assigned male at birth?

1 THE WITNESS: That's not been my  
2 experience. That's not what we're seeing in sports. I  
3 can't say anything else about whether or not I could  
4 assess it. That would be my only way to assess it based  
5 on my experience.

6 BY ATTORNEY BROOKS:

7 **Q. What is your professional training or research**  
8 **that qualifies you to evaluate the impact that would be**  
9 **experienced in athletics on biological women if sport**  
10 **were coed or competition were open?**

11 ATTORNEY BORELLI: Objection to form.

12 THE WITNESS: Yeah. I don't study  
13 sports.

14 BY ATTORNEY BROOKS:

15 **Q. You are an endocrinologist by training.**  
16 **Is that correct?**

17 A. I am.

18 **Q. Do you have an expert opinion as to what lasting**  
19 **or legacy --- strength and athletic capability if any**  
20 **way natal males continue to enjoy over natal females**  
21 **after suppressing testosterone?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: So there's a lack of  
24 research in this area. I feel like we need more

1 BY ATTORNEY BROOKS:

2 **Q. Correct.**

3 A. The average at 13 is Tanner 3.

4 **Q. By the end of age 13 you would say Tanner 3?**

5 A. It is really 13 and a half is what the published  
6 literature says.

7 **Q. So presumably by the end of their 13th year,**  
8 **when they're older than 13 they're either in a later**  
9 **stage of Tanner stage 3 or moving into Tanner stage 4?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: On average, but there is  
12 such a wide variety of --- they can present with puberty  
13 from 9 to 14. And they all move differently at  
14 different rates and different times, so there's a lot of  
15 variety in the 13 and a half year olds I see in my  
16 clinic who are assigned male at birth.

17 BY ATTORNEY BROOKS:

18 **Q. And my question was about averages. So on**  
19 **average, by the end of the 13th year the patients you**  
20 **see would be towards the end of Tanner stage 3 or**  
21 **entering into Tanner stage 4?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: On average, yeah.

24 BY ATTORNEY BROOKS:

**Q. And by that time those biologically male who have under gone effects on skeleton, on height, on musculature, typical of or sometimes referred to as verilization.**

**Correct?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So at 13 and a half the average assigned male at birth is dead center their growth spurt, so they've only gone through about half of it. They still have about half of it left.

BY ATTORNEY BROOKS:

**Q. Okay.**

**And do you have any knowledge as to whether they have also undergone changes in heart and lung size and bone strength that are typical of male puberty?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So I can't comment about the heart and the lung. The lung size is typically proportioned to the body size. So in that way, halfway. Bone strength, however, there's more information about. And you know, people don't get their peak bone mass until they're 30, so they have a long way to go starting from 13 and a half before they reach that.

BY ATTORNEY BROOKS:

anything specific.

BY ATTORNEY BROOKS:

**Q. Well, as I tell witnesses I am defending I don't know is always a great conversation stopper. Is it your testimony that you don't actually know how much bone densification has occurred by the end of the 13th year in those in biological males?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I haven't looked at it --- I haven't looked at it recently. There are --- that's an --- interpretations that we use and it comes with our reports and I would have to look at that to rely on it.

BY ATTORNEY BROOKS:

**Q. Have you heard the name Joanna Harper?**

A. No.

**Q. Let me see tab 24.**

ATTORNEY BROOKS: Marking 13, what was previously designated tab 24, article published December 2020 by Emma Hilton and Tommy Lundberg, titled Transgender Women in the Female Category of Sport: Perspectives on Testosterone Suppression and Performance Advantage.

---

(Whereupon, Adkins Exhibit 13, 2020

**Q. Have, on average, males experienced significant bone densification by age --- by the end of their 13th year?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Depends on your definition of significant. Clinically significant, medically significant? Is it, you know, significant with regard to the biological assay. Is it you're talking about which would --- Dexs scans?

BY ATTORNEY BROOKS:

**Q. I will take clinically significant.**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: Can you repeat your question with that?

BY ATTORNEY BROOKS:

**Q. Yes. On average, have biological males experienced clinically significant bone densification by the end of their 13th year?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Over their life span they do continue to increase their bone density. The peak of bone density is much later, so every person is different as to where they are in that density scale. At the middle of puberty, I mean, I would be guessing if I said

Hilton and Lundberg Article, was marked for identification.)

---

BY ATTORNEY BROOKS:

**Q. And Dr. Adkins, let me ask again whether you know the name Emma Hilton or Tommy Lundberg.**

A. No.

**Q. Can I take it then you have not seen this article before?**

A. I wouldn't say that one equals the other. I'm terrible with names, to be quite honest.

**Q. Let me ask --- therefore, I retract that question. Do you recall seeing this article before today?**

A. No.

**Q. Okay.**

Then again, we will be short. You see the title. I understand you have not seen it. Let me ask you to turn to page 201. About an inch down in the first column, summarizing other research the authors of this paper write an extensive review of fitness from over 85,000 Australian children age 9 to 17 years old show that, compared with 9 year old females, 9 year old males were faster over short sprints, 9.8 percent, and

1 one mile, 16.6 percent. Could jump 9.5 percent further  
 2 from a standing start, a test of explosive power.  
 3 Quote, could complete 33 more push ups in 30 seconds and  
 4 had 13.8 percent stronger grip, closed quote. Do you  
 5 see that language?

6 A. Yeah.

7 Q. And my question for you is you have yourself any  
 8 knowledge as to whether the facts recited there are  
 9 scientifically accurate or inaccurate?

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: So whenever I'm reviewing  
 12 an article, and again, I have not seen the full article,  
 13 it's reporting on population from Australia, which I  
 14 usually use the population that I'm talking about when I  
 15 am using that information to help guide my practice. So  
 16 I'm not completely sure that would be a thing that would  
 17 come into my mind when looking at this. Is this the  
 18 same population in Australia you we're seeing here?  
 19 That's one of my first questions about it.

20 BY ATTORNEY BROOKS:

21 Q. And I understand that everybody in Australia is  
 22 upside down, but my question simply was do you have any  
 23 knowledge as to whether, as a matter of science, these  
 24 assertions are true or false?

1 THE WITNESS: Generally education in  
 2 medical school and then looking at hormonal effects in  
 3 muscle and bone and those things. But not in particular  
 4 these specific tests.

5 BY ATTORNEY BROOKS:

6 Q. Do you have any opinion as to whether prior to  
 7 puberty natal males have strength, speed or other  
 8 athletic advantages over natal females on average?

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: Gosh, there's such a wide  
 11 variety of humans. And I know you are asking on  
 12 average. I don't think I feel comfortable answering the  
 13 question.

14 BY ATTORNEY BROOKS:

15 Q. All right.

16 You have offered the opinion --- we can go back  
 17 to paragraph 28, I keep referring to the same, that  
 18 refusing to permit a transgender individual to  
 19 participate in a sport category corresponding to their  
 20 gender identity can be or is extremely harmful. From  
 21 your medical point of view, what do you consider to be  
 22 the implications of that opinion when it comes to  
 23 individuals who claim both a male and a female gender  
 24 identity?

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: They have published it in a  
 3 peer reviewed journal I think. I would have to look if  
 4 this is a peer reviewed journal because some are not.  
 5 If those things are true, the assumption we make in  
 6 medicine is that they are true.

7 BY ATTORNEY BROOKS:

8 Q. You are a very trusting person to peer reviewed  
 9 journals.

10 A. They get redacted all the time. So again, my  
 11 previous thing is you got to look at all of the pieces,  
 12 et cetera.

13 Q. In general --- in general, do you consider that  
 14 your expertise extends to the question of how much  
 15 athletic advantage biological males enjoy over  
 16 biological females prior to puberty, if any?

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: I know limited amount of  
 19 that information. We all learn a little bit, but I  
 20 wouldn't say that I could say, you know, I know  
 21 everything that exists.

22 BY ATTORNEY BROOKS:

23 Q. What is your source of information in that area?

24 ATTORNEY BORELLI: Objection, form.

1 ATTORNEY BORELLI: Objection, form.

2 BY ATTORNEY BROOKS:

3 Q. Must they be permitted to play in either  
 4 category according to their choice.

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: That is a good question. I  
 7 would have to talk to the individual person to really  
 8 know what harm they might think --- feel that they are  
 9 having if they were kept from one versus the other. I  
 10 think that would be a very individualized question. I  
 11 can't answer it with my experience.

12 BY ATTORNEY BROOKS:

13 Q. All right.

14 Would you have the same answer with regard to  
 15 an individual who experiences neither gender identity,  
 16 neither male or female?

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: So people who identify as a  
 19 agender, you know, there is such a wide variety there of  
 20 their life experience, their pubertal experience, their  
 21 current hormones and what things they might be taking or  
 22 not taking, where their levels are. I think it --- and  
 23 you know, again, I think --- you would have to look at  
 24 the individual person.

1 BY ATTORNEY BROOKS:

2 **Q. Is it your opinion, Dr. Adkins, that the only**  
3 **reasonable policy for schools, colleges or athletic**  
4 **leagues would be to consider eligibility for transgender**  
5 **individuals on a case by case basis, taking into account**  
6 **all of the types of complexities you just described?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: I think that that is  
9 completely possible for them to do given the small  
10 population that we're talking about. And I think it is  
11 reasonable for them to take the time to do that with  
12 each individual human.

13 BY ATTORNEY BROOKS:

14 **Q. Do you think that such a policy is the only**  
15 **reasonable policy?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: Yeah, I'm going to venture  
18 that, yes.

19 BY ATTORNEY BROOKS:

20 **Q. In your view --- as you've testified earlier a**  
21 **bit about the category of gender fluid individuals. You**  
22 **mentioned the term. Are you familiar with that**  
23 **category, concept of gender fluid individuals?**

24 ATTORNEY BORELLI: Objection, form.

1 little bit. They sometimes are frilly, like me, very  
2 feminine-ish, and on days --- and feel that --- and  
3 other days they might wear a suit and tie. And that  
4 gender expression may align with their gender identity I  
5 guess, to express themselves a different way. It's just  
6 a matter that, you know, some days I feel like a girl  
7 and some days I don't. And I actually also sometimes  
8 have that feeling of, you know, a more girly one day  
9 than the other. I don't know. I'm not implying that  
10 I'm gender fluid, but that particular person is an  
11 example of what might happen for someone who's gender  
12 fluid.

13 **Q. Let me ask you to find. I told you we'd dig for**  
14 **it again, the Endocrine Society 2017 Guidelines, which**  
15 **are Exhibit 4.**

16 A. I'm not saying my experience is the one and  
17 only, one all be all.

18 **Q. And I'll call your attention to page five,**  
19 **column two?**

20 A. I'm sorry, what is that again?

21 **Q. Page five, column two. Language looks like**  
22 **this. That's on page five. That's fine.**

23 ATTORNEY TRYON: This is Dave Tryon. I  
24 think both of you are starting to trail off at times and

1 THE WITNESS: I'm aware of the concept.

2 BY ATTORNEY BROOKS:

3 **Q. Can you explain for the court what the concept**  
4 **of --- what a gender fluid individual is or what that**  
5 **person experiences?**

6 ATTORNEY BORELLI: Objection to form.

7 THE WITNESS: So my experience is that  
8 every gender fluid person is different, and I have to  
9 actually dig deep when I'm talking to someone who is  
10 gender fluid as to what that means. It could mean a  
11 wide variety of different experiences.

12 BY ATTORNEY BROOKS:

13 **Q. You're not able to describe at all what it mean**  
14 **to be gender fluid?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: I can give you an example.  
17 I can give you more than one example.

18 BY ATTORNEY BROOKS:

19 **Q. I'll take an example.**

20 A. Okay.

21 For a patient I'm bringing to mind, for that  
22 individual they generally might be expressing their  
23 gender identity variably on a particular day. Their  
24 understanding of their identity is that it shifts a

1 speak less loudly and it's getting a little bit harder  
2 to hear you. If you can both remember to keep your  
3 voices up, it would be helpful to me.

4 ATTORNEY BROOKS: We will do our best.  
5 Wait until 6:30.

6 BY ATTORNEY BROOKS:

7 **Q. Page 3873, column two. And towards the bottom**  
8 **is a discussion of the continuum and individuals who**  
9 **experience both or neither and then a reference that we**  
10 **looked at before about reports of individuals**  
11 **experiencing a continuous and rapid involuntary**  
12 **alternation between a male and female gender identity.**  
13 **Do you see that? It's about eight lines from the**  
14 **bottom.**

15 A. On the right?

16 **Q. Yes.**

17 A. Yeah.

18 **Q. And I'm going to focus you on the rapid**  
19 **involuntary alternation between male and female**  
20 **identity. And is it your view --- is it your opinion**  
21 **that unless school or league policy allows such gender**  
22 **fluid individuals to play in the league according to**  
23 **their present gender identity, whatever that might be,**  
24 **that it will do extreme harm to those individuals?**

Page 166

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: So I think that unless you

3 are working with that individual person to do what works  
4 for them based on their gender identity, you are likely  
5 to do harm.

6 BY ATTORNEY BROOKS:

7 **Q. And am I correct that it is your opinion that**  
8 **avoiding harm to students who experience a transgender**  
9 **identity, perhaps a gender fluid identity, is a higher**  
10 **priority than ensuring fairness in competition for those**  
11 **born female?**

12 ATTORNEY BORELLI: Objection to form.

13 THE WITNESS: So doing a harm to  
14 individuals that are transgender can lead directly to  
15 their death. So we're talking about a life and death  
16 experience for these individuals. What you are  
17 referring to with regard to sports participation in my  
18 vision of all of the sports athletics is a rarity of  
19 someone dying, and it is not because of the harm policy  
20 --- of transgender person.

21 BY ATTORNEY BROOKS:

22 **Q. What's the answer to my question?**

23 COURT REPORTER: Excuse me.

24 ATTORNEY BORELLI: Objection.

Page 168

1 THE WITNESS: I do.

2 BY ATTORNEY BROOKS:

3 **Q. And do you have specific examples of such**  
4 **patients who experienced increased suicidal ideation**  
5 **specifically as a result of not being permitted to play**  
6 **in athletics according to their gender identity?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: I do.

9 BY ATTORNEY BROOKS:

10 **Q. Tell us about that.**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: Yeah. So one of my  
13 patients, for example, had played football. This  
14 patient was assigned female at birth, identifying as  
15 male in middle school. Really wanted to play in high  
16 school and was eventually not allowed to do so, and  
17 their depression deepened. They had not had any  
18 suicidal ideation before. They had been well affirmed.  
19 They were living in their gender identity in every other  
20 aspect of their life.

21 And they ended up having to go on  
22 medication to make sure that --- to treat that  
23 depression in addition to all of the support in the  
24 family and teachers were giving with their gender

Page 167

1 COURT REPORTER: I just want to interrupt  
2 because the witness cut out during her answer.

3 BY ATTORNEY BROOKS:

4 **Q. Well, I'm going to re-ask the question. And**  
5 **we'll both try to speak up and perhaps to some extent**  
6 **the transcript will have to be, you know, cleaned up**  
7 **from the recording. We'll do the best we can. Is it**  
8 **your opinion that avoiding harm to transgender**  
9 **individuals, potentially including gender fluid**  
10 **individuals, is a value that is more important than**  
11 **protecting the fairness and safety for girls and women**  
12 **for those born female in sport?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: So when we're talking about  
15 life and death, that is the ultimate outcome. And I  
16 still say that if you're talking about a policy that  
17 could cause the death of a human being, that, in my  
18 judgment, does rank higher than fairness at that time.

19 BY ATTORNEY BROOKS:

20 **Q. And you talked earlier about your assertion that**  
21 **you had patients who have experienced harm as a result**  
22 **of not being permitted to play according to their gender**  
23 **identity. Do you recall that testimony?**

24 ATTORNEY BORELLI: Objection, form.

Page 169

1 identity.

2 BY ATTORNEY BROOKS:

3 **Q. And do you have any knowledge as to whether that**  
4 **individual would have faced serious safety injury risks**  
5 **had that individual, natal female, been permitted to**  
6 **play football at high school level as your patient's**  
7 **male peers matured into full male stature?**

8 ATTORNEY BORELLI: Objection to form.

9 THE WITNESS: This particular patient was  
10 within the normal range for a male of that age as far as  
11 height, weight and BMI, so there wasn't a great  
12 disparity with regard to that. That can come up at  
13 times with regards to sports participation in  
14 consideration with injury. So this particular patient,  
15 I would not have had any concern there. Lots of  
16 assigned females at birth who are not transgender also  
17 play football in high school.

18 BY ATTORNEY BROOKS:

19 **Q. Tab 25. Dr. Adkins, do you recall permitting**  
20 **the reporting of and being part of a WNYC podcast back**  
21 **in 2016?**

22 A. Yes.

23 **Q. Let me mark as Exhibit 14 a two-page kind of**  
24 **introductory page off the WNYC website describing this**

1 **podcast. The document itself, the posting is dated**  
2 **August 2, 2016. Give me one moment here.**

3 ---  
4 **(Whereupon, Adkins Exhibit 14, 2016**  
5 **Podcast Summary Webpage, was marked for**  
6 **identification.)**

7 ---  
8 ATTORNEY BROOKS: And let me also mark as  
9 Exhibit 15 the transcript of that podcast downloaded off  
10 of the WNYC website.

11 ---  
12 **(Whereupon, Adkins Exhibit 15, 2016**  
13 **Podcast Transcript, was marked for**  
14 **identification.)**

15 ---  
16 BY ATTORNEY BROOKS:

17 **Q. And that --- the title apparently of the podcast**  
18 **is, quote, I'd Rather Have a Living Son than a Dead**  
19 **Daughter. Do you see that?**

20 A. I do.

21 **Q. And you allowed a reporter from WNYC to come**  
22 **into your office and record various conversations.**

23 **Am I correct?**

24 ATTORNEY BORELLI: Objection, form.

1 **Q. I'm sorry. In this field of treatment of gender**  
2 **--- of individuals suffering gender dysphoria?**

3 ATTORNEY BORELLI: Objection, form.

4 THE WITNESS: I started caring for  
5 patients who are transgender in --- I think around 2013.  
6 BY ATTORNEY BROOKS:

7 **Q. Okay.**

8 **So between two and three years before the time**  
9 **this was recorded.**

10 **Okay.**

11 **Let me ask you to look at Exhibit 15, which is**  
12 **to say the transcript. And first page, it indicates and**  
13 **I'll just --- it deals with two clients with names, at**  
14 **least for purposes of the podcast, of Drew Adams and**  
15 **Mark. Do you recall that?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: I would have to verify.  
18 Probably accurate, but ---.

19 BY ATTORNEY BROOKS:

20 **Q. Martin shows up on page 13. A couple inches**  
21 **down we skip to the last patient at the end of a long**  
22 **day and then it says recalling this patient Martin.**

23 A. I see that.

24 **Q. Let's go back and just look at issues relating**

1 THE WITNESS: With the permission of ---  
2 the --- everyone involved.

3 BY ATTORNEY BROOKS:

4 **Q. To participate and they waived the privacy with**  
5 **regard to anything that wasn't included in the podcast.**

6 **Am I correct?**

7 ATTORNEY BORELLI: Objection to form.

8 THE WITNESS: That would be standard.

9 BY ATTORNEY BROOKS:

10 **Q. At least as far as yourself, do you recall doing**  
11 **that?**

12 ATTORNEY BORELLI: Objection to form.

13 THE WITNESS: I don't recall. I suspect  
14 I would have.

15 BY ATTORNEY BROOKS:

16 **Q. And did you yourself review the podcast before**  
17 **it was released for any privacy or accuracy concerns?**

18 ATTORNEY BORELLI: Objection, form.

19 THE WITNESS: I don't remember. That's  
20 been so long ago.

21 BY ATTORNEY BROOKS:

22 **Q. It has been a while. This was 2016. And you**  
23 **had been practicing in this area about how long in 2016?**

24 A. In North Carolina?

1 **to Drew Adams. Drew is, if I understand correctly,**  
2 **natal female, identifying at the time of this recording**  
3 **as ---?**

4 A. Drew was assigned female at birth and identified  
5 as male at this time.

6 **Q. And so far as you understand, based on your**  
7 **medical evaluation, Drew is somebody who was**  
8 **chromosomally female.**

9 **Correct?**

10 ATTORNEY BORELLI: Objection to form.

11 THE WITNESS: I don't get to verify their  
12 chromosomes. We don't do that.

13 BY ATTORNEY BROOKS:

14 **Q. At the time this was recorded, you did have an**  
15 **understanding, did you not, that Drew had female**  
16 **reproductive biology?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: On my exam at that time  
19 Drew had external genitalia that appeared female and  
20 secondary sex characteristics typical of someone  
21 assigned female at birth.

22 BY ATTORNEY BROOKS:

23 **Q. Well, in fact, somebody biologically female.**  
24 **Correct?**

1 ATTORNEY BORELLI: Objection.

2 THE WITNESS: Assigned female at birth.

3 BY ATTORNEY BROOKS:

4 **Q. Well, let me ask you this. You prescribed**  
5 **hormones for Drew.**

6 **Am I correct?**

7 A. Yes.

8 **Q. And you didn't do that without a high level of**  
9 **confidence in your mind as to the biology of Drew's**  
10 **body.**

11 **Am I correct?**

12 ATTORNEY BORELLI: Objection to form.

13 BY ATTORNEY BROOKS:

14 **Q. You weren't just based on what somebody happened**  
15 **to be assigned at birth. You believed that Drew was**  
16 **biologically female, did you not?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: So at the beginning, prior  
19 to treating patients, we do look at where their baseline  
20 hormones are. So I did have that information as well as  
21 an external exam. I didn't have chromosomes or an  
22 ultrasound.

23 BY ATTORNEY BROOKS:

24 **Q. My question is at the time you prescribed**

1 work like I do with every patient, which is recommended  
2 by the Endocrine Society that you get baseline hormone  
3 levels. I did a physical exam. Not every patient gets  
4 to have an ultrasound, a karyotype or a full exon  
5 analysis. It's not the way you can practice medicine.

6 BY ATTORNEY BROOKS:

7 **Q. Turn with me to page three of the transcript.**  
8 **Two, two and a half inches down, MH, who I believe is**  
9 **the reporter, not somebody working for you but the**  
10 **reporter, says, quote, this is Drew's second time here,**  
11 **closed quote. Do you see that, just two inches down?**

12 A. Yeah.

13 **Q. It's been quite a few years. Do you believe**  
14 **that that was accurate that what the events that were**  
15 **recorded here were on Drew's second visit to your**  
16 **clinic?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: It has been so long. To  
19 verify it is true I would have to look back at my clinic  
20 notes as well as if I even still had it recorded when  
21 they were in clinic or not.

22 BY ATTORNEY BROOKS:

23 **Q. And do you know, as you sit here today, whether**  
24 **prior to this perhaps second meeting with Drew any**

1 **hormones for Drew you believed that Drew was**  
2 **biologically female firmly, did you not?**

3 ATTORNEY BORELLI: Objection, form.

4 THE WITNESS: I had no reason at that  
5 time with the data in front of my to identify Drew as  
6 anything other than assigned female at birth.

7 BY ATTORNEY BROOKS:

8 **Q. And you just didn't care what Drew's biology was**  
9 **as you chose hormones to prescribe?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: I investigated what is  
12 necessary to move ahead with that prescription and make  
13 it safe for the patient.

14 BY ATTORNEY BROOKS:

15 **Q. What was necessary was to determine that**  
16 **biologically Drew was female.**

17 **Am I correct?**

18 ATTORNEY BORELLI: Objection, form.

19 BY ATTORNEY BROOKS:

20 **Q. You are going to tell the court that you didn't**  
21 **try to determine whether Drew was biologically male or**  
22 **female?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: I obtained baseline blood

1 **psychologist or psychiatrist associated with your new**  
2 **clinic had personally evaluated Drew to confirm the**  
3 **diagnosis of gender dysphoria?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: Before we start treatment  
6 we have our mental health team do an assessment of the  
7 patient with regard to finding out their --- any  
8 psychological challenges that they may be having and  
9 confirm if they have gender dysphoria and confirm the  
10 criteria from the DSM --- God, my brain is just tired.  
11 From the DSM criteria. And in addition to that, we have  
12 a person who is a local mental health provider also  
13 perform any evaluation and develop a relationship with  
14 the patient prior to starting the treatment.

15 BY ATTORNEY BROOKS:

16 **Q. Well, let me break that out. Do you require**  
17 **that a psychologist or psychiatrist associated with Duke**  
18 **confirm a diagnosis of gender dysphoria before you**  
19 **proceed with hormonal interventions?**

20 ATTORNEY BORELLI: Objection, form.

21 THE WITNESS: I have a team of mental  
22 health providers who work with me and do that  
23 assessment. That is part of their standard job. And  
24 every patient is evaluated by that team. Sometimes it

1 is a psychiatrist, psychologist. Sometimes it is a  
2 different kind of mental health provider.

3 BY ATTORNEY BROOKS:

4 **Q. Well, if it is not a psychologist or**  
5 **psychiatrist, on what type of mental health --- what**  
6 **qualifications of mental health providers do you rely to**  
7 **make such a diagnosis before prescribing hormonal**  
8 **interventions?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: You know, there are  
11 Licensed Clinical Social Workers that we work with that  
12 are used by Duke in a number of capacities with regard  
13 to mental healthcare.

14 BY ATTORNEY BROOKS:

15 **Q. Is it your testimony --- I want to be careful on**  
16 **this. Is it your testimony that you are willing to rely**  
17 **on a diagnosis by a social worker with no medical,**  
18 **psychological degree before prescribing a hormonal**  
19 **intervention?**

20 ATTORNEY BORELLI: Objection, form.

21 THE WITNESS: So the mental health  
22 providers that I use have master's degree education in  
23 care for patients in this area and have ongoing  
24 continuing medical education with regard to their

1 ability to asses the mental health of a patient in front  
2 of them.

3 BY ATTORNEY BROOKS:

4 **Q. That would be a --- a Master's in social work.**  
5 **Correct?**

6 A. Often it's a Master's in social work. Also have  
7 people who have Master's in public health in addition I  
8 should say.

9 **Q. And so if such any evaluations was done by a**  
10 **mental health professional associated with Duke, that**  
11 **would have been at Drew's first visit, not at the visit**  
12 **that was the subject of this podcast recording?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: At that time it could have  
15 been done physically at the first visit. Sometimes we  
16 have had them come on a different day than their visit  
17 with me. So it is possible it could have been a  
18 different day. I just don't remember.

19 BY ATTORNEY BROOKS:

20 **Q. Okay.**

21 **Do you ever rely on the diagnosis of an**  
22 **individual's mental health worker not associated with**  
23 **Duke as an adequate basis to prescribe hormonal**  
24 **interventions?**

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: Our clinic policy is to  
3 have someone outside of Duke as well as someone inside  
4 of Duke.

5 BY ATTORNEY BROOKS:

6 **Q. So you may recall --- do you recall that Drew**  
7 **and his mother had driven up from Florida for this**  
8 **meetings?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: I do remember that.

11 BY ATTORNEY BROOKS:

12 **Q. And do you sometimes consider diagnosis given by**  
13 **mental --- for purposes of proceeding with hormonal**  
14 **interventions?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: If they are licensed to  
17 practice in that area or certified in their state, that  
18 is what we rely on.

19 BY ATTORNEY BROOKS:

20 **Q. At the top of page two --- and again, this is**  
21 **the voice of the reporter, so I want to check it with**  
22 **you. It says, the end of the first full paragraph, that**  
23 **Drew and his mom are driving eight hours from**  
24 **Jacksonville, Florida, to get here because North**

1 **Carolina is also home to one of the only clinics in the**  
2 **south that treats transgender kids. Do you see that?**

3 A. I do.

4 **Q. And in your understanding was that true in 2016,**  
5 **that you here had one of the only clinics in the south**  
6 **that treated transgender kids?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: We were one of a few.

9 BY ATTORNEY BROOKS:

10 **Q. And they had driven all the way to North**  
11 **Carolina from Florida precisely because whatever mental**  
12 **health providers they were seeing in Florida didn't have**  
13 **expertise in this area.**

14 **Is that correct?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: They didn't drive here to  
17 see a mental health provider. They drove here to see me  
18 as an endocrinologist.

19 BY ATTORNEY BROOKS:

20 **Q. I apologize. Whatever professionals were**  
21 **advising them in Florida didn't have expertise in this**  
22 **area?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: With regard to hormonal

1 management.

2 BY ATTORNEY BROOKS:

3 **Q. What steps, if any, did you take to give**  
4 **yourself comfort that any comorbidities that might be**  
5 **--- might confound the diagnosis of transgenderism had**  
6 **been appropriately addressed before you prescribed**  
7 **hormones for Drew?**

8 ATTORNEY BORELLI: Objection to form.

9 THE WITNESS: I mean, I would have to  
10 look back at my notes specifically to see exactly what  
11 we had in the record. Our policy again is to have  
12 someone who has had a relationship with the patient  
13 outside of Duke Clinic that states that they have well  
14 managed issues with regard to their mental health and  
15 are prepared and safe to move forward with gender  
16 affirming hormones.

17 BY ATTORNEY BROOKS:

18 **Q. As a matter of policy in your clinic do you**  
19 **insist on a diagnosis that will tell you whether or not**  
20 **this patient suffers from autism of any sort?**

21 ATTORNEY BORELLI: Objection, form.

22 THE WITNESS: We do require that they  
23 have a screening that is performed within our clinic for  
24 any potential signs or symptoms of autism.

1 BY ATTORNEY BROOKS:

2 **Q. Do you have any professional opinion as to**  
3 **whether autism itself can cause individuals to feel**  
4 **alienated from or disassociated with their gender**  
5 **identity ---**

6 ATTORNEY BORELLI: Objection, form.

7 BY ATTORNEY BROOKS:

8 **Q. --- or I should say the gender identity**  
9 **associated with their natal sex?**

10 ATTORNEY BORELLI: Objection to form.

11 THE WITNESS: With the information that I  
12 have worked with on our autism team at Duke is that, you  
13 know, it can take a little longer for people with autism  
14 to truly understand their gender identity. So we do  
15 take care there. That's why we screen.

16 BY ATTORNEY BROOKS:

17 **Q. I would like to play a clip from this podcast**  
18 **that includes your voice, the reporter's voice, Drew's**  
19 **voice. I think it will come through loud and clear.**  
20 **I'm optimistic --- for those of you ---.**

21 ATTORNEY BORELLI: While you're settling  
22 this, will the words from the recording, do they appear  
23 in the transcription.

24 ATTORNEY BROOKS: They do. I was about

1 BY ATTORNEY BROOKS:

2 **Q. And if you identify that a patient does have**  
3 **some signs or symptoms of autism what significance does**  
4 **that have as to how quickly or whether you are willing**  
5 **to proceed with hormonal interventions?**

6 ATTORNEY BORELLI: Objection to the form.

7 THE WITNESS: So again, every patient is  
8 different. Autism is a spectrum, as it's described  
9 autism spectrum disorder, and so you have to figure out  
10 each patient's understanding of their gender identity,  
11 what's going on in their life and if they're ready.

12 BY ATTORNEY BROOKS:

13 **Q. Do you have any professional opinion as to**  
14 **whether autism itself can cause a patient to feel**  
15 **uncomfortable with their identity?**

16 ATTORNEY BORELLI: Objection to form.

17 THE WITNESS: Their whole identity?

18 BY ATTORNEY BROOKS:

19 **Q. Yes.**

20 **A. I---**

21 ATTORNEY BORELLI: Objection ---.

22 THE WITNESS: Yeah, I don't know if I  
23 have seen any reports about their whole identity being  
24 called into question just because they have autism.

1 to say that for everybody's benefit.

2 ATTORNEY BORELLI: Thank you, Counsel.

3 ATTORNEY BROOKS: Now, I'm thinking.  
4 That has to be live. All right. So that's unmuted.

5 VIDEOGRAPHER: You said one?

6 ATTORNEY BROOKS: What's that?

7 VIDEOGRAPHER: You said one?

8 ATTORNEY BROOKS: But I need to say on  
9 the record and tell people --- can the court reporter  
10 here me.

11 COURT REPORTER: Yes.

12 ATTORNEY BROOKS: The clip that I'm about  
13 to play appears on page four of the transcript that is  
14 marked Exhibit 15 and it makes up kind of the center  
15 two-thirds of the transcript. All the words that you  
16 will hear or perhaps won't hear very well appear on the  
17 transcript. We're going to listen to clip one here.

18 ---

19 (WHEREUPON, PODCAST AUDIO WAS PLAYED.)

20 ---

21 BY ATTORNEY BROOKS:

22 **Q. The narrator says that Drew's only question was,**  
23 **quote, when can I start testosterone, and you responded**  
24 **today, sound good, yeah, all right. Is that consistent**

Page 186

1 **with your recollection of what happened that day?**

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: Yes.

4 BY ATTORNEY BROOKS:

5 **Q. Was that your voice?**

6 A. That was my voice.

7 **Q. Okay.**

8 **And did you know before you came into the room**  
9 **that Drew's goal was to walk out with a testosterone**  
10 **injection or a prescription for a testosterone**  
11 **injection?**

12 ATTORNEY BORELLI: Objection to form.

13 THE WITNESS: You know, I don't remember.

14 I don't remember what I knew before in walked in the  
15 door. Sometimes I do. Sometimes I don't.

16 BY ATTORNEY BROOKS:

17 **Q. Now, I want to be fair. This is --- these are**  
18 **clips and they're carefully done, so I can't be sure**  
19 **whether there are things in between.**

20 A. Correct.

21 **Q. Do you have any recollection as to any**  
22 **discussion or any further evaluation that happened**  
23 **between, hey, how are you, and your voice, and answering**  
24 **the question when can I start, today?**

Page 188

1 of our visit. It's not necessarily part that I would  
2 do. And we also have forms that they fill out that does  
3 an assessment of depression prior to me walking in the  
4 room.

5 BY ATTORNEY BROOKS:

6 **Q. Did you ensure that an assessment had been done**  
7 **that evaluated the strengths and weaknesses of Drew's**  
8 **relationship with Drew's family?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: The mental health  
11 evaluation does include walking through parent  
12 relationships, school relationships, teacher  
13 relationships and finding out where those are.

14 BY ATTORNEY BROOKS:

15 **Q. Did you feel that you, yourself, needed to have**  
16 **any understanding, for instance, of Drew's relationship**  
17 **with Drew's father before you proceeded to prescribe**  
18 **cross sex hormones?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: I would want to know where  
21 their relationships are.

22 BY ATTORNEY BROOKS:

23 **Q. So Drew's mother attended. What steps did you**  
24 **take to find out what Drew's relationship with Drew's**

Page 187

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: So most typically, before I  
3 walk into a room I have reviewed the patient's medical  
4 record. I have reviewed their letter from their mental  
5 health provider. And I have reviewed any laboratory  
6 evaluation that I have received from them prior and  
7 generally review their records. So I would come into a  
8 visit with that sort of fresh in my mind.

9 BY ATTORNEY BROOKS:

10 **Q. So it is consistent with your recollection that**  
11 **on Drew's second meeting with you, you walked into the**  
12 **room having made up your mind to give Drew testosterone?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: Based on the words that are  
15 here, that would be --- I would have reviewed the  
16 information that I needed to know that that would be  
17 safe.

18 BY ATTORNEY BROOKS:

19 **Q. And in between walking in the room and telling**  
20 **Drew today, yay, all right, did you make any further**  
21 **inquiry about whether Drew in the last --- since he last**  
22 **saw you had been suffering from any sort of depression?**

23 ATTORNEY BORELLI: Objection to form.

24 THE WITNESS: So typically that is part

Page 189

1 **father was?**

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: I don't remember. I would  
4 have to look back.

5 BY ATTORNEY BROOKS:

6 **Q. And does your clinic before prescribing hormonal**  
7 **interventions make sure that an overall psychotherapy**  
8 **treatment plan has been prepared to diagnose and address**  
9 **any other psychological or social difficulties suffered**  
10 **by the patient?**

11 ATTORNEY BORELLI: Objection to form.

12 THE WITNESS: So you know, I follow the  
13 guidelines that say that we should have any of the  
14 mental health issues well managed and that's why we use  
15 --- have our patients have a mental health provider and  
16 that's why we have them tell us that in writing.

17 BY ATTORNEY BROOKS:

18 **Q. So I'm going to play a second clip that picks up**  
19 **exactly where we left off on the transcript, that is at**  
20 **the very bottom of page five and continuing halfway ---**  
21 **I'm sorry, the very bottom of page four and continuing**  
22 **halfway down page five. If you would.**

Page 190

(WHEREUPON, PODCAST AUDIO WAS PLAYED.)

---

ATTORNEY BROOKS: That was background noise. I thought it was coming through here. I apologize. Just start it again. My mistake.

---

(WHEREUPON, PODCAST AUDIO WAS PLAYED.)

---

BY ATTORNEY BROOKS:

**Q. Dr. Adkins, do you believe that the basic narrative here accurately describes what happened, that you came in, you spoke with Drew, you went out, and while you were out one of your aides read risk disclosures for consent to Drew and Drew's mother?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: That is part of it.

BY ATTORNEY BROOKS:

**Q. And the narrator said at the beginning explaining this process that there were still, as of 2016, a lot of unknowns about what these hormones will do long term. Was that an accurate statement at the time in your opinion?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: We've learned a lot more.

Page 192

**testosterone at a future date.**

**Correct?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Correct.

BY ATTORNEY BROOKS:

**Q. And that is still part of your disclosure today; is that correct?**

A. That's part of it. We actually have more studies that show actually an equal fertility rate for our transgender males who have been on testosterone and come off and choose to get pregnant as their cisgender peers, their assigned females at birth who've never been through any testosterone treatment.

**Q. Because of the present science you still make exactly the same caution in your warnings to patients before prescribing testosterone.**

**Correct?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: I do.

BY ATTORNEY BROOKS:

**Q. And so the sequence is that you said with regard to administering testosterone, which you cautioned or clinic cautioned could be potentially sterilizing, you as the doctor said to Drew, sound good, yeah, all right.**

Page 191

We have got however many more years, what, five more years at least of information since then. You can't know what every single thing that every drug is going to do forever.

BY ATTORNEY BROOKS:

**Q. One of the things that you included at that time in your cautions or disclosures was that taking these cross sex hormones might prevent a patient who had -- was a natal female from ever being able to get pregnant, even if Drew stopped taking testosterone in the future.**

**Correct?**

ATTORNEY BORELLI: Objection, form. One other just piece of clarity for the record, I want to make sure that it is clear that the transcript and recording is not a complete recording of the entire visit.

ATTORNEY BROOKS: I have made that clear I think.

ATTORNEY BORELLI: Thank you, Counsel.

BY ATTORNEY BROOKS:

**Q. My question is one of your disclosures in 2016 was that the administration of testosterone to a natal female might mean that that individual would not ever be able to get pregnant even should the patient stop taking**

Page 193

**And then you left the room while somebody else read warnings and disclosures.**

**Is that right?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: That doesn't --- is that what the sequence was in this report? It looks like that I also make sure that the patients have adequate time to answer questions. I usually give them this form ahead of the visit so they can review it and in case their reading is their better method versus verbal. That's why we do it in two different ways as far as their learning style. We make every effort to help make sure that our patients understand.

ATTORNEY BORELLI: We have been going a while. Can we take a break soon? I think we should.

ATTORNEY BROOKS: Fairly soon. We'll finish this line of questioning and this clip.

BY ATTORNEY BROOKS:

**Q. You yourself didn't ever sit down and talk through known or potential side effects with either the child or the mother in this case, did you?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I don't remember it specifically every visit from 2016 and exactly what

Page 194

1 happened.

2 BY ATTORNEY BROOKS:

3 **Q. As a matter ---.**

4 ATTORNEY BORELLI: Counsel, I'm sorry, I  
5 think I heard the witness say a moment ago that a break  
6 would be good. Why don't we break here? Can we come  
7 back in say ten minutes?

8 ATTORNEY BROOKS: We can say that or I  
9 can finish this paragraph.

10 ATTORNEY BORELLI: Why don't we break  
11 now. We've been going a while. Thank you.

12 VIDEOGRAPHER: Going off the record. The  
13 current time reads 2:27 p.m. Eastern Standard Time.

14 OFF VIDEO

15 ---

16 (WHEREUPON, A PAUSE IN THE RECORD WAS HELD.)

17 ---

18 ON VIDEO

19 VIDEOGRAPHER: We're back on the record.  
20 Current time reads 2:43 p.m. Eastern Standard Time.

21 BY ATTORNEY BROOKS:

22 **Q. Dr. Adkins, in dealing with Drew, you have a**  
23 **social worker read the disclosures, the warnings. Did**  
24 **you, yourself, ever present to Drew options for**

Page 196

1 BY ATTORNEY BROOKS:

2 **Q. Have you, yourself, ever participated as a**  
3 **physician in a so-called phase one clinical trial?**

4 ATTORNEY BORELLI: Objection to form.

5 THE WITNESS: So phase one typically is  
6 dose related. I have not done those. I have done phase  
7 two, phase three and then after market.

8 BY ATTORNEY BROOKS:

9 **Q. Phase one is, among other things, required to**  
10 **establish safety.**

11 **Am I correct?**

12 ATTORNEY BORELLI: Objection, form.

13 THE WITNESS: That is part of the  
14 objective of a phase one study.

15 BY ATTORNEY BROOKS:

16 **Q. And indeed, it is a required part of the**  
17 **objective.**

18 **Right?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: Yes.

21 BY ATTORNEY BROOKS:

22 **Q. And to your knowledge, has any study of safety**  
23 **of administering testosterone for the purpose of**  
24 **appearing more masculine in natal females ever been done**

Page 195

1 **fertility preservation?**

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: Yes, that is a conversation  
4 I have with my patients.

5 BY ATTORNEY BROOKS:

6 **Q. You, yourself, have that conversation?**

7 A. I do.

8 **Q. Let's --- and did you explain --- I see that the**  
9 **disclosure --- we heard the disclosure that it's ---**  
10 **using testosterone to appear more masculine is off label**  
11 **use. Is that part of your standard disclosures?**

12 ATTORNEY BORELLI: Objection, form.

13 BY ATTORNEY BROOKS:

14 **Q. Do you explain to your patients that the fact**  
15 **that it is off label means that no studies that**  
16 **establish safety of use of testosterone for that purpose**  
17 **at the level as would be required for FDA approval have**  
18 **been done?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: No, that wouldn't be an  
21 accurate statement. Those studies can be done. They  
22 just haven't been presented by the company manufacturing  
23 the medication to the FDA to try and get that  
24 certification from the FDA.

Page 197

1 **at a level of rigor that could satisfy FDA requirements?**

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: So I don't have the FDA  
4 standards right in front of me. I have, you know, read  
5 articles that report outcomes and side effects and  
6 safety profiles. There are other testosterone --- there  
7 are testosterone products on the market that are FDA  
8 approved for using cisgender females.

9 BY ATTORNEY BROOKS:

10 **Q. Do you know whether any safety study has ever**  
11 **been done for administration of testosterone to natal**  
12 **females for the purpose of appearing more masculine at a**  
13 **level of rigor that could satisfy FDA requirements?**

14 ATTORNEY BORELLI: Objection, form.

15 THE WITNESS: I can't answer the question  
16 without, you know --- I would have to really look at the  
17 indications, the FDA rules.

18 BY ATTORNEY BROOKS:

19 **Q. Okay.**

20 **Let's listen to a third and final clip. This**  
21 **one begins with a sentence the last one ended with on**  
22 **page five and runs just onto page six, I believe. End**  
23 **of page five. Let's hear that.**  
24

1 ---  
2 (WHEREUPON, PODCAST AUDIO WAS PLAYED.)

3 ---  
4 BY ATTORNEY BROOKS:

5 **Q. All right.**

6 **My impression, correct me or tell me if you**  
7 **agree, that clip is just a single unbroken bit of**  
8 **conversation, not pieced together from different things.**  
9 **Is that consistent with what you heard and what you**  
10 **recall?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: You know, I don't remember.

13 BY ATTORNEY BROOKS:

14 **Q. Okay.**

15 **You come back in the room with a prescription**  
16 **in your hand, the warnings have been read while you were**  
17 **outside. You ask, guess what I have in my hand. You**  
18 **heard the clip and I see what it says there. Is the**  
19 **voice that says happy drugs Drew's voice or your voice?**

20 ATTORNEY BORELLI: Objection, form.

21 THE WITNESS: Mine. My voice.

22 BY ATTORNEY BROOKS:

23 **Q. The voice that says happy drugs is your voice.**  
24 **And the voice that says yay, yay, s also your voice? If**

1 **hormones as happy drugs?**

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: So if you will recall, we  
4 use the medication to decrease dysphoria, which is a  
5 discomfort, and to improve depression. So any  
6 medication that would relieve those things could be  
7 described as a happy drug. I'm okay with that.

8 BY ATTORNEY BROOKS:

9 **Q. And after Drew says happy drug you said yay,**  
10 **yay. Are you comfortable that's consistent with your**  
11 **role as a doctor in light of potential downsides and**  
12 **side effects of this treatment and this child's life to**  
13 **serve the role of a cheerleader saying yay, yay?**

14 ATTORNEY BORELLI: Objection. Counsel, I  
15 just want to note for the record it's not clear from  
16 that recording that both yays are in the same voice.  
17 That's actually not what I heard.

18 ATTORNEY BROOKS: If you have an  
19 objection you can raise it later.

20 ATTORNEY BORELLI: I need to make my  
21 record now, Counsel.

22 ATTORNEY BROOKS: No, you need to raise  
23 your objection now. You get to discuss it further in  
24 front of the court.

1 **you want to hear it again you can.**

2 A. It's not labeled that way.

3 **Q. Well, yay, yay is labeled you?**

4 A. Yay, yay is labeled me? Okay.

5 **Q. Doctor A?**

6 A. It's really confusing because it's ---.

7 **Q. Let's do this. Let's listen to this one more**  
8 **time.**

9 A. There is confusion.

10 **Q. I want you to listen --- don't trust the labels.**  
11 **Listen to the voice on happy drugs. They may be ---.**

12 ---  
13 (WHEREUPON, PODCAST AUDIO WAS PLAYED.)

14 ---  
15 BY ATTORNEY BROOKS:

16 **Q. Whose voice says happy drugs?**

17 A. That sounded like Drew.

18 **Q. Okay.**

19 **So the labeling you believe is correct. I just**  
20 **wanted to double check that.**

21 **Are you, as a physician, in light of all of the**  
22 **disclosures that have just been made about potential**  
23 **side effects, potential harmful effects, were you**  
24 **comfortable with the child referring to cross sex**

1 BY ATTORNEY BROOKS:

2 **Q. I will re-ask my question. Do you consider it**  
3 **consistent with your role as a physician, in light of**  
4 **the potential downsides and side effects from cross sex**  
5 **hormones for this child, for you to play the role of**  
6 **cheerleader saying yay?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: So in my job as a physician  
9 I often am helping motivate my patients improve their  
10 overall health. And in that way I often sound like I am  
11 a cheerleader and I am trying to help them believe in  
12 themselves and understand and feel good moving forward  
13 with medication treatments to have the best likelihood  
14 of success. So I may say yay.

15 VIDEOGRAPHER: Excuse me. You got cut  
16 out there in the middle of that --- in the middle of  
17 your answer.

18 THE WITNESS: Okay.

19 Do you want me to start over?

20 ATTORNEY BROOKS: Who was that?

21 ATTORNEY WILKINSON: That was the court  
22 reporter. I can make a recording if everyone is happy  
23 with my phone just on the table so we could refer to  
24 that later if that's useful if we're concerned about the

Page 206

1 BY ATTORNEY BROOKS:

2 **Q. And you, yourself, are not aware of a single**  
3 **case of suicide by a preadolescent gender dysphoria**  
4 **patient that has come to your clinic?**

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: No.

7 BY ATTORNEY BROOKS:

8 **Q. And have you consulted any research on the rate**  
9 **of actual suicide by children suffering from gender**  
10 **dysphoria under the age of 15?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: Have I? Yes.

13 BY ATTORNEY BROOKS:

14 **Q. And what did that --- what source do you have in**  
15 **mind when you say that?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: Again, I have trouble with  
18 remembering and there is a wide variety of reports, some  
19 as --- from 25 to 30 percent, some as high as 40  
20 percent. And those are suicide attempts, as I recall,  
21 which means that the folks that died wouldn't have even  
22 been identified.

23 BY ATTORNEY BROOKS:

24 **Q. Well, you are aware that there's a very wide**

Page 208

1 THE WITNESS: Excuse me. No.

2 BY ATTORNEY BROOKS:

3 **Q. Have you followed up so that you have current**  
4 **information about Drew's mental, physical and social**  
5 **health as of today, which would be about age 21?**

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: Drew's no longer my  
8 patient, has transitioned to adult care. That's not  
9 what I do, so I don't have access to that.

10 BY ATTORNEY BROOKS:

11 **Q. What procedures do you have in place, if any, in**  
12 **your clinic to follow up long term with those whom you**  
13 **have prescribed puberty blockers or cross sex hormones**  
14 **for?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: So you know, here at Duke  
17 we have a multidisciplinary team. As --- I don't know  
18 if I mentioned them before. It includes a wide variety  
19 of individuals. And that group discusses every month  
20 our patients, any concerns or questions. In addition,  
21 that group has put together a registry that starts when  
22 they come to my clinic and we follow their health, their  
23 mental health through the time that they are in our  
24 clinic and then when --- oops. Sorry. And then when

Page 207

1 **statistical gap between suicide attempts and suicides.**  
2 **Correct?**

3 ATTORNEY BORELLI: Objection to form.

4 THE WITNESS: There is some variation  
5 between suicide attempts and what was the word, suicide  
6 ideation, yeah.

7 BY ATTORNEY BROOKS:

8 **Q. No. What I said is there is a very wide gap**  
9 **between suicide attempts and actual completed suicide?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: There is a gap between.  
12 Not every one who attempts. Otherwise, there wouldn't  
13 be a difference in the name.

14 BY ATTORNEY BROOKS:

15 **Q. In fact, you know as a matter of professional**  
16 **expertise that it is a very wide gap, do you not?**

17 ATTORNEY BORELLI: Objection.

18 THE WITNESS: I would have to look at the  
19 literature, at what the numbers look like and describing  
20 it why is an opinion.

21 BY ATTORNEY BROOKS:

22 **Q. Has any patient of the 500 under your care ever**  
23 **committed suicide at an age younger than 14?**

24 ATTORNEY BORELLI: Objection, form.

Page 209

1 they are adults transitioning to our adult care team.  
2 And in that way I'm able to keep up with those patients  
3 who remain at Duke for adult care.

4 BY ATTORNEY BROOKS:

5 **Q. So you have been practicing this field I think**  
6 **you said since about 2013. And the patients that you**  
7 **saw let's say in 2013, 2014, 2015, I think you said most**  
8 **of your patients presented older than age --- I don't**  
9 **recall exactly. Your average presentation is older than**  
10 **13?**

11 ATTORNEY BORELLI: Object to the form.

12 THE WITNESS: Yes.

13 ATTORNEY BORELLI: You got to pause so I  
14 can get in an objection.

15 THE WITNESS: Oh, yeah. Yeah.

16 BY ATTORNEY BROOKS:

17 **Q. So --- yeah. So those patients on average are**  
18 **now in their upper teens or perhaps 20?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: Let's see. I have patients  
21 who are older than that. I'm not sure of an average. I  
22 have not calculated an average.

23 BY ATTORNEY BROOKS:

24 **Q. Do you have any procedures in place to attempt**

1 **to monitor the mental health of your patients five years**  
 2 **after you first prescribe puberty blockers or cross sex**  
 3 **hormones?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: The patients that remain  
 6 within our registry do have regular mental health  
 7 follow-up. We have a team on the adult side as well in  
 8 both of the two clinics that we work with.

9 BY ATTORNEY BROOKS:

10 **Q. What percentage of your patients that you**  
 11 **yourself have authorized cross sex hormones do you have**  
 12 **access to data about their mental health five years**  
 13 **after initiation of hormone treatment?**

14 ATTORNEY BORELLI: Objection, form.

15 THE WITNESS: Some are still present in  
 16 the clinic. I would have access to those. You know,  
 17 I'm not supposed to access records specifically if  
 18 they're no longer in my care. The provider can reach  
 19 out to me with concerns and have a very close  
 20 relationship with the adult providers and they do ask me  
 21 questions about some of those. So in that way I would  
 22 have access as well as when we calculate on a population  
 23 base within our registry any outcomes there.

24 BY ATTORNEY BROOKS:

1 A. A registry is a list of patients who are  
 2 enrolled in a study, if it's done as a research  
 3 protocol. And within that registry, you collect  
 4 information that you choose to record that's important  
 5 and then you follow that over time in a systematic way.

6 ATTORNEY BROOKS: Let me grab tab 29 ---  
 7 let me mark as Exhibit 16 a document previously  
 8 designated as tab 29, which is article entitled --- I  
 9 should say a newspaper article entitled The Mental  
 10 Health Establishment is Failing Trans Kids by Laura  
 11 Edwards Leeper and Erica ---.

12 ---

13 (Whereupon, Adkins Exhibit 16, 2021  
 14 Washington Post Article, was marked for  
 15 identification.)

16 ---

17 BY ATTORNEY BROOKS:

18 **Q. And Dr. Adkins, am I correct that this in the**  
 19 **Washington Post came out in November of 2021 stirred up**  
 20 **quite a bit of discussion within your profession?**

21 ATTORNEY BORELLI: Objection, form.

22 THE WITNESS: I understand that there was  
 23 an article by Laura Edwards Leeper that there was a lot  
 24 of conversation around. I don't know if it was this

1 **Q. As a matter of research, has --- have you or**  
 2 **anybody associated with your clinic attempted a**  
 3 **follow-up survey or systematic series of interviews of**  
 4 **all patients who were prescribed hormones within, for**  
 5 **instance, some particular time period?**

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: So we currently are  
 8 enrolling patients in that study. It's not complete.  
 9 BY ATTORNEY BROOKS:

10 **Q. As we sit here today, you don't have any**  
 11 **systematic reasonably thorough information on the mental**  
 12 **health condition of let's say patients for whom you**  
 13 **first prescribed hormonal interventions five years ago.**

14 **Is that correct?**

15 ATTORNEY BORELLI: Objection. Objection  
 16 to form.

17 THE WITNESS: I would consider, you know,  
 18 a registry with research based systematic method.

19 BY ATTORNEY BROOKS:

20 **Q. A registry with research based ---?**

21 A. That is research based is a systematic program  
 22 to do that and find out follow-up.

23 **Q. What do you mean by registry that it is research**  
 24 **based?**

1 one. It is possible.

2 BY ATTORNEY BROOKS:

3 **Q. Did you read this?**

4 A. I haven't read this article.

5 **Q. There was a lot of conversation around a recent**  
 6 **article by Dr. Edwards Leeper and Dr. Anderson but you**  
 7 **didn't bother to read it?**

8 ATTORNEY BORELLI: Objection to form.

9 THE WITNESS: I have had discussions with  
 10 my colleagues around the substance. I haven't had the  
 11 time to read it.

12 BY ATTORNEY BROOKS:

13 **Q. Have you had professional interactions in the**  
 14 **past with Dr. Edwards Leeper?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: It's possible that we  
 17 taught at a same conference once, but I don't recall  
 18 ever having a conversation.

19 BY ATTORNEY BROOKS:

20 **Q. And have you had professional interactions with**  
 21 **Dr. Anderson?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: I have not.

24 BY ATTORNEY BROOKS:

Page 214

1 **Q. Are you generally aware of Dr. Edwards Leeper's**  
2 **reputation in the field?**

3 ATTORNEY BORELLI: Objection, form.

4 THE WITNESS: Yes.

5 BY ATTORNEY BROOKS:

6 **Q. How would you describe that reputation at least**  
7 **prior to publication of this article?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: In general, I would not  
10 necessarily say that it has changed. People have  
11 respect for Dr. Edwards Leeper and her publications in  
12 general. I don't know about specific ---.

13 BY ATTORNEY BROOKS:

14 **Q. People generally have respect for her**  
15 **publications?**

16 A. Generally. I don't know about every one.

17 **Q. Sure. Were you invited to participate as a**  
18 **member of the committee to revise the WPATH so-called**  
19 **standards of care relating to treatment of transgender**  
20 **individuals?**

21 ATTORNEY BORELLI: Objection, form.

22 THE WITNESS: I was.

23 BY ATTORNEY BROOKS:

24 **Q. Are you doing that?**

Page 216

1 BY ATTORNEY BROOKS:

2 **Q. So as a representation there I know that Dr.**  
3 **Anderson is transgender, is a natal male who's been**  
4 **living with a female gender identity for many years.**  
5 **That you don't know about one way or the other?**

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: I do not know that.

8 BY ATTORNEY BROOKS:

9 **Q. Okay.**

10 **Let me take you back to Exhibit --- sorry, what**  
11 **was the first one we marked? Was it 17 and 18 or 16 and**  
12 **17?**

13 ATTORNEY WILKINSON: Sixteen (16) and 17,  
14 16 and 17.

15 BY ATTORNEY BROOKS:

16 **Q. Let me take you back to Exhibit 16. And the**  
17 **first paragraph contains a narrative. I have no idea**  
18 **whether it is a specific narrative or kind of case study**  
19 **narrative about this girl Patricia who told her parents**  
20 **she was transgender at age 13. It goes on to say that a**  
21 **year earlier she had been sexually assaulted by an older**  
22 **girl. Do you know what percentage of natal females who**  
23 **come to your clinic after the beginning of puberty have**  
24 **experienced sexual assault before they present to you?**

Page 215

1 A. No.

2 **Q. And did you participate in the task force for**  
3 **the American Psychological Association, which developed**  
4 **guidelines for practice guidelines for work with**  
5 **transgender individuals?**

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: I have not participated in  
8 that, no.

9 BY ATTORNEY BROOKS:

10 **Q. Okay.**

11 **And let me mark the next one, which is an**  
12 **article that consists of an interview with Dr. Anderson.**  
13 **This I will mark as Exhibit 17?**

14 ---

15 (Whereupon, Adkins Exhibit 17, Anderson  
16 Interview, was marked for  
17 identification.)

18 ---

19 BY ATTORNEY BROOKS:

20 **Q. And I believe I asked if you knew her or are you**  
21 **familiar with the reputation of Dr. Anderson, Dr. Laura**  
22 **Anderson?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: Actually, no.

Page 217

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: I can't give you a  
3 percentage. It is something that we discuss with every  
4 patient in their intake assessment.

5 BY ATTORNEY BROOKS:

6 **Q. Do you believe that natal females who have**  
7 **suffered sexual assault are disproportionately**  
8 **represented among the population who present**  
9 **experiencing gender dysphoria or gender incongruence?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: So those assigned female at  
12 birth, I can't say that based on my review of my  
13 information that they are overrepresented. And I would  
14 have to have a comparison group. You know, one in four  
15 cisgender women have been attacked sexually at some  
16 point in their life. It's hard to get around that.

17 BY ATTORNEY BROOKS:

18 **Q. Let me ask you to turn to page three of Exhibit**  
19 **16.**

20 A. I'm sorry ---.

21 **Q. Page three, Exhibit 16.**

22 A. Okay. Thank you. I just had a drink of water.

23 **Q. Of course.**

24 A. They're not labeled on my paper.

**Q. The pages are not. You are right. I wrote them on mine. You would have to count them to be sure, but the third page.**

A. I think I got it.

**Q. These authors, Doctors Edwards Leeper and Anderson, state at the end of the paragraph at the top of page three that, quote, we may be harming some of the young people we strive to support, people who may not be prepared for the gender transitions they are being rushed into, closed quote.**

**Do you see that?**

A. Where again?

**Q. It's the very last sentence of the partial paragraph at the top?**

A. Right. Got it. Thank you. Yeah, I see it.

**Q. Do you share that concern expressed by Dr. Edwards Leeper and Dr. Anderson that is that some young people are being rushed into transitions and may be harmed rather than supported as a result?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So if you're following the recommendations there's at least six months of time. In my general experience it is years before they even present to my clinic. So I don't --- I would not say

**think it does, it begins ---.**

A. Okay. All right.

**Q. Within that you'll find the sentence that begins in recent study.**

A. Got it.

**Q. And it says in a recent study 100 detransitioners, for instance, 38 percent reported that they believed their original dysphoria have been caused by something specific such as trauma, abuse or mental health condition, closed quote.**

**Do you see that?**

A. I do.

**Q. Are you, yourself, aware of a recently published survey of 100 detransitioners by Dr. Litman of Brown University?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I have not seen that report.

BY ATTORNEY BROOKS:

**Q. Are you aware of that?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: No, actually. Again, I don't remember names, so when you ask me about an article by Doctor Brown, I know 100 Doctor Brown. And I

that that's a rush.

BY ATTORNEY BROOKS:

**Q. Well, and my question wasn't about your clinic now. My question was do you share the concern of these authors that looking around the practice more generally that some young people are being harmed rather than supported because they are being rushed into transitions they may not be fully prepared for?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So within research and within my conversations with my colleagues who are doing similar work, we practice similarly. I don't agree that they are rushing these kids.

BY ATTORNEY BROOKS:

**Q. Let me ask you to turn over to the next page. And there in the second paragraph from the bottom is a sentence that begins in a recent study. Do you see that sentence?**

A. I must not be on the right page.

**Q. It is the penultimate page.**

A. In the ---.

**Q. In the penultimate paragraph.**

A. Providers, that one?

**Q. In a recent study of 100 detransitioners. I**

have seen some articles about de-transition. So without that in front of me to really say, yes, I've seen that article --- it's possible. I do my best to keep up on the literature.

BY ATTORNEY BROOKS:

**Q. All right. I'm used to wetting my fingers --- let me take you back to the previous page, the third paragraph --- and the paragraph begins comprehensive assessment. Do you see that paragraph?**

A. Yes.

**Q. And at the end of that the last sentence reads the messages that teens get from Tik-Tok and other sources may not be very productive for understanding this constellation of issues, referring to gender dysphoria-related issues. Do you see that sentence?**

A. I do.

**Q. Do you share the concern of these authors, young people are being unduly influenced on issues of gender identity by social media messages?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: As a pediatrician, I have my reservations about social media and their effects on teens. Always reminding teens in my care that they need to check their sources and that TikTok isn't, for

Page 222

example, peer reviewed and that they should rely on, you know, the knowledge of their provider. And they're free to ask those questions and learn that information from a reliable person within our clinic.

BY ATTORNEY BROOKS:

**Q. Do you share the concern that teens are particularly subject to peer pressure through social media?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So you know, peer pressure is a recognized phenomenon with adolescents that can affect teens.

BY ATTORNEY BROOKS:

**Q. Is your clinic seeing an increasing number of older teens or young adults who are considering de-transitioning?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I'm sorry. Repeat the very first part of that.

BY ATTORNEY BROOKS:

**Q. Is your clinic seeing an increasing number of older teens or young adults who are considering de-transitioning?**

ATTORNEY BORELLI: Objection, form.

Page 224

**over the last decade?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I have seen at least one study would suggest that. It has not been my clinical experience.

BY ATTORNEY BROOKS:

**Q. That has not been the experience in your clinic?**

A. No.

**Q. Let me take you to paragraph 18 of your expert report. And there you express the opinion that a person's gender identity cannot be voluntarily changed and is not undermined or altered by the existence of other sexually related characteristics that do not align with it. Do you see that?**

A. I do.

**Q. And let me, in fact, have the Declaration --- the preliminary injunction declaration, which is tab one.**

ATTORNEY BROOKS: I'm going to mark that as Exhibit --- or did I already mark it?

ATTORNEY WILKINSON: Not marked.

ATTORNEY BROOKS: I did not. So what exhibit was that?

ATTORNEY WILKINSON: Eighteen (18).

ATTORNEY BROOKS: We will mark the

Page 223

THE WITNESS: Increasing over time ---

BY ATTORNEY BROOKS:

**Q. Yes.**

A. --- or in the past? I wouldn't say the rate has increased in my clinic.

**Q. Within the last --- well, let's say within 2021 or whatever of 2022 there has been, how many patients have raised with you or to your knowledge anyone in your clinic the possibility of de-transitioning?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: In that timeframe, I would have to look back exactly. Only three.

BY ATTORNEY BROOKS:

**Q. Are you aware of multiple reports that the proportion of young people presenting with gender dysphoria or gender incongruence among teens has shifted heavily towards girls over the last decade?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: You will have to clarify the question because girls ---.

BY ATTORNEY BROOKS:

**Q. Are you aware that the proportion of teens presenting at clinics with gender dysphoria or gender incongruence who are natal female has increased greatly**

Page 225

Declaration of Deanna Adkins dated 5/21/2021 as Exhibit 18.

---

(Whereupon, Adkins Exhibit 18, Declaration of Deanna Adkins, M.D., was marked for identification.)

---

BY ATTORNEY BROOKS:

**Q. And in this document also I want to call your attention to paragraph 18. And in the declaration filed in May of last year in paragraph 18 you wrote a person's gender identity is fixed. Do you see that language?**

A. I do.

**Q. And you eliminated the word --- the assertion that a person's gender identity is fixed from your expert declaration submitted more recently. Do you see that?**

A. I do.

**Q. Why did you make that omission?**

A. I think that it's too easy to misinterpret.

**Q. Explain.**

A. So when I'm talking about someone's gender identity it is what it is. And nothing that I do or they do or their family does can change that gender

Page 226

1 identity. Their understanding of that gender identity  
2 may change over time. And that was my --- what I was  
3 trying to say was not changeable. And when you use the  
4 other word it seems that it could be misinterpreted to  
5 me.

6 **Q. So you don't mean to say that gender identity**  
7 **never changes in individuals, do you?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: That's not what I said. I  
10 said gender identity is what it is. And your  
11 understanding of it may change over time.

12 BY ATTORNEY BROOKS:

13 **Q. We looked in the Endocrine Society Guidelines,**  
14 **at the language that refers to individuals who**  
15 **experience a continuous and rapid involuntary**  
16 **alternation between male and female. Do you remember**  
17 **that language?**

18 A. I do.

19 **Q. How does that relate --- how is that consistent**  
20 **with your opinion that gender identity is fixed and**  
21 **means what it is?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: So gender identity is that  
24 it moves somewhat along the spectrum. That doesn't

Page 228

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: Everyone's gender identity  
3 is how they explain it. They may understand it  
4 differently over time. Just because I say I don't like  
5 strawberries when I'm eight and I do like strawberries  
6 now doesn't mean I never liked strawberries to begin  
7 with. It means I finally had a good strawberry.

8 ATTORNEY BROOKS: Let me have tab 12.  
9 Let me mark as Exhibit 20.

10 ATTORNEY WILKINSON: Nineteen (19).

11 ATTORNEY BROOKS: Let me mark as Exhibit  
12 19, an article from Herbert Health Publishing by Sadra  
13 Katz-Wise, entitled Gender Fluidity: What it Means and  
14 Why Support Matters.

15 ---

16 (Whereupon, Adkins Exhibit 19, 2020  
17 Herbert Health Publishing Article, was  
18 marked for identification.)

19 ---

20 BY ATTORNEY BROOKS:

21 **Q. First I'll ask if you have any professional**  
22 **contact with Doctor Sadra Katz-Wise?**

23 A. I don't see the name spelled out. It doesn't  
24 sound familiar.

Page 227

1 change. That is their identity.

2 BY ATTORNEY BROOKS:

3 **Q. That doesn't change, but you have a professional**  
4 **opinion that individuals who experience a gender fluid**  
5 **identity at some period in their life inevitably remain**  
6 **gender fluid for the rest of their lives?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: Understanding their gender  
9 identity may change, what the identity is, is under  
10 exploration throughout their lives. From the time  
11 they're young they're discovering their gender identity.

12 BY ATTORNEY BROOKS:

13 **Q. Well, you consider part of your professional**  
14 **practice to believe what people tell you about their**  
15 **gender identity, don't you?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: The gender identity is  
18 something that can only be explained by a person because  
19 it is their knowledge of themselves.

20 BY ATTORNEY BROOKS:

21 **Q. And if a person at one point in time feels that**  
22 **their gender identity is fluid and another point in time**  
23 **feels that it is not, on what basis do you say that**  
24 **their true gender identity hasn't changed?**

Page 229

1 **Q. It's just under the graphic here ahead of the**  
2 **text. You'll see the name.**

3 A. Oh, in red. That's why I didn't see it.

4 **Q. Yeah, exactly. Right.**

5 A. Got it. Katz-Wise. No.

6 **Q. I see, when I look her up, that Dr. Katz-Wise is**  
7 **associated with Boston Children's Hospital and Harvard**  
8 **Medical School. That doesn't refresh your recollection**  
9 **as to any previous professional interactions with her?**

10 A. Again, I'm terrible with names.

11 **Q. You're aware that Boston Children's Hospital has**  
12 **a high reputation in the area of transgender therapy?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: Well, they have been  
15 involved in transgender therapy for a long time.

16 BY ATTORNEY BROOKS:

17 **Q. And they have a high reputation?**

18 ATTORNEY BORELLI: Objection, form.

19 THE WITNESS: In general people feel like  
20 they do a good job.

21 BY ATTORNEY BROOKS:

22 **Q. Let me ask you to turn to the second page. And**  
23 **down at the bottom is a heading that says what's the**  
24 **difference between gender fluid and transgender. Do you**

Page 230

1 see that?

2 A. I do.

3 **Q. And the first sentence there says while some**  
4 **people develop a gender identity early in childhood,**  
5 **others may identify with one gender at one time and then**  
6 **another gender later on.**

7 **Do you see that?**

8 A. I do.

9 **Q. And do you agree or disagree with that statement**  
10 **by Dr. Sabar Katz-Wise?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: So she is not saying that  
13 their gender identity changes. You know, at different  
14 times in your life your understanding may be that this  
15 is the group that I belong with. And as you learn more  
16 about your experience and your gender, that can change.

17 BY ATTORNEY BROOKS:

18 **Q. Dr. Adkins, how do you as a clinician --- if you**  
19 **have a patient who at one time identifies one way and**  
20 **another time identifies another way, how do you as a**  
21 **clinician determine which of those is that patient's**  
22 **true gender identity, given that you've said that gender**  
23 **identity is something that only the patient can express**  
24 **to you?**

Page 231

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: So you know, we're not sort  
3 of doing anything to influence that in our patients  
4 until they come to us later and have had lots of time to  
5 reflect on that. They by the guidelines need to have at  
6 least six months of identification with and  
7 understanding that gender identity is a particular way.  
8 And typically gender identity is starting to consolidate  
9 in adolescence and have a good understanding of your  
10 identity at that time.

11 BY ATTORNEY BROOKS:

12 **Q. What do you understand to be meant by the term**  
13 **gender incongruence?**

14 A. It is similar to the gender identity not  
15 matching your sex assigned at birth.

16 **Q. Let me ask you to find Exhibit 4, 2007 Endocrine**  
17 **Society guidelines. And turn if you would to page 3879,**  
18 **first column under the heading evidence, it reads in**  
19 **most children diagnosed with GD/gender incongruence it**  
20 **did not persist into adolescence.**

21 **Do you see that?**

22 A. I did.

23 **Q. So the point here is that these children were,**  
24 **in fact, diagnosed with gender dysphoria or gender**

Page 232

1 **incongruence which you just said means that their gender**  
2 **identity doesn't match their gender assigned at birth.**

3 **And then the Endocrine Society goes on to say that that**  
4 **identity, that sense of incongruence does not persist**  
5 **into adolescence.**

6 **Do you see that?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: I do.

9 BY ATTORNEY BROOKS:

10 **Q. And how do you reconcile that with your**  
11 **previously expressed opinion that gender identity is,**  
12 **quote, fixed?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: So this is a random piece  
15 out of this whole publication. They are talking --- as  
16 far as I can tell right here, and again I would be  
17 speculating, that it is about a particular piece of  
18 medical evidence. And medical evidence in this area has  
19 varied. It's based on the different groups and the way  
20 they were recruited, et cetera.

21 BY ATTORNEY BROOKS:

22 **Q. Well, you're --- never mind on a particular**  
23 **piece. You're well aware, are you not, that there are**  
24 **multiple studies that indicate the substantial majority**

Page 233

1 **of children who are diagnosed with gender dysphoria**  
2 **desist from experiencing gender dysphoria by some stage**  
3 **in adolescence?**

4 ATTORNEY BORELLI: Objection, form.

5 BY ATTORNEY BROOKS:

6 **Q. You discuss that in your report, do you not?**

7 A. I'm sorry. Can you repeat the question?

8 **Q. You are aware that there are multiple studies**  
9 **that have found that children diagnosed with gender**  
10 **dysphoria, the large majority of those individuals**  
11 **desist from experiencing gender dysphoria by some time**  
12 **in adolescence?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: And I don't typically see  
15 those patients in my clinic.

16 BY ATTORNEY BROOKS:

17 **Q. But you're aware of the science that is**  
18 **described though.**

19 **Right?**

20 ATTORNEY BORELLI: Objection, form.

21 THE WITNESS: There are patients ---  
22 there are studies that were done in the past that were  
23 not well done and had a bias with the recruitment that  
24 overlapped with other issues. I'm aware of those

Page 238

1 BY ATTORNEY BROOKS:

2 **Q. Do you in your professional work deal with**  
3 **prepubertal children who are experiencing gender**  
4 **dysphoria?**

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: Some.

7 BY ATTORNEY BROOKS:

8 **Q. Okay.**

9 **And do you want to revise the statement in your**  
10 **report to say instead that after puberty gender identity**  
11 **is fixed?**

12 ATTORNEY BORELLI: Objection, form.

13 THE WITNESS: Will you point that out to  
14 me?

15 BY ATTORNEY BROOKS:

16 **Q. I'm sorry, point what out to you?**

17 A. That particular statement in my report.

18 **Q. I misspoke. You asserted in your declaration**  
19 **that gender identity was fixed and my question is on**  
20 **consideration would you prefer to say that gender**  
21 **identity is fixed after puberty has occurred?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: So I didn't put that in a  
24 way that --- again, we eliminated the word fixed because

Page 240

1 **ago, you swore under oath that it was your professional**  
2 **opinion that gender identity was fixed. I'm entitled to**  
3 **ask you about that. The fact that you wanted to change**  
4 **a later document is interesting. It doesn't deprive me**  
5 **of the right to ask you questions about that document.**

6 **My question for you now is do you want to revise**  
7 **that statement to express the opinion that gender**  
8 **identity is fixed after puberty?**

9 ATTORNEY BORELLI: Objection, form. I  
10 apologize, Counsel. Can we --- I'm sorry, just lost  
11 track. Have you introduced the PI declaration?

12 ATTORNEY BROOKS: I have.

13 ATTORNEY BORELLI: What exhibit number is  
14 it?

15 ATTORNEY BROOKS: It is 18. Paragraph  
16 18.

17 ATTORNEY BORELLI: Paragraph 18. Thank  
18 you. Objection to form.

19 THE WITNESS: So I don't think that my  
20 description of people's understanding of gender identity  
21 and the way that we understand its development has  
22 changed. I can't do anything to change their identity.  
23 You can't do it. Their parents can't do it. And in  
24 that way I still agree with the fact that in the way

Page 239

1 of the easy ability to misconstrue that. People undergo  
2 a period of time in life where they understand their  
3 gender better than other times. And puberty is part of  
4 --- part of the mix.

5 BY ATTORNEY BROOKS:

6 **Q. So --- and this is the opportunity --- you're**  
7 **here, so we're not going to misunderstand your words.**  
8 **You signed and swore to an affidavit last year in which**  
9 **you said gender identity is fixed. I'm giving you an**  
10 **opportunity if you want to clarify or qualify that. And**  
11 **my question to you is, is it now your testimony that**  
12 **gender identity is fixed once puberty has occurred?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: Again, I think we have  
15 another document here that doesn't use the word fixed.  
16 Would you like me to go back and read that part? I can  
17 read through it and find it for you.

18 BY ATTORNEY BROOKS:

19 **Q. No. I would like to work with your sworn**  
20 **document from May of last year in which you said it was**  
21 **fixed.**

22 A. When we update documents we try to clarify  
23 anything that might be confusing.

24 **Q. Dr. Adkins, in May of 2021, which is not so long**

Page 241

1 that that was meant to be stated, that it can't be  
2 changed. Fixed is a similar word. I use that word.

3 BY ATTORNEY BROOKS:

4 **Q. So and I didn't ask you about our ability to**  
5 **change somebody else. Let me ask you a different**  
6 **question. At which developmental stage in your**  
7 **professional opinion does gender identity become fixed?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: Again, I believe I said  
10 already that gender identity is what it is from the time  
11 you are young. Your understanding of that develops over  
12 time based on your path through life. That --- in that  
13 way you can't change it.

14 BY ATTORNEY BROOKS:

15 **Q. Does that mean that if, according to Steemza and**  
16 **Cohen-Kettenis, 85 percent of prepubertal children who**  
17 **are diagnosed with gender dysphoria ultimately desist**  
18 **from experiencing dysphoria, that their original**  
19 **diagnoses were wrong?**

20 ATTORNEY BORELLI: Objection to form.

21 THE WITNESS: So there are a lot of  
22 individuals who have looked at that information and felt  
23 that the original group of individuals didn't have a  
24 transgender identity. In a young group that's hard to

1 assess at times. And so I would say in that way, you  
2 know, we --- it's just not the same. And you can repeat  
3 the question for me, please.

4 ATTORNEY BORELLI: We have been going an  
5 hour. I'd like to take a break.

6 ATTORNEY BROOKS: Let me repeat the  
7 question since I was just invited to do so.

8 BY ATTORNEY BROOKS:

9 **Q. I believe you testified that it is your view**  
10 **that one's gender identity never changes from infancy to**  
11 **adulthood although one's understanding of it may change**  
12 **over time. My question for you now is does that mean**  
13 **that in every case in which a child is diagnosed as**  
14 **gender dysphoric and they subsequently desist from**  
15 **gender dysphoria that the original diagnosis was wrong?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: So you know, at the time  
18 that their understanding of their identity was different  
19 from their sex assigned at birth when they were a child,  
20 if that was the case, and it is not clear in that study  
21 that that was necessarily the case, that the individuals  
22 felt dysphoria about that, that is what happened to  
23 them. Their understanding of their identity, if it  
24 changed over time, it may relieve some of that gender

1 dysphoria. I guess that's the best way I can state it.

2 ATTORNEY BROOKS: Let's take that break.

3 THE WITNESS: Thank you.

4 VIDEOGRAPHER: Going off the record. The  
5 current time reads 3:43 p.m. Eastern Standard Time.  
6 OFF VIDEO

7 ---  
8 (WHEREUPON, A PAUSE IN THE RECORD WAS HELD.)

9 ---  
10 ON VIDEO

11 VIDEOGRAPHER:

12 We're back on the record. The current  
13 time is 3:59 p.m. Eastern Standard Time.

14 ATTORNEY BROOKS: I'm just --- sorry.  
15 I'm just moving that so --- make sure it's still  
16 recording and I didn't muck it up. I just wanted to not  
17 hit it with papers.

18 ATTORNEY WILKINSON: Yes, it's still  
19 recording.

20 BY ATTORNEY BROOKS:

21 **Q. Let's --- Dr. Adkins, if I can ask you to find**  
22 **Exhibit 4 again, which is the 2017 guidelines. We are**  
23 **again on page 3879 where we just were. And there after**  
24 **the discussion that we looked at about desistance of**

1 **childhood gender dysphoria, the next sentence reads**  
2 **right after where we stopped if children had completed**  
3 **socially transition, the may have great difficulty in**  
4 **returning to the original gender role upon entering**  
5 **puberty. And it continues social transition is**  
6 **associated with the persistence of GD/gender**  
7 **incongruence as a child progresses into adolescence.**

8 **Do you see that?**

9 A. Uh-huh (yes).

10 **Q. At the very end of the paragraph it reads social**  
11 **transition in addition to GD/gender incongruence has**  
12 **been found to contribute to the likelihood of**  
13 **persistence.**

14 **Do you see that?**

15 A. Uh-huh (yes).

16 **Q. Now, what the Endocrine Society Committee,**  
17 **considering all the available research, says is that**  
18 **social transition has been found to contribute to the**  
19 **likelihood of persistence. Is that how you read their**  
20 **language here?**

21 ATTORNEY BORELLI: Objection, form.

22 THE WITNESS: That's how I read it.

23 BY ATTORNEY BROOKS:

24 **Q. And social transition has to do with how the**

1 **people around the child treat him or her, what pronouns**  
2 **they use, what names they use, what clothing they**  
3 **provide, correct, is that consistent with your**  
4 **understanding of social transition?**

5 ATTORNEY BORELLI: Objection, form.

6 BY ATTORNEY BROOKS:

7 **Q. It has to do with how society, how the people**  
8 **around you treat you.**

9 **Correct?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: Yes.

12 BY ATTORNEY BROOKS:

13 **Q. And therefore, what this is saying is how**  
14 **parents and those around the child treat that child can**  
15 **affect whether that child ends up identifying as**  
16 **transgender or identifying with a gender identity**  
17 **congruent with his or her biology.**

18 **Correct?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: One more time.

21 BY ATTORNEY BROOKS:

22 **Q. What this is saying is that how parents --- when**  
23 **it says that social transition has been found to**  
24 **contribute to the likelihood of persistence what that**

1 **tells us is how parents and others around the child**  
2 **treat that child can affect whether the child ends up**  
3 **identifying as transgender or cisgender?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: That is the way that reads.  
6 I would say that, you know, I don't recommend  
7 necessarily --- I recommend we follow the child and  
8 watch their gender developments.

9 BY ATTORNEY BROOKS:

10 **Q. This Committee says that by assisting a child to**  
11 **socially transition the available science suggests that**  
12 **adults are contributing to the likelihood of persistence**  
13 **rather than desistance. That's what it says.**

14 **Right?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: I'm sorry. I'm going to  
17 make you say it one more time, please. I apologize.  
18 I'm just getting tired.

19 BY ATTORNEY BROOKS:

20 **Q. I know the feeling. This says that by assisting**  
21 **a child to socially transition the available science**  
22 **suggests that adults are, quote, contributing to the**  
23 **likelihood of persistence rather than desistance.**

24 ATTORNEY BORELLI: Objection, form.

1 their gender identity can develop over time.

2 BY ATTORNEY BROOKS:

3 **Q. Do you agree or disagree with this statement in**  
4 **the Endocrine Society Guidelines that social transition**  
5 **has been found to contribute to the likelihood of**  
6 **persistence?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: You know, they --- I  
9 answered that question.

10 BY ATTORNEY BROOKS:

11 **Q. I'm sorry. I perhaps didn't correctly**  
12 **understand. So if you would answer it again, that would**  
13 **be helpful.**

14 A. So kids who --- now I've forgotten the question.

15 **Q. This one is a simple one. Do you agree or**  
16 **disagree with the statement from this committee, the**  
17 **Endocrine Society, that social transition has been found**  
18 **to contribute to the likelihood of persistence?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: You know, this --- it's  
21 hard for me to agree with that. As a pediatrician I  
22 know that people --- prepubertal children, young  
23 children, explore their gender identity in a lot of  
24 different ways over time, and so I don't know that I can

1 THE WITNESS: Gosh. So I'm not sure what  
2 you say sounds right to me. That is what it says on the  
3 paper.

4 BY ATTORNEY BROOKS:

5 **Q. And I will give you a chance to tell us whether**  
6 **you agree or disagree with it, because my understanding**  
7 **is that you, in contrast, believe that external**  
8 **influences can't affect gender identity.**

9 **Correct?**

10 ATTORNEY BORELLI: Objection to form.

11 BY ATTORNEY BROOKS:

12 **Q. Cannot?**

13 A. So you know, all of your life influences your  
14 identity development. You can't change what it is. You  
15 can --- it can change your experience. I don't think  
16 that these children were likely to have had a different  
17 outcome.

18 **Q. So your view is that gender identity can't**  
19 **change and therefore any child whose gender identity**  
20 **appears to change must have been mistaken at some state**  
21 **of their understanding.**

22 **Correct?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: So their understanding of

1 agree necessarily that the way that it's written ---  
2 that I necessarily agree with the specific terms.

3 BY ATTORNEY BROOKS:

4 **Q. I don't mean to suggest to you by word or tone**  
5 **that this document was handed down on Mount Sinai. I**  
6 **understand that there's room for scientists to disagree.**  
7 **I am just trying to get clear on your opinion. I'm**  
8 **pretty sure this document was not handed down on Mount**  
9 **Sinai.**

10 **Let me find a copy of your rebuttal report, which**  
11 **I believe was marked as Exhibit 3. Exhibit 3, the**  
12 **rebuttal report. Let me ask you to turn to page 11 of**  
13 **your rebuttal report. We can hand you another copy if**  
14 **need be. We should have one more.**

15 A. I think this is it.

16 **Q. No, we're looking for your rebuttal report.**  
17 **It's going to be a typewritten kind of something or**  
18 **other.**

19 A. Like this, right?

20 **Q. Exhibit 3.**

21 A. I'm sorry. No that's not --- sugar.

22 **Q. I'm just going to hand you another one.**

23 A. Okay. Thank you.

24 **Q. No hard feelings.**

Page 250

1 A. I --- I know it's here because I -- there's so  
2 many papers. You warned me there would be so many  
3 papers.

4 **Q. I did. I tried to warn you.**

5 **Let me ask you to turn to paragraph 11 of your**  
6 **rebuttal report.**

7 A. Oh, okay. Yeah.

8 **Q. Page five.**

9 A. I'm sorry, the number --- one of the numbers  
10 skipped and it was just a labeling of a reference, so  
11 again 11.

12 **Q. Yes. The second sentence there you wrote ---**  
13 **and this is of course a recent submission, adolescents**  
14 **with persistent gender dysphoria after reaching Tanner**  
15 **stage two almost always persist in their gender identity**  
16 **in the long term. Do you see that language?**

17 A. I do.

18 **Q. So --- and the basis that you cite for that**  
19 **rather specific factual proposition is an article or**  
20 **actually a chapter by Turban, DeVries and Zucker.**

21 **Correct? I'm just looking at footnote three.**

22 A. Yes.

23 **Q. So Tanner stage two, as I understand --- or we**  
24 **can look at the Endocrine Society note, but this is ---**

Page 252

1 between 9 and 14. Anything earlier or later again might  
2 trigger some questions that something is going on.

3 **Q. So age eight is generally girls turn eight in**  
4 **second or third grade? Third grade roughly?**

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: That would be --- you know,  
7 it varies because early starters, late starters. But  
8 ---.

9 BY ATTORNEY BROOKS:

10 **Q. And so for nine, for boys would be fourth grade?**

11 ATTORNEY BORELLI: Objection to form.

12 THE WITNESS: That would be the typical.

13 BY ATTORNEY BROOKS:

14 **Q. So we're talking grade school kids here, not**  
15 **even the end of grade school?**

16 ATTORNEY BORELLI: Objection, form.

17 BY ATTORNEY BROOKS:

18 **Q. And if the type of changes that mark the**  
19 **beginning of Tanner stage two are generally at least to**  
20 **the layman's eye not visible on a clothed child.**

21 **Correct?**

22 ATTORNEY BORELLI: Objection, form.

23 BY ATTORNEY BROOKS:

24 **Q. That mark the beginning Tanner stage two?**

Page 251

1 **Tanner stage two is when children first begin to exhibit**  
2 **physically recognizable changes in puberty.**

3 **Right?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: Yes.

6 BY ATTORNEY BROOKS:

7 **Q. So Tanner stage one, there's nothing observable.**  
8 **And the beginning of Tanner stage two is the first**  
9 **observable changes?**

10 A. Yes.

11 ATTORNEY BORELLI: Objection, form.

12 BY ATTORNEY BROOKS:

13 **Q. And I think you testified, but if you could just**  
14 **remind us kind of the timespan that that tends to begin**  
15 **for boys and girls.**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: Tanner two. Tanner two,  
18 for those assigned female at birth can range in the  
19 normal, typical development between the ages of 8 and  
20 12. It does fall outside of that at times and is  
21 considered early and could be a marker of a problem as  
22 well as delayed could be a marker of a problem.

23 **Q. For boys?**

24 A. For those assigned male at birth, so usually

Page 253

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: I would say that some  
3 assigned females at birth, especially if they're lean,  
4 you can see their breast development.

5 BY ATTORNEY BROOKS:

6 **Q. Just a breast bud. But in general, when we**  
7 **speak of adolescence, we don't --- in common parlance we**  
8 **do not include third and fourth graders, do we?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: Well, the definition of  
11 adolescence is the time during puberty, so they should  
12 be included.

13 BY ATTORNEY BROOKS:

14 **Q. In your experience as to how people use the**  
15 **term, third and fourth graders included in adolescence?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: It varies with regard to  
18 the context. Within my medical practice that's the way  
19 we use the term.

20 BY ATTORNEY BROOKS:

21 **Q. At any rate, we're talking about grade school**  
22 **ages, not junior high or middle school ages. What is**  
23 **your basis for saying that those children who persist up**  
24 **to the beginning of Tanner stage two almost always**

Page 254

1 **persist transgender identity?**

2 ATTORNEY BORELLI: Objection. Objection,  
3 form.

4 THE WITNESS: I don't know which  
5 reference it is, but I can state that in my practice  
6 that's what I have seen.

7 BY ATTORNEY BROOKS:

8 **Q. Let me show you the only reference you did cite**  
9 **for that, which I will mark as Exhibit 20, the article**  
10 **by Turban, DeVries and Zucker cited in footnote 20 of**  
11 **your rebuttal report. I'm sorry. Don't know why I said**  
12 **20. I'm going to hand the witness that article now.**

13 A. Thank you.

14 ---

15 (Whereupon, Adkins Exhibit 20, Turban,  
16 DeVries and Zucker Article, was marked  
17 for identification.)

18 ---

19 COURT REPORTER: Excuse me, but you're  
20 mumbling and I can't understand everything that you're  
21 saying.

22 ATTORNEY BROOKS: At the moment I'm just  
23 shuffling papers and handing out documents. And I will  
24 speak up now and ask a question. Sorry about that.

Page 256

1 **just last week?**

2 A. I have reviewed this document. I don't remember  
3 when though.

4 **Q. Okay.**

5 **And in here --- let's look at page 638. And**  
6 **there at the top of --- near the top of the first column**  
7 **on 638 is a discussion of follow-up studies of**  
8 **persisters and desisters. Do you see that discussion?**

9 A. Yes.

10 **Q. And it says --- four lines, five lines down it**  
11 **begins, quote, Restoray and Skeemsma have provided the**  
12 **most recent study of 10 follow up studies in which the**  
13 **percentage of participants classified as persisters**  
14 **ranged from two percent to 39 percent collapsed across**  
15 **natal boys and girls, closed quote. Do you see that?**

16 A. Yeah.

17 **Q. And further down under the heading persistence**  
18 **of gender dysphoria from adolescence to adulthood is a**  
19 **very short paragraph that reads in its entirety in**  
20 **contrast low rates of persistence from childhood into**  
21 **adolescence, it appears that the vast majority of**  
22 **transgender adolescents persist in their transgender**  
23 **identity, closed quote.**

24 **Do you see is that?**

Page 255

1 COURT REPORTER: Well, we are on the  
2 record and I need to be able to hear every single word  
3 that you guys are saying.

4 ATTORNEY BROOKS: We'll do the best we  
5 can.

6 COURT REPORTER: It's hard for me over  
7 here.

8 BY ATTORNEY BROOKS:

9 **Q. Is this, in fact, the article that you**  
10 **referenced in your rebuttal report, Dr. Adkins, or the**  
11 **chapter I should say?**

12 A. Yeah. I mean, I'd have to take a minute to  
13 review it.

14 VIDEOGRAPHER: Counsel, which tab number  
15 is this?

16 THE WITNESS: I'm sorry, you broke up.

17 VIDEOGRAPHER: Which tab number is this  
18 document?

19 ATTORNEY BROOKS: Tab 39. I apologize.

20 VIDEOGRAPHER: Thank you.

21 THE WITNESS: It is labeled as that.

22 BY ATTORNEY BROOKS:

23 **Q. Well, do you recall recently reading this**  
24 **article since it was cited in this document submitted**

Page 257

1 A. Yes.

2 **Q. And was that the language that you had in mind**  
3 **when you cited this reference in footnote three of your**  
4 **rebuttal report?**

5 A. I would have to look all the way through the  
6 article. It's consistent.

7 **Q. And the language that I directed you to at the**  
8 **top summarizes studies that show --- showing of**  
9 **persistence of gender dysphoria among childhood**  
10 **dysphorics of only two percent to 39 percent.**

11 **Right?**

12 ATTORNEY BORELLI: Objection, form.

13 THE WITNESS: Those are two different  
14 populations.

15 BY ATTORNEY BROOKS:

16 **Q. They are. And I'm asking you now again about**  
17 **what it says at the top?**

18 A. Please repeat your question.

19 **Q. The discussion at the top summarizes studies**  
20 **showing persistent childhood dysphoria of only between**  
21 **two percent and 39 percent, depending on the study?**

22 ATTORNEY BORELLI: Objection to form.

23 THE WITNESS: I see that.

24 BY ATTORNEY BROOKS:

**Q. And that is that the large majority consisted at some stage before adulthood.**

**Correct?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: More than half per this.

BY ATTORNEY BROOKS:

**Q. And nothing here tells us about exactly what stage of adolescence before adulthood they desisted, does it?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: In this literature adolescence is puberty. It would have to be at least Tanner two.

BY ATTORNEY BROOKS:

**Q. At least. Now, my question was nothing in the discussion up towards the top of the column about these persistence and desistance studies tells us at what stage of puberty the desisters desisted, does it?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I would have to look at the whole study. Just in that line that detail is not listed.

BY ATTORNEY BROOKS:

**Q. And similarly, looking at the discussion under**

**gender dysphoria do so no later than the time they first reach Tanner stage two?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I don't think that I recall a study that's been modeled that way.

BY ATTORNEY BROOKS:

**Q. Can you tell me --- identify for me any study that has examined whether what is called in the literature watchful waiting combined with psychotherapy results in worse outcomes for children as compared to administration of puberty blockers and social outcomes?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So the experience is that some patients have dysphoria that is significant enough once they are in puberty to be dangerous to their life. I worry about those patients. We allow them a pause with puberty blockers to continue to figure out their gender identity. I got lost in my answer, I apologize.

BY ATTORNEY BROOKS:

**Q. Well, Dr. Adkins, I didn't ask what you were worried about. I asked can you identify any study that examines whether watchful waiting for children combined with psychotherapy results in better or worse outcomes on average than administering puberty blockers and**

**the heading persistence of gender dysphoria from adolescence to adulthood not being in that sentence tells us what stage of adolescence, whether it is Tanner stage two or three or four is being referred to when it says the majority of adolescents persist?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: It's not written right there, no.

BY ATTORNEY BROOKS:

**Q. Please identify for me all studies you are aware of that show that those who desist from childhood gender dysphoria do so by no later than beginning of Tanner stage two.**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I am not going to be able to remember those off the top of my head.

BY ATTORNEY BROOKS:

**Q. Can you remember a single one?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I would have to have you repeat the question, but I doubt it.

BY ATTORNEY BROOKS:

**Q. I will repeat it. Identify all studies you're aware of that show that those who desist from childhood**

**social transition?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: You know, I can't remember the exact study. We have studies that show that if you are not helping the patients relieve their gender dysphoria and psychotherapy has not been shown to do that, then we would be, you know, at an unethical point to do that study because it would increase risk of death in those patients for us to watch and wait.

BY ATTORNEY BROOKS:

**Q. So your answer is at no time since the inception of this field, that is therapy for gender dysphoria, are you aware of any study comparing outcomes for gender dysphoric children of on the one hand watchful waiting accompanied by psychotherapy and on the other hand puberty blockers and social transitioning?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: There's a long history of individuals who were left untreated or treated with psychotherapy who died in hospitals or not in hospitals because they were only given those therapies which were the only ones available at the time.

BY ATTORNEY BROOKS:

**Q. Dr. Adkins, you are also aware, are you not,**

1 **that there's a long history of individuals who have**  
 2 **transitioned both socially and hormonally who have**  
 3 **committed suicide?**

4 ATTORNEY BORELLI: Objection to form.  
 5 BY ATTORNEY BROOKS:

6 **Q. That's well documented in the literature, is it**  
 7 **not?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: There are individuals who  
 10 still struggle with depression and anxiety to the point  
 11 that they are --- do commit suicide and they have not  
 12 necessarily the reason being related to their gender  
 13 dysphoria. Could be. Hard to know.

14 BY ATTORNEY BROOKS:

15 **Q. In fact, Skeemsma and colleagues at the**  
 16 **respected institute in Amsterdam, DeVry University, have**  
 17 **documented very high rates of successful completed**  
 18 **suicide among transgender adults, have they not?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: I would have to see the  
 21 study.

22 BY ATTORNEY BROOKS:

23 **Q. You are not aware of that information?**

24 A. I have not seen that study. I have read the

1 literature. I don't recall a study saying there was a  
 2 high or why. I would need a number.

3 BY ATTORNEY BROOKS:

4 **Q. You read Dr. Levine's report?**

5 A. Yeah, it was --- yes.

6 **Q. And do you recall that he cites multiple**  
 7 **studies, including studies from DeVry University team**  
 8 **documenting high rates of successful completed suicide,**  
 9 **not studies, he's done, that clinic has done documented**  
 10 **high rates of successful suicide among transgender**  
 11 **adults?**

12 ATTORNEY BORELLI: Objection, form.

13 THE WITNESS: I would need a number. I'm  
 14 not going to classify something as high just because ---  
 15 I would need a number.

16 BY ATTORNEY BROOKS:

17 **Q. Have you thought that it was incumbent upon you**  
 18 **somebody assisting young people to transition and**  
 19 **prescribing hormones to thoroughly investigation and**  
 20 **question suicidality among transitioned transgender**  
 21 **individuals?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: Again, yes. I read those  
 24 when I can. I am not good with recalling names in

1 specific reports. I am aware that that is an issue with  
 2 some people who have transitioned fully.

3 BY ATTORNEY BROOKS:

4 **Q. Do you believe that social transition is an**  
 5 **important part of medical care for transgender**  
 6 **individuals?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: Yes.

9 BY ATTORNEY BROOKS:

10 **Q. And do you also consider puberty blockers to be**  
 11 **part of treatment for children with gender dysphoria?**

12 ATTORNEY BORELLI: Objection to the form.

13 THE WITNESS: I have seen results from a  
 14 recent study that said that there was a decrease in  
 15 dysphoria. I think it was anxiety and depression. I  
 16 would have to double check the article, with puberty  
 17 blockers. Our goal with puberty blockers is to pause  
 18 and allow people to understand their identity and figure  
 19 out what is going on with that understanding and what is  
 20 the best care for that patient is.

21 BY ATTORNEY BROOKS:

22 **Q. Is the point of administering puberty blockers**  
 23 **to children who are experiencing gender dysphoria to**  
 24 **prevent puberty from occurring at the time that it**

1 **naturally would occur in that child?**

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: In patients --- in patients  
 4 who are having early puberty it is a different  
 5 mechanism. For people with gender dysphoria where you  
 6 are trying to pause it and we keep it within the realm  
 7 of normal pubertal development.

8 BY ATTORNEY BROOKS:

9 **Q. For individuals suffering --- children suffering**  
 10 **from gender dysphoria the precise point of administering**  
 11 **puberty blockers is to prevent puberty from occurring in**  
 12 **that child at the time it would otherwise naturally**  
 13 **occur.**

14 **Correct?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: It would --- our pausing  
 17 the puberty and keeping it within the normal range of  
 18 pubertal development.

19 BY ATTORNEY BROOKS:

20 **Q. Dr. Adkins, the purpose of administering**  
 21 **pubertal blockers to a particular child is to prevent it**  
 22 **from happening when it would otherwise happen naturally**  
 23 **in that child.**

24 **Correct?**

Page 266

1 ATTORNEY BORELLI: Objection, form.

2 BY ATTORNEY BROOKS:

3 **Q. There is no other purpose?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: I'm sorry. I have to ask

6 --- you used some pronounced in there that were not real  
7 clear. If you don't mind repeating the question.

8 BY ATTORNEY BROOKS:

9 **Q. The purpose of administering puberty blockers to**  
10 **a child suffering from gender dysphoria is to prevent**  
11 **puberty from happening in that child at the time it**  
12 **would otherwise naturally occur in that child absent the**  
13 **blockade?**

14 ATTORNEY BORELLI: Objection.

15 THE WITNESS: We are pausing their  
16 puberty once it starts, putting a pause.

17 BY ATTORNEY BROOKS:

18 **Q. I get to ask the questions. That means you**  
19 **wanted to prevent puberty from happening when it would**  
20 **naturally happen for that child apart from the**  
21 **medication?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: Yes.

24 BY ATTORNEY BROOKS:

Page 268

1 and side effects and my general experience and the  
2 publications that are available. Goodness gracious.  
3 Boy, that lunch is getting me.

4 I explain to my patients the effects and  
5 side effects and I talk with them about whether --- my  
6 experience has been I have had very few patients  
7 experience a problem with the medication.

8 BY ATTORNEY BROOKS:

9 **Q. And if you are unwilling to sit here today and**  
10 **admit that you tell parents that puberty blockers are**  
11 **safe then why have you stated in your expert report to**  
12 **the court that treatment, including puberty blockers,**  
13 **are safe?**

14 ATTORNEY BORELLI: Objection, form.

15 THE WITNESS: Every patient is  
16 individual. I have to make an individual assessment for  
17 each patient. I will say it's safe for the patients  
18 that that applies to.

19 BY ATTORNEY BROOKS:

20 **Q. Which patients does that apply to?**

21 A. Most of the patients don't have a  
22 contraindication to using puberty blockers.

23 **Q. Is safe a term of art to you as a doctor?**

24 ATTORNEY BORELLI: Objection, form.

Page 267

1 **Q. Thank you.**

2 **You regularly tell parents that the**  
3 **administration of puberty blockers for that purpose is,**  
4 **quote, safe?**

5 **Correct?**

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: I go through very specific  
8 list of side effects and effects with my patients with  
9 that medication.

10 BY ATTORNEY BROOKS:

11 **Q. You regularly tell parents using the word that**  
12 **puberty blockers are, quote, safe, do you not?**

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: I am telling my patients  
15 the risks and benefits. I am telling them I feel  
16 comfortable using it.

17 BY ATTORNEY BROOKS:

18 **Q. Let's find your report, which is Exhibit 1 ---**  
19 **no --- yes, Exhibit 1. If you can find your report.**  
20 **Apologize. Too much paper. Too long a day.**

21 **Dr. Adkins, do you or do you not tell parents**  
22 **that puberty blockers are safe?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: Again, I review the effects

Page 269

1 THE WITNESS: I'm not sure what you mean  
2 by the word art.

3 BY ATTORNEY BROOKS:

4 **Q. Does it have a precise meaning? To say a**  
5 **pharmaceutical is safe, does that have a meaning to you**  
6 **as a doctor?**

7 A. It has a meaning.

8 **Q. What is that?**

9 A. So in general when we're talking about safety  
10 and medicine we're talking about limiting the number of  
11 negative side effects that can cause significant issues  
12 for patients. I think that would --- I think that's  
13 what I would say.

14 **Q. Isn't it a truism you were taught in medical**  
15 **school that every pharmaceutical has side effects?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: So truism is a word that  
18 --- sorry, that is unclear to me. Can you clarify?

19 BY ATTORNEY BROOKS:

20 **Q. Weren't you taught in medical school that every**  
21 **pharmaceutical has side effects?**

22 ATTORNEY BORELLI: Object to form.

23 THE WITNESS: Yes.

24 BY ATTORNEY BROOKS:

Page 270

1 **Q. And do you agree or disagree that a flat**  
 2 **assertion that any pharmaceutical is safe is not**  
 3 **consistent with accurate medical terminology?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: I would say that I work  
 6 with what the information is available to me about  
 7 safety profile. I apply that to each patient  
 8 individually. Sometimes I feel safer using it in one  
 9 patient versus another patient. Every drug is  
 10 different, every side effect profile is different, every  
 11 patient is different.

12 BY ATTORNEY BROOKS:

13 **Q. Why then did you flatly assert to the court that**  
 14 **treatment for transgender youth when you were discussing**  
 15 **puberty blockers and hormone therapies is, quote, safe?**

16 ATTORNEY BORELLI: Objection to form.

17 THE WITNESS: In general I have not  
 18 experienced nor have I seen published experiences of  
 19 issues with using these medications that causes a  
 20 significant problem for my patients.

21 BY ATTORNEY BROOKS:

22 **Q. You regularly tell parents what you have said**  
 23 **several times today, that puberty blockers act merely as**  
 24 **a pause and are fully reversible, do you not?**

Page 272

1 **Do you see that language?**

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: I do.

4 BY ATTORNEY BROOKS:

5 **Q. And what is your understanding as to why the**  
 6 **Endocrine Society advises that it's important to advise**  
 7 **about fertility preservation prior to initiating puberty**  
 8 **suppression if puberty suppression is nearly nothing but**  
 9 **a pause?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: Well, the --- you know,  
 12 puberty pausing is in my experience and in the reported  
 13 data always reversible. I have not ever had a patient  
 14 who didn't resume their normal puberty when they came  
 15 off and were on no other treatment of a puberty  
 16 blockade. I would think that this is being very careful  
 17 about young individuals getting puberty blockers.  
 18 Again, I haven't seen any reports. In fact, it is used  
 19 to preserve fertility in cancer patients.

20 BY ATTORNEY BROOKS:

21 **Q. Do you, in fact, counsel all parents and**  
 22 **children about fertility preservation options before**  
 23 **administering puberty blockers?**

24 ATTORNEY BORELLI: Objection, form.

Page 271

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: I do.

3 BY ATTORNEY BROOKS:

4 **Q. And you are aware, are you not, that the**  
 5 **Endocrine Society guidelines advise that before**  
 6 **approving puberty blockers a clinician should discuss**  
 7 **risks to fertility and the availability, the possibility**  
 8 **of fertility preservation.**

9 **Correct?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: I'm not sure that is in the  
 12 Endocrine Society guidelines with puberty blockers. It  
 13 may be. That it is no part of the gender affirming  
 14 hormone recommendation.

15 BY ATTORNEY BROOKS:

16 **Q. Let's look at page 3879 in the guidelines,**  
 17 **Exhibit 4.**

18 A. What exhibit again, 4?

19 **Q. Exhibit 4. And I'm going to call your attention**  
 20 **to 3879. And column two is guideline 1.5 where it says,**  
 21 **quote, we recommend the clinicians inform and counsel**  
 22 **all individuals seeking gender affirming medical**  
 23 **treatment regarding options for fertility preservation**  
 24 **prior to initiating puberty suppression in adolescence.**

Page 273

1 THE WITNESS: I do.

2 BY ATTORNEY BROOKS:

3 **Q. And do you have a view as to whether for**  
 4 **instance a 9 year old can even begin to understand**  
 5 **puberty, sexual development and the possibility of**  
 6 **becoming a parent so as to provide meaningfully informed**  
 7 **consent?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: So those individuals also  
 10 have their parents who are with them to learn about  
 11 these thing and weigh those things. The patient is not  
 12 there in isolation. They get an option at the time  
 13 where we would stop puberty blockers or any time that  
 14 they are on to make a change in that. It is completely  
 15 reversible.

16 BY ATTORNEY BROOKS:

17 **Q. You have testified at the beginning of the day**  
 18 **you had children of your own. Both as a professional**  
 19 **and as a mother do you have a view as to whether a 9**  
 20 **year old can sufficiently understand puberty, sexual**  
 21 **development and the possibility of becoming a parent to**  
 22 **enable them to provide meaningfully informed consent?**

23 ATTORNEY BORELLI: Objection, form.

24 THE WITNESS: So in young kids we use

Page 274

these --- in five year olds --- I have treated a five year old this week with this medication for early puberty. I trust, based on the data that is available to me over the last 30 years using this medication to pause puberty for central precocious puberty that it is a safe medication and that the patient will be fertile. Can't say 100 percent because who knows what else is going on in each individual patient that may cause them to have an infertility issue.

BY ATTORNEY BROOKS:

**Q. Dr. Adkins, puberty blocking drugs have gone through phase one, phase two, phase three clinical trials submitted to the FDA, reviewed. They've been approved for the indication of precocious puberty.**

**Correct?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Yes.

BY ATTORNEY BROOKS:

**Q. None of that has been done for an indication of gender dysphoria to your knowledge.**

**Correct?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I use lots of medications that aren't FDA approved for the particular indications.

Page 276

the day. I'll be glad.

BY ATTORNEY BROOKS:

**Q. Just to clarify, and I don't mean to harass you, but we've been asked to repeat it. Puberty blockers have been put through phase one, phase two, phase three clinical trials submitted to the FDA for the purpose of delaying precocious puberty in children until the normal time for puberty. And your answer was?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Yes.

BY ATTORNEY BROOKS:

**Q. And they have not been tested for safety, for efficacy in phase one, phase two or phase three clinical trials for the purpose of delaying puberty from its naturally occurring time in children who do not suffer from precocious puberty.**

**Correct?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: We use data that wasn't presented to the FDA to --- to look at this to see if it is safe. It's also been approved by the FDA to be used in adults. Also been used and approved for fertility preservation. Has lots of approvals that have verified its safety over time.

Page 275

Many drugs in pediatrics are not ever tested in children. It's just within the last few years that they have made a recommendation that that happen for a medication. So there are many drugs that haven't been FDA approved that are used in pediatrics based on information for patients in a different indication or adulthood.

**Q. Puberty blockers have been tested through phase one, phase two, phase three clinical trials for the purpose of postponing precocious puberty until the normal time period for puberty.**

**Correct? That's what has been tested?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: Yes.

BY ATTORNEY BROOKS:

**Q. And no such tests have been done or submitted to the FDA ---?**

COURT REPORTER: Can you repeat what you said because I'm not sure that last question fully came through.

ATTORNEY BROOKS: The last question was --- and I --- I admit that my voice, as the witness's, is dropping. We're trying here. And I --- Dave's resting his voice for a few questions towards the end of

Page 277

BY ATTORNEY BROOKS:

**Q. Well, a moment ago when I asked you if you tell people they were safe you were not quite willing to say that. Do you want to revise that testimony?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I believe at the end of that I was saying to you that every patient is different. There are some that have risks. When I feel comfortable that my patient in front of me doesn't have those risks based on the medical literature I feel that they're safe to use. I have my experience. I have seen the literature. I feel --- yes.

BY ATTORNEY BROOKS:

**Q. The law that's being challenged in this lawsuit doesn't restrict the use of puberty blockers so far as you understand, does it?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I don't recall that being part of the law.

BY ATTORNEY BROOKS:

**Q. It doesn't exclude anyone for participation on any team based on use of puberty blockers, does it?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Not that I recall.

Page 278

1 BY ATTORNEY BROOKS:

2 **Q. And you have previously testified that in your**  
3 **view, the law is unreasonable if it excludes, prevents**  
4 **any individuals with a transgender identity from playing**  
5 **in the category that corresponds to their gender**  
6 **identity.**

7 **Correct?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: That sounds accurate.

10 BY ATTORNEY BROOKS:

11 **Q. I don't want to mischaracterize your opinion.**

12 **Okay.**

13 **So what is the relevance to your opinion that**  
14 **all the discussions in your report about puberty**  
15 **blockers?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: Sorry. I need some water.

18 And then, if you don't mind, while I'm doing that, could  
19 you please re-read the question. Sorry.

20 BY ATTORNEY BROOKS:

21 **Q. Yes. I'll even wait until you've had your**  
22 **drink.**

23 A. Sorry.

24 **Q. I'm hitting the bottom myself.**

Page 279

1 A. It's pollen season. It's bad.

2 **Q. It's just getting going.**

3 A. I know.

4 **Q. Given what we just walked through, ---**

5 A. Yes.

6 **Q. --- what is the relevance of all the discussion**  
7 **about puberty blockers in your expert report and**  
8 **rebuttal report to the opinions you're offering in this**  
9 **case?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: So my part of this is to  
12 talk about what care is for people who are transgender  
13 and what medications they might be on and what  
14 treatments might be ideal for them.

15 BY ATTORNEY BROOKS:

16 **Q. You've talked about how each --- you want to**  
17 **treat each patient differently. You want to be very**  
18 **careful about their treatment choices, their parents'**  
19 **treatment choices, that they understand all of the**  
20 **considerations.**

21 **Would it cause you concern if West Virginia put**  
22 **into place a law that created incentives or pressures on**  
23 **parents and children to make decisions about puberty**  
24 **blockers at an early stage?**

Page 280

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: I would not think it would  
3 be appropriate to pressure anyone.

4 BY ATTORNEY BROOKS:

5 **Q. So for instance, a law that said if you take**  
6 **puberty blockers then you can play on the girls team and**  
7 **if you don't you can't, that would cause you concern as**  
8 **a doctor, would it not?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: Ideally, they would be able  
11 to whether or not they have the puberty blockers or not  
12 play on the team that matches their gender identity.

13 BY ATTORNEY BROOKS:

14 **Q. And ideally and from your perspective and in**  
15 **fact if the law set up an incentive that says you can**  
16 **only play on the girls' team if you take puberty**  
17 **blockers, and if you don't, you're foreclosed from female**  
18 **athletics, that would cause you concern as a doctor as**  
19 **biasing the patient's and parents' decisions, would it**  
20 **not?**

21 ATTORNEY BORELLI: Objection, form.

22 BY ATTORNEY BROOKS:

23 **Q. That's not a law you would want to see on the**  
24 **books?**

Page 281

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: I don't think I would want  
3 to see that on the books. Haven't thought through every  
4 detail of that but I don't think so.

5 BY ATTORNEY BROOKS:

6 **Q. You are aware, are you not, that all the**  
7 **recommendations in the 2017 guidelines, also in the 2009**  
8 **guidelines from the Endocrine Society about the**  
9 **administration of puberty blockers is according to the**  
10 **committee that prepares those recommendation based on**  
11 **either low quality or very low quality evidence.**

12 **Right?**

13 A. You know, all recommendation put together are  
14 graded with evidence, and it's in the report --- we use  
15 them --- not in the report, in the guidelines. And we  
16 use lots of guidelines that have low quality to help  
17 guide our care.

18 **Q. Low quality evidence means that you, as a**  
19 **scientist, you as a doctor, can't be very confident that**  
20 **the recommendation will result in beneficial results.**  
21 **That is kind of the meaning of low quality evidence.**

22 **Right?**

23 ATTORNEY BORELLI: Objection to form.

24 THE WITNESS: I would suggest it gives us

1 a place to start and we need to be very mindful when  
2 using that information as to how we apply it.

3 ATTORNEY BORELLI:

4 Why don't we go ahead and take another  
5 break?

6 ATTORNEY BROOKS: Let me just ask the  
7 court reporter how many --- how much more time in the  
8 seven o'clock hours.

9 COURT REPORTER: We're at six hours and  
10 six minutes, so 54 minutes.

11 ATTORNEY BROOKS: Okay. We'll take that  
12 break. Absolutely.

13 ---

14 (WHEREUPON, A PAUSE IN THE RECORD WAS HELD.)

15 ---

16 ATTORNEY BROOKS:

17 All right. We will resume.

18 BY ATTORNEY BROOKS:

19 **Q. Dr. Adkins, once again I will direct you to the**  
20 **Endocrine Society guidelines, Exhibit 4, and ask you to**  
21 **turn with me to page 3874 and column two --- column one,**  
22 **I'm sorry 3874.**

23 A. Column ---?

24 **Q. Column one. And towards the bottom, penultimate**

1 **paragraph begins in the future we need. Do you see**  
2 **that?**

3 A. I do.

4 **Q. And it says in the future --- this is in the**  
5 **preliminary section. Before the specific**  
6 **recommendations it says, quote, in the future we need**  
7 **more rigorous evaluations of the effectiveness and**  
8 **safety of endocrine and surgical protocols. And it goes**  
9 **on then to say specifically endocrine protocol ---**  
10 **specifically endocrine treatment protocols for GD/gender**  
11 **incongruence should include the careful assessment of**  
12 **the following. And it lists a number of things, the**  
13 **effective prolonged delay of puberty in adolescence on**  
14 **bone health, gonadal function and the brain, including**  
15 **effects on cognitive, emotional --- emotional, social**  
16 **and sexual development.**

17 **Have I, with various corrections, read that**  
18 **correctly?**

19 A. Yes.

20 **Q. So as of 2017, in the opinion of the committee**  
21 **that put together these guidelines ---.**

22 COURT REPORTER: Excuse me. I don't know  
23 if you're speaking, but I lost you at cognitive.

24 ATTORNEY BROOKS: I'm sorry?

1 COURT REPORTER: I lost you at cognitive  
2 and then I didn't hear anything for like 20 seconds. So  
3 I wasn't sure if you were still talking since I can't  
4 see you.

5 ATTORNEY BROOKS: Of course. And I was.  
6 So, golly.

7 COURT REPORTER: Thank you.

8 BY ATTORNEY BROOKS:

9 **Q. So I'm going to pick up that question again.**

10 **In the paragraph that we're looking at in**  
11 **column one of page 3874 the committee writes that things**  
12 **that need to be better studied include, quote, the**  
13 **effects of prolonged delay of puberty in adolescence on**  
14 **bone health, gonadal function and the brain, including**  
15 **effects on cognitive, emotional, social and sexual**  
16 **development, closed quote.**

17 **Dr. Adkins, is it your understanding that the**  
18 **committee here is saying that there's not yet adequate**  
19 **scientific evaluation of the impact of puberty blockers**  
20 **on the brain?**

21 ATTORNEY BORELLI: Objection, form.

22 THE WITNESS: So you know, the  
23 recommendation by the same group is that in some  
24 patients this is the approach that --- that is used.

1 Certainly we all welcome more research. We all want to  
2 know if anything is different from the information that  
3 we have as mentioned before for use of this medication  
4 in other areas where we're not seeing any effect on  
5 these things.

6 BY ATTORNEY BROOKS:

7 **Q. Is it consistent with your understanding as a**  
8 **doctor that the development of the brain in turn affects**  
9 **cognitive, emotional, social and sexual development?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: The brain has effects in  
12 all those areas.

13 BY ATTORNEY BROOKS:

14 **Q. To your knowledge, it has effects that change**  
15 **across the course of puberty in all those areas.**

16 **Correct?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: Yes, they're all  
19 interrelated and they're occurring all at the same time.

20 ATTORNEY BROOKS: Let me mark as Exhibit  
21 21 a document that is titled Teenage Brain: A work in  
22 Progress, which is an information sheet that is  
23 attributes itself to the National Institute of Mental  
24 Health, which I believe we discussed earlier. Tab 32.

Page 286

1 Yes, thank you. I'm sorry, I believe I said it, Exhibit  
2 21.

3 ---

4 (Whereupon, Adkins Exhibit 21, NIMH  
5 Information Sheet, was marked for  
6 identification.)

7 ---

8 BY ATTORNEY BROOKS:

9 **Q. So I would like to talk for a moment about the**  
10 **impact of puberty and therefore puberty blockade on**  
11 **brain development. On the second page at the more**  
12 **information, we see contact information at the National**  
13 **Institute of Mental Health. And I don't want to**  
14 **misrepresent, did you earlier testify that is a well**  
15 **known and respected source of information about mental**  
16 **health therapies?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: Yes.

19 BY ATTORNEY BROOKS:

20 **Q. And let me take you to page one. And I'm simply**  
21 **using this to pin down a few kind of basic points. In**  
22 **the second column out of three, two-thirds of the way**  
23 **down, three-quarters of the way down --- well, the**  
24 **sentence begins halfway down. In the first such**

Page 288

1 **thinking part of the brain happens sometime a bit after**  
2 **the beginning of Tanner stage two according to this**  
3 **description here?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: So let me read it myself.

6 BY ATTORNEY BROOKS:

7 **Q. Sure.**

8 A. What you read was --- it starts before that. So  
9 I just want to read it.

10 **Q. I did misspeak. Let me just re-ask my question**

11 ---

12 A. Okay.

13 **Q. --- because I mixed up peaks and starts, right,**  
14 **that was the problem.**

15 According to the description here this second  
16 wave of development of the thinking part of the brain,  
17 the gray matter, peaks at sometime after the beginning  
18 of Tanner stage two?

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: Peaks, yes.

21 BY ATTORNEY BROOKS:

22 **Q. And is it consistent with your understanding**  
23 **that the gray matter in the brain is the thinking part**  
24 **of the brain or is that really outside your expertise**

Page 287

1 **longitudinal study of 145 children. Do you see that?**

2 A. I see that.

3 **Q. And it goes on to describe research that**  
4 **discovered the second wave of overproduction of gray**  
5 **matter, which it refers to as, quote, the thinking part**  
6 **of the brain, just prior to puberty. Do you see that?**

7 A. I do.

8 **Q. And it goes on to say that this second**  
9 **overproduction peaks at around age 11 in girls and 12 in**  
10 **boys. Do you see that?**

11 A. Yes.

12 **Q. And according to your earlier testimony, that is**  
13 **probably a bit into --- on average a bit into Tanner**  
14 **stage two.**

15 **Correct?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: In general.

18 BY ATTORNEY BROOKS:

19 **Q. So a little later than the beginning of Tanner**  
20 **stage two?**

21 ATTORNEY BORELLI: Objection, form.

22 THE WITNESS: Based on averages, yes.

23 BY ATTORNEY BROOKS:

24 **Q. So this second wave of development of the**

Page 289

1 **given that you're not a neurologist?**

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: I think that that is basic  
4 enough in medical school that I can agree with that.

5 BY ATTORNEY BROOKS:

6 **Q. Okay.**

7 And in the next column, about the same distance  
8 down it reads, quote, the gray matter spurt --- growth  
9 spurt just prior to puberty --- we've already talked  
10 about the timing, predominates in the frontal lobe,  
11 which it goes on to say is the seat of, quote, executive  
12 functions, planning, impulse control, and reasoning,  
13 closed quote.

14 **Do you see that?**

15 A. I do.

16 **Q. And is it within your knowledge or not within**  
17 **your knowledge that the frontal lobe is the seat of**  
18 **executive functions, including planning, impulse control**  
19 **and reasoning?**

20 ATTORNEY BORELLI: Objection, form.

21 THE WITNESS: That is what my education  
22 has informed me.

23 BY ATTORNEY BROOKS:

24 **Q. And certainly all of us who have raised**

Page 290

1 children have gratefully seen that planning, impulse  
2 control and reasoning improve across the years of  
3 puberty.

4 Right?

5 ATTORNEY BORELLI: Objection, form.

6 BY ATTORNEY BROOKS:

7 Q. Maybe some ups and some downs?

8 A. I'm am just happy that it continuously improves  
9 the whole time.

10 Q. I won't press --- I won't pres the question.  
11 Have you, yourself, attempted to make any study of the  
12 timing of brain gray matter development and the role of  
13 puberty hormones in promoting that development?

14 ATTORNEY BORELLI: Objection, form.

15 THE WITNESS: I have not.

16 BY ATTORNEY BROOKS:

17 Q. What study, if any, have you made of the effects  
18 of blocking puberty and the increased level of hormones  
19 associated with puberty on this growth spurt in the  
20 thinking part of the brain that otherwise peaks at  
21 around 11 in girls and 12 in boys?

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: I have not done that study.

24 I don't see it here either.

Page 292

1 Q. Now, all the same brain and bodily development  
2 is a really big absolute statement, isn't it?

3 ATTORNEY BORELLI: Objection, form.

4 THE WITNESS: There are --- you know, for  
5 the most part, people go through it in this manner. Of  
6 course, again, with medicine you can't say 100 percent.  
7 BY ATTORNEY BROOKS:

8 Q. Well, specifically, as a scientist, based on the  
9 information available to you, you can't say with  
10 confidence that patients who are treated with puberty  
11 delaying medication undergo all the same brain and  
12 bodily system development, can you?

13 ATTORNEY BORELLI: Objection, form.

14 THE WITNESS: I used the medication for  
15 all of my career. I have followed patients through  
16 their --- into their puberty, in their growth. When  
17 they are done with their pubertal development, we have  
18 not seen any definable cognitive developmental issues  
19 with them. Haven't been able to identify that with any  
20 of my patients, including precocious puberty. There's  
21 not been any evidence in the literature over a year's  
22 worth of use of this medication that there's anything  
23 different happening to these individuals.

24 BY ATTORNEY BROOKS:

Page 291

1 BY ATTORNEY BROOKS:

2 Q. You said in your rebuttal report, paragraph 24,  
3 that patients with gender dysphoria who are treated with  
4 puberty delaying medication undergo hormonal puberty  
5 with all the same brain and other bodily system  
6 development. Do you recall writing that?

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: I'm sorry, could you ---?

9 BY ATTORNEY BROOKS:

10 Q. Right in front of you. Your rebuttal report is  
11 --- Exhibit 3?

12 A. I got it.

13 Q. Paragraph 24.

14 A. Thank you for your patience.

15 Q. Here, let me just find it. Let me see here.

16 And the second sentence says, quote, patients with  
17 gender dysphoria treated with puberty delaying  
18 medication undergo hormonal puberty with all the same  
19 brain and other bodily system development, closed quote.  
20 Do you see that?

21 A. Oh, wait. I must be looking at the wrong place.

22 Q. Paragraph 24, second sentence. It runs over the  
23 page?

24 A. I see. I see. Yeah. I see that.

Page 293

1 Q. Well, you also haven't done any systematic study  
2 of cognitive development of those for whom you have  
3 prescribed puberty blockers as compared to in a control  
4 group, have you?

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: Not personally.

7 BY ATTORNEY BROOKS:

8 Q. And the --- the Endocrine Society, 2017 --- let  
9 me ask you to turn in Exhibit 4 to page 3882. And we  
10 are in the section here that discusses a recommendation  
11 to use GRNH for purposes of puberty suppression when  
12 puberty suppression is indicated. Do you see that?  
13 That heading is on the previous page.

14 A. I see that.

15 Q. Just wanted to locate you in the discussion  
16 we're talking about puberty suppression. Now, back to  
17 3882. And the first thing --- the first sentence under  
18 the heading side effects states that, quote, the primary  
19 risks of puberty suppression in GD/gender incongruent  
20 adolescents may include and then it lists a number of  
21 things, one of which is, quote, unknown effects on brain  
22 development, closed quote. Do you see that?

23 A. I do.

24 Q. So the committee that put together the Endocrine

**Society guidelines thought that the potential effects of puberty suppression on brain development were at 2017 at least unknown. You just disagreed?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I don't have any reason to believe that there's any different effect on individuals based on the research from early puberty and the studies that --- I mean, sorry, my experience with those patients. I would want to be watchful of those individuals as I would always who use any medication for potential issues.

BY ATTORNEY BROOKS:

**Q. Endocrine Society thinks the effect on brain development is unknown and you, though you have done no systematic study, are of the view that you know that is not harmful to brain development. Am I accurately summarizing your testimony?**

ATTORNEY BORELLI: Objection.

THE WITNESS: No.

BY ATTORNEY BROOKS:

**Q. Let me ask it a different way if that was in accurate.**

A. I am trying to tell you that you are able to look at the use of this medication in early pubertal

**developments. The only source you cite in support of that is a 2015 article by Staphorsius.**

**Correct?**

A. I would have to look at it and verify that.

**Q. Forty-three (43).**

A. Which exhibit were you ---?

**Q. I have not given it to you yet. I apologize.**

A. No, I mean ---.

**Q. Oh, it was paragraph 24 in your rebuttal report, which is ---.**

A. Okay.

**Q. All right.**

**Did you carefully read the Staphorsius article that you cited in paragraph 24 of your rebuttal report?**

A. At some point in time I have read that, yes.

**Q. Are you able to describe the experiment that is --- the study that was done in this Staphorsius report --- or the Staphorsius article?**

ATTORNEY BORELLI: Objection.

THE WITNESS: I'm not --- familiar ---.

BY ATTORNEY BROOKS:

**Q. You say also in paragraph 24 of your rebuttal report that Dr. Levine's claims with regard to concern about brain development is, quote, inaccurate for the**

patients and see what happens to those individuals. Those outcomes can be used to give you some inference as to what might potentially happen if you use it later on for the same purpose of delaying puberty. It doesn't --- doesn't wholly rule out something different.

**Q. And indeed, simply based on observation, nonsystematic observations from one clinic, it's not possible to rule out harmful effects on brain development, is it?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I'm not sure that there's any study you could do to completely rule out any effect --- any specific effect. Lots of individuals have different effects.

BY ATTORNEY BROOKS:

**Q. And you in your clinic haven't attempted any study?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I have not done a study.

BY ATTORNEY BROOKS:

**Q. Let me have tab 43. In your report you asserted that those treated with gender dysphoria undergo --- I'm sorry, those treated with puberty delaying medication experience all the same brain and other bodily system**

**additional reason that some people never go through hormonal puberty such as patients with Turner syndrome and still have normal brain development with respect to cognition and executive function. Do you see that language?**

A. Yes.

**Q. And you don't cite anything for that. What is the basis for that assertion?**

A. So when you look at the information regarding Turner syndrome within the medical literature as well as the --- my work with Marsha Gavenport at UNC who runs --- ran the biggest Turner syndrome registry, in that experience we did not see any patients that had problems with --- there may have been some that were --- had sort of issues with visual spatial skills but not cognitive issues. In fact, I have partners that are women with Turner syndrome that practice medicine.

**Q. You will agree with me as a scientist, will you not, that kind of anecdotal information about a particular person you know is not very weighty evidence as to whether hormone changes associated with puberty are generally important to cognitive development of humans?**

ATTORNEY BORELLI: Objection, form.

1 THE WITNESS: We can delve into Turner  
2 syndrome literature.

3 BY ATTORNEY BROOKS:

4 **Q. Well, Dr. Adkins, I hope you understand that**  
5 **your obligation to prepare an expert report was to**  
6 **provide your opinions and the basis of your opinions.**  
7 **What literature are you relying on?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: Every textbook that talks  
10 about Turner syndrome with regard to these patients  
11 talks about any of the issues that go along with that.  
12 I --- and that's something we study in our training as a  
13 pediatric endocrinologists because we see these patients  
14 routinely. So that has been my experience and training.  
15 BY ATTORNEY BROOKS:

16 **Q. Well, can you identify --- every is not very**  
17 **useful. Can you identify for me a single source that**  
18 **reports based on statistically significant studies that**  
19 **individuals who never go through puberty experience all**  
20 **the same brain development as individuals who do go**  
21 **through puberty?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: I would have to look back  
24 in the literature on those reports because we treat

1 **Q. And those are stages that, as we looked at in**  
2 **earlier document, include cognition, social skills,**  
3 **sexual development?**

4 ATTORNEY BORELLI: Objection, form.

5 THE WITNESS: So you know, that is what  
6 is --- was written there. I agree that that can be  
7 affected by those --- by puberty. I also don't see in  
8 any of the literature around people who haven't gone  
9 with --- through puberty any mention of any of the  
10 concerning cognitive delays or other issues, again  
11 visual, spatial has been mentioned.

12 BY ATTORNEY BROOKS:

13 **Q. Visual spatial, can you just --- for the**  
14 **uninitiated, the layman, can you explain what you're**  
15 **referring to?**

16 A. For the use of like driving a car, looking at  
17 something and being able to estimate where it is or  
18 those sorts of things, navigating with a map versus not.

19 ATTORNEY BROOKS: Let me ask the court  
20 reporter how many minutes we still have on the clock.

21 COURT REPORTER: We're at six hours, 31  
22 minutes, so 29.

23 ATTORNEY BROOKS: Well, I had promised to  
24 hand it over with 30 minutes to go, so I have broken my

1 patients now when we realize they are not going through  
2 puberty. I can't do that off the top of my head.

3 BY ATTORNEY BROOKS:

4 **Q. And are you now contending that it is not widely**  
5 **accepted that hormonal changes associated with puberty**  
6 **drive important stages of brain growth?**

7 ATTORNEY BORELLI: Objection, form.

8 THE WITNESS: I'm not saying that. What  
9 I'm saying is there are some things that are specific  
10 and you're generalizing my terms.

11 BY ATTORNEY BROOKS:

12 **Q. Okay.**

13 **Well, flipping it around, you have also been**  
14 **taught whether or not it's --- if we're speaking in the**  
15 **area, I recognize you're not a neurologist.**

16 **Correct?**

17 A. Correct.

18 **Q. But it's your understanding that hormonal**  
19 **changes associated with puberty do drive important**  
20 **developmental stages in the human brain.**

21 **Correct?**

22 ATTORNEY BORELLI: Objection, form.

23 THE WITNESS: Yes.

24 BY ATTORNEY BROOKS:

1 word. And I will stop and leave the remainder of the  
2 time to counsel for the State of West Virginia, Dave  
3 Tryon.

4 ---

5 EXAMINATION

6 ---

7 BY ATTORNEY TRYON:

8 **Q. Hello, Dr. Adkins. Long day. I appreciate your**  
9 **time. My name is David Tryon and I do represent the**  
10 **State of West Virginia. I would like just to ---.**

11 A. You're cutting out.

12 **Q. Okay.**

13 ATTORNEY BROOKS: You are going to have  
14 to speak up very clearly because you are literally  
15 disappearing half of the time and we have no work around  
16 for that.

17 BY ATTORNEY TRYON:

18 A. Okay.

19 I will speak very loudly. Can you hear me now?

20 A. Yes.

21 **Q. Okay.**

22 **So thank you for your time my. Name is David**  
23 **Tryon. I am an attorney for the State of West Virginia.**  
24 **I would like to continue with some questions about your**

1 **rebuttal report. Do you still have that in front of**  
2 **you?**

3 A. Yes.

4 **Q. Okay.**

5 **First of all, you have indicated that you are**  
6 **--- I'm still here --- give me a moment --- you run a**  
7 **clinic.**

8 **Correct?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: I have a clinic that I'm  
11 the medical director of, yes.

12 BY ATTORNEY TRYON:

13 **Q. And that is --- I'm sorry, what's the name of**  
14 **the clinic again?**

15 A. Duke Child and Adolescent Gender Clinic.

16 **Q. What is a gender care clinic?**

17 A. For our purposes in my clinic it includes  
18 patients who are transgender people who are --- also  
19 have intersex conditions as well.

20 **Q. Are there other clinics that you consider gender**  
21 **care clinics elsewhere in the country?**

22 A. Yes.

23 **Q. Would you be able to estimate approximately how**  
24 **many of them there are?**

1 A. That number is changing a lot. It would be  
2 difficult for me to say accurately.

3 **Q. Would it be over 100?**

4 A. I'm not sure. I'm not sure.

5 **Q. Would it be over 50?**

6 A. Oh, it could be definitely over 50. It could be  
7 over 100, but I'm not sure.

8 **Q. And are you --- do you have any meetings with**  
9 **those other gender care clinics?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: Yes.

12 BY ATTORNEY TRYON:

13 **Q. How many --- what fashion --- are those**  
14 **individual meetings or are they group meetings?**

15 A. A bit of both.

16 **Q. Are you aware of the practices of all of those**  
17 **other gender care clinics?**

18 ATTORNEY BORELLI: Objection, form.

19 THE WITNESS: We do talk about practice  
20 when we meet with the ones that I meet with. Can't  
21 speak to all of the others.

22 BY ATTORNEY TRYON:

23 **Q. You are of course familiar with the practices in**  
24 **your clinic.**

1 **Correct?**

2 A. Yes.

3 **Q. Are you equally familiar with the practices of**  
4 **the other gender care clinics throughout the country?**

5 ATTORNEY BORELLI: Objection, form.

6 THE WITNESS: I know a lot about them. I  
7 can't say I know everything.

8 BY ATTORNEY TRYON:

9 **Q. Do you know if they have the exact same**  
10 **standards of care and practice that your clinic does?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: We all have discussed that  
13 we follow the Endocrine Society guidelines as well as  
14 WPATH guidelines.

15 BY ATTORNEY TRYON:

16 **Q. You have disagreed with some of the guidelines**  
17 **in the WPATH guidelines that Mr. Brooks has shown to**  
18 **you.**

19 **Correct?**

20 ATTORNEY BORELLI: Objection, form.

21 THE WITNESS: I don't think I've seen the  
22 WPATH guidelines today.

23 BY ATTORNEY TRYON:

24 **Q. Sorry, the Endocrine Society guidelines?**

1 ATTORNEY BORELLI: Same objection.

2 THE WITNESS: So the Endocrine Society  
3 guidelines are guidelines. All of us who use guidelines  
4 do vary some from those guidelines when it's appropriate  
5 for the particular patient.

6 BY ATTORNEY TRYON:

7 **Q. Do you know if the other clinics have the same**  
8 **reservations about the policies or guidelines in those**  
9 **--- in the endocrine Society's guidelines that you've**  
10 **expressed today?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: I've had some discussions  
13 with people who have some reservations along the same  
14 lines that I do.

15 BY ATTORNEY TRYON:

16 **Q. How many clinics does that represent?**

17 A. Oh, you went out. You went out. Sorry.

18 **Q. How many clinics does that represent?**

19 ATTORNEY BORELLI: Objection, form.

20 THE WITNESS: It's difficult for me to  
21 say because it is at our annual meeting and for some of  
22 the meetings, so it could be a lot. In group meetings  
23 that we have, I have some that are one on one and I have  
24 some that are about five different groups.

BY ATTORNEY TRYON:

**Q. So fair to say you don't know?**

A. I'm sorry, you broke up again.

**Q. Is it fair to say you do not know?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I do not know what?

BY ATTORNEY TRYON:

**Q. You do not know which ones have the same reservations that you do about the provisions you've expressed reservations about today?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I know --- I know --- I know off the top of my head three. The others I may or may not know where an individual is from when they're talking in all of our meetings. They are big meetings.

BY ATTORNEY TRYON:

**Q. What are those three?**

A. So Rady Children's in Los Angeles and in Seattle, Children's and Texas, Children's.

BY ATTORNEY TRYON:

**Q. Are there any gender care clinics in West Virginia?**

ATTORNEY BORELLI: Objection to form.

THE WITNESS: I don't know personally any

A. I'm sorry. I wrote it --- I'm sorry. I'm getting really tired. I apologize. I wrote it.

**Q. In the --- I believe it is the third sentence says no medical treatment is provided to transgender youth until they have reached Tanner stage two. Do you see that?**

A. I do.

**Q. When you say no medical treatment, is that --- does that include affirmation therapy?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I am not aware of anything called affirmation therapy.

BY ATTORNEY TRYON:

**Q. Are you aware of the term affirmation for transgender individuals?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Gender affirming care is a term I am aware of.

BY ATTORNEY TRYON:

**Q. Do you consider gender affirming care to be medical treatment?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So it is meant to be wholistic, so part of it is medical, part of it is

endocrinologists that do pediatric endocrinology or gender care in West Virginia. I'm not aware.

BY ATTORNEY TRYON:

**Q. In the rebuttal report, your paragraph 11, I'd like to ask you some questions about that. If you would turn there.**

A. I got it.

**Q. When did you --- well, did you write this paragraph 11?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Yes.

BY ATTORNEY TRYON:

**Q. When did you write it?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I don't remember.

BY ATTORNEY TRYON:

**Q. Was it after you received the expert reports from the Plaintiff's experts --- excuse me, from the Defendant's experts?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So we wrote the rebuttal after we received the expert witnesses from --- yes.

BY ATTORNEY TRYON:

**Q. Who is we?**

social, part of it is surgical.

BY ATTORNEY TRYON:

**Q. Is any gender affirming care provided to transgender youth before they reach Tanner stage two?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So the social transition is considered part of gender affirming care and some individuals do socially transition before Tanner stage two.

BY ATTORNEY TRYON:

**Q. Do you assist them in that?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Not typically. They're not usually in my clinic until they are in puberty.

BY ATTORNEY TRYON:

**Q. Is there any other type of gender affirming care which is conducted or provided prior to Tanner stage two?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: Before Tanner stage two generally it's -- no --- no. No.

BY ATTORNEY TRYON:

**Q. What do you consider to be medical treatment which is provided once they reach Tanner stage two?**

Page 310

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: Not every patient is  
3 treated with medication. So some do, some don't.  
4 Sometimes that is puberty blockers. Sometimes it is  
5 not. Sometimes it is gender affirming hormones  
6 depending on where they're in their development.

7 BY ATTORNEY TRYON:

8 **Q. What about surgery, is that considered medical**  
9 **treatment provided to transgender youth?**

10 ATTORNEY BORELLI: Objection, form.

11 THE WITNESS: So patients who are  
12 children aren't having surgeries.

13 BY ATTORNEY TRYON:

14 **Q. What's the difference between youth and**  
15 **children?**

16 ATTORNEY BORELLI: Objection, form.

17 THE WITNESS: Youth in general in my mind  
18 are somewhat similar to adolescents in that they have  
19 started puberty.

20 BY ATTORNEY TRYON:

21 **Q. At what point are --- is --- excuse me, at what**  
22 **point or age is surgery, medical treatment, provided to**  
23 **those who have gender dysphoria or considered to be**  
24 **transgender?**

Page 312

1 THE WITNESS: Well, not all individuals  
2 who are transgender actually have surgery. It depends  
3 on the patient. Many, many do not. Our recommendations  
4 are to wait until 18. There is a caveat in the  
5 Endocrine Society guidelines where some surgery could  
6 happen between 16 and 18, but generally 18 and up.

7 BY ATTORNEY TRYON:

8 **Q. Why wait until 18?**

9 ATTORNEY BORELLI: Objection, form.

10 THE WITNESS: That is the --- as I  
11 understand it, the legal time at which a person has ---  
12 what is the word for it? You all are the legal people.  
13 I'm probably going to say it wrong, the ability to  
14 legally consent to things. Prior to that, we do get  
15 what's called an assent from the patient, but it's a  
16 little different than a consent from the patient if  
17 we're doing a general procedure.

18 BY ATTORNEY TRYON:

19 **Q. Why is that legal consent different for surgery**  
20 **then it is for puberty blockers?**

21 ATTORNEY BORELLI: Objection, form.

22 THE WITNESS: As I mentioned before,  
23 puberty blockers aren't a permanent effect and surgery  
24 is complicated to reverse.

Page 311

1 ATTORNEY BORELLI: Objection, form.

2 THE WITNESS: So you cut out and could  
3 you repeat the question?

4 BY ATTORNEY TRYON:

5 **Q. Yes. Let me back up and make sure I understand.**  
6 **Surgery is considered medical treatment.**  
7 **Correct?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: So I hesitate to use those  
10 words. My surgical colleagues would take some offense  
11 at that. They consider themselves surgeons and not  
12 medicine doctors. So I think that's an opinion there.  
13 So I'm not sure that that phrase is appropriate.

14 BY ATTORNEY TRYON:

15 **Q. So when you refer to medical treatment in this**  
16 **statement does that include or exclude surgery?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: They do not --- yeah, that  
19 would be inclusive of surgery in that particular  
20 statement.

21 BY ATTORNEY TRYON:

22 **Q. At what point is surgery provided to transgender**  
23 **persons?**

24 ATTORNEY BORELLI: Objection, form.

Page 313

1 BY ATTORNEY TRYON:

2 **Q. At the point in time that you prescribe puberty**  
3 **blockers for a natal male, that person has at that point**  
4 **concluded that they have a gender identity of female.**

5 **Correct?**

6 ATTORNEY BORELLI: Objection, form.

7 THE WITNESS: So for puberty blockers  
8 they may not totally be clear on their gender identity.  
9 They do have dysphoria with the changes that are  
10 happening to their body at the time and need time to get  
11 a better understanding of their gender identity.

12 BY ATTORNEY TRYON:

13 **Q. At what point do we know that they have a full**  
14 **understanding of their gender identity?**

15 ATTORNEY BORELLI: Objection, form.

16 THE WITNESS: Again, we do our best to  
17 take each patient as they get older and they are  
18 consistent for a period of time. Again, the  
19 recommendation are at least six months. Everyone is  
20 different. Most of my patients' identity isn't changing  
21 substantially. Their understanding of their identity  
22 isn't changing substantially for longer than that before  
23 one would do anything different other than puberty  
24 blockers.

BY ATTORNEY TRYON:

**Q. At what point --- someone comes to you and says I am a biological male or assigned male at birth, however you want to term that, but I identify it as a --- let me rephrase that because I'm not sure I said that right.**

Someone comes to you and says I was born an assigned male at birth, but I identify as a female. I have identified as a female for two years now and I want to move forward with any treatment possible so that I can feel comfortable with my true identity as a female. You accept that as their true identity?

ATTORNEY BORELLI: Objection, form.

THE WITNESS: You didn't give an age and I do way that into consideration.

BY ATTORNEY TRYON:

**Q. Let's say a ten year old?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So we as I mentioned in my earlier testimony also use assessments from other individuals with regard to the consistency of their gender identity and including family as well as their mental health providers and we would provide individualized care based on that patient.

**Q. If that child says, this is extremely harmful to me to still have my penis at this age, I want it removed, and you said yourself that is extremely harmful to not allow this child to not play on a sports team with which that child identifies, isn't having a penis when the child doesn't want one even more harmful?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I think they're both --- those situations could cause a risk for self harm and suicide. We would not like to do something that is permanent. Playing on a sports team is not something that is unchangeable.

BY ATTORNEY TRYON:

**Q. But you told me, you told us, that gender is unchangeable and that child at that point has identified as a female. And since that is not going to change what is the harm in removing that child's penis?**

A. You broke up after what is the harm in removing that child.

**Q. That child's penis?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I stated that their understanding of their gender identity occurs over the lifespan and so we want to be very careful with regard

BY ATTORNEY TRYON:

**Q. At that point do you actually give a diagnosis that they are their true gender identity is female or what happens?**

ATTORNEY BORELLI:

Objection, form.

THE WITNESS: Again, gender identity is a core part of their being and their understanding of it at the time is their understanding of it at the time and that is the only way that we can decide what someone's gender identity is.

BY ATTORNEY TRYON:

**Q. So at that point in time where the child is 10 or 12 or 14, at that point in time where they have concluded my true gender identity is not my natal sex of male but rather my true gender identity is a female, why shouldn't that child then be able to say I want gender --- I want surgery to remove my penis?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: So we don't want to do anything that's permanent until a person is older and their cognitive development is broader. And in some cases, you know --- well, I'll stop there.

BY ATTORNEY TRYON:

to that --- any permanent treatment.

BY ATTORNEY TRYON:

**Q. So you're saying you don't --- you're saying you don't believe that that child's true identity is a female, true gender identity is a female, you doubt that child?**

ATTORNEY BORELLI: Objection, form.

THE WITNESS: I don't doubt what my patients tell me because --- what they tell me is their truth and their identity. I do like --- think it is important when you are making these decisions to again corroborate that with other individuals who are with the family --- I'm sorry, with the person. And we want to make sure that that is a durable place where their understanding is. Ideally, we would like for it to be as understood as it might be before making a decision that is a permanent decision like surgery.

VIDEOGRAPHER: Mr. Tryon, I sent you a chat, I didn't know if you saw that. I just wanted to give a five-minute warning.

ATTORNEY TRYON: Oh, it's five minutes left? Thank you. I did not see that. One moment.

BY ATTORNEY TRYON:

**Q. You are getting paid as an expert witness in**

Page 318

1 **this case right?**

2 ATTORNEY BORELLI: Objection, form.

3 THE WITNESS: Yes.

4 BY ATTORNEY TRYON:

5 **Q. Are you being paid as an expert witness in**  
6 **connection to any other litigation or testimony or any**  
7 **other statutes --- similar statutes?**

8 ATTORNEY BORELLI: Objection, form.

9 THE WITNESS: I am --- have not been  
10 paid. I am involved in other --- another case, two  
11 cases.

12 BY ATTORNEY TRYON:

13 **Q. What are those other two cases?**

14 A. I'm not going to be able to tell you the name  
15 because I'm terrible with names. It involves  
16 transgender care in Arkansas as well as in  
17 sports-related issues with transgender youth in Florida.

18 **Q. Have you testified in those cases yet?**

19 A. I have not.

20 **Q. You testified in other cases.**

21 **Right?**

22 A. You broke up again. Could you repeat?

23 **Q. You have testified in other cases.**

24 **Right?**

Page 319

1 A. Yes.

2 **Q. Which cases are those?**

3 A. The transgender-related cases were with Adams in  
4 Florida. Why am I blanking?

5 **Q. Connecticut?**

6 A. I did not actually --- I have not been deposed  
7 in --- except for Adams.

8 **Q. Okay.**

9 **In your --- in your expert report you say that**  
10 **I have testified twice as an expert at trial or**  
11 **deposition.**

12 A. Yeah, I was involved in another case as an  
13 expert witness and was deposed for a case involving an  
14 infant with fractures that were --- there was concern  
15 for abuse.

16 **Q. I'm sorry, you froze on me. Can you tell me**  
17 **what that was again?**

18 A. Yeah. There was a case that I was involved with  
19 where the patient's parents --- they had concern for  
20 abuse from the parents because the child had fractures.

21 **Q. Well, I'm running out of time, so let me glance**  
22 **through my notes and see if there is anything else. Do**  
23 **you disagree with the policies of the other agents ---**  
24 **excuse me, of the sporting organizations which require a**

Page 320

1 **delay in time before a transgender female can**  
2 **participate in those sports?**

3 ATTORNEY BORELLI: Objection, form.

4 THE WITNESS: I think it would be better  
5 for the patient if they did not have to delay.

6 BY ATTORNEY TRYON:

7 **Q. So you --- if it was up to you, you would**  
8 **eliminate that delay that is required by these other**  
9 **sports organizations.**

10 **Is that right?**

11 ATTORNEY BORELLI: Objection, form.

12 THE WITNESS: I think it would be better  
13 for my patients. Yes.

14 BY ATTORNEY TRYON:

15 **Q. And you think those organizations should change**  
16 **their policies to satisfy what your concern is?**

17 ATTORNEY BORELLI: Objection, form.

18 THE WITNESS: You know, there is a lot to  
19 weigh there. I am not sure that I would be able to like  
20 say for their purposes. I don't know all of the things  
21 that are there. For my patients what would be best for  
22 them is to not to have to have that delay.

23 BY ATTORNEY TRYON:

24 **Q. But would you agree with me that the State of**

Page 321

1 **West Virginia had a lot to weigh as well when it put in**  
2 **place its legislation before they passed the law?**

3 ATTORNEY BORELLI: Objection. Objection,  
4 form.

5 THE WITNESS: I would hope that every  
6 piece of legislation is weighed heavily.

7 BY ATTORNEY TRYON:

8 **Q. And you would agree that in this case there was**  
9 **a lot to weigh on a number of different issues before**  
10 **they passed the law.**

11 **Correct?**

12 ATTORNEY BORELLI: Objection, form.

13 THE WITNESS: I would agree. And I  
14 wasn't there to know what was, so I agree there should  
15 be.

16 BY ATTORNEY TRYON:

17 **Q. I'm sorry. I didn't catch that. You froze up.**  
18 **Can you repeat that?**

19 A. Sure. I agree there should have been. I wasn't  
20 there to hear what happened with regard to the process,  
21 so I don't know if they actually did that.

22 ATTORNEY TRYON:

23 Thank you. Do I have any time left,  
24 Jacob?

1 VIDEOGRAPHER: I think that's the cap.

2 ATTORNEY TRYON: Okay.

3 Dr. Adkins, thank you very much for your  
4 time. Appreciate it.

5 ATTORNEY BORELLI: This is Tara Borelli  
6 for Plaintiff, B.P.J.. Plaintiff has no questions for  
7 the witness. We will read and sign.

8 VIDEOGRAPHER: That concludes this  
9 deposition. Current time reads 5:56 p.m. Eastern  
10 Standard Time.

Reinhardt from Cooley on behalf of Plaintiff.

VIDEOGRAPHER: If that's everyone, the  
witness has already been sworn in and we can begin.

---

## EXAMINATION

---

BY ATTORNEY BARHAM:

**Q. Good morning, Dr. Janssen.**

A. Good morning.

**Q. Have you ever had a deposition before?**

A. No.

**Q. All right.**

1 I'm going to ask you a series of questions  
2 about this case and your involvement in it. Do your  
3 best to answer audibly. Just nodding the head, while it  
4 can be captured on video cannot be captured by our court  
5 reporter, and so we'll try to make her life as easy as  
6 possible.

7 I'm going to do my best to wait until you finish  
8 an answer before starting the next question. And I will  
9 ask that you do the same. We'll probably violate that  
10 rule a few times, but cross talk doesn't translate well  
11 on the record. So if you need to take a break at any  
12 time today, please let me know and we will do our best  
13 to facilitate that as quickly as possible. I know we  
14 need to take a break at two o'clock.

15 A. I think about 2:30, 2:45, something like that.

16 Q. Okay.

17 You just let us know when you need to take it.  
18 All right.

19 ATTORNEY BARHAM: I'm going to show you a  
20 document we're going to mark as Exhibit-1. This will be  
21 Tab 90 for online purposes.

22 ---

23 (Whereupon, Exhibit 1, Expert Report, was  
24 marked for identification.)

1 ---

2 BY ATTORNEY BARHAM:

3 Q. This is a copy of your expert report in this  
4 case.

5 Is that correct?

6 A. Yes, that is correct.

7 Q. If you'll turn to the first page of your CV.  
8 It's probably page 21 of this document. Do you  
9 have ---?

10 VIDEOGRAPHER: This is the videographer.  
11 Can I ask Counsel to speak up? You are kind of getting  
12 cutoff at the end of your sentences.

13 ATTORNEY BARHAM: Pardon. I will do my  
14 best.

15 BY ATTORNEY BARHAM:

16 Q. Do you have a degree in adult psychiatry?

17 A. There is not a degree in psychiatry.

18 Q. Okay.

19 So your academic training in psychiatry began  
20 with your psychiatry residency? Is that how it works?

21 A. I did a medical degree, where there is  
22 psychiatry training and then a residency in adult  
23 psychiatry and a fellowship in child psychiatry.

24 Q. Do you consider yourself trained and

1 professionally competent in using the American  
2 Psychiatric Association's Diagnostic and Statistical  
3 Manual, DSM-V, to make child and adolescent mental  
4 illness or psychiatric diagnoses generally beyond just  
5 gender dysphoria?

6 A. Yes.

7 Q. Do you have any residency or fellowship in  
8 pediatrics?

9 A. No.

10 Q. Do you have any residency or fellowship in  
11 endocrinology?

12 A. No.

13 Q. Do you have any training in sports physiology?

14 A. No.

15 Q. Do you have any training in sports medicine?

16 A. No.

17 Q. Have you published any papers, conducted any  
18 research or given any lectures relating to sports  
19 physiology?

20 A. No.

21 Q. Have you published any papers, conducted any  
22 research or given any lectures relating to sports  
23 medicine?

24 A. No.

1 Q. Have you published any papers, conducted any  
2 research or given any lectures relating to male  
3 physiological advantages in athletics before, during or  
4 after puberty?

5 A. No.

6 ATTORNEY BLOCK: Objection to form. You  
7 can answer.

8 BY ATTORNEY BARHAM:

9 Q. Have you published any papers, conducted any  
10 research or given any lectures relating to the impact of  
11 any drugs or hormones on athletic performance?

12 A. No.

13 Q. Have you published any papers, conducted any  
14 research or given any lectures relating to the impact of  
15 testosterone suppression on athletic performance?

16 A. No.

17 Q. Have you published any papers, conducted any  
18 research or given any lectures relating to the effect of  
19 transsex surgeries on athletic performance?

20 A. No.

21 ATTORNEY BLOCK: Objection. Objection to  
22 terminology.

23 BY ATTORNEY BARHAM:

24 Q. Have you published any papers, conducted any

1 **research or given any lectures relating to the safety**  
 2 **issues and risks to women associated with transgender**  
 3 **participation in female athletics by male athletes?**

4 ATTORNEY BLOCK: Objection to form.

5 Sorry, objection to form.

6 THE WITNESS: Yeah, I think there's a bit  
 7 of a premise in there that I don't agree with, but I  
 8 have not given any lectures about transgender  
 9 participation in sports.

10 BY ATTORNEY BARHAM:

11 **Q. Do you consider --- do you have any professional**  
 12 **expertise related to the concept of fairness?**

13 A. I do not.

14 **Q. Do you have any professional expertise on the**  
 15 **definition of fairness?**

16 A. I do not.

17 **Q. Would you agree that fairness is an elusive,**  
 18 **subjective concept with malleable boundaries?**

19 ATTORNEY BLOCK: Objection to form.

20 THE WITNESS: I do not have an opinion on  
 21 the definition of fairness.

22 BY ATTORNEY BARHAM:

23 **Q. Have you treated or personally examined BPJ?**

24 A. I have not.

1 **Q. You have no direct knowledge as to what Tanner**  
 2 **stage BPJ started puberty blockers at the age.**

3 **Correct?**

4 A. Correct.

5 **Q. You do not know how BPJ's physiology or athletic**  
 6 **capabilities compare with genetic females at the same**  
 7 **age?**

8 A. I do not.

9 ATTORNEY BLOCK: Objection to  
 10 terminology.

11 BY ATTORNEY BARHAM:

12 **Q. This report, Exhibit-1 of 20 pages sets out the**  
 13 **complete statement of all opinions that you will testify**  
 14 **to at trial.**

15 **Correct?**

16 A. Which report are you referring to?

17 **Q. The report in front of you, Exhibit-1, Tab 90.**

18 A. And can you repeat the question? Sorry.

19 **Q. This report sets out a complete statement of all**  
 20 **opinions that you will testify to at trial.**

21 **Correct?**

22 A. I do not know the answer to that. I mean, I  
 23 would assume so, but I don't know. I've never been in a  
 24 trial, so I don't know if there will be questions asked

1 outside of this document.

2 **Q. Does this report identify all facts and data**  
 3 **that you considered in forming the opinions that you set**  
 4 **forth in your report?**

5 A. I wouldn't say it has all facts because I don't  
 6 think it is possible to include all facts in an expert  
 7 report, but the relevant facts, yes.

8 **Q. This includes the facts that you'll rely on in**  
 9 **supporting those opinions.**

10 **Correct?**

11 A. That's correct.

12 **Q. Does your report set out all the reasons for the**  
 13 **opinions that you propose to offer?**

14 A. Yes.

15 **Q. Your footnotes cite to I believe 32 scientific**  
 16 **or professional articles and you reference some others**  
 17 **in your CV. Are those all the articles that form the**  
 18 **basis of the opinions you propose to offer?**

19 A. No.

20 **Q. What other articles form the basis of the**  
 21 **opinions you propose to offer?**

22 A. I guess the question is what has formed my  
 23 professional expertise around gender health, and I've  
 24 read a lot that aren't necessarily going to be apropos

1 to this specific report.

2 **Q. But those are the articles that you cited and**  
 3 **referenced in this document are those that you relied**  
 4 **upon as the basis of opinions that you intend to offer.**

5 **Correct?**

6 A. That is correct.

7 **Q. You currently serve as the Clinical Associate**  
 8 **Professor of Child and Adolescent Psychiatry.**

9 **Correct?**

10 A. Yes.

11 **Q. And what institution is that with?**

12 A. It is with Northwestern University Feinberg  
 13 School of Medicine, and Ann and Robert H. Lurie  
 14 Children's Hospital of Chicago.

15 **Q. And how much of your time in this position is**  
 16 **related to discussing or treating gender dysphoric**  
 17 **children and adolescents?**

18 ATTORNEY BLOCK: Objection to  
 19 terminology.

20 THE WITNESS: It's hard to quantify.  
 21 Probably about 40 percent of my time is allocated in  
 22 some way to either clinical care, research or academics  
 23 around gender health.

24 BY ATTORNEY BARHAM:

1 **Q. And what is your compensation for this position?**  
2 A. It is roughly \$265,000 a year in salary.  
3 **Q. You also serve as the Vice Chair of the**  
4 **Pritzker Department of Psychology and Behavioral Health**  
5 **at the Ann and Robert H. Lurie Children's Hospital of**  
6 **Chicago.**  
7 **Correct?**  
8 A. That's correct.  
9 **Q. And how much of your time in this position is**  
10 **related to discussing or treating gender dysphoric**  
11 **children and adolescents?**  
12 ATTORNEY BLOCK: Objection to  
13 terminology.  
14 THE WITNESS: Again, it is hard to parse  
15 out what specific about my leadership role is around  
16 gender health but it is a minority of my day-to-day  
17 work in that role.  
18 BY ATTORNEY BARHAM:  
19 **Q. Do you have an approximate percentage?**  
20 A. No.  
21 **Q. Twenty-five (25) percent, more or less?**  
22 A. Probably ten percent.  
23 **Q. Ten percent. Okay.**  
24 **And what is your compensation for that**

1 **position?**  
2 A. I get a stipend of around \$30,000.  
3 **Q. You currently serve as the Medical Director of**  
4 **Outpatient Psychiatric Services at the Lurie Children's**  
5 **Hospital of Chicago.**  
6 **Is that correct?**  
7 A. That's correct.  
8 **Q. And how much of your time in this position is**  
9 **related to discussing or treating gender dysphoric**  
10 **children and adolescents?**  
11 ATTORNEY BLOCK: Objection to  
12 terminology.  
13 THE WITNESS: About 25 percent of my time  
14 is probably spent discussing or related to the health of  
15 transgender youth or transgender --- gender diverse  
16 youth.  
17 BY ATTORNEY BARHAM:  
18 **Q. And what is your compensation for that position?**  
19 A. There is no compensation.  
20 **Q. You currently serve as the Clinical Director of**  
21 **the NYU Gender and Sexuality Services.**  
22 **Is that correct?**  
23 A. That is not correct.  
24 **Q. When did you conclude your role in that**

1 **position? I'm referencing page one of your CV.**  
2 A. That was when I moved to Chicago a few years  
3 ago.  
4 **Q. Okay.**  
5 **So where it says 2011 to present Clinical**  
6 **Director, NYU Sexuality Service, that is just a typo?**  
7 A. That is a typo, yes.  
8 **Q. You currently serve as the Associate Professor**  
9 **of Child and Adolescent Psychology at Northwestern**  
10 **University, and we have already discussed that. Is**  
11 **there a difference between Clinical Associate Professor**  
12 **and Associate Professor of Child and Adolescent**  
13 **Psychiatry?**  
14 A. No.  
15 **Q. You serve as the Vice Chair of Clinical Affairs**  
16 **at the Pritzker Department of Psychiatry and Behavioral**  
17 **Health at the Lurie Children's Hospital.**  
18 **Correct?**  
19 A. That's correct.  
20 **Q. And how much time in this position is related to**  
21 **discussing or treating gender dysphoric children and**  
22 **adolescents?**  
23 ATTORNEY BLOCK: Objection to  
24 terminology.

1 THE WITNESS: I think I answered that one  
2 with the guess of about ten percent.  
3 BY ATTORNEY BARHAM:  
4 **Q. Okay?**  
5 **So that's the same as the Vice Chair of the**  
6 **Department of Psychiatry?**  
7 A. Correct.  
8 **Q. You currently serve as the Associate Editor for**  
9 **Transgender Health.**  
10 **Correct?**  
11 A. That is correct.  
12 **Q. And what is your compensation for that position?**  
13 A. There is no compensation for that position.  
14 **Q. What is that publication's annual income?**  
15 A. I do not know.  
16 **Q. You serve as a reviewer for LGBT Health.**  
17 **Correct?**  
18 A. Yes.  
19 **Q. And how much of your time is related --- in that**  
20 **position is related to treating or discussing**  
21 **transgender children and adolescents?**  
22 A. I would say 100 percent of my review time with  
23 LGBT health is around gender.  
24 **Q. Do you receive any compensation for that**

1 position?

2 A. I do not.

3 **Q. Do you receive any compensation for your role as**  
4 **a reviewer with the Journal of the Academy of Child and**  
5 **Adolescent Psychiatry?**

6 A. I do not.

7 **Q. You served in various positions with different**  
8 **professional organizations according to paragraphs 11**  
9 **and 12 of your report. Do any of those positions**  
10 **provide you financial compensation?**

11 A. No.

12 **Q. You founded and directed Gender Variant Youth**  
13 **and Family Network.**

14 **Correct?**

15 A. Correct.

16 **Q. What's your compensation for that position?**

17 A. Zero.

18 **Q. What is the entity's annual income or budget?**

19 A. Zero.

20 **Q. You indicate in your report that you have seen**  
21 **approximately 500 transgender patients.**

22 **Is that correct?**

23 A. That is correct.

24 **Q. How many patients do you see per year?**

1 that's the only other income I receive.

2 **Q. Do you receive any speaking fees?**

3 A. I have received speaking fees for participation  
4 and grand rounds as an example.

5 **Q. And how much would those speaking fees run?**

6 A. It is typically about a thousand dollars per  
7 event.

8 **Q. Before the last four years had you provided any**  
9 **expert testimony on issues related to gender dysphoria?**

10 A. Can you clarify the difference between  
11 testimonies and reports? I've submitted a report but  
12 not ---.

13 **Q. Okay.**

14 **So you have submitted a report?**

15 A. Correct.

16 **Q. Do you remember what case that involved?**

17 A. That involves Medicaid and top surgery in  
18 Arizona.

19 **Q. Okay.**

20 **Have you ever provided any testimony in trial**  
21 **or deposition before related to gender dysphoria?**

22 A. I have not.

23 **Q. And how much compensation have you received so**  
24 **far in this case?**

1 ATTORNEY BLOCK: Objection to form.

2 THE WITNESS: I'd have to look at my  
3 report. I don't have the information in front of me  
4 right now.

5 BY ATTORNEY BARHAM:

6 **Q. Do you have a ballpark of how many patients you**  
7 **see in a year?**

8 A. I don't.

9 **Q. Does this include --- and I'm assuming that your**  
10 **colleagues see additional patients beyond just those**  
11 **that you see.**

12 **Correct?**

13 A. Correct.

14 **Q. How frequently do you see each patients?**

15 A. I see --- the frequency with which I see  
16 patients is dependent upon their clinical need, so  
17 between once or twice a week to once every three months.

18 **Q. And how much are patients charged per**  
19 **appointment?**

20 A. Everything is billed to their insurance, so I'm  
21 not sure.

22 **Q. Do you receive any other income related to your**  
23 **work on gender dysphoria?**

24 A. I'm being paid for my expert report for this, so

1 A. This case so far, none thus far.

2 **Q. How much are you expecting to receive so far in**  
3 **this case?**

4 A. I haven't added up my invoice yet, but I imagine  
5 it's probably around \$10,000.

6 **Q. Okay.**

7 **Do you have any professional expertise related**  
8 **to the legal definition of relevance?**

9 A. I do not.

10 **Q. Do you have any legal training or education?**

11 A. I do not.

12 **Q. When you were preparing your report did you**  
13 **consult the Federal Rules of Evidence or any other legal**  
14 **sources as to the meaning of relevance?**

15 A. I did not.

16 **Q. Several people in this case have referenced**  
17 **disorders of sexual development. Would you agree that**  
18 **gender dysphoria is not a disorder of sexual**  
19 **development?**

20 ATTORNEY BLOCK: Objection to form.

21 THE WITNESS: Gender dysphoria has not  
22 been classified as a disorder of sexual development.

23 BY ATTORNEY BARHAM:

24 **Q. Of the approximately 500 transgender patients**

1 **you had seen how many suffered from disorder of sexual**  
2 **development?**

3 A. A minority of patients, less than ten.

4 **Q. So you would agree that the vast majority of**  
5 **individuals with gender dysphoria or who assert a**  
6 **transgender identity do not suffer from a disorder of**  
7 **sexual development.**

8 **Correct?**

9 ATTORNEY BLOCK: Objection to form.

10 THE WITNESS: The data we have speaks to  
11 the majority of people with gender dysphoria do not have  
12 a disorder of sex development.

13 BY ATTORNEY BARHAM:

14 **Q. Do you have any reason to believe that BPJ**  
15 **suffers from a disorder of sexual development?**

16 A. I have not reviewed BPJ's case.

17 **Q. Are you aware of any instance in which an**  
18 **individual with a disorder of sexual development has**  
19 **attempted to play on a girls' or women's sports team in**  
20 **West Virginia?**

21 A. I am not aware.

22 **Q. Is it your opinion that a person's gender**  
23 **identity is durable?**

24 ATTORNEY BLOCK: Objection to form.

1 (Whereupon, Exhibit-2, Endocrine  
2 Society's Guidelines, was marked for  
3 identification.)

4 ---

5 BY ATTORNEY BARHAM:

6 **Q. If you'll turn to page 3873 of this document.**  
7 **This document is the Endocrine Society's Guidelines,**  
8 **Endocrine Treatment of Gender Dysphoric or Gender**  
9 **Incongruent Persons, Endocrine Society Clinical Practice**  
10 **Guideline published in 2017.**

11 **Correct?**

12 A. That is correct.

13 **Q. On page 3873 of this document the Endocrine**  
14 **Society indicates that this continuum gender identity**  
15 **ranged from all male through something in between to all**  
16 **female yet such a classification does not take into**  
17 **account that people may have gender identities outside**  
18 **this continuum. For instance, some experience**  
19 **themselves as having both a male and female gender**  
20 **identity whereas others completely renounce any gender**  
21 **classification. There are also reports of individuals**  
22 **experiencing a continuous and rapid involuntary**  
23 **alternation between a male and female identity.**

24 **Do you see that?**

1 THE WITNESS: Can you define durable?  
2 BY ATTORNEY BARHAM:

3 **Q. Unchanging.**

4 ATTORNEY BLOCK: Objection to form.

5 THE WITNESS: It is my testimony that  
6 there is a concept of gender identity that remains  
7 generally fixed for most people throughout their lives.

8 BY ATTORNEY BARHAM:

9 **Q. So it's your opinion that a person's gender**  
10 **identity cannot be changed with medical or mental health**  
11 **intervention.**

12 **Correct?**

13 COURT REPORTER: Sorry, Counsel, that  
14 question one more time.

15 BY ATTORNEY BARHAM:

16 **Q. So it's your opinion that a person's gender**  
17 **identity cannot be changed with medical or mental health**  
18 **intervention.**

19 **Correct?**

20 A. Yes.

21 ATTORNEY BARHAM: I'm going to hand you  
22 what we're going to mark as Exhibit-2. This will be  
23 Tab 5.

24 ---

1 A. I don't see that.

2 **Q. Second column, towards the bottom of the page.**

3 A. Yes, I see that.

4 **Q. Is this consistent with your understanding of**  
5 **gender identity?**

6 ATTORNEY BLOCK: Can you give him time to  
7 read?

8 ATTORNEY BARHAM: Gladly.

9 THE WITNESS: I think there is a  
10 difference between a gender identity and how people  
11 understand and express that gender identity. And in the  
12 context of this article the rapid involuntary alteration  
13 between male and female identity as an example is a case  
14 reported of single individuals subjective experience of  
15 their gender according to the reference.

16 BY ATTORNEY BARHAM:

17 **Q. And by that you're referring to note ten?**

18 A. Correct.

19 **Q. So according to this document, someone can be**  
20 **one sex or the other, both, neither or in between.**

21 **Correct?**

22 ATTORNEY BLOCK: Objection to form.

23 THE WITNESS: I can't speak for the  
24 conclusions drawn by the author of this article.

BY ATTORNEY BARHAM:

**Q. And according to the Endocrine Society a person's gender identity can change rapidly.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I'm not a part of the Endocrine Society, so I'm not sure how they discuss this.

BY ATTORNEY BARHAM:

**Q. According to this document, the Endocrine Society is indicating that there are reports, plural, of individuals, plural, experiencing a continuous and rapid involuntary alternation between male and female gender identity.**

**Correct?**

A. That is documented in the article.

**Q. Okay.**

A. I'm not sure of the governance of the Endocrine Society.

**Q. Do you think the Endocrine Society Guidelines are wrong?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I think anything relating to gender identity has to be taken in a broader context

**Organization statements?**

ATTORNEY BLOCK: Objection to form. Can he have time to read the document?

ATTORNEY BARHAM: Of course.

VIDEOGRAPHER: Counsel, is that Tab 10?

LAW CLERK WILKINSON: Tab 10.

ATTORNEY BARHAM: It is.

VIDEOGRAPHER: Okay. Thank you.

THE WITNESS: Can you repeat the question?

BY ATTORNEY BARHAM:

**Q. Do you agree with these World Health Organization statements?**

A. Not in their entirety.

**Q. In what parts do you dispute?**

A. The word gender as a concept is much more complicated and I do not agree with their characterization in this page.

**Q. So the World Health Organization says that gender itself is a social construct and can change over time.**

**Correct?**

ATTORNEY BLOCK: Objection to form. Does this document have a URL to it?

within both the article in and of itself but in broader practice and specifically around children and adolescents.

BY ATTORNEY BARHAM:

**Q. So what is your basis for indicating that this statement is potentially inaccurate?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I think there is more context that's needed in order to understand the intent of the authors in this particular section.

ATTORNEY BARHAM: I'm going to hand you what we will mark as Exhibit-3. This is the document from the World Health Organization entitled Gender and Health.

---

(Whereupon, Exhibit-3, World Health Organization, was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q. Are you familiar with the World Health Organization?**

A. I've heard of them.

**Q. Do you agree with these World Health**

ATTORNEY BARHAM: It does, but I don't see it printed on the document.

LAW CLERK WILKINSON: We can get it.

ATTORNEY BARHAM: We can supply that.

THE WITNESS: I agree that it says on the document that gender varies from society to society and can change over time.

BY ATTORNEY BARHAM:

**Q. And according to the World Health Organization, gender identity refers to a person's experience of gender which is a social construct.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I don't see in the document where it refers to gender identity or defines gender identity.

BY ATTORNEY BARHAM:

**Q. It says gender interacts with different sex, which refers to the different biological and physiological characteristics of males, females, intersex persons such as chromosomes, hormones and reproductive organs.**

**Correct?**

A. That is correctly read. I don't see gender

1 identity defined in this document.

2 **Q. Gender identity refers to a person's deeply held**  
3 **internal and individual experience of gender.**

4 **Correct?**

5 A. That's what it says here, yes.

6 **Q. If an individual asserts an identity of man or**  
7 **both, how can a clinician verify whether that individual**  
8 **is telling the truth?**

9 ATTORNEY BLOCK: Objection to form.

10 THE WITNESS: I'm not sure what exactly  
11 that means. The process of an assessment for gender  
12 care involves a complex series of interviews,  
13 diagnostics.

14 BY ATTORNEY BARHAM:

15 **Q. So how does the clinician assess whether the**  
16 **patient is accurately relating their experiences?**

17 A. In the typical process, particularly around  
18 child and adolescent psychiatry, part of the assessment  
19 involves information gathered from multiple contexts.

20 **Q. Such as?**

21 A. Such as parents, schools, caregivers, other  
22 providers, history over time, et cetera.

23 **Q. And if --- so how does one assess from those**  
24 **various contexts whether someone who's claiming to be**

1 **male or both is accurately relating what's going on?**

2 ATTORNEY BLOCK: Objection to form.

3 THE WITNESS: Yeah, I guess I don't  
4 understand the question exactly. You know, my job is  
5 not necessarily to define what is accurate in someone's  
6 own experience. It's to understand how that fits into  
7 typical processes and developmental expectations for the  
8 broad range of gender diversity over time.

9 BY ATTORNEY BARHAM:

10 **Q. How do you determine whether someone in that**  
11 **scenario is accurately understanding his own subjective**  
12 **feelings --- his or her subjective feelings?**

13 ATTORNEY BLOCK: Objection to form.

14 THE WITNESS: The context of the  
15 treatment is really important. If an individual is  
16 seeking specific interventions that require a mental  
17 health assessment, there are specific components of that  
18 mental health assessment that must be met.

19 BY ATTORNEY BARHAM:

20 **Q. So what are the treatments that would require a**  
21 **mental health assessment?**

22 A. Puberty blocking medications, hormones or  
23 surgery.

24 **Q. And what are the interventions that would not**

1 **require mental health evaluations, in your opinion?**

2 ATTORNEY BLOCK: Objection to form.

3 THE WITNESS: It depends upon what  
4 guidelines you're talking about and what recommendations  
5 that the family is looking for.

6 BY ATTORNEY BARHAM:

7 **Q. Well, what are some of the interventions? You said**  
8 **there's some interventions that would require a mental**  
9 **health evaluation, so that implies that there are some**  
10 **that would not. What are the interventions that would**  
11 **not require a mental health evaluation?**

12 ATTORNEY BLOCK: Objection to form.

13 THE WITNESS: You know, parents giving  
14 hugs to their kids is not something that a mental health  
15 assessment would require. Providing a way of helping  
16 families to understand their kids or asking questions is  
17 not something that requires a mental health evaluation  
18 and some children will socially transition prior to any  
19 assessments by any mental health professional.

20 BY ATTORNEY BARHAM:

21 **Q. How do you determine --- if an individual**  
22 **asserts a gender identity of male or both, how do you**  
23 **determine whether the individual is making a statement**  
24 **based on societal expectations for a particular gender**

1 **rather than ---?**

2 ATTORNEY BLOCK: Objection. Travis, I'm  
3 sorry, the male or both phrasing, is that a quote from  
4 something. I don't have the paper in front of me, so  
5 just want to clarify.

6 ATTORNEY BARHAM: No, that's not a  
7 question from something. That's just my question.

8 ATTORNEY BLOCK: Okay.

9 THE WITNESS: Can you repeat the  
10 question?

11 BY ATTORNEY BARHAM:

12 **Q. If an individual asserts a gender identity male**  
13 **or both, how can a clinician verify whether the**  
14 **individual is making the statement based on societal**  
15 **expectations for a particular gender rather than his own**  
16 **genuine gender?**

17 ATTORNEY BLOCK: Objection to form.

18 THE WITNESS: I personally never had  
19 anybody assert an identity of male or both, but part of  
20 the assessment of --- if we are diagnosing gender  
21 dysphoria is understanding the cultural and social  
22 contexts and ensuring that folks are not presenting with  
23 a gender identity that is incongruent with their sex  
24 assigned at birth because of actual or perceived

1 cultural advantages.

2 BY ATTORNEY BARHAM:

3 **Q. And how does one go about assessing the**  
4 **motivations behind the claimed gender identity or**  
5 **transgender sex?**

6 ATTORNEY BLOCK: Objection to form.

7 THE WITNESS: For any psychiatric  
8 assessment this is through a combination of interviews,  
9 gathering history from relevant data sources and  
10 sometimes for some people structured interviews or  
11 scales.

12 BY ATTORNEY BARHAM:

13 **Q. And how long does it take to conduct such an**  
14 **assessment?**

15 A. There is no specific timeframe involved in this  
16 assessment. It really depends upon contextual factors  
17 that are hard to nail down.

18 **Q. So if you were treating a child or teenager, how**  
19 **many relevant data sources would you need to get**  
20 **information from in order to make a complete assessment**  
21 **of the child's motivations?**

22 A. I don't think there's ever going to be a  
23 concrete answer in terms of how many. There's not a  
24 specific answer of how many sources are necessary. It's

1 however many sources are necessary to gather the  
2 relevant information.

3 **Q. So how do you determine whether you have**  
4 **gathered enough information to make a competent**  
5 **assessment?**

6 A. It's hard to state this in a non-pithy way, but  
7 that's kind of what the process of psychiatry and child  
8 psychiatry training helps you to learn.

9 **Q. Could you explain to someone who doesn't have**  
10 **the training how you come to the conclusion, okay, I've**  
11 **gathered enough information to make a competent**  
12 **assessment?**

13 A. Sure. I can try. How accurate is the reporter  
14 in their description of their history. How much does it  
15 align with reports from other informants, how much does  
16 it match with or is deviant from expected phenotypic  
17 processes with the disorders in question and what is the  
18 impression of the evaluator about the accuracy of the  
19 statements.

20 ATTORNEY BARHAM: I'm going to show you  
21 what we will mark as Exhibit-4, this will be Tab 12.

22 ---

23 (Whereupon, Exhibit-4, Harvard Medical  
24 School Study, was marked for

1 identification.)

2 ---

3 BY ATTORNEY BARHAM:

4 **Q. Are you familiar with this study? This is a**  
5 **study from the Harvard Medical School entitled Gender**  
6 **Fluidity: What it Means and Why Support Matters?**

7 ATTORNEY BLOCK: Objection.

8 THE WITNESS: This looks like a popular  
9 website article and not a study.

10 BY ATTORNEY BARHAM:

11 **Q. Are you familiar with the author, Dr. Sabrina**  
12 **Katz --- Sabra Katz-Wise?**

13 A. Dr. Katz-Wise has published in the world of  
14 transgender health. I'm not familiar with them  
15 personally, I don't know them.

16 **Q. Do you know Dr. Katz-Wise at least by**  
17 **reputation?**

18 A. I don't. I've only read some studies.

19 **Q. But you would agree that she is highly respected**  
20 **in this area.**

21 **Correct?**

22 A. I would not be able to offer an opinion.

23 **Q. But she is widely published in this area.**

24 **Correct?**

1 ATTORNEY BLOCK: Objection to form.

2 THE WITNESS: From my recollection, yes.

3 BY ATTORNEY BARHAM:

4 **Q. At the bottom of page two of this document, Dr.**  
5 **Katz-Wise indicates that while some people develop a**  
6 **gender identity early in childhood others may identify**  
7 **with one gender at one time and then another gender**  
8 **later on.**

9 **Is that correct?**

10 A. You're reading that accurately, yeah.

11 **Q. So according to this article, on page three a**  
12 **gender fluid person is one whose gender identity changes**  
13 **frequently.**

14 **Correct?**

15 ATTORNEY BLOCK: Objection to form.

16 THE WITNESS: I do not --- I have not  
17 read it in here that it is defined in that way and  
18 that's not how I would define gender fluidity.

19 BY ATTORNEY BARHAM:

20 **Q. At least you see the statement at the first full**  
21 **paragraph at the top of page three, ultimately anyone**  
22 **who identifies as gender fluid, is a gender fluid person**  
23 **often the term is used for a person's gender expression**  
24 **or gender identity, essentially their internal sense of**

1 **self changes frequently?**

2 ATTORNEY BLOCK: Objection. We're  
3 jumping quickly from pages. Can you give him some more  
4 time to read before answering the question?

5 ATTORNEY BARHAM: Certainly.

6 THE WITNESS: Yes. I'm not seeing where  
7 that is here. Can you point that out for me?

8 BY ATTORNEY BARHAM:

9 **Q. Top of page three, just above that, how is**  
10 **gender fluidity related to health in child and teens?**

11 A. Gender fluidity is a very nonspecific term that  
12 means very different things to different people. In the  
13 practice of the clinical work with transgender and  
14 gender diverse youth, kids who are self identifying as  
15 gender fluid, I want to understand what it means to them  
16 and what that definition is for that individual. I  
17 don't think there is one established definition of  
18 gender fluidity that has been agreed upon.

19 **Q. But at least some respected professionals in**  
20 **this arena indicate that the term gender fluidity means**  
21 **that the person's internal sense of self, their gender**  
22 **identity changes frequently.**

23 **Correct?**

24 ATTORNEY BLOCK: Objection to form.

1 what we will mark as Exhibit-5, and this will be Tab 13.

2 ---

3 (Whereupon, Exhibit-5, American  
4 Psychological Association Guidelines,  
5 was marked for identification.)

6 ---

7 BY ATTORNEY BARHAM:

8 **Q. This document is the American Psychological**  
9 **Association Guidelines for Psychological Practice with**  
10 **Transgender and Gender Non-Conforming People.**

11 **Correct?**

12 A. That is correct.

13 **Q. And on page 836 of this document the APA writes**  
14 **just as some people experience their sexual orientation**  
15 **as being fluid or variable, some people also experience**  
16 **their the gender identity as fluid.**

17 **Correct?**

18 A. Can you show me on the page where that is?

19 **Q. The bottom of the first paragraph in the first**  
20 **column of page 836.**

21 A. Yes.

22 **Q. So the APA Guidelines say that gender identity**  
23 **can be fluid or changing.**

24 **Correct?**

1 THE WITNESS: I can't speak to what Dr.  
2 Katz-Wise is using to define it. The way I would  
3 describe gender fluidity, again outside the context of  
4 how my patients are actually using the term, is that  
5 understanding of the expression of gender identity may  
6 change over time.

7 BY ATTORNEY BARHAM:

8 **Q. So you said that their understanding of gender**  
9 **identity can change over time. Dr. Katz-Wise says that**  
10 **their gender identity changes frequently?**

11 **Is that correct?**

12 A. That's what it stated in this popular press  
13 article.

14 **Q. And Dr. Katz-Wise is an Assistant Professor in**  
15 **Adolescent and Young Adult Medicine at Boston Children's**  
16 **Hospital.**

17 **Is that correct?**

18 A. I would have to take your word for that.

19 **Q. Okay.**

20 **Are you aware that she co-directs the Harvard**  
21 **Sexual Orientation and Gender Identity Expression Equity**  
22 **Research Collaborative?**

23 A. I do not know the term, no.

24 ATTORNEY BARHAM: I'm going to show you

1 ATTORNEY BLOCK: Objection to form.

2 THE WITNESS: Well, I think the important  
3 piece is some people experience gender identity as fluid  
4 or variable.

5 BY ATTORNEY BARHAM:

6 **Q. So it can be fluid or changing?**  
7 **Correct?**

8 ATTORNEY BLOCK: Objection to form.

9 BY ATTORNEY BARHAM:

10 **Q. For at least some people.**  
11 **Correct?**

12 THE WITNESS: As I would describe it and  
13 understand it, that's the experience of expression of  
14 gender identity can be fluid over time, which is  
15 different.

16 BY ATTORNEY BARHAM:

17 **Q. How is that different to say that one's gender**  
18 **identity changes?**

19 A. It's getting a little complicated in terms of  
20 the concepts that we're talking about, but the identity  
21 that gender identity is something that is inherently  
22 fixed, that how people understand, experience it and  
23 express it can change over time. That's the difference.

24 **Q. But the American Psychological Association at**

1 least describes gender identity as being fluid.

2 Correct?

3 ATTORNEY BLOCK: Objection to form.

4 THE WITNESS: In the article that you  
5 have put in front of me it describes that people's  
6 experience of their gender identity is fluid over time.

7 BY ATTORNEY BARHAM:

8 Q. Let's go back to Tab 5, which is Exhibit-2. Are  
9 you familiar with the Endocrine Society Guidelines?

10 A. I am.

11 Q. Is it your view that these guidelines were  
12 developed through rigorous scientific processes?

13 ATTORNEY BLOCK: Objection to form.

14 THE WITNESS: I agree.

15 BY ATTORNEY BARHAM:

16 Q. Would you agree that these guidelines were  
17 developed by among the most respected researchers in the  
18 field?

19 ATTORNEY BLOCK: Objection to form.

20 THE WITNESS: I wouldn't disagree with  
21 that, no.

22 BY ATTORNEY BARHAM:

23 Q. Do you respect Dr. Hembree of Columbia  
24 University Medical Center?

1 gender adolescence.

2 Correct?

3 ATTORNEY BLOCK: Objection to form.

4 THE WITNESS: Yeah, in these studies have  
5 been published primarily by the Dutch clinic the rates  
6 of dissentience of the diagnosis of gender dysphoria has  
7 been upwards of 85 percent.

8 BY ATTORNEY BARHAM:

9 Q. And at the bottom of the first column of  
10 page 3879 the committee indicates that their clinical  
11 experience suggests that the persistence of gender  
12 dysphoria or gender incongruence can only be reliably  
13 assessed after the first signs of puberty.

14 Is that correct?

15 A. That is what is written, yes.

16 Q. You have not offered an opinion in your report  
17 as to whether or --- whether or to what transgender  
18 identity has a biological basis.

19 Is that correct?

20 A. Let me just make sure that I'm reviewing it. I  
21 have not offered an opinion.

22 Q. If you will turn to page 76 of Exhibit-2, Tab 5.  
23 The committee with all of its experience and presenting  
24 all the evidence said that gender dysphoria in children,

1 A. I do.

2 Q. Do you respect Dr. Cohen-Kettenis of the  
3 University of Amsterdam?

4 A. I would say I respect all of these clinicians  
5 and researchers, although Sabine Hannema I am not  
6 familiar personally.

7 Q. If you will turn to page 3879 of this document.  
8 Right under the heading evidence this article reports  
9 that the large majority, about 85 percent of prepubertal  
10 children with a childhood diagnosis did not remain GD,  
11 slash, gender incongruent in adolescence.

12 Is that correct?

13 A. That is correctly read, yes.

14 Q. And footnote 20 of this document cites to Dr.  
15 Steensma, de Vries, Cohen-Kettenis article in 2013?

16 A. That's correct.

17 Q. These are extensively published original peer  
18 reviewed research --- peer reviewed researchers in the  
19 field.

20 Correct?

21 A. Correct.

22 Q. So this committee reveals evidence that the  
23 large majority of children, about 85 percent, with a  
24 childhood diagnosis do not remain gender dysphoric in

1 quote, does not invariably persist into adolescence and  
2 adulthood.

3 Is that correct?

4 A. That is correct.

5 Q. In fact, this committee concluded that that  
6 gender dysphoria, a minority of prepubertal children  
7 appears to persist in adolescence.

8 Is that correct?

9 A. That is correct.

10 Q. I'm going to turn your attention to --- this  
11 will be Tab 15, Exhibit-6.

12 ---

13 (Whereupon, Exhibit-6, Lisa Littman  
14 Study, was marked for identification.)

15 ---

16 BY ATTORNEY BARHAM:

17 Q. This is a 2021 study by Lisa Littman entitled  
18 Individuals Treated for Gender Dysphoria with a Medical  
19 and/or Surgical Transition who Subsequently  
20 De-transitioned.

21 Is that correct?

22 A. That is correct.

23 Q. Are you familiar with this study?

24 A. I am.

**Q. The study was based on survey responses from a hundred adult individuals who were approved for hormonal and/or surgical transition, underwent such transition, lived in a transgender identity for a period of years and then decided to de-transition or revert to a gender identity associated with their biological sex.**

**Is that correct?**

A. That is my understanding of the study, yes.

**Q. And all of the subjects had detransitioned by discontinuing their medications, having surgeries to reverse the effects of transition or both.**

**Correct?**

ATTORNEY BLOCK: Objection to form. Are you reading something?

ATTORNEY BARHAM: I'm referencing page two, column two, at the bottom of the page.

THE WITNESS: My recollection from the study was that this was all self report, so there was no way to verify if that was correct or true.

BY ATTORNEY BARHAM:

**Q. But that's at least what the participants reported.**

**Correct?**

A. From my recollection. I'd have to reread the

A. I do.

**Q. Do you see the heading detransition?**

A. I do.

**Q. And it says there that when participants decided to detransition they were a mean age of 26.4 years old.**

**Correct?**

A. That is correct.

**Q. Have you read this study before today?**

A. I have.

**Q. So doesn't this study at least suggest that patients may think they have a sense of belonging to the opposite sex but can be mistaken?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I think what this study does is hear experiences from a select group of individuals who are motivated to participate in the study about detransition and hear their experiences of their care.

BY ATTORNEY BARHAM:

**Q. But the study still indicates that those individuals had a sense of belonging to the opposite sex and later concluded that they were were mistaken.**

**Is that correct?**

A. You will have to forgive my clinician nature

entire study to say for sure but that is my recollection, yes.

**Q. And if you turn to page eight of the second column, under the heading de-transition?**

A. I don't have page numbers on mine.

ATTORNEY BLOCK: Do you reference the page number at the top?

ATTORNEY BARHAM: The source contains no page numbers, making it difficult.

BY ATTORNEY BARHAM:

**Q. Under the heading detransition it's the page right before table four.**

ATTORNEY BLOCK: I'm sorry. Can I see the heading on the document? Just for the record, this doesn't appear to be a paginated version of the article where, you know, when I pull it up I get a publication, date and pages. So I don't know if this is the final version of the article or not, but you can proceed with the questions.

ATTORNEY BARHAM: Counsel, I'll return to your concerns, Mr. Block.

BY ATTORNEY BARHAM:

**Q. Do you see the one page before the page that contains Table 4?**

here, but language is important when working with patients who are transitioning. I don't know if that's the language that they would use or if that is the language that was used in this particular survey.

**Q. But the effect of detransitioning is that they at one time thought they belonged to the opposite sex and then later concluded that they did not?**

ATTORNEY BLOCK: Objection to the form.

THE WITNESS: Again, I think we would want to know specifically what each individual person, how they described their process. I don't know what detransition means to those who are taking a relatively anonymous survey, so it's hard to draw a conclusion about the specific nature of it. The generally accepted upon definition of detransition is generally aligned with somebody who reverts back to a gender identity or gender expression that is more aligned with their sex assigned at birth.

BY ATTORNEY BARHAM:

**Q. This study defines detransition as discontinuing medications, having surgeries to reverse the effect of transition or both.**

**Is that correct? It is on page two?**

A. Show me where on page two.

**Q. The second column of page two, at the bottom of the page?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Yeah. I'm not seeing that Dr. Littman is specifically defining detransition but describing the objective of the study for folks who detransitioned by those aspects that you noted.

BY ATTORNEY BARHAM:

**Q. Okay.**

**But she notes in the last paragraph on that page the objective of the current study was to describe the population of individuals, skipping, who then detransitioned by discontinuing medications, having surgery to reverse the effects of transition or both?**

A. That's correct.

**Q. So she is indicating what she understands detransitioning to mean in this article.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Again I'm not sure how she specifically defines detransition. It is not necessarily made clear in that statement.

BY ATTORNEY BARHAM:

**Q. Is it true that people may mistake feelings**

**resulting from trauma, mental illness or homophobia for a genuine sense of transgender identity?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I think there are a lot of complicated experiences that people may have that make them question their gender identity.

BY ATTORNEY BARHAM:

**Q. So it's at least possible that people could mistake feelings resulting from trauma, mental illness or homophobia for genuine sense of transgender identity.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I don't disagree with that, no.

BY ATTORNEY BARHAM:

**Q. You said it's complicated, so it sounds like it would be hard sometimes for a clinician to tell with certainty what's going on?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: What I would describe is that in anything related to mental health that there are complications and nuances. This is no different.

BY ATTORNEY BARHAM:

**Q. Now, I believe you alluded to this a moment ago.**

**You mentioned that this is a self-reporting study and it obviously concerns an emotionally fraught area of gender identity. So is it your position that this does not produce scientifically meaningful results?**

A. I don't know what you mean by scientifically meaningful.

**Q. Do you believe that this --- the results of this article are scientifically reliable?**

A. It depends upon what question is being asked. As a blanket, any kind of selection bias, particularly for this study based upon where the participants were drawn from makes us not want to draw conclusions about their generalized applicability of this study to other transgender folks, including other folks who may have detransitioned, but the goal of science is not necessarily to draw widely applicable conclusions, but to put us in a position where we can ask more questions and improve our care for our patients.

**Q. Now, why do you say --- why do you highlight concerns about where the participants were drawn from?**

A. I highlight that because it creates a sense of selection bias, which potentially, as I said, can reduce the why applicability of the conclusions drawn.

**Q. And why do you say that there is a potential for**

**selection bias in this article?**

A. Based upon the websites that Dr. Littman has drawn her participants.

**Q. And why do you have concerns about those websites?**

A. I have concerns about the websites because of the contents of those websites.

**Q. And what is contents of those websites that causes you concern?**

A. The content of the websites is unscientific. And I guess I'm not sure how to articulate it in a most defined way very specific to answering a set of questions that reenforces the prestudy hypotheses.

**Q. So which websites that she drew participants from cause you concern?**

A. As an example, Fourth Wave Now is a website that Dr. Littman had used for some of her study recruitment.

**Q. And why are you concerned about the use of Fourth Wave now in the recruitment process?**

A. What I would say is that when you're designing a study that presupposes the conclusion and the website is designed to attract people who presuppose that conclusion, that limits the applicability of the results. It just have to be taken into account. It

1 doesn't mean that there isn't data from this kind of  
2 snowball recruitment that isn't valuable and I wouldn't  
3 say that there isn't value to some of Dr. Littman's  
4 work, specifically this study as compared to the last,  
5 though you have to take it in the context with which it  
6 was developed.

7 **Q. So are you suggesting that Dr. Littman**  
8 **presupposed the conclusion that she wanted to reach in**  
9 **designing this survey?**

10 A. I'm less familiar with the design of this study  
11 than previous studies that she has designed, which I  
12 would say that was correct.

13 **Q. What other websites did she use in the process**  
14 **to cause you concern?**

15 A. I'm not as familiar with this study, so I don't  
16 know if she specifically identified which websites. And  
17 I can't recall right now on the others which they were.

18 **Q. If you look at page three she discusses the**  
19 **method and the participants and procedures. Would**  
20 **reviewing that refresh your recollection as to any**  
21 **concerns about participants?**

22 A. It would not because she does not describe the  
23 specific fora. She describes a closed Facebook group,  
24 Tumbler, Twitter and Reddit, but those are large

1 websites that have a lot of different kind of content.

2 **Q. So is it your position that it's not possible to**  
3 **know whether anonymous or any results have any relation**  
4 **to true fact in actual case histories?**

5 A. That is not my position.

6 **Q. Do you have any --- you mentioned earlier**  
7 **something about how these were anonymous results. So is**  
8 **it possible to know whether they actually corresponded**  
9 **with true cases?**

10 A. I think anonymous surveys, you have to really  
11 dig into the specifics of the survey design in order to  
12 draw conclusions. And again, with any study in any  
13 survey in particular you just want to make sure you have  
14 an understanding of that context how broadly to draw  
15 conclusions.

16 **Q. Would you agree that online recruitment does not**  
17 **provide a statistically meaningful sample?**

18 A. I would not agree with that.

19 **Q. Is it your position --- how can an online**  
20 **recruitment produce a statistically meaningful sample?**

21 A. I think I would need to understand the context  
22 of what you mean by statistically meaningful. There is  
23 a difference between a survey that could be potentially  
24 poorly designed and yet reach statistical significance.

1 You would need to understand the broader context in  
2 order to draw conclusions about what that statistical  
3 significance means and that means really digging into  
4 the specific methodology of this study. There is a vast  
5 literature about efficacy of survey data and it really  
6 depends on the specifics.

7 **Q. We've previously referenced paragraph eight of**  
8 **your report where you mention you've seen approximately**  
9 **500 transgender patients.**

10 ATTORNEY BLOCK: Travis, sorry, not to  
11 avoid a pending question, but we're almost at one hour,  
12 so if this is a good time, if you're moving to a  
13 different subject maybe this would be a good time to  
14 break.

15 ATTORNEY BARHAM: Let me wrap up a few  
16 more and then we will do that.

17 ATTORNEY BLOCK: Thanks.

18 BY ATTORNEY BARHAM:

19 **Q. Your clinical practice for children and**  
20 **adolescents started in 2013, about eight years ago.**

21 **Is that correct?**

22 A. No, I finished medical school in 2011 and have  
23 been working with adults, children and adolescents since  
24 then.

1 **Q. Okay.**

2 A. Actually that's when I finished --- to go back,  
3 that's when I finished my residency and fellowship. I  
4 finished medical school in 2006. I can't believe it's  
5 been long.

6 **Q. And when did you begin your work in child and**  
7 **adolescent psychiatry?**

8 A. I had child and adolescent psychiatry  
9 experiences when I was in medical school.

10 **Q. When did you begin practicing child and**  
11 **adolescent psychiatry?**

12 A. That's not a very specific term. I practiced  
13 child psychiatry as a medical student in my training.

14 **Q. When were you licensed, when were you first**  
15 **licensed to practice child and adolescent psychiatry?**

16 A. There's no specific license to practice child  
17 psychiatry. Anybody who is --- has a medical license  
18 can practice any medical specialty. I was Board  
19 Certified in Child and Adolescent Psychiatry, which is a  
20 different process and I would have to look through to  
21 recall the date. I'm assuming that it's 2012 or 2013.  
22 2013 is when I was Board Certified.

23 **Q. So when did you begin --- and you finished your**  
24 **fellowship in child and adolescent psychiatry when?**

1 A. 2011.

2 **Q. 2011. When did you begin treating as a child**  
3 **and adolescent psychiatrist children with gender**  
4 **dysphoria?**

5 ATTORNEY BLOCK: Objection to form.

6 THE WITNESS: I saw children with gender  
7 dysphoria during my residency and in my fellowship.

8 BY ATTORNEY BARHAM:

9 **Q. And your fellowship?**

10 A. Between 2006 and 2009.

11 **Q. And what proportion of those patients socially**  
12 **transitioned?**

13 A. Of all of the patients that I saw in my training  
14 or in all of the patients that I've seen over my time as  
15 a physician?

16 **Q. Let's go first with the training.**

17 A. It was a much smaller number, so probably if I  
18 were to guess, and I'm going back, probably close to  
19 95 percent.

20 **Q. Ninety-five (95) percent socially transitioned**  
21 **when you were in training?**

22 A. Yes.

23 **Q. And how many of your patients overall have**  
24 **socially transitioned?**

1 A. I'm not sure how to answer that question. Over  
2 the course of our time working together, before I  
3 started seeing them or --- I'm not sure how to  
4 accurately answer that question.

5 **Q. Over the --- just in general how many of your**  
6 **patients socially transitioned, not just while they were**  
7 **being treated under your care?**

8 A. And these are patients who are seeing me  
9 specifically through the context of gender or of those  
10 500 transgender patients?

11 **Q. Of the 500 transgender patients.**

12 A. Probably --- I mean, it's a guess but probably  
13 in the order of 85 percent.

14 **Q. And what proportion of the 500 patients used**  
15 **puberty blockers?**

16 A. Probably a minority of those patients. If I had  
17 to guess, probably 20 percent or less.

18 **Q. And what percent of those 500 transgender**  
19 **patients used cross sex hormones?**

20 A. I don't have my records in front of me, so it  
21 would really just be a guess, but probably close to the  
22 same percentage that socially transitioned, probably a  
23 little bit less than that.

24 **Q. If I recall correctly that's about 85 percent?**

1 A. Probably somewhere on the order of that.

2 ATTORNEY BLOCK: Would now be a good time  
3 for that break?

4 ATTORNEY BARHAM: One last question.  
5 BY ATTORNEY BARHAM:

6 **Q. What systems do you have in place to track these**  
7 **patients five years after they have been in your care?**

8 A. I have the same systems as most psychiatrists.  
9 We see the patients within our care. Folks will reach  
10 out to us after time has passed and it's one of the  
11 great pleasures of being a child psychiatrist, we get to  
12 see folks longitudinally. So there is not a specific  
13 system apart from mutual care.

14 **Q. So you rely on them to reach out to you.**  
15 **Is that correct?**

16 ATTORNEY BLOCK: Objection to form.

17 THE WITNESS: It depends on context.

18 BY ATTORNEY BARHAM:

19 **Q. But do you have any systematic way of tracking**  
20 **all patients five years after they leave your care?**

21 A. There is no systematic way of tracking all  
22 patients.

23 ATTORNEY BARHAM: All right. Let's take  
24 a break. How long would you all like?

1 ATTORNEY BLOCK: Five minutes.

2 ATTORNEY BLOCK: Should we go off the  
3 record?

4 VIDEOGRAPHER: Going off, 10:14 a.m.  
5 OFF VIDEOTAPE

6 ---  
7 (WHEREUPON, A SHORT BREAK WAS TAKEN.)

8 ---  
9 ON VIDEOTAPE

10 VIDEOGRAPHER: Back on the record. The  
11 time is 10:27 am.

12 BY ATTORNEY BARHAM:

13 **Q. Moments ago we were discussing Dr. Littman's**  
14 **2021 study, that was Tab 15, Exhibit 6. Are you aware**  
15 **of any studies that contradict Dr. Littman's data?**

16 A. Can you be more specific?

17 **Q. Are you aware of any studies that contradict Dr.**  
18 **Littman's work survey in this article in Exhibit-6 that**  
19 **find fault with her data?**

20 ATTORNEY BLOCK: Objection to the form.

21 THE WITNESS: Yeah. I'm sorry. I don't  
22 think I understand the question. There are other  
23 articles that have been written about detransition and  
24 clinical experiences of patients that have

Page 70

1 detransitioned who have described those experiences.  
2 There has not been a specific survey designed of  
3 detransitioners outside of this one that I'm aware of.

4 BY ATTORNEY BARHAM:

5 **Q. Has anyone written an article finding fault with**  
6 **the way Dr. Littman interpreted the data that ---?**

7 ATTORNEY BLOCK: Objection to form.

8 THE WITNESS: For this specific data set  
9 or for previous?

10 BY ATTORNEY BARHAM:

11 **Q. For this specific data set?**

12 A. For this specific data set, from my  
13 recollection, this was studied --- or published just  
14 recently so I'm not aware of any. It doesn't mean that  
15 there aren't.

16 **Q. Are you aware of any studies that contradict Dr.**  
17 **Littman's conclusions in this 2021 article?**

18 A. If you give me a moment I will read the  
19 conclusion.

20 ATTORNEY BLOCK: Objection to form.

21 THE WITNESS: Inasmuch as Dr. Littman's  
22 conclusion is that there's no single narrative to  
23 explain the experiences of all individuals who  
24 detransitioned and we should take care to avoid painting

Page 72

1 **patients that you have treated, the 500 transgender**  
2 **patients you referenced in your report, and you**  
3 **mentioned that about 20 percent or less of those had**  
4 **used puberty blockers. I'm wondering why that**  
5 **percentage is so low.**

6 ATTORNEY BLOCK: Objection to form.

7 THE WITNESS: I don't know. Low compared  
8 to what? I think it's important to understand the  
9 context that in 2011, when I first started my gender  
10 program, that puberty blocking medications were not  
11 widely available, cost upwards of \$3,000 a month and  
12 were not covered by most insurance. So puberty blockers  
13 were not something that were available in the same way  
14 they are now. And I also saw a fair number of adults  
15 and older adolescents for whom puberty blockers are not  
16 indicated.

17 BY ATTORNEY BARHAM:

18 **Q. So of the 500 patients that you reference in**  
19 **paragraph eight of your report, what percentage of those**  
20 **are adults?**

21 A. I would really have to go back and look. I  
22 mean, in my current practice, I see adolescents and  
23 young adults, so kind of parsing out artificially who is  
24 18 and up, it would take some time to do that. Probably

Page 71

1 the population with a broad brush, I agree with that  
2 conclusion.

3 BY ATTORNEY BARHAM:

4 **Q. Are you aware of any studies that contradict her**  
5 **conclusions not just in the conclusion section but her**  
6 **description of the detransitioners?**

7 ATTORNEY BLOCK: Objection to the form.

8 THE WITNESS: I think it's hard to  
9 provide a specific answer to that question. We have to  
10 look at each study and judge each individual study based  
11 upon the merits. The conclusions she draws are from a  
12 subset of patients with a very specific viewpoint, and I  
13 agree with her and her conclusion that there needs to be  
14 more research to better understand the broader  
15 implications of this care.

16 BY ATTORNEY BARHAM:

17 **Q. You're not aware of any article that has been**  
18 **published specifically critiquing this 2021 study by Dr.**  
19 **Littman.**

20 **Is that correct?**

21 A. Not that I'm aware of.

22 ATTORNEY BLOCK: Objection to form.

23 BY ATTORNEY BARHAM:

24 **Q. A few moments ago we were also talking about the**

Page 73

1 in the order of 75 percent are children in adolescence,  
2 25 percent adults. But of course, over 2011 to now, a  
3 lot of those folks are now adults.

4 **Q. And when I'm asking about these percentages I**  
5 **mean when you were treating them. What percentage of**  
6 **the patients you were treating were children?**

7 A. That's my best guess.

8 **Q. Seventy-five (75) percent?**

9 A. Yes.

10 **Q. And are you distinguishing between prepubertal**  
11 **children and adolescents in that 75 percent or both?**

12 A. That's both.

13 **Q. Of that 75 --- of all the patients you've seen,**  
14 **at the time you saw them, how many were prepubertal**  
15 **children?**

16 A. Probably --- and again, I have to give this a  
17 major caveat. I would have to go back and look through  
18 everything, but I would say probably 25 percent of that  
19 75 percent were prepubertal at the time of initial  
20 assessment.

21 **Q. And so then the remaining 75 percent of 75 would**  
22 **be adolescents.**

23 **Is that correct?**

24 A. Correct.

1 ATTORNEY BLOCK: Objection to form.

2 BY ATTORNEY BARHAM:

3 **Q. How many of your patients of those 500 patients**  
4 **have detransitioned in a year?**

5 A. It's kind of a hard question to answer. The one  
6 patient who self identifies as having detransitioned  
7 started seeing me after she had detransitioned.

8 **Q. Have any of your patients detransitioned while**  
9 **under your care?**

10 A. Not that I'm aware of.

11 **Q. And is the one patient who detransitioned before**  
12 **starting to see you, is that the only patient you're**  
13 **aware of of the 500 that has detransitioned?**

14 A. That is the only one that I'm aware of, yes.  
15 But can I clarify that of those 500 patients there are  
16 certainly those who did not choose to transition.

17 **Q. And how many of the 500 chose not to transition?**

18 A. If I had to guess, probably about 10 to 20,  
19 probably ten percent.

20 **Q. And did they make that decision before puberty**  
21 **began?**

22 A. It was a mix.

23 **Q. Of those who chose not to transition, how many**  
24 **were children when they made that decision?**

1 A. Lost to follow-up is a specific term used in  
2 studies, so it's not something that I would use to  
3 describe my patients.

4 **Q. How many patients do you lose contact with after**  
5 **five years?**

6 A. Again, I don't know how to answer that question.  
7 I've been at my current role for three, so I haven't  
8 lost touch with any significant number of patients.

9 **Q. What about patients that you saw before you were**  
10 **in your current position?**

11 A. I'm not in contact with patients from my  
12 previous role.

13 ATTORNEY BARHAM: All right. Let's go to  
14 Tab 110. This is Exhibit-7 I believe.

15 ---

16 (Whereupon, Exhibit-7, Study, was marked  
17 for identification.)

18 ---

19 BY ATTORNEY BARHAM:

20 **Q. Are you familiar with this study?**

21 A. I am not.

22 **Q. Have you seen it before today?**

23 A. I have not.

24 **Q. On page one this again has been --- it's**

1 A. I couldn't tell you at that point, but  
2 significantly more were the prepubertal youth than  
3 adolescents.

4 **Q. This is a sensitive question. I mean no offense**  
5 **by it, but how many of the 500 patients have made the**  
6 **sad decision to commit suicide?**

7 ATTORNEY BLOCK: I'm sorry. I couldn't  
8 heat that. Can you speak up?

9 BY ATTORNEY BARHAM:

10 **Q. How many of the 500 patients have made the sad**  
11 **decision to commit suicide?**

12 ATTORNEY BLOCK: Objection to form.

13 THE WITNESS: Is your question how many  
14 have completed suicide?

15 BY ATTORNEY BARHAM:

16 **Q. Correct.**

17 A. Of those 500 patients, zero.

18 **Q. How many of those 500 patients have been**  
19 **hospitalized for a psychiatric illness?**

20 A. I do not have that information in front of me.

21 **Q. Do you have any general idea?**

22 A. I don't.

23 **Q. After five or more years what percentage of your**  
24 **patients would be characterized as lost to follow-up?**

1 **paginated in the top right corner or top inside corner.**  
2 **On page one the first sentence of the last paragraph**  
3 **says gender transition is as scientifically fascinating**  
4 **as it is socially controversial for it poses significant**  
5 **professional and bioethical challenges for those**  
6 **clinicians working in the field of gender dysphoria.**

7 **Do you agree that gender detransition poses**  
8 **significant professional and bioethical challenges for**  
9 **professionals treating gender dysphoria?**

10 ATTORNEY BLOCK: Objection to form.

11 THE WITNESS: I don't necessarily agree  
12 with the language. And certainly don't agree with the  
13 author to use something that's scientifically  
14 fascinating. What I think is that every decision that  
15 we make in child psychiatry in particular is fraught  
16 with ethical challenges. This is not any different from  
17 the ethical challenges that we face with a lot of other  
18 interventions.

19 BY ATTORNEY BARHAM:

20 **Q. What challenges does detransition pose to your**  
21 **profession in your view?**

22 ATTORNEY BLOCK: Objection to form.

23 THE WITNESS: I don't see how it poses  
24 any challenges to my work.

BY ATTORNEY BARHAM:

**Q. Page three of this article, the authors identify several things that may prompt a person's decision to detransition including understanding how past trauma, internalized sexism and other psychological difficulties influence the experience of gender dysphoria.**

**Correct?**

ATTORNEY BLOCK: Objection. Can you give him a chance to read?

ATTORNEY BARHAM: Of course.

THE WITNESS: And can you repeat what you said?

BY ATTORNEY BARHAM:

**Q. On page three the authors identify several things that may prompt a person's decision to detransition including, quote, understanding how past trauma, internalized sexism and other psychological difficulties influence the experience of gender dysphoria.**

**Correct?**

A. Sorry. Just give me a second to look at the context here.

**Q. Sure.**

A. I agree that's how it is written and there

**Stella 2016. It is the same paragraph.**

A. Got it. Yeah I don't know what solving a psychological or emotional problem means in this context.

**Q. But these authors are at least indicating that solving these problems, however they mean the term, may prompt a decision to detransition.**

**Is that correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I think I've answered how I can answer that.

BY ATTORNEY BARHAM:

**Q. Okay.**

**Let's go back to Tab 15, which is Exhibit-6. This was the Littman study that we were discussing a moment ago. On page three --- excuse me, according to Table 5, on page nine, 60 percent of the participants in this survey reported that they became more comfortable identifying as their natal sex.**

**Is that correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I see 65 percent of those assigned female at birth and 48 of those assigned male at birth reported that.

appears to be no basis from which the author has built that assertion. There is no methods described in this whatsoever.

**Q. I believe the author in that instance is citing Dodsworth 2020, Gonzalez 2019, Herzog 2017, and one, two, three, four other studies.**

**Do you see that?**

A. I see those studies. I'd have to look at the specific studies in order to understand the implications and the context.

**Q. But the authors obviously seem to have a basis or at least a citation basis for what they're saying.**

**Is that correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Again, without knowing the specifics of those studies it's hard for me to say.

BY ATTORNEY BARHAM:

**Q. The authors also indicate that solving previous psychological or slash emotional problems that contributed to gender dysphoria may prompt the decision to detransition.**

**Is that correct?**

A. Where is that?

**Q. They are citing Butler and Hutchinson, 2020,**

BY ATTORNEY BARHAM:

**Q. So 45 and 15 is 60, so that would be 60 percent of the 100 participants in the study.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I believe.

BY ATTORNEY BARHAM:

**Q. I'm sorry. I didn't hear your answer.**

A. I trust your math, yes.

**Q. Okay.**

**And on page 12, under the heading discussion, this survey indicates that only a small percentage of detransitioners, 24 percent, informed the clinicians and clinics that facilitated their transfer that they --- their transition that they had detransitioned.**

**Is that correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Yes, the participants in the study, that is correct.

BY ATTORNEY BARHAM:

**Q. And you testified a moment ago, if I recall correctly, please correct me if I'm wrong, that you are aware of only one patient in your career that has detransitioned.**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p style="text-align: right;">Page 82</p> <p>1 <b>Is that correct?</b></p> <p>2 A. That I'm aware of, yes.</p> <p>3 <b>Q. Let's go to Tab 116, which is Exhibit-8.</b></p> <p>4 ---</p> <p>5 <b>(Whereupon, Exhibit-8, Article by</b></p> <p>6 <b>Vandenbussche, was marked for</b></p> <p>7 <b>identification.)</b></p> <p>8 ---</p> <p>9 BY ATTORNEY BARHAM:</p> <p>10 <b>Q. Are you familiar with this article?</b></p> <p>11 A. I have not read this article.</p> <p>12 <b>Q. And this is a 2021 article by I believe a</b></p> <p>13 <b>gentleman named --- or an individual named</b></p> <p>14 <b>Vandenbussche, Detransitioned Related Needs in Sports.</b></p> <p>15 <b>Is that correct?</b></p> <p>16 A. That is correct.</p> <p>17 <b>Q. Did you review this article when preparing your</b></p> <p>18 <b>report?</b></p> <p>19 A. I did not.</p> <p>20 <b>Q. If you look at page four this article examined a</b></p> <p>21 <b>sample survey of 237 detransitioners.</b></p> <p>22 <b>Is that correct?</b></p> <p>23 ATTORNEY BLOCK: Objection. Can you give</p> <p>24 him time to read the document he has never seen before.</p>                                    | <p style="text-align: right;">Page 84</p> <p>1 ATTORNEY BARHAM: I want to show you</p> <p>2 Tab 117, and this will be Exhibit 9. It will be an</p> <p>3 article by Lily Durwood entitled Mental Health and Self</p> <p>4 Worth in Socially Transitioned Transgender People.</p> <p>5 ---</p> <p>6 <b>(Whereupon, Exhibit-9, Article by Lily</b></p> <p>7 <b>Durwood, was marked for identification.)</b></p> <p>8 ---</p> <p>9 BY ATTORNEY BARHAM:</p> <p>10 <b>Q. Are you familiar with this article?</b></p> <p>11 A. I am.</p> <p>12 <b>Q. You cited this in footnote nine of your report</b></p> <p>13 <b>as demonstrating the treatment associated with social</b></p> <p>14 <b>transitions.</b></p> <p>15 <b>Correct?</b></p> <p>16 A. I have to look at the specific footnote. I know</p> <p>17 I cited it, but I don't know if it was citing to that</p> <p>18 specific conclusion.</p> <p>19 <b>Q. By all means take a look.</b></p> <p>20 A. Can you point me to where my footnote is?</p> <p>21 <b>Q. Footnote nine is --- let me find it myself.</b></p> <p>22 ATTORNEY SWAMINATHAN: It's page 11.</p> <p>23 THE WITNESS: Yes.</p> <p>24 BY ATTORNEY BARHAM:</p>                                                                                                                                   |
| <p style="text-align: right;">Page 83</p> <p>1 ATTORNEY BARHAM: Certainly.</p> <p>2 THE WITNESS: Can you repeat the</p> <p>3 question?</p> <p>4 BY ATTORNEY BARHAM:</p> <p>5 <b>Q. This article highlights the results of a survey</b></p> <p>6 <b>of 237 detransitioners.</b></p> <p>7 <b>Correct?</b></p> <p>8 A. Yes, as they are defining detransitioning, yes.</p> <p>9 <b>Q. And on page five these authors --- these</b></p> <p>10 <b>researchers report that 70 percent of participants</b></p> <p>11 <b>detransitioned because they realized that their gender</b></p> <p>12 <b>dysphoria was related to other issues.</b></p> <p>13 <b>Correct?</b></p> <p>14 A. Correct.</p> <p>15 <b>Q. And that was the most common reported reason for</b></p> <p>16 <b>detransitioning.</b></p> <p>17 <b>Correct?</b></p> <p>18 A. As they stated, yes.</p> <p>19 <b>Q. In paragraph 43 of your report you cite Lisa</b></p> <p>20 <b>Littman's 2018 study. Paragraph 43. And you highlight</b></p> <p>21 <b>what you describe as serious methodological flaws that</b></p> <p>22 <b>render the study meaningless.</b></p> <p>23 <b>Is that correct?</b></p> <p>24 A. Correct.</p> | <p style="text-align: right;">Page 85</p> <p>1 <b>Q. The Durwood article in 2017 is a survey of</b></p> <p>2 <b>children and their parents about the children's mental</b></p> <p>3 <b>health.</b></p> <p>4 <b>Is that correct?</b></p> <p>5 A. Correct.</p> <p>6 <b>Q. The children in the Durwood article were not</b></p> <p>7 <b>surveyed or assessed by clinicians.</b></p> <p>8 <b>Is that correct?</b></p> <p>9 A. I don't know the answer to that. I'd have to</p> <p>10 look at the specific ---.</p> <p>11 <b>Q. Well, if this is a self report it would be</b></p> <p>12 <b>reporting what the children themselves said.</b></p> <p>13 <b>Correct?</b></p> <p>14 ATTORNEY BLOCK: Objection. Let him have</p> <p>15 time to read the article.</p> <p>16 THE WITNESS: The trans youth project was</p> <p>17 directed by Dr. Ulson involved clinicians in the</p> <p>18 assessment of the children and their families. So I'm</p> <p>19 not sure specifically. I would have to go through the</p> <p>20 methods of this one particularly for me to recall.</p> <p>21 As you will see from the procedure on</p> <p>22 page 117 whenever possible parents and children</p> <p>23 completed the measurements in separate rooms or far</p> <p>24 enough in the same room to be out of ear shot. And so</p> |

1 they were researchers who were boarded who were  
2 participating in these interviews with the kids and  
3 their families.

4 BY ATTORNEY BARHAM:

5 **Q. But those researchers were just recording what**  
6 **the students said out loud?**

7 A. Correct.

8 **Q. So there's no clinical assessment of the**  
9 **children as part of this survey.**

10 **Is that correct?**

11 ATTORNEY BLOCK: Object to form.

12 THE WITNESS: I wouldn't be able to  
13 answer that question. It depends upon how it's used.  
14 In a research context you might be using the same  
15 instruments that we would use for clinical assessments,  
16 but for the sake of research purposes it's not used in  
17 that way.

18 BY ATTORNEY BARHAM:

19 **Q. But the purpose of this article was just to**  
20 **record what the children said as a self report.**

21 **Is that correct?**

22 ATTORNEY BLOCK: Objection to form.

23 THE WITNESS: As far as I understand the  
24 point of this article, they utilized child self report

1 which is what is typically used in children mental  
2 health studies.

3 BY ATTORNEY BARHAM:

4 **Q. According to page --- the second page of this**  
5 **article, which is page 117, the participants were**  
6 **recruited through word of mouth, national and local**  
7 **support groups, summer camps and online forums for**  
8 **families of transgender and gender nonconforming youth.**

9 **Correct?**

10 A. That is correct.

11 **Q. Frequently in your report you refer to**  
12 **gender-affirming care. What in your view are the**  
13 **components of gender-affirming care?**

14 ATTORNEY BLOCK: Objection to form.

15 THE WITNESS: I think that there is no  
16 one agreed upon use of that term and it is used by  
17 different people in different context to mean whatever  
18 they want it to mean, depending upon who is asking the  
19 questions. The way that I define it, for my own  
20 practice, is that it's important for children to be  
21 heard and listened to, that any particular gender  
22 identity outcome is not better than any other and that  
23 the child and families should be directing the process  
24 with appropriate assessments and interventions.

1 BY ATTORNEY BARHAM:

2 **Q. How do you handle a situation where parental**  
3 **desires may be differ than the child's desires?**

4 A. That is almost a universal phenomenon of  
5 parenthood, so there's not an atypical process. When  
6 there is disagreement about specific issues in the  
7 treatment plan those interventions are going to be  
8 tailored to the individual families based upon their  
9 need.

10 **Q. So when you use gender-affirming care what do**  
11 **you view as the different components or different**  
12 **aspects of gender-affirming care in your practice?**

13 ATTORNEY BLOCK: Objection to form.

14 THE WITNESS: I think that is also going  
15 to be highly context dependent. I'm a psychiatrist and  
16 I see a lot of children with complex psychiatric needs,  
17 so my process for gender-affirming care is going to be  
18 different than what somebody else might describe as  
19 gender-affirming care, but I think I highlighted what I  
20 see as the components of it for myself.

21 BY ATTORNEY BARHAM:

22 **Q. I've missed in your list of the different**  
23 **components, so could you explain again what do you see**  
24 **as the components of gender-affirming care?**

1 A. That it should be child and family led, that  
2 listening to and understanding the child is an important  
3 aspect of the process and that there is no gender  
4 identity outcome that is privileged over another. I'm  
5 sure I said it slightly differently than the last time  
6 around but the concepts are the same.

7 **Q. Do you consider social transition to be a**  
8 **component of gender-affirming care?**

9 A. I think that understanding the risks, benefits  
10 and alternatives of social transition is a part of  
11 gender-affirming care. In that way, sometimes  
12 recommending not socially transitioning is a part of  
13 gender-affirming care.

14 **Q. But gender-affirming care can be an approach**  
15 **used as part of gender-affirming care.**

16 **Is that correct?**

17 ATTORNEY BLOCK: Objection to the form.

18 THE WITNESS: Can you repeat the  
19 question?

20 BY ATTORNEY BARHAM:

21 **Q. Social transitioning can be a method used as**  
22 **part of gender-affirming care.**

23 **Correct?**

24 A. It is an option.

**Q. An available tool.**

**Correct?**

A. Yes.

**Q. Is it your belief that social transition is a type of medical or mental health treatment for gender dysphoria?**

A. It's a hard question to answer. Social transition is a pretty diverse concept that's hard to get as a categorical variable to study, but the implication is that there's a lot of things that are often helpful for mental health that aren't specifically mental health treatments, right, like exercise, regular sleep. These aren't specific mental health interventions but nevertheless have impacts on mental health outcomes.

**Q. Well, in paragraph 90 --- I mean paragraph 36 of your report you say that social transition is a treatment for gender dysphoria?**

A. Yeah I would agree with that.

**Q. So what kind of treatment is it?**

A. It's a psychosocial intervention.

**Q. Psychosocial. What does social transitioning include in your view?**

A. I have to recall if I provided an operational

definition for it in my report. Essentially what we're talking about is an alignment of gender role and gender identity. So that's transition of name, pronouns, hair, participation in sex-segregated activities, et cetera.

**Q. And so social transition in your view means the participation in girls or boys athletic teams in competitions consistent with ones gender identity.**

**Is that correct?**

A. Again, it's going to be context dependent. It is not a yes or no question around social transition. What we're going to be doing in the context of an assessment is understanding the risks and benefits of all the various options that we have.

**Q. I understand that it can differ from person to person, but participation in girls or boys athletic teams in competition consistent with one's gender identity is an aspect, a possible aspect, of social transitioning.**

**Correct?**

A. It may be an option for some students, yes.

**Q. Do you consider the use of puberty blockers to be an available tool as part of gender-affirming care?**

A. I do.

ATTORNEY BLOCK: Objection to form.

BY ATTORNEY BARHAM:

**Q. Do you consider the use of cross sex hormones to be an available tool as part of gender-affirming care?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Gender-affirming care can include hormones.

BY ATTORNEY BARHAM:

**Q. Are there any other available tools that you use as part of gender-affirming care?**

A. Yes, there is a lot of tools that I use that are involved in gender-affirming care. Work with the family is one big piece of it. Work with the school is another. Referrals for surgery when indicated, recommendations for assessment and treatment of any co-occurring mental health disorder is a part of it.

**Q. What is your role in the prescribing of puberty blockers?**

A. I'm occasionally in the role of doing a mental health assessment prior to initiation of those medications.

**Q. And are you the individual who would prescribe the puberty blockers?**

A. I am not.

**Q. What type of professional would be responsible**

**for the prescribing?**

A. In the clinics that I have worked these are either adolescent medicine specialists or pediatric endocrinologists.

**Q. And is the same true with cross sex hormones?**

A. Yes.

**Q. In your report you describe gender-affirming care as the prevailing model of care for transgender youth.**

**Is that correct? And I'm referencing paragraph 15 of your report.**

A. Yes.

**Q. Later on in your report you refer to prevailing standards of care, paragraph 18, paragraph 26, for example. By that are you referring to gender-affirming care?**

A. Which paragraph?

**Q. Eighteen (18) and 26.**

A. I would say that it is a part of what I'm referring to but not the entirety of what I'm referring to.

**Q. What else are you referring to in paragraph 18 and 26 when you say prevailing standards of car?**

A. This would include a lot of components,

1 including both the Endocrine Society Guidelines, the  
2 World Professional Association for Transgender Health  
3 Guidelines as well as recommendations and ethical  
4 guiding principles of the various governing bodies that  
5 we all work with.

6 **Q. And you would describe those various documents**  
7 **that you just referenced as reflecting gender-affirming**  
8 **care.**

9 **Correct?**

10 A. I would have to go through, for example, the  
11 Endocrine Society Guidelines to know whether or not they  
12 use that specific term. Again, I think I just want to  
13 make sure that I'm emphasizing that gender-affirming  
14 care does not have an agreed upon definition so it's  
15 controversial and I wouldn't know how to answer that  
16 question.

17 **Q. As you use the term and as you define the term**  
18 **in your practice, would you consider the WPATH standards**  
19 **to fall under the umbrella of gender-affirming care?**

20 A. I would yes.

21 **Q. And would you consider the Endocrine Society**  
22 **Guidelines to fall under the umbrella of**  
23 **gender-affirming care?**

24 A. I would, yes.

1 **Q. In paragraph 15 of your report you claim that**  
2 **gender-affirming care is endorsed by at least five**  
3 **professional associations.**

4 ATTORNEY BLOCK: Objection to form.  
5 BY ATTORNEY BARHAM:

6 **Q. And you reference others. What other**  
7 **organizations are you alluding to in paragraph 15 of**  
8 **your report?**

9 A. I don't want to get the name of the organization  
10 incorrect, but National Association of Social Workers  
11 and the National Association of Marital and Family  
12 Therapists have released statements about it, but I  
13 don't have specific recollection of those sitting here  
14 today.

15 **Q. Okay.**

16 **Are there any other organizations besides those**  
17 **and those listed in paragraph 15?**

18 A. There likely are but none that are coming to  
19 mind today.

20 **Q. When you were preparing your report did you**  
21 **consult the standards of care articulated by any**  
22 **international professional organizations?**

23 A. Yes.

24 **Q. Which ones?**

1 A. Both the Endocrine Society Guidelines as well as  
2 the WPATH standards of care.

3 **Q. Any other international or professional**  
4 **organizations?**

5 A. Not that I can recall, no.

6 **Q. Are you aware that international and**  
7 **professional organizations have been moving away from**  
8 **using puberty blockers and cross sex hormones on**  
9 **children and adolescents under the age of 16?**

10 ATTORNEY BLOCK: Objection to form.

11 THE WITNESS: I don't see that that is  
12 necessarily accurate. I'm going to have to take a break  
13 in five minutes if that is okay.

14 ATTORNEY BARHAM: This would be the  
15 perfect time.

16 THE WITNESS: I will be quick.

17 VIDEOGRAPHER: Going off the record. The  
18 current reads 11:01.

19 OFF VIDEOTAPE

20 ---

21 (WHEREUPON, A SHORT BREAK WAS TAKEN.)

22 ---

23 ON VIDEOTAPE

24 VIDEOGRAPHER: Back on the record. The

1 current time is 11:06 a.m.

2 ATTORNEY BARHAM: I'm going to show you  
3 what we will mark as Exhibit 10, this will be Tab 91.

4 ---

5 (Whereupon, Exhibit-10, Statement by  
6 Royal Australian and New Zealand College  
7 of Psychiatrists, was marked for  
8 identification.)

9 ---

10 BY ATTORNEY BARHAM:

11 **Q. This is a statement from the Royal Australian**  
12 **and New Zealand College of Psychiatrists.**

13 **Correct?**

14 ATTORNEY BLOCK: Objection. Can you give  
15 him a chance to look at the document?

16 THE WITNESS: It's what it says. I don't  
17 know what the government structure of this organization  
18 is or how they release their statements or how they are  
19 developed.

20 BY ATTORNEY BARHAM:

21 **Q. This is Position Statement 103, according to the**  
22 **document.**

23 **Correct?**

24 A. I will take your word for it if that's what it

Page 100

THE WITNESS: Psychiatrists are often a useful adjunct to the team, but isn't a necessary requirement. There are many other mental health professionals who have expertise and can fill this role.

5 BY ATTORNEY BARHAM:

6       **Q. And what other professionals do you think could**  
7       **fill this role?**

8       A. This would be licensed clinical mental health  
9 professionals.

10 Q. And those would include?

11 A. Psychologists, social workers, marital and  
12 family therapists and there are probably other titles  
13 that are governed by their regulatory boards that I  
14 don't recall right now.

15 BY ATTORNEY BARHAM:

16 **Q. And on what are you basing your disagreement**  
17 **with the Royal College's emphasis on the importance of**  
18 **the psychiatrist's role**

19 ATTORNEY BLOCK: Objection to form and  
20 characterization of the document.

THE WITNESS: The WPATH standards of care  
as an example does not dictate necessary involvement of  
a psychiatrist. And I would have to review the  
Endocrine Society, but I don't believe that they

Page 101

1 specifically --- from my guild either.

2 BY ATTORNEY BARHAM:

3       **Q. Is it true that psychiatrists have training and**  
4       **skills that psychologists and marital therapists and**  
5       **social workers do not have?**

6      A. That is correct.

7 ATTORNEY BARHAM: I'm going to hand you  
8 what we will mark as Exhibit-11. And this will be  
9 Tab 92 for those watching online.

10 ---

(Whereupon, Exhibit-11, Policy Change  
Regarding Hormonal Treatment of Minors,  
was marked for identification.)

14 ---

15 BY ATTORNEY BARHAM:

16 **Q. This document is an announcement of a policy**  
17 **change regarding hormonal treatment of minors with**  
18 **gender dysphoria at Astrid Lindgren Children's Hospital.**  
19 **Are you aware that this is the main gender clinic in**  
20 **Sweden?**

21 ATTORNEY BLOCK: Objection to form.

22 THE WITNESS: I don't see any specific  
23 information about this document that reports where it's  
24 from.

BY ATTORNEY BARHAM:

**Q. Are you aware of Astrid Lindgren Hospital by reputation?**

A. I don't know if that's the name of it. No, I don't recall the specific name of the Swedish Children's Hospital.

**Q. Are you aware that the Swedish Agency for Health Technology Assessment and Assessment of Social Services published an overview of the knowledge base which showed a lack of evidence of both long-term consequences of the treatments of gender dysphoria?**

A. I have heard ---.

ATTORNEY BLOCK: Objection to form and where are you quoting from?

ATTORNEY BARHAM: Halfway through the first paragraph of the background section on page one.

ATTORNEY BLOCK: I'm sorry. Where was this document obtained from?

ATTORNEY BARHAM: I can supply that information, but this is an announcement of a policy change from a Children's Hospital in Sweden.

ATTORNEY BLOCK: Just for the record, this doesn't seem to have a walk --- like --- it just looks like words on a page without other sourcing on it.

**Q. Are you aware that the United Kingdom's National Health Service put an end to initiating hormone treatment in new cases of individuals under 16?**

ATTORNEY BLOCK: Objection to form and foundation.

THE WITNESS: My understanding is that it's under litigation right now and a final decision has not been reached, but I could be wrong about that.

BY ATTORNEY BARHAM:

**Q. Are you aware that that's at least a current practice to put an end to initiating hormonal treatment in new patients --- in new cases of individuals under 16?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Can you repeat the question?

BY ATTORNEY BARHAM:

**Q. Are you aware that the United Kingdom's National Services' current practice is to put an end to initiating hormonal treatments in new cases of individuals under 16?**

ATTORNEY BLOCK: Objection to form and foundation.

THE WITNESS: I do not have the NHS

ATTORNEY BARHAM: Your objection is noted.

THE WITNESS: I mean without speaking to the providence of the document, I have heard that there was a change within the Swedish establishment in regards to prepubertal youth or prepubertal youth.

BY ATTORNEY BARHAM:

**Q. And what was your understanding of that change?**

A. I would have to look through the specifics to know for sure.

**Q. What is your general understanding of the nature of that change?**

A. My general understanding was there was a pause on some of the treatments, medical treatments available for children with gender dysphoria.

**Q. And by pause, at least according to this document, it means that they had decided hormonal treatments, i.e. puberty blocking and cross sex hormones, will not be initiated in gender-dysphoric patients under the age of 16.**

**Correct? First bullet point in executive decisions.**

A. Again, not knowing the providence of this document, that's what this document says, yes.

policies in front of me, so I cannot speak to that.

ATTORNEY BARHAM: The document Exhibit --- what number are on, 11.

LAW CLERK WILKINSON: 11, yes

BY ATTORNEY BARHAM:

**Q. Exhibit 11 indicates, quote, the United Kingdom's National Health Service put an end to initiating hormonal treatment in new cases of individuals under 16. Do you have any reason to believe that that statement is inaccurate?**

ATTORNEY BLOCK: Just objection that this document came out at a certain time and so it's just not clear what timeframe, you know, this question is referring to. And just another objection to this document. This appears to be a translation ---.

ATTORNEY BARHAM: Your objection is noted. And we've already agreed that there are the three objections, so I will ask you to cease the speaking objections.

THE WITNESS: I have reason to doubt it. Yes.

BY ATTORNEY BARHAM:

**Q. What is your reason to doubt it?**

A. My understanding is that there were legal

processes involved that have changed the landscape of this care in the U.K.

**Q. Are you aware of the National Health Service reinitiating hormonal treatments in new cases of individuals under 16?**

A. I am unsure. That's where my doubt is.

**Q. But you're aware that at one time they put an end to those treatments for individuals under the age of 16?**

A. Yes.

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Yes.

ATTORNEY BARHAM: I'm going to show you what we will mark as Exhibit-12. This is a document --- an article by Lisa Nainggolan. I'm probably butchering the last name.

LAW CLERK WILKINSON: Tab 93.

ATTORNEY BARHAM: Tab 93, entitled Hormonal Treatment of Youth with Gender Dysphoria Stops in Sweden.

---

(Whereupon, Exhibit-12, Article by Lisa Nainggolan, was marked for identification.)

document is that I don't --- I've not heard of what Cohere Finland is and how their recommendations impact policies on the ground in Finland.

BY ATTORNEY BARHAM:

**Q. So are you not familiar with Cohere as an entity?**

A. Correct.

**Q. And that was a question. Are you?**

A. I am not.

**Q. Have you seen this document before today?**

A. I have not.

ATTORNEY BARHAM: I'm going to show you what we'll mark as Exhibit 14, and this will be Tab 95 for those watching at a distance.

---

(Whereupon, Exhibit-14, Article Published on Medscape.com, was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q. This is an article by Betsy McCall published on Medscape.com on October 7th, 2021.**

**Is that correct?**

A. Yes.

---

BY ATTORNEY BARHAM:

**Q. In the fourth paragraph it indicates that other centers in Sweden that treat gender dysphoria youth in Loom and Licopene will follow the lead of the ALB. Are you aware that those two clinics had made the same decision as the Astrid Lindgren Children's Hospital?**

A. I am not.

ATTORNEY BARHAM: I'm going to show you what we will mark as Exhibit-4 --- I mean, I'm sorry Tab 94, Exhibit 13.

---

(Whereupon, Exhibit-13, Study, was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q. Are you aware that Finland has similarly reversed its course issuing new guidelines that allow puberty blockers only on a case by case basis after extensive psychiatric assessment?**

ATTORNEY BLOCK: Objection to form. And can you give the witness and me a chance to see this document? Can the document be scrolled down?

THE WITNESS: What I can say about this

**Q. If you look at the third paragraph from the bottom. Ms. McCall reports that Scandinavian countries, most notably Finland, once eager advocates for the gender-affirmative approach, have pulled back and issued new treatment guidelines in 2020, stating that psychotherapy rather than gender reassignment should be the first line of treatment for gender dysphoric youth.**

**Do you see that?**

A. I see that.

**Q. Do you agree with that approach?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Medscape is a popular press forum for discussing issues and the language that is used by this author implies to me that this is not somebody who has a great deal of expertise or understanding in this field.

BY ATTORNEY BARHAM:

**Q. Do you agree with using psychotherapy rather than gender reassignment as the first line of treatment for gender dysphoric youth?**

A. The term gender reassignment in and of itself is not a meaningful term in this context, and so it's unclear what this particular author is trying to get across. And it's a false dichotomy that is being

1 positive that doesn't actually happen.

2 **Q. Are you aware that Finland had issued new**  
3 **treatment guidelines in 2020?**

4 A. I don't recall the specifics of when guidelines  
5 were recommended. But based upon the document that you  
6 placed in front of me it seems to be yes. But I think  
7 the description of those guidelines and what you put in  
8 front of me as the Cohere guidelines, which again I'm  
9 not sure what they actually represent in terms of their  
10 policies, there are contradictions there.

11 ATTORNEY BLOCK: I'm sorry. I want to  
12 put on the record this document about Finland also  
13 appears to be a translation from the original by the  
14 Society for Evidence Based Gender Medicine whose website  
15 describes it as an unofficial translation. So I just  
16 want to note that for the record.

17 ATTORNEY BARHAM: So noted. I'm going to  
18 show you what we will mark as Exhibit 15, Tab 96.

19 ---

20 (Whereupon, Exhibit-15, Article in  
21 National Health Service, was marked for  
22 identification.)

23 ---

24 BY ATTORNEY BARHAM:

1 excluded, which would be required in a validated  
2 metaanalysis type approach. So without a very specific  
3 description of the methodology it's going to be hard for  
4 me to make an educated statement.

5 BY ATTORNEY BARHAM:

6 **Q. If you look at page three of the document, under**  
7 **executive summary it highlights the nine observational**  
8 **studies that were included in the evidence review.**

9 A. Yeah, in a metaanalysis or even a systematic  
10 review one of the processes that occurs is you define as  
11 the authors what you are searching for, what are the  
12 exclusionary and inclusionary criteria for each  
13 individual study and a list of every single study that  
14 was reviewed and why or why not it was included. That  
15 is missing here, so it's --- I don't know how the  
16 authors decided which ones to include or which ones not  
17 to include, which makes it hard to draw a conclusion  
18 from the report as it stands.

19 **Q. Have you seen any other reports that suggest**  
20 **that the evidence being discussed on page 13 under the**  
21 **conclusions heading isn't anything higher than a very**  
22 **low certainty using modified grade?**

23 A. I'm not 100 percent familiar with modified grade  
24 as a methodology, so I can't speak to how that would

1 **Q. And I will direct your attention to page 13.**  
2 **This is a --- to identify the document for the record.**  
3 **This is an Evidence Reviewed Gonadotrophin Releasing**  
4 **Hormone Analogs for Children and Adolescents with Gender**  
5 **Dysphoria, from the National Health Service in 2021 ---**  
6 **or in 2020. On page 13, right at the beginning of the**  
7 **conclusions section the authors indicate that the**  
8 **results of studies that reported impact on the critical**  
9 **outcomes of gender dysphoria and mental health and the**  
10 **important outcomes of body image and psychosocial impact**  
11 **in children and adolescents with gender dysphoria are a**  
12 **very low certainty using modified grade. They suggest**  
13 **little change with GnRH analogs from baseline to**  
14 **follow-up. Do you see that?**

15 A. I do not.

16 **Q. First paragraph, under the conclusion.**

17 A. Yes, I see that.

18 **Q. Do you have any scientific basis for disputing**  
19 **this conclusion?**

20 ATTORNEY BLOCK: Objection. Let him read  
21 the document.

22 THE WITNESS: I mean, without having seen  
23 this before, I'm not sure what the scoping was for how  
24 they defined which studies to include, which ones were

1 apply to other studies.

2 **Q. And the next paragraph the authors indicate that**  
3 **studies found differences in outcome could represent**  
4 **changes that are either a questionable clinical value or**  
5 **the studies themselves are not reliable and changes**  
6 **could be due to confounding bias or chance. Do you**  
7 **agree that that is possible?**

8 ATTORNEY BLOCK: Objection to form.

9 THE WITNESS: Well, I agree that all  
10 things are possible, that scientific literature is not  
11 always 100 percent drawing any conclusions. But again,  
12 without knowing specifically how they included what they  
13 included or why they included what they included and why  
14 they opt to remove others, it's not possible for me to  
15 draw a specific conclusion from this.

16 BY ATTORNEY BARHAM:

17 **Q. In paragraph 34 of your report you distinguish**  
18 **Dr. Levine's approach to treating gender dysphoria as**  
19 **--- or you describe it as gender identity conversion**  
20 **model. Do you recall that?**

21 A. Yes.

22 **Q. In your view are there two approaches to**  
23 **treating gender dysphoria in children and adolescents,**  
24 **the gender-affirming model and the conversion therapy**

1 **model?**

2 ATTORNEY BLOCK: Objection to form.

3 THE WITNESS: I would not agree with that  
4 characterization.

5 BY ATTORNEY BARHAM:

6 **Q. How many other approaches do you see? How do**  
7 **you categorize the different approaches for treating**  
8 **gender dysphoria in children and adolescents?**

9 A. I don't agree with the premise, but there  
10 specific defined treatment paradigms that are used. I  
11 think there are --- there are elements of conversion  
12 therapy as I referred to in my report. There are  
13 elements of gender-affirming care and there is a  
14 spectrum in between that.

15 **Q. What are the elements --- what are the elements**  
16 **of identity --- gender identity conversion model in your**  
17 **mind?**

18 A. I think the primary element as I understand it  
19 in conversion therapy is a presupposition that a  
20 transgender outcome is an inherently negative outcome  
21 and that engagement or interventions should be put into  
22 place in order to make that outcome the least likely as  
23 possible.

24 **Q. And in your mind gender-affirming care is care**

1 **that affirms that child's gender identity.**

2 **Correct?**

3 ATTORNEY BLOCK: Objection to form.

4 THE WITNESS: As I described earlier,  
5 there are multiple components to how I would define  
6 gender-affirming therapy.

7 ATTORNEY BARHAM: Let's go to Exhibit 16,  
8 this will be Tab 97.

9 ---

10 (Whereupon, Exhibit-16, Article by  
11 Roberto D'Angelo, was marked for  
12 identification.)

13 ---

14 BY ATTORNEY BARHAM:

15 **Q. This is an article by Roberto D'Angelo published**  
16 **in 2020, entitled One Science Does Not Fit All. Are you**  
17 **familiar with these authors?**

18 A. Not personally, no.

19 **Q. Are you familiar with them by reputation?**

20 A. Looking at Dr. D'Angelo's footnotes, given that  
21 he works for the Society for Evidence Based Gender  
22 Medicine, then I might draw some conclusions from that.

23 **Q. And what conclusions would you draw from that?**

24 A. That there is a presupposition that transgender

1 identity is a negative outcome.

2 **Q. And why would you draw that conclusion from that**  
3 **association?**

4 A. Based upon the description of the care on the  
5 website. But that would be an assumption. I would  
6 never do that on any individual basis for any of these  
7 authors without knowing them.

8 **Q. Beyond the association, do you have any reason**  
9 **to doubt the scholarly integrity of the authors here?**

10 A. I think you can't really talk about scholarly  
11 integrity when it's a letter to the editor. It's not  
12 the same --- same level of evidence as another study  
13 would be.

14 **Q. It's a letter to the editor that cites 37**  
15 **different sources.**

16 **Is that correct? I'm looking at the last page.**

17 A. The sources aren't numbered, so I don't know how  
18 many sources it has, but ---.

19 ATTORNEY BLOCK: Let him look at it.

20 BY ATTORNEY BARHAM:

21 **Q. The references at the end are numbered. Excuse**  
22 **me. I apologize. I was looking at the wrong document.**

23 A. There are 37 footnotes. I would assume that you  
24 are correct on that.

1 **Q. We are talking about this letter to the editor**  
2 **--- let me clarify for the record because I was looking**  
3 **at the wrong document prior to questioning for which I**  
4 **apologize. This letter to the editor contains**  
5 **approximately two pages of typed materials listing the**  
6 **references that it uses.**

7 **Correct?**

8 A. Yes, correct.

9 **Q. Did you review this article when preparing your**  
10 **report?**

11 A. I did not.

12 **Q. Did you review this article before today?**

13 A. I have not.

14 **Q. The article reviews the document published by**  
15 **Turban, et al., in 2020, a study by Turban, et al, in**  
16 **2020.**

17 **Is that correct?**

18 A. It does.

19 ATTORNEY BLOCK: Objection to form.

20 BY ATTORNEY BARHAM:

21 **Q. If you look at the last page, that article is**  
22 **the same article that you cited in paragraph 34 of your**  
23 **report.**

24 **Is that correct?**

1 A. That's correct.

2 **Q. This D'Angelo, et al. criticized Turban on**  
3 **page one for his simplistic affirmation versus**  
4 **conversion binary --- or I should state permeates his**  
5 **narrative and establishes a foundation for their**  
6 **analysis and conclusions. Do you see that on the first**  
7 **page?**

8 A. What page?

9 **Q. The first page, second column, middle paragraph.**

10 A. I see that, yes.

11 **Q. These authors state the notion that all therapy**  
12 **interventions for gender dysphoria can be categorically**  
13 **classified into this simplistic binary betrays a**  
14 **misunderstanding of the complexity of psychotherapy.**  
15 **Would you agree with that statement?**

16 ATTORNEY BLOCK: Objection to form and  
17 asking him questions about an article he hasn't read.

18 THE WITNESS: The premise of that  
19 statement implies a cognition on behalf of the authors  
20 of that study that I don't think is necessarily  
21 accurate. I don't think that the authors of the Turban  
22 study would suggest that there is a simple binary of  
23 therapy interventions.

24 BY ATTORNEY BARHAM:

1 ends up being, whether that is a cisgender identity or  
2 transgender identity. The difference between that and a  
3 conversion therapy is again a presupposition that a  
4 transgender identity is an inherently worse outcome  
5 which is not focused on the overall mental health and  
6 wellbeing of the child.

7 BY ATTORNEY BARHAM:

8 **Q. I understand the distinction that you're making.**  
9 **I'm trying to understand are there --- as we assess**  
10 **different people's approaches to this area, can we**  
11 **characterize them by the goals of their approach into a**  
12 **gender-affirming model and a conversion therapy model**  
13 **and those are basically two different camps.**

14 **Is that correct?**

15 ATTORNEY BLOCK: Objection to form.

16 THE WITNESS: We cannot.

17 BY ATTORNEY BARHAM:

18 **Q. And in saying that I'm not trying to say that**  
19 **therapeutic techniques belong in one or the other. I'm**  
20 **just trying to say can we categorize treatment**  
21 **approaches by the goals?**

22 ATTORNEY BLOCK: Objection to form.

23 BY ATTORNEY BARHAM:

24 **Q. Because that seems to be what you are doing in**

1 **Q. And you would also say there's not a simplistic**  
2 **binary.**

3 **Is that correct?**

4 A. That is correct.

5 **Q. So in paragraph 34 of your report you're not**  
6 **trying to draw a --- you're not trying to draw some sort**  
7 **of dichotomy between Dr. Levine's approach and yours?**

8 ATTORNEY BLOCK: Objection to form.

9 THE WITNESS: It is less helpful for me  
10 to describe it as identifying a dichotomy but really  
11 more focused on the goals of treatment approach. And if  
12 the goal of the treatment approach is a conversion type  
13 goal, then I think there is a draw between that and the  
14 standard of care of the affirmative model.

15 BY ATTORNEY BARHAM:

16 **Q. So that in your view are there two different**  
17 **treatment goals when treating gender dysphoria? We can**  
18 **categorize treatment approaches by the goals, conversion**  
19 **therapy versus the gender-affirming model that you have**  
20 **outlined?**

21 ATTORNEY BLOCK: Objection to form.

22 THE WITNESS: The way I would describe  
23 the goal of the gender-affirming model is to have a  
24 healthy, resilient child whatever the gender identity

1 **paragraph 34 of your report.**

2 A. There's a process versus an outcome question  
3 that I'm just not understanding the distinction between  
4 for as I'm defining conversion therapy here, it is a  
5 specific goal that a transgender outcome is a negative  
6 outcome. For gender-affirming therapy or interventions  
7 there is no presupposed outcome that is better than  
8 another other than building the mental health and  
9 well-being of the child.

10 **Q. Okay.**

11 A. And there is many different ways of approaching  
12 that question and intervening that are going to be  
13 outside of the scope of a goal-based approach.

14 **Q. It still sounds and again I'm just trying to**  
15 **explore and understand what you're saying here. It**  
16 **still sounds like there is one approach that has a goal**  
17 **in your view of having the child return to comfort with**  
18 **the child's natal sex and then there is another approach**  
19 **that has a goal that says I don't care where you end up.**  
20 **Is that fair to say?**

21 ATTORNEY BLOCK: Objection to form.

22 THE WITNESS: Again, I think it really  
23 narrows down what's a highly complex question, so it's  
24 really hard to give an answer to that. But if we define

conversion as approach one and everything else outside of that, I can work with that if that is helpful for having further discussion or asking more questions.  
BY ATTORNEY BARHAM:

**Q. Is that the way you would describe this situation in the field at present?**

A. It is not the way I would describe the situation in the field.

**Q. On page five of this article ---.**

ATTORNEY BLOCK: I'm sorry, which article?

ATTORNEY BARHAM: On Tab 97 of Exhibit 16. Dr. D'Angelo's article.

BY ATTORNEY BARHAM:

**Q. It sounds to me like you are rejecting what these authors describe as a conflation of ethical non-affirming psychotherapy and conversion therapy, next to the last paragraph on the page.**

ATTORNEY BLOCK: Objection. Please give him time to read the page.

THE WITNESS: I've never seen of or heard a definition for ethical non-affirmative psychotherapy, so I don't know what that means.

BY ATTORNEY BARHAM:

A. I can't speak to what the authors' motivations are for writing this. I do not know.

**Q. Based on your knowledge of the field, do you believe that that's a reasonable concern?**

A. I do not.

**Q. Why not?**

A. Because understanding the overlap and the interaction between gender identity and sexuality and sexual orientation is a part of the assessment process in affirming care.

**Q. At the bottom of page one the authors write, if anything other than affirmation is viewed as GICE ---.**

A. What page is that?

**Q. On page six, I'm sorry. Same page you were on with the gay affirmative therapy or gay conversion therapy. The last paragraph in column one of page six. If anything other than affirmation is viewed as GICE, it follows that the provision of psychotherapy in these clinical scenarios can be seen as harmful conversion efforts. If these therapeutic efforts do not aim to convert or consolidate an identity but instead aim to help individuals gain a deeper understanding of their discomfort with themselves, the factors that have contributed to their distress and their motivations for**

**Q. Is it your position that there is no such thing?**

A. I have never heard of such a thing.

**Q. On page six, in the first column, the authors write, in fact, some homophobic societies and indeed families that reject homosexuality among their children have embraced the affirmative biomedical pathway, which poses questions as to whether, quote, affirmative care in some cases in some instances serve the role of gay conversion therapy. Do you believe that that's a legitimate concern?**

A. I do not.

**Q. Why not?**

A. As I mentioned before, affirmative care is not presupposed any one specific outcome.

**Q. Do you think that someone can have a concern that affirmative care could serve the role regardless of its dole, serve the role of gay conversion therapy?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Well, the authors appear to have that concern. It is not a concern that has been borne out by the literature in my clinical experience.

BY ATTORNEY BARHAM:

**Q. Do you believe that the authors are reasonable in having that concern?**

**seeking transition. Is it your position that there are no therapeutic interventions that do not aim to convert or consolidate an identity?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: What I would say is that helping individuals gain a deeper understanding of their discomfort with themselves, the factors contributing to their distress and their motivations for seeking transition is a vital and inherent part of gender-affirming care.

BY ATTORNEY BARHAM:

**Q. But a moment ago you indicated that you were not aware of any ethical non-affirmative psychotherapy?**

A. That is not a phrase that I have heard or have heard described. What the passage that you are referring to describes is a very typical process involved in any kind of standard of care around anything really is understanding motivations and understanding distress. There is nothing --- there is nothing novel about that description of care that is not already under the umbrella of affirming care.

**Q. And a little bit later in that paragraph, I believe at the top of column two of page six, the authors right both conversion and affirmative therapy**

1 efforts carry the risk of undue influence potentially  
2 compromising patient autonomy. Do you agree that that  
3 is a possibility?

4 A. Again, I'm not sure what the authors are  
5 referring to when they say affirmation therapy efforts  
6 because what they're describing as ethical,  
7 non-affirmative interventions falls to me under the  
8 clear rubric of affirming care, so I don't know what  
9 they mean by this.

10 Q. Okay.

11 In paragraph 35 of your report you indicate ---  
12 you stated research indicates that social transitioning  
13 significantly improves the mental health of transgender  
14 young people.

15 Is that correct?

16 A. Yes.

17 ATTORNEY BARHAM: And I'm going to show  
18 you what we will mark as Exhibit 17. This is Tab 118  
19 for those following from a distance. This is a study by  
20 Gibson, et al. published in 2021.

21 ---

22 (Whereupon, Exhibit 17, Study by Gibson,  
23 et al., was marked for identification.)

24 ---

1 BY ATTORNEY BARHAM:

2 Q. Tab 117. This is the article by Lily Durwood,  
3 et al. published in 2017. You cited this article also  
4 in footnote nine of your report.

5 Is that correct?

6 A. That is correct.

7 Q. And we have previously discussed how this  
8 article reports what children and parents said about the  
9 children's mental health.

10 Is that correct?

11 A. That is correct.

12 Q. Really a self report.  
13 Correct?

14 A. I think we went through that earlier. It was  
15 not just a self report. These were interview led  
16 evaluations.

17 Q. But an interview led self report.  
18 Correct?

19 A. There were also parent reports that were ---.

20 Q. And so self reports of children, parental  
21 reports about their children.

22 Correct?

23 A. Correct.

24 Q. Okay.

1 BY ATTORNEY BARHAM:

2 Q. You've cited this article in footnote nine of  
3 your report.

4 Is that correct?

5 A. Let me just double check. I believe so. Yes.

6 Q. Under methods on page one of Exhibit-17 it  
7 indicates this a cross-sectional study.

8 Is that correct?

9 A. That is correct.

10 Q. Can cross-sectional studies be used to  
11 demonstrate causation?

12 A. Not on their own, no.

13 Q. So this study does not show that social  
14 transitions caused any improvement in mental health.

15 Correct?

16 A. This study demonstrated that there was a  
17 correlation between improved mental health and social  
18 transition.

19 Q. So it did not show causation.

20 Is that correct?

21 A. It did not show causation.

22 Q. I'm going to show you Exhibit 9. Let's go back  
23 to Exhibit 9.

24 LAW CLERK WILKINSON: Tab 117.

1 And then in footnote nine you also cite a study  
2 by Olson, et al. in 2016, footnote nine of your report.

3 Correct?

4 A. That is correct.

5 Q. And in footnote nine you indicate that alleged  
6 statistical errors in that article have already been  
7 corrected in 2018.

8 Correct?

9 A. Correct.

10 Q. And for that assertion you cite a study by  
11 Olson, et al. in 2018.

12 Is that correct?

13 A. I don't see that.

14 ATTORNEY BLOCK: Objection. Where are  
15 you at?

16 THE WITNESS: I don't see it. If you can  
17 point to me where that is.

18 BY ATTORNEY BARHAM:

19 Q. Footnote nine, on page 11, small statistical  
20 errors in Olson 2016 had already been corrected in 2018,  
21 see Olson, et al., 2018, mental health of transgender  
22 student who are supported in their identity throughout.

23 A. Yes.

24 Q. Is that correct?

1 A. Yes.

2 ATTORNEY BARHAM: I'm going to show you  
3 what we are going to mark as Exhibit 18. This will be  
4 tab 119.

5 ---

6 (Whereupon, Exhibit-18, Errata Sheet, was  
7 marked for identification.)

8 ---

9 BY ATTORNEY BARHAM:

10 **Q. This is the errata sheet that you cited in**  
11 **footnote nine of your report.**

12 **Is that correct?**

13 A. That is correct.

14 **Q. The only change in this 2018 article is the**  
15 **highlight and missing common from the 2016 article.**

16 **Is that correct?**

17 ATTORNEY BLOCK: Objection to form.

18 THE WITNESS: Yes.

19 BY ATTORNEY BARHAM:

20 **Q. In paragraph 40 of your report you say that**  
21 **studies have repeatedly documented puberty blocking**  
22 **medication and gender-affirming hormone therapy are**  
23 **associated with mental health benefits in both the short**  
24 **and long term.**

1 Tordoff, et al., was marked for  
2 identification.)

3 ---

4 BY ATTORNEY BARHAM:

5 **Q. This is an article by Tordoff, et al, published**  
6 **in 2022, entitled Mental Health Outcomes in Transgender**  
7 **and Non-Binary Youth Receiving Gender-Affirming Care.**  
8 **This is one of the studies that you cited in footnote 14**  
9 **of your report?**

10 A. That is correct.

11 **Q. According to table one on page five of this**  
12 **report 65 percent of the participants were also**  
13 **receiving mental health therapy.**

14 **Is that correct?**

15 A. That is correct.

16 **Q. So it's not possible to determine how much of**  
17 **the improvement was due to puberty blocking medication**  
18 **and gender-affirming hormone therapy and how much was**  
19 **due to the mental health therapy.**

20 **Correct?**

21 ATTORNEY BLOCK: Objection to form.

22 THE WITNESS: There is a lot of questions  
23 in that one singular question about study design and  
24 what we know about the history of transgender health

1 **Is that correct?**

2 A. That is correct.

3 **Q. And the studies that you're citing for that**  
4 **assertion are those listed in footnote 14 of your**  
5 **report.**

6 **Correct?**

7 A. That is correct.

8 **Q. Are there any others that you are referencing?**

9 A. Those are the only that I'm referencing.

10 **Q. In paragraph 41 of your report you claim that**  
11 **Dr. Cantor fails to discuss many of the studies**  
12 **documenting the benefits of puberty blocking medication.**  
13 **Which of the studies in footnote 14 did he fail to**  
14 **discuss?**

15 A. I would need to review Dr. Cantor's report to  
16 know specifically.

17 **Q. Do you recall now which ones he failed to**  
18 **discuss?**

19 A. I do not.

20 ATTORNEY BARHAM: All right. I'm going  
21 to show you what we will mark as Exhibit-19, and this is  
22 Tab 98.

23 ---

24 (Whereupon, Exhibit-19, Article by

1 outcomes prior to the existence of gender-affirming  
2 care. As this study is designed, it is not designed in  
3 such a way to be able to specifically keep that apart.

4 ATTORNEY BARHAM: All right.

5 I'm going to show you what we will mark  
6 as Exhibit-20, and this will be Tab 99.

7 ---

8 (Whereupon, Exhibit-20, Article by Amy  
9 Green, et al., was marked for  
10 identification.)

11 ---

12 BY ATTORNEY BARHAM:

13 **Q. This is the second article. This is an article**  
14 **by Amy Green entitled --- it says et al. entitled**  
15 **Association of Gender Affirming Hormone Therapy with**  
16 **Depression, Thoughts of Suicide and Attempted Suicide**  
17 **Among Transgender and Nonbinary Youth published in 2021.**  
18 **This is the second article that you cited in footnote 14**  
19 **of your report.**

20 **Is that correct?**

21 A. That is correct.

22 **Q. On page six of this report, column two, the**  
23 **authors indicate that causation cannot be inferred due**  
24 **to this study's cross-sectional design.**

**Correct?**

A. That is correct.

**Q. This study also does not prove that puberty blocking medication and gender-affirming hormone therapy caused any improvements.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: This study was not designed to show a causal outcome, no.

ATTORNEY BARHAM: Let's go to Exhibit 21, this will be Tab 100.

---

(Whereupon, Exhibit-21, Article by Turban, et al., was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q. This is an article by Turban, et al. published in 2020 entitled Pubertal Risks for Transgender Youth and Risks of Suicide Ideation --- Suicidal Ideation?**

ATTORNEY BLOCK: Objection to misreading the name of the study.

BY ATTORNEY BARHAM:

**Q. This is the third article that you cited in**

identification.)

---

BY ATTORNEY BARHAM:

**Q. You also cited this article in footnote 14 of your report.**

**Is that correct?**

A. Yes, I did.

**Q. And on page two of this report, the bottom of the first column, the authors write that most subjects --- quote, most subjects were followed by mental health professionals, closed quote, and quote, those that were not were encouraged to see a mental health professional.**

**Correct?**

A. That is correct.

**Q. And on page three, the first column, the authors say that after statistically adjusting for psychiatric medication and engagement in counseling, quote, most predictors did not reach statistical significance.**

**Is that correct?**

A. Where are you?

**Q. Page three, column one, under regression analysis.**

A. Correct.

**footnote 13 of your report.**

**Is that correct?**

A. That is correct.

**Q. And on page seven of this article the authors also indicate that limitations include the cross-sectional --- the study's cross-sectional design, which does not allow for determination of causation.**

**Is that correct?**

A. That is correct.

**Q. So this study does not prove that puberty blocking medication and gender affirming hormone therapy caused any improvements.**

**Correct?**

A. This study was not designed to demonstrate causation.

ATTORNEY BARHAM: I'm going to show you what we will mark as Exhibit-22. This is an article by Achille, et al. entitled Longitudinal Impact of Gender Affirming Endocrine Intervention on Mental Health and Well-being of Transgender Youths, Preliminary Results published in 2020.

---

(Whereupon, Exhibit-22, Article by Achille, et al., was marked for

ATTORNEY BARHAM: I'm going to show you what we will mark as Exhibit-23, this is Tab 102.

---

(Whereupon, Exhibit-23, Article by Kuper, et al., was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q. This is an article by Kuper, et al. published in 2020, entitled Body Dissatisfaction and Mental Health Outcomes of Youth on Gender Affirming Hormone Therapy. On page six --- let me rephrase that for the record. You cited this article in footnote 14 of your report.**

**Is that correct?**

A. That is correct.

**Q. According to Table 2 on page six none of the results for those receiving puberty suppression were statistically significant.**

**Correct?**

A. I need a few minutes.

**Q. Take your time.**

A. As I read the bottom of that table, there are a number of analyses that reached statistical significance.

**Q. But if you look at the lines for each one under**

each of the scores, body dissatisfaction, depressive symptoms, depressive symptoms QIDS, anxiety symptoms, panic symptoms, generalized anxiety symptoms, social anxiety symptoms, separation anxiety symptoms, school avoidance symptoms, the lines marked puberty suppression have no superscript on them.

Is that correct?

ATTORNEY BLOCK: Objection to form.

THE WITNESS: That is correct.

BY ATTORNEY BARHAM:

**Q.** So none of those --- none of the specific findings regarding individuals on puberty suppression only were statistically significant.

Is that correct?

A. None of them were statistically significant as measured by their reports.

ATTORNEY BARHAM: I'm going to show you what we will mark as Exhibit-24. This will be Tab 103.

---

(Whereupon, Exhibit-24, Article by van der Miesen, et al., marked for identification.)

---

BY ATTORNEY BARHAM:

participants in the groups before and after puberty suppression may potentially limit the results?

A. Yes, I see that.

**Q.** The present study can therefore not provide evidence about the direct benefits of puberty suppression over time and the long-term mental health outcomes.

Is that correct?

A. That is correct.

**Q.** So the authors of this study indicate that conclusions about the long-term benefits of puberty suppression should thus be made with extreme caution, meaning prospective long-term follow-up studies with repeated measured design of individuals being followed over time to confirm.

Is that correct?

A. That is correct.

ATTORNEY BARHAM: I'm going to show you what we will mark as Exhibit-25. This will be Tab 104.

---

(Whereupon, Exhibit-25, Article by de Vries, was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q.** This is an article by van der Miesen, et al., published in 2020 entitled Psychological Functioning in Transgender Adolescents Before and After Gender Affirmative Care Compared with Cisgender General Population of Peers. You cited this article in footnote 14 of your report.

Is that correct?

A. That is correct.

**Q.** The authors on page five, in column two, the authors of this study ---.

A. What page?

**Q.** Page five.

A. I have that in the 700s.

**Q.** Oh 703, sorry. 703. The fifth page, but it's paginated 703. The authors of this study indicate that, quote, due to its cross-sectional design, the present study cannot provide evidence about the direct benefits of puberty suppression over time and long-term mental health outcomes?

Correct?

A. I don't see where that is.

**Q.** Next to the last paragraph in the second column. The third and most important --- skipping the cross-sectional design of this study different

**Q.** This is an article by van der Miesen --- or I mean De Vries, et al --- excuse me, De Vries, et al., 2014, Young Adult Psychosocial Outcome After Puberty Suppression and Gender Reassignment. This is the last article you cite in footnote 14 of your report.

Is that correct?

A. That is correct.

**Q.** At the Dutch clinic patients who receive puberty blockers also receive psychotherapy.

Is that correct?

A. That is correct.

**Q.** So again, there is no way to determine how much of the improvement reflected in this study is due to the puberty blockers and how much is due to the psychotherapy.

Correct?

ATTORNEY BLOCK: Objection to the form.

THE WITNESS: Let me restate my response to the previous question. The Dutch clinic always recommends participation in therapy. I'm not a 100 percent certain that every participant participated in the therapy as directed.

BY ATTORNEY BARHAM:

**Q.** For the most part, the Dutch model combined

1 **psychotherapy with puberty blockers.**

2 **Correct?**

3 ATTORNEY BLOCK: Objection.

4 THE WITNESS: That is correct. And may I  
5 state that I think that is part of the reason that the  
6 van der Miesen study is quite important because it does  
7 start to look at the impact of being on the wait list  
8 and the impacts of just getting psychotherapy alone  
9 versus access to puberty suppression and/or hormones.

10 ATTORNEY BARHAM: I'm going to show you  
11 what we're going to mark as Exhibit-26. Tab 105.

12 ---

13 (Whereupon, Exhibit-26, Article, was  
14 marked for identification.)

15 ---

16 BY ATTORNEY BARHAM:

17 **Q. This is an article by Michael Biggs published in**  
18 **2020, Gender Dysphoria and Psychological Functioning in**  
19 **Adolescents Treated with GnRHa. Are you familiar with**  
20 **this study?**

21 ATTORNEY BLOCK: Objection,  
22 mischaracterizes the document.

23 BY ATTORNEY BARHAM:

24 **Q. Are you familiar with this letter to the editor?**

1 **us in other drawbacks that undermine its reliability.**

2 **Correct?**

3 ATTORNEY BLOCK: Objection to form.

4 THE WITNESS: It depends upon the type of  
5 data that is being calculated.

6 BY ATTORNEY BARHAM:

7 **Q. Why do you mean by that?**

8 A. If it is qualitative interview data, yes, there  
9 is retrospective data that reviews contemporary  
10 documentation and charts, lab results, imaging results,  
11 et cetera. That is less confounded by that kind of  
12 bias.

13 **Q. When we are talking about people recalling their**  
14 **experiences before hormone therapy was available that**  
15 **would be the qualitative type of data.**

16 **Correct?**

17 A. Correct. And when analyzing that data you have  
18 to take that into account.

19 **Q. So that still doesn't help me understand why you**  
20 **disagree with that statement because the Dutch model**  
21 **combines hormones with psychosocial --- psychological**  
22 **support, the two effects are inevitably conflated?**

23 A. We have a long history of people receiving  
24 psychological support alone. And with the addition of

1 A. I have not read this letter to the editor.

2 **Q. If you look at bottom of page one continuing**  
3 **onto page two, the author writes an additional**  
4 **complication with this treatment is that the Dutch model**  
5 **combines GnRHa with psychological support so the two**  
6 **effects are inevitably conflated. Do agree with that**  
7 **statement?**

8 A. I do not.

9 **Q. Why?**

10 A. Use of GnRH logs for this kind of intervention  
11 were first used in 1999. So every --- every transgender  
12 person prior to 1999 had no access to this kind of  
13 treatment. Between 1999 and probably about 2014 these  
14 medications were not widely available and so unavailable  
15 for use for most people. So we have the clinical  
16 experience of adults, talking retrospectively, about  
17 their experiences as well as the patients that we have  
18 treated that did versus did not have access to these  
19 interventions. So we have both clinical experience and  
20 some retrospective data that looks at this question  
21 specifically.

22 **Q. Can retrospective data demonstrate causation?**

23 A. In some cases it can.

24 **Q. But retrospective data is subject to recall by**

1 these interventions and this model of care, outcomes  
2 improve with specific measures around gender dysphoria.

3 **Q. Over that time the psychological support would**  
4 **have evolved as more understanding was gained.**

5 **Correct?**

6 A. One would hope, yes.

7 ATTORNEY BLOCK: Objection to form.

8 BY ATTORNEY BARNHAM:

9 **Q. But for the individuals who receive treatment**  
10 **under the Dutch model, receiving both the hormones and**  
11 **the psychological support, it's impossible to determine**  
12 **how much improvement was due to the psychological**  
13 **support and how much was due to the hormones.**

14 **Correct?**

15 ATTORNEY BLOCK: Objection to form.

16 THE WITNESS: There has not been a study  
17 that has sought to identify the specific percentage of  
18 impact of those two.

19 ATTORNEY BARHAM: All right.

20 I'm going to show you what we will mark  
21 as Exhibit 27.

22 ---

23 (Whereupon, Exhibit 27, Article, was  
24 marked for identification.)

1 ---  
2 BY ATTORNEY BARHAM:  
3 **Q. Tab 106. This is an article by Costa, et al.**  
4 **In 2015 Psychological Support, Puberty Expression and**  
5 **Psychosocial Functioning in Adolescents with Gender**  
6 **Dysphoria.**

7 **Is that correct?**

8 A. That is correct.

9 **Q. You cite this article in footnote 14 of your**  
10 **report.**

11 **Is that correct?**

12 A. That's correct.

13 **Q. Now, in this study there were two groups of**  
14 **adolescents, those who receive both puberty --- I mean,**  
15 **both therapy and puberty blockers at the outset and**  
16 **those who received just therapy at the outset.**

17 **Correct?**

18 A. I'll need a minute to refresh myself.

19 **Q. Sure. And I'm referencing pages 228, the second**  
20 **column over to 229, the top of the first column.**

21 A. That's correct.

22 **Q. And on page 2211 going over to 2212, the**  
23 **author's note that the difference between the**  
24 **immediately eligible group and the delayed eligible**

1 **group failed to reach significance.**

2 **Correct?**

3 A. So as I read this, immediately eligible group  
4 who had a higher in psychosocial functioning did not  
5 show any significant improvement after 12 months, but  
6 after 12 months there was a statistical difference.

7 **Q. Then it says finally, even if the end or**  
8 **follow-up study, plan three, immediately eligible group**  
9 **had a five point higher CGAS score than the delayed**  
10 **eligible group, this difference failed to reach**  
11 **significance.**

12 **Correct?**

13 A. That's correct. What I have to point out there,  
14 is CGAS is the children's global assessment scale, and  
15 not a measure of gender dysphoria or quality of life or  
16 distress in body.

17 **Q. Is it a measure of a child's mental health?**

18 ATTORNEY BLOCK: Objection.

19 THE WITNESS: It is a rough and very  
20 precise measure of general functioning.

21 BY ATTORNEY BARHAM:

22 **Q. But it is the scale that this study was using.**

23 **Correct?**

24 A. That is correct.

1 ATTORNEY BARHAM: Let's go to tab 28.

2 ---

3 (Whereupon, Exhibit 28, Article by  
4 Edwards-Leeper, was marked for  
5 identification.)

6 ---

7 THE WITNESS:

8 And to clarify the CGAS is something that  
9 is clinician rated of remedy objective criteria.

10 BY ATTORNEY BARHAM:

11 **Q. Do you want to take a break?**

12 A. In a few minutes if that's okay.

13 **Q. Are you aware of Dr. Edwards-Leeper's reputation**  
14 **in the field?**

15 A. I am.

16 **Q. Are you personally acquainted with Dr.**  
17 **Edwards-Leeper?**

18 A. I am.

19 **Q. Have the two of you worked together in the**  
20 **American Psychiatric Academics Association?**

21 A. We have not worked together through the American  
22 Psychiatric Association. Dr. Edwards-Leeper is a  
23 psychologist.

24 **Q. She served as a member of the task force to**

1 **develop practice guidelines for working with transgender**  
2 **individuals? Have you served in a similar capacity with**  
3 **the American Psychiatric Association?**

4 A. I have. And we both worked together on the  
5 WPATH standards of care provision.

6 **Q. You anticipated my next question. So you would**  
7 **agree that Dr. Edwards-Leeper is considered an**  
8 **international expert in this area.**

9 **Correct?**

10 A. Yes. Dr. Edwards-Leeper is a complicated figure  
11 right now, but yes, she has a lot of expertise.

12 ATTORNEY BARHAM: I want to show you what  
13 we will mark as Exhibit 29. This is Tab 29.

14 --

15 (Whereupon, Exhibit 29, Article by  
16 Edwards-Leeper, was marked for  
17 identification.)

18 ---

19 ATTORNEY BLOCK: I imagine you have a lot  
20 of questions about this next document, and I just want  
21 to make sure the witness has a chance to have a bathroom  
22 break if it's going to go on for ten minutes or more.

23 ATTORNEY BARHAM: I have no objection to  
24 that.

1 THE WITNESS: Five minutes.  
 2 ATTORNEY BARHAM: We will take five  
 3 minutes.  
 4 VIDEOGRAPHER: Going off the record. The  
 5 time is 12:12 p.m.  
 6 OFF VIDEO  
 7 ---  
 8 (WHEREUPON, A SHORT BREAK WAS TAKEN.)  
 9 ---  
 10 ON VIDEO

11 VIDEOGRAPHER: We are back on the record  
 12 the current time reads 12:21 p.m.  
 13 BY ATTORNEY BARHAM:

14 **Q. A moment ago we were discussing Dr.**  
 15 **Edwards-Leeper and you commented that she is a**  
 16 **complicated individual.**

17 **What did you mean by that?**

18 A. What I mean is that she has published some  
 19 things in popular press that have led me to be talking  
 20 about her here.

21 **Q. And would one of those be the document before**  
 22 **you Exhibit 29?**

23 A. That is correct.

24 **Q. This is an article published in the Washington**

1 **Q. Dr. Anderson is a member of the American**  
 2 **Psychological Association Committee tasked with writing**  
 3 **guidelines and working with transgender individuals.**

4 **Is that correct?**

5 A. I do not know.

6 **Q. Dr. Anderson is a former president of the U.S.**  
 7 **Professional Association for Transgender Health.**

8 **Is that correct?**

9 A. That is correct.

10 **Q. Dr. Anderson is a former board member for the**  
 11 **World Professional Association for Transgender Health.**

12 **Correct?**

13 A. I'm not sure.

14 **Q. Beyond the committee assignments listed on**  
 15 **page two of your CV have you held any committee**  
 16 **assignments for the USPATH or WPATH Organizations?**

17 A. Not additional committee assignments than WPATH  
 18 or USPATH, no.

19 **Q. In this copy published in the Washington Post**  
 20 **Dr. Edwards-Leeper and Dr. Anderson summarizes a**  
 21 **situation of a 13-year old natal girl with no prior**  
 22 **history of gender dysphoria. Some issues of sexual**  
 23 **assault and depression and then an abrupt announcement**  
 24 **of this child of transgender identity.**

1 **Post by Dr. Edwards-Leeper and Dr. Anderson.**

2 **Is that correct?**

3 A. That is correct.

4 **Q. What is it --- are there any other publications**  
 5 **that Dr. Edwards-Leeper has written recently that caused**  
 6 **you to describe her as a complicated figure?**

7 A. No, no.

8 **Q. So just this one article.**

9 **Is that correct?**

10 A. Yes.

11 **Q. Are you familiar with Dr. Anderson?**

12 A. I am.

13 **Q. She is a clinical psychiatrist?**

14 A. She is a psychologist.

15 **Q. A psychologist. And Dr. Anderson has been**  
 16 **working with transgender youth for a long time.**

17 **Is that correct?**

18 A. I'm not a hundred percent familiar with Dr.  
 19 Anderson's history, I don't know.

20 **Q. Was she in the field before you?**

21 A. I don't know.

22 **Q. Dr. Anderson is also a transgender.**

23 **Is that correct?**

24 A. That is correct.

1 **Does that summarize the scenario they outline?**

2 A. That is the scenario they outlined.

3 ATTORNEY BLOCK: Objection to form.  
 4 BY ATTORNEY BARNHAM:

5 **Q. What percent of your patients first present as a**  
 6 **team without a prior gender dysphoria diagnosis?**

7 A. Well, first I just want to address the scenario  
 8 with Patricia, this is a popular press article, so I  
 9 have no idea if Patricia is a real person or an amalgam.

10 **Q. Understood.**

11 A. I hope it's an amalgam, because it would be  
 12 unethical to not have consent to publish this story.  
 13 Whether or not a child has a diagnosis of gender  
 14 dysphoria before they come to see me is dependent upon  
 15 if they've had previous evaluations, so it's dependent.  
 16 I don't have a specific number for you.

17 **Q. In general, how many of your patients first**  
 18 **present as a team versus first presenting as a child?**

19 A. That is very different, depending upon which  
 20 cite that I was practicing at. So in New York I saw  
 21 more prepubertal youth than I do in Chicago.

22 **Q. So in New York, what percent of your patients**  
 23 **first presented as adolescents versus children?**

24 A. I think I answered that question earlier. If I

remember it was 25 percent of the 75 percent.

**Q. And in Chicago how many --- what percentage of your patients present as adolescents versus as teen?**

A. Probably 90 percent during adolescence.

**Q. And are those all adolescents who first presented as adolescents or did they first present with gender dysphoria as a child?**

A. It's a combination of both.

**Q. So of your adolescent patients how many presented first as an adolescent, and how many presented as a child?**

A. I don't have that information in front of me.

**Q. Do you have a general ballpark idea?**

A. No, I mean, the question --- I guess what I'm struggling with is that there are a lot of adolescents who I see who presented the first as adolescent, but have clear symptoms of gender dysphoria going back to childhood. So I'm not sure how to characterize those children in your question.

**Q. What percent of the patients that present themselves to you first as an adolescent are natal female?**

ATTORNEY BLOCK: Objection to terminology.

THE WITNESS: I would say in the clinic where I'm practicing, currently certainly over half of the children presenting in adolescence for the first time are assigned female at birth.

BY ATTORNEY BARHAM:

**Q. And in New York, what percent of the patients that presented to you first as an adolescent or natal female?**

A. In New York it was more even split between those assigned female and those assigned male at birth.

**Q. And here when you say it's more than 50 percent are we talking 75 percent, we're talking 80 percent, 90 percent?**

A. I don't have that information in front of me, so I couldn't tell you specifically. It would be a guess.

**Q. Do you have a range?**

A. I don't. I don't. More than 50 is the closest that I can get right now.

**Q. More than 75 percent?**

A. Probably not, no.

**Q. So somewhere between 50 and 75?**

A. That's a good guess.

**Q. What proportion of teen girls presenting at your clinic have suffered sexual assault or abuse of any**

**sort?**

A. So if we're talking assigned females at birth, is that what you mean?

**Q. Yes. Natal females.**

A. Between one out four and one out of eight assigned females at birth who do not identify as transgender have exposure to sexual assault and trauma of some kind. What we know from the literature is that rates of sexual assault and sexual abuse of transgender youth is higher than that and my patients are relatively similar to that, so probably in the order of 25 to 30 percent.

**Q. What policies do you have in place to ensure adequate counseling and therapy for that trauma before making any decisions regarding hormones?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Assessing co-occurring psychiatric disorders or stressors or traumas is an inherent part of any assessment.

BY ATTORNEY BARHAM:

**Q. Beyond just it being an inherent part of any assessment, do you have any other policies or standards that you use to ensure that the trauma is addressed before making decisions regarding hormones?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I mean, I don't have a written down policy. Incorporating understanding of trauma is always going to be an important part of any informed assessment prior to moving forward with an intervention.

BY ATTORNEY BARHAM:

**Q. Do you agree or disagree that before prescribing hormones to a teen girl who has suffered sexual abuse or depression, medical professionals have a responsibility to confirm that the patient has received a thorough mental health assessment, including investigating how other mental health issues and any other changes in her life might be contributing to her desire are perceived transgender identification?**

ATTORNEY BLOCK: Objection to form and terminology.

THE WITNESS: So for any child regardless of gender, who we are recommending a medical or surgical intervention, we are assessing for the presence of gender dysphoria, the presence of co-occurring psychiatric disorders and their impact on that diagnosis or the capacity to consent to treatment, and a clear understanding of the risks, benefits and alternatives of

1 whatever that intervention may be.

2 BY ATTORNEY BARHAM:

3 **Q. So then --- and that would include investigating**  
4 **how other mental health issues and other changes in her**  
5 **life might be contributing to her desire or perceived**  
6 **transgender identification?**

7 A. That is correct.

8 ATTORNEY BLOCK: Objection to terminology  
9 and pronouns.

10 BY ATTORNEY BARHAM:

11 **Q. Do you agree or disagree that the standards of**  
12 **care recommend mental support and comprehensive**  
13 **assessment for all dysphoric youth before starting**  
14 **medical interventions?**

15 A. I would agree that the current recommendations,  
16 which are in the process of being updated recommend that  
17 a mental health assessment be in place. And it's not a  
18 mandate that psychotherapy is a requirement prior to  
19 initiation of medical care for gender dysphoria, and it  
20 is not indicated for every patient.

21 **Q. And that's partly because the standards of care**  
22 **are guidelines not mandates.**

23 **Correct?**

24 A. It's mostly because of the indications for the

1 patient's best interest that psychotherapy is not a  
2 requirement for folks who are otherwise doing well.

3 **Q. But it's also true that the standards of care**  
4 **are guidelines not mandates.**

5 **Correct?**

6 A. That is correct. They are guidelines.

7 **Q. On page two of this article the author is ---**  
8 **and by this article I'm referring to tab 29. The author**  
9 **has indicated that a study of ten pediatric gender**  
10 **clinics in Canada found that half do not require**  
11 **psychological assessment before initiating puberty**  
12 **blockers or hormones.**

13 **Is that your policy?**

14 A. Where is this in the article? I don't see it.

15 **Q. The bottom of page two?**

16 A. What I want to emphasize is this is an opt ed  
17 and a popular press outlet and not a study. So I have  
18 no idea where they gathered their information about this  
19 or the accuracy of the statement, nor do I know what the  
20 authors meant by a psychological assessment.

21 **Q. I understand. I did not mean to imply that**  
22 **this article Exhibit --- tab 29 is a study. I was**  
23 **merely quoting the authors, that a study of ten**  
24 **pediatric gender clinics found that half do not require**

1 **psychological assessment before initiating puberty**  
2 **blockers or hormones. My question to you is, is that**  
3 **your policy?**

4 ATTORNEY BLOCK: Objection to form.

5 THE WITNESS: Again, I can't speak to the  
6 accuracy of Dr. Edwards-Leeper and Dr. Anderson's  
7 description of a study that I haven't seen.

8 BY ATTORNEY BARHAM:

9 **Q. I'm not asking you to. I'm asking do you have**  
10 **--- is it your policy at your clinic that you do not**  
11 **require psychological assessments before initiating**  
12 **puberty blockers for hormones?**

13 A. We require psychological assessments prior to  
14 initiation, yes.

15 ATTORNEY TRYON: Travis, it's Dave Tryon.  
16 You referred to this as Tab 29, I believe you mean  
17 Exhibit 29. Is that right?

18 ATTORNEY BARHAM: It's both Exhibit 29  
19 and Tab 29.

20 BY ATTORNEY BARHAM:

21 **Q. When patients come to you referred by a**  
22 **pediatrician or counselor with no expertise in gender**  
23 **dysphoria assessment or diagnosis, what policies do you**  
24 **have to ensure that the patients receive full and**

1 **adequate course of mental healthcare before prescribing**  
2 **life altering hormones?**

3 ATTORNEY BLOCK: Objection to form.

4 THE WITNESS: As a mental health  
5 professional I'm not the person who is prescribing those  
6 treatments.

7 BY ATTORNEY BARHAM:

8 **Q. Before you recommend someone for eligibility for**  
9 **life-altering hormones?**

10 ATTORNEY BLOCK: Objection to form.

11 THE WITNESS: Prior to making a  
12 recommendation of hormone initiation I'm doing my own  
13 assessment and ensuring that those standards are met.

14 BY ATTORNEY BARHAM:

15 **Q. So beyond your own assessments do you have any**  
16 **policies that guide that process?**

17 A. Our clinic has its own policies dependent upon  
18 clinical practice or whether or not patients are  
19 enrolled in a particular trial, but it is the standard  
20 of care as laid out by both Endocrine Society and WPATH  
21 that adolescent patients have a psychological  
22 assessment. There's a lot of latitude for what that  
23 actually means.

24 **Q. And on page three of this document, Exhibit 29,**

1 the bottom of the first paragraph the authors write as a  
2 result we may be harming some of the young people we  
3 strive to support, people who may not be prepared for  
4 the gender transitions they are being rushed into.

5 Do you share the concern of these authors?

6 A. I don't have numbers on my end. Which --- where  
7 is it?

8 Q. (Indicating).

9 A. Got it. Can you repeat the question? Sorry.

10 Q. The authors express concern that we may be ---  
11 quote, we may be harming some of the young people we  
12 strive to support, people who may not be prepared for  
13 the gender transitions they are being rushed into.

14 Do you share the author's concern?

15 A. I do not. These are tested hypotheses that can  
16 be researched, and this is not what this is.

17 Q. You said you have no concern that people are  
18 being rushed into gender transitions?

19 A. This is a supposition by these two authors that  
20 people are being rushed into gender transition. I'm not  
21 sure what that means, and that has not been the clinical  
22 experience that I've had nor what the guidelines  
23 recommend.

24 Q. So you were not aware of people being rushed

1 into transitions that they are not ready for?

2 A. That has not been my experience, no.

3 Q. On page four towards the bottom of the page, the  
4 authors reference a recent study of 100 detransitioners,  
5 38 percent of whom reported that they believe their  
6 original dysphoria had been caused by something specific  
7 such as trauma, abuse or mental health condition.  
8 Fifty-five (55) percent of whom said they did not  
9 receive adequate evaluation from a Dr. Or mental health  
10 professional before starting transition.

11 Are you aware of that study that authors  
12 reference here?

13 ATTORNEY BLOCK: Object to form.

14 THE WITNESS: I am --- I'm assuming  
15 because I think they have a footnote in here somewhere,  
16 but it is not in this particular article, but they are  
17 receiving to the recent 2021 Littman study  
18 detransitioners.

19 BY ATTORNEY BARHAM:

20 Q. Do you share the concern that some have been  
21 misdiagnosed as transgender when their gender dysphoria  
22 was, in fact, not innate, but cause by something  
23 specific, such as trauma, abuse or mental health  
24 condition?

1 A. I really don't mean to parse this, but I don't  
2 know what Dr. Edwards-Leeper or Dr. Anderson's concerns  
3 are, but the evidence that we have from the literature  
4 and from our clinical experience is that this is not a  
5 broad experience of most children.

6 Q. And what literature, are you referencing when  
7 you say we referenced the literature?

8 A. I'm referencing the literature that I cited in  
9 my report.

10 Q. And which specific portions of your report are  
11 you referencing?

12 A. Let me just take a moment. What I'm referencing  
13 is the longitudinal studies in particular that have  
14 followed these kids over time.

15 Q. And which ones would those be in your report?

16 A. Really anything from the Dutch clinic is going  
17 to have a longitudinal focus to them, but I think what's  
18 more important is that in all of these studies, which  
19 include some of the Dutch studies both in childhood and  
20 adults that have looked at regret rates or detransition  
21 have shown that this is a very infrequent occurrence,  
22 and there has been nothing I've read within the  
23 scientific literature that in, any way, tries to  
24 operationalize this idea of children being forced into

1 or pressured into transition.

2 Q. What steps do you take to ensure that gender  
3 dysphoria, the child's --- the child's or teen's gender  
4 dysphoria was not caused by something specific such as  
5 trauma, abuse or mental health condition before  
6 recommending someone for puberty blocking or cross sex  
7 hormones?

8 ATTORNEY BLOCK: Objection to form.

9 THE WITNESS: I perform a thorough  
10 evaluation.

11 BY ATTORNEY BARHAM:

12 Q. Anything beyond the thorough evaluation?

13 A. A very thorough evaluation. It involves  
14 multiple steps as I described earlier.

15 Q. So this comprehensive --- the authors actually  
16 talk about a comprehensive assessment on page three of  
17 their article. And they indicate that comprehensive  
18 assessment and gender exploratory therapy helps ---  
19 quote, helps a young person peel back the layers of  
20 their developing adolescent identity and examines  
21 factors that contribute to their dysphoria. And those  
22 include --- so what steps did you take to identify the  
23 factors that may contribute to a child's or teen's sense  
24 of dysphoria?

1 ATTORNEY BLOCK: Objection to form.

2 THE WITNESS: It is a thorough assessment  
3 and there are multiple factors within that assessment  
4 that speak to those concerns specifically.

5 BY ATTORNEY BARHAM:

6 **Q. And what are those multiple factors?**

7 A. Understanding developmental history, getting  
8 multiple performance, doing the diagnostic assessment of  
9 any co-occurring mental health conditions and ensuring  
10 that those are adequately explored and understood.

11 **Q. What factors in a transgender identity do you  
12 identify as most often contributing to gender dysphoria?**

13 ATTORNEY BLOCK: Objection to form.

14 THE WITNESS: I think it's complicated to  
15 answer that in a short way, because not every child who  
16 identifies as transgender would meet diagnostic criteria  
17 for gender dysphoria. And specifically, if we agreed  
18 with the premise that the gender dysphoria is being  
19 caused by trauma that's specifically a rule out of the  
20 diagnosis of gender dysphoria. So that is part of what  
21 we're doing in an assessment is to understand the role  
22 of other potential factors in helping a kid explore and  
23 understand their identity.

24 BY ATTORNEY BARHAM:

1 their identities that is a shared characteristic of some  
2 of the patients that I have seen.

3 BY ATTORNEY BARHAM:

4 **Q. So you have not only two factors that could  
5 contribute to a child's transgender identification,  
6 other than ---?**

7 A. Can I stop you, sir? I'm not identifying that  
8 as a cause or a causal factor in a core gender identity.  
9 It is the understanding and expression of that identity  
10 that often changes.

11 **Q. Okay.**

12 **And that is why I was trying to talk about  
13 transgender identification more broadly. But you've  
14 identified two factors that contribute to that not  
15 necessarily causal but contribute. Are there any others  
16 that you have identified as most often contributing  
17 as ---?**

18 A. Not that I have seen.

19 **Q. The authors on page three express a concern  
20 about other influences that patients can be subjected  
21 to, so as in these assessments patients reflect on the  
22 duration of the dysphoria they feel they continue a  
23 gender --- the intersection of sexual orientation, et  
24 cetera, social media, internet and peer influences.**

1 **Q. Then allow me to clarify the question. What  
2 factors other than an innate transgender identity do you  
3 identify as most often contributing to a child's  
4 transgender identification?**

5 ATTORNEY BLOCK: Objection to form.

6 THE WITNESS: The children that I have  
7 treated over my years of doing this work that describe a  
8 gender identity that is inconsistent who don't  
9 ultimately meet the criteria for gender dysphoria are  
10 often children who have been subjected to multiple types  
11 of trauma. That would be one of the factors.

12 BY ATTORNEY BARHAM:

13 **Q. What other ones would you identify?**

14 A. The other factors are around parental conflicts.  
15 That's probably the other large cohort of kids when  
16 exploration is the full come around which parents,  
17 particularly divorcing parents, are acting in conflict.

18 **Q. So by that you mean, for example one parent  
19 supporting an affirmation approach and the other raising  
20 concerns about proceeding in that direction?**

21 ATTORNEY BLOCK: Objection to form.

22 THE WITNESS: That's not an infrequent  
23 occurrence and this is a very rare outcome to that, but  
24 in that cohort of patients who desist, I would say in

1 **Do you share concerns that teens maybe misled by  
2 TikTok or other social media to self diagnose as  
3 transgender when, in fact, other factors have driven  
4 their gender dysphoria or their transgender  
5 identification?**

6 ATTORNEY BLOCK: Objection to form.

7 THE WITNESS: To clarify transgender  
8 isn't a diagnosis, so I'm not concerned about that  
9 specifically. And I think that's the study of all  
10 phenomenon, whether or not this is occurring, but again,  
11 as a part of a comprehensive gender assessment, we are  
12 looking at multiple factors beyond a child's  
13 self-report.

14 BY ATTORNEY BARHAM:

15 **Q. So do you share concerns that teens may be  
16 misled by social media to self declare as transgender  
17 when, in fact, other factors have driven their gender  
18 dysphoria?**

19 ATTORNEY BLOCK: Objection.

20 THE WITNESS: I would not characterize it  
21 in that way.

22 BY ATTORNEY BARHAM:

23 **Q. How would you characterize it?**

24 A. I would characterize it by taking exploration of

1 an identity via TikTok for what it is, as a normal  
2 process of adolescent development and having a child who  
3 self identifies as transgender as a result of seeing a  
4 video on TikTok is not going to be the child who meets  
5 the typical phenomenology that we would see with gender  
6 dysphoria. That is part of the assessment that we are  
7 evaluating.

8 **Q. Okay.**

9 **So then in general, you don't agree with the**  
10 **concerns that the authors raise regarding the influence**  
11 **of social media, internet and peer influences.**

12 **Correct?**

13 A. I would say it's a matter of degree. I don't  
14 think social media has been a particularly healthy thing  
15 for kids in general, and understanding how it impacts  
16 kids is something that we all need to be learning more  
17 about.

18 **Q. In the last paragraph on page three, the authors**  
19 **talk about how the WPATH recommends collaborative**  
20 **approach that involves parents and take into account the**  
21 **complexities of adolescents.**

22 **Do you see that?**

23 A. Yes.

24 **Q. Do you understand the WPATH standards of care**

1 **for adolescents to call for a collaborative approach**  
2 **that involves both parents whenever possible?**

3 A. There is not a specific call out within the  
4 standards of care for my recollection that say both  
5 parents need be involved, but that's certainly implied  
6 and is the general practice to include all parents or  
7 all family members who are involved in the child's life  
8 whomever is going to need to be in the room in order to  
9 both get a clear understanding of what's going on as  
10 well as make sure the child gets the adequate support to  
11 be able to thrive.

12 **Q. So is it your understanding that the WPATH**  
13 **standards of care would allow treatment to proceed based**  
14 **on the consent of one parent?**

15 A. As we talked about earlier, these are guidelines  
16 and not mandates. In practice within the United States  
17 almost all consent processes for puberty suppression and  
18 hormones go through a two parent consent process  
19 whenever possible, even though that is not a requirement  
20 of the law.

21 **Q. What I'm trying to get to is what is the**  
22 **requirements of the guidelines, recognizing that the**  
23 **guidelines are not mandatory, but do the guidelines**  
24 **allow for treatment based on the consent of one parent?**

1 A. I think one of the limitations of an  
2 international document is that there is not going to be  
3 that level of specificity because consent laws are going  
4 to be different from state to state, not to mention  
5 country to country.

6 **Q. Okay.**

7 **On page two --- I'm sorry, on page three ---**  
8 **let me clarify again. I'm sorry I confused myself. On**  
9 **page two the authors write that after exploring who she**  
10 **was --- after a year of exploring who she was, Patricia**  
11 **no longer felt she was a boy, she decided to stop**  
12 **binding her breasts and wearing boys clothes.**

13 **What proportion of those who present at your**  
14 **clinic change their minds and decided to remain with or**  
15 **return to the gender identity of their natal sex before**  
16 **undergoing any hormonal treatments?**

17 ATTORNEY BLOCK: Objection to form.

18 THE WITNESS: I'm one practitioner in my  
19 clinic, so I don't have the data on everybody. And I  
20 think a lot of that is going to depend upon the  
21 population that you are seeing.

22 BY ATTORNEY BARHAM:

23 **Q. What proportion of your patients then changed**  
24 **their mind and decide to remain or return to the gender**

1 **identity of their natal sex before undergoing any**  
2 **hormonal treatments?**

3 ATTORNEY BLOCK: Objection to form.

4 THE WITNESS: I would say a minority of  
5 patients.

6 BY ATTORNEY BARHAM:

7 **Q. Do you have a range?**

8 A. I don't. I think when you were asking those  
9 questions at the beginning about my 500 transgender  
10 patients in that cohort, and I think 75 percent pursued  
11 some things, but being that 25 percent that didn't.  
12 Somewhere in there.

13 **Q. On page five of this document, the last page the**  
14 **authors report a rising a number of detransitioners that**  
15 **clinicians report seeing. Are you aware of this rising**  
16 **number of detransitioners?**

17 ATTORNEY BLOCK: Objection to form.

18 THE WITNESS: I'm aware that these two  
19 authors are raising that it's a possibility. It is not  
20 something that I've seen published in the literature.

21 BY ATTORNEY BARHAM:

22 **Q. Have you seen a rising number of detransitioners**  
23 **at your clinic?**

24 A. I think the question is whether or not the

percentage is changing and that's not an answer we know. I think by definition the more people you see the more folks --- the detransition you're going to see. And the difference of children who had access to gender care now compared to a decade ago is just orders of magnitude different. But I don't know or there has not been any evidence that I've seen that the percentage of kids who detransition is any different now than it was a decade ago.

**Q. A few paragraphs above what we were just looking at, it says only a quarter of these individuals told their doctors they had reversed their transitions making this population especially hard to track. Would you agree that this population is difficult to track?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Again, this is not a study and so it's hard to kind of make a pronouncement about a population without a defined understanding of what that population actually is. Our folks who don't talk to their medical professionals about dissatisfaction in their care, a difficult population to treat, I think, probably by definition that is true.

BY ATTORNEY BARHAM:

**Q. And to be clear, I wasn't asking if they're**

**difficult to treat, I was just asking would you agree they're difficult to track?**

A. I think by definition, yes, if they are not reaching out to their providers or dropping out of studies, yes.

**Q. The next to last paragraph of this article begins by saying the pressure by activists, medical and mental health providers along with a national LGBT organizations to silence the voices of detransitioners and sabotage the discussion around what is occurring in the field is unconscionable. Do you agree that it is concerning that certain organizations are seeking to silence the voice of detransitioners?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: It is not my experience that organizations are seeking to silence the voices of folks who identify as detransitioners, no.

BY ATTORNEY BARHAM:

**Q. If they were would you agree that that is unconscionable?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: My job as a psychiatrist and a child psychiatrist in particular is to understand the kid who is sitting in front of me in that very

moment. I want to understand how to best meet their needs. So anything that is going to interfere with me being able to understand that is going to be a problem for me.

ATTORNEY BARHAM: I'm going to show you what we will mark as Exhibit-30. This is also Tab 30.

---

(Whereupon, Exhibit-30, Interview by Lisa Selin Davis, was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q. This is an interview written up by Lisa Selin Davis of Quillette entitled Trans Pioneer Explains her Resignation from the U.S. Professional Association for Transgender Health, published at the beginning of 2022. Are you familiar with this article?**

A. I am not.

**Q. I'm going to direct your attention to page three. This is an interview with Dr. Anderson, the same individual who is a co-author of the Washington Post article we were just discussing.**

**Correct?**

A. That is correct.

**Q. On page three Dr. Anderson states, the data are very clear that adolescent girls are coming to gender clinics in greater proportion than adolescent boys and this is a change in the last couple of years and it's an open question, what do we make of that. We really don't know what's going on and we should be concerned about it. Does her experience match your experience?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I think it's consistent in the literature that we've seen more assigned females at birth presenting for care than in the past.

BY ATTORNEY BARHAM:

**Q. And have you seen this change in balance since approximately 2015?**

A. I don't know if I would say --- I could point to one specific year, but with each year it seems like that's --- I think probably that's when the data came out that that demonstrated it.

**Q. When do you recall beginning to see this trend develop?**

A. I think one of the challenges is that the scope of the literature is limited to a few very specific subsets of where clinical care is practiced, and so we have to just be careful not to completely generalize.

1 So in these specific clinics what we have seen is a  
2 preponderance and an increase of assigned females at  
3 birth. I can't speak to this being a national  
4 phenomenon, but the literature probably certainly all  
5 points in that direction. I think personally for me I  
6 just started to see more assigned females at birth  
7 presenting in adolescence I think in the mid 2010s is  
8 not unreasonable.

9 **Q. Is there any test in scientific understanding as  
10 to why this trend in the literature is developing?**

11 A. There is not.

12 **Q. Do you agree that this is something that  
13 practitioners should be very concerned about before  
14 agreeing to administer sterilizing cross sex hormones to  
15 teen girls?**

16 ATTORNEY BLOCK: Objection to form.

17 THE WITNESS: The thing that's important  
18 is what are the specific factors of the child in the  
19 family that is sitting in front of you and how to ensure  
20 that that child has gotten appropriate care and that  
21 we're making a recommendation based upon the best  
22 interest of that individual child that is irrespective  
23 of population-based changes that are happening.

24 BY ATTORNEY BARHAM:

1 **adolescents who have preexisting mental health problems  
2 and are looking for an explanation about who they are.  
3 And there's a bit of I would say fantasy about seeking  
4 to form an identity that may then explain their  
5 distress. You would agree that the adolescent years can  
6 be distressing for many teens, whether they are  
7 transgender or not.**

8 **Correct?**

9 ATTORNEY BLOCK: Objection to form.

10 THE WITNESS: I would wholly agree with  
11 that, yes.

12 BY ATTORNEY BARHAM:

13 **Q. Do you share the concern that some teens who  
14 present at clinics are indulging in a fantasy about what  
15 a transgender identity will do for them and their  
16 distress?**

17 A. I would not put it in that way, no.

18 **Q. As part of your assessment do you have to --- as  
19 part of your thorough assessment do you have to assess  
20 whether the teen is incorrectly assessing what a  
21 transgender identity would do for them and their  
22 distress?**

23 A. A part of any formed --- informed consent  
24 process is assessing the understanding of the child and

1 **Q. Don't you need to assess though whether the  
2 individual in front of you is exemplar of that national  
3 --- of that trend in the literature?**

4 A. That's where --- that's where an assessment  
5 comes in.

6 **Q. So you would agree then that practitioners  
7 should be concerned about this trend before deciding to  
8 administer hormones.**

9 **Correct?**

10 ATTORNEY BLOCK: Objection to form.

11 THE WITNESS: What I'm stating is that  
12 the guidelines for what's involved in assessment have  
13 been relatively clear and that we want to make the  
14 decisions based upon what's in the best interest and  
15 understanding of the patient and family that we are  
16 seeing. We should always be concerned. We should  
17 always be building up our understanding of the field, as  
18 well as some of the epidemiology of the field. But that  
19 doesn't change the individual experiences of the patient  
20 and the family that we're meeting with.

21 BY ATTORNEY BARHAM:

22 **Q. Okay.**

23 **At the bottom of page four Dr. Anderson says  
24 that she is, quote, worried that there is a new group of**

1 the family's understanding of the risks, benefits and  
2 alternatives of that specific intervention. That would  
3 include an unrealistic belief about what the potential  
4 benefits may be.

5 **Q. All right.**

6 **I want to go to page five of this document.  
7 Dr. Anderson indicates earlier today I talked to some  
8 parents who brought their child to a health  
9 professional. The child is seen three times by a  
10 therapist and then recommended for hormones. The  
11 therapist never talked to the parents. Do you share her  
12 concern that three sessions with a mental health  
13 providers is far less than required before a competent  
14 diagnosis of a durable transgender identity can be made?**

15 ATTORNEY BLOCK: Objection to the form.

16 THE WITNESS: I would not. The objection  
17 as I read it in this article that you've put in front of  
18 me with the interview with Dr. Anderson, her concern  
19 seems to be more about not having spoken to the parents  
20 prior to the recommendation. And I can't take her word  
21 for it that this was true. We hear a lot of things from  
22 parents who express frustration with care that is  
23 ultimately found not to be accurate.

24 BY ATTORNEY BARHAM:

**Q. Would you share the concern that prescribing hormones if one parent is strongly opposed to it is creating a likelihood of family conflict that is going to likely be destabilizing and harmful to the child?**

ATTORNEY BLOCK: Objection to the form. Are you referencing something in the article or is this your own question?

ATTORNEY BARHAM: I am referencing page six, where Dr. Anderson says you don't want to rush ahead with a kid, giving them encouragement that they're going to get hormones until we bring their parents along. Battling the parents is a no win proposition.  
BY ATTORNEY BARHAM:

**Q. So just to be clear about the question do you share the concern that prescribing hormones if one parent is strongly opposed is likely creating the likelihood of family conflict that may be separately destabilizing and harmful to the child?**

ATTORNEY BLOCK: Objection to the form and foundation.

THE WITNESS: What I hear Dr. Anderson's concern from this is that battling with parents is a no-win proposition. I think that's different from recommending a treatment that not all parents agree to.

I think it's about the work of psychotherapy, which involves understanding and hearing parents' experiences and objections.

BY ATTORNEY BARHAM:

**Q. Do you think that prescribing hormones if one parent is strongly opposed is likely creating family conflict that may be separately destabilizing and harmful to the child?**

A. I can't answer that question without a specific family scenario in front of me. I have seen the opposite be the case where the conflict is the creation of the lack of consensus as opposed to the other way around. And I've seen kids in my experience treating kids who had parents who have opted out of any decisional capacity and the kid's medical care but nevertheless do much better when given access to this care.

**Q. But it is also possible that prescribing hormones over the objection of one parent can create conflict within the family.**

Correct?

ATTORNEY BLOCK: Objection to the form.

THE WITNESS: Understanding the impact of any intervention is a part of that consent process.

BY ATTORNEY BARHAM:

**Q. I'm just asking if that's a possible outcome?**

A. Yes.

**Q. All right.**

**Is it your opinion that it's unreasonable to exclude from female teams biological males, and by that I mean people with XY chromosomes, who have gained a physiological advantage as a result of undergoing male puberty?**

A. This is outside of the scope of what I was providing my testimony on.

**Q. Well, in paragraph 52 of your report you say no reasonable mental health professional could think the act in question is anything but harmful to the mental health of transgender youth and that preventing transgender youth from participating in the same activities as their peers undermines their ability to socially transition and prevents transgender youth from accessing important educational and social benefits.**

**So I'm asking you is it your opinion that it's unreasonable to exclude from female teams biological males who have gained a physiological advantage as a result of undergoing male puberty?**

ATTORNEY BLOCK: Objection to form and

scope.

THE WITNESS: Again, I can testify to the mental health aspects of exclusion. I can't testify to the endocrinologic changes of the physiologic changes in sports specifically.

BY ATTORNEY BARHAM:

**Q. I'm not asking you to testify to the endocrinology aspects of this. I'm just asking is it your opinion that if we assume that an individual has gained physiological advantage as a result of undergoing male puberty that it is still unfair to --- or unreasonable to exclude them from competing on a women's team?**

ATTORNEY BLOCK: Objection to form and scope.

THE WITNESS: That is not an assumption I feel comfortable making.

BY ATTORNEY BARHAM:

**Q. Well, if you say that it is no reasonable mental health professional can say that this Act is anything but harmful to the mental health of transgender youth that doesn't depend upon whether the child has undergone male puberty or not.**

**Is that correct?**

1 A. That is correct.

2 **Q. So even if the child --- even if the individual**  
 3 **has undergone male puberty you're saying that no**  
 4 **reasonable mental health professional could think that**  
 5 **the Act is anything but harmful, barring them from**  
 6 **competing on the women's team is anything but harmful.**  
 7 **Is that correct?**

8 A. I would say exclusion and isolation from access  
 9 to same aged peer activities is likely to be harmful  
 10 from a mental health perspective.

11 **Q. To what extent can puberty blockers started**  
 12 **late, such as age 14, unring the bell by reversing**  
 13 **physical changes in male puberty?**

14 ATTORNEY BLOCK: Sorry, I can't hear the  
 15 questions.

16 BY ATTORNEY BARHAM:

17 **Q. To what extent do puberty blockers started late,**  
 18 **for example age 14, unring the bell by reversing the**  
 19 **physical changes of male puberty?**

20 ATTORNEY BLOCK: Objection to form and  
 21 scope.

22 THE WITNESS: It is a complicated  
 23 question that is best left to an endocrinologist to  
 24 answer.

1 **Q. Isn't it true that puberty blockers just stop**  
 2 **further typical male development?**

3 ATTORNEY BLOCK: Same objections.

4 THE WITNESS: I would --- I would give  
 5 two responses. One, I would want an endocrinologist to  
 6 weigh in on the specifics, but clearly puberty blockers  
 7 are also prescribed to folks assigned females at birth  
 8 as well. There's more than just impacts on testosterone  
 9 as a result of these medications.

10 BY ATTORNEY BARHAM:

11 **Q. I understand, but you make recommendations for**  
 12 **whether people are eligible to receive puberty blocking**  
 13 **hormones.**

14 **Is that correct?**

15 A. That is correct.

16 **Q. So you have to have some understanding of the**  
 17 **effects of these medications.**

18 **Is that correct?**

19 A. That is correct.

20 **Q. So isn't it true that puberty blockers**  
 21 **administered to natal males should stop further typical**  
 22 **male development?**

23 ATTORNEY BLOCK: Objection to form and  
 24 scope.

1 BY ATTORNEY BARHAM:

2 **Q. Can puberty blockers reverse the physical**  
 3 **changes of male puberty to the genitals?**

4 ATTORNEY BLOCK: Objection to form and  
 5 scope?

6 THE WITNESS: It's the same answer. I  
 7 would defer to an endocrinologist on that response.

8 BY ATTORNEY BARHAM:

9 **Q. Can puberty blockers reverse the physical**  
 10 **changes to the hair?**

11 ATTORNEY BLOCK: Same objections.

12 THE WITNESS: Again, I would defer to an  
 13 endocrinologist.

14 BY ATTORNEY BARHAM:

15 **Q. Can they reverse the physical changes to the**  
 16 **voice or the muscles?**

17 ATTORNEY BLOCK: Same objections.

18 THE WITNESS: Same answer.

19 BY ATTORNEY BARHAM:

20 **Q. Can they reverse the effect --- the physical**  
 21 **changes of male puberty to the heart or lung size?**

22 ATTORNEY BLOCK: Same objection.

23 THE WITNESS: Same answer.

24 BY ATTORNEY BARNHAM:

1 THE WITNESS: I'd have the same answer,  
 2 and they do more than that.

3 BY ATTORNEY BARNHAM:

4 **Q. What else do they do?**

5 A. Again, I would defer to the endocrinologist for  
 6 the specific pathophysiology of how GnRH analogs affect  
 7 a complicated physiology of the body.

8 **Q. But what is your understanding of how they**  
 9 **affect because you said they also do other things?**

10 ATTORNEY BLOCK: Objection to form and  
 11 scope.

12 THE WITNESS: I think I answered it. In  
 13 the GnRH analogs are given an anatomic manner compared  
 14 to the pulsatile way in which GnRH is released during  
 15 the puberty, which is what causes the suppression of  
 16 other hormones more than just testosterone and estrogen.

17 BY ATTORNEY BARNHAM:

18 **Q. If puberty blocking hormones are administered to**  
 19 **a natal male, do they cause that individual to undergo**  
 20 **typically female pubertal development?**

21 ATTORNEY BLOCK: Objection to form and  
 22 scope.

23 THE WITNESS: They do not.

24 BY ATTORNEY BARHAM:

**Q. So they just stop further male development. Correct?**

ATTORNEY BLOCK: Same objections.

THE WITNESS: As kind of a Gestalt pithy response, yes, they cause puberty for assigned females at birth and assigned males at birth who are given these medications.

BY ATTORNEY BARNHAM:

**Q. When does puberty typically begin in biological males?**

ATTORNEY BLOCK: Same objections.

THE WITNESS: Those are very known data that an endocrinologist could tell you.

BY ATTORNEY BARHAM:

**Q. I'm sure, though, that as a psychiatrist you have a general understanding of what ages puberty typically begins in biological males?**

ATTORNEY BLOCK: Same objections.

THE WITNESS: I do, however, I am assessing individuals who come through my office. And regardless of what the population says about when puberty is typical, it's going to depend upon who that individual child is and when they develop puberty.

BY ATTORNEY BARHAM:

be around the 12ish mark. But there is a broad variability. And again, there is an answer that exists for this question that I don't have in front of me.

**Q. Are you familiar with Tanner stages of puberty?**

A. I am.

**Q. What are the different Tanner stages of puberty?**

A. Tanner stages one through five are the different Tanner stages.

**Q. So what is Tanner stage one in biological males?**

A. It depends upon if we're talking about genitalia or chest development, but it's no pubertal changes, so ---.

**Q. And what is two?**

A. Two is at the initial stages of pubertal changes that you start to see. The specifics of the Tanner staging is something that you need to be trained on. I would not claim myself as an expert in being able to accurately access the Tanner stage of a child.

**Q. Do you know when --- at what ages Tanner Stage 2 typically initiates in biological males?**

A. Again, it's going to be an individualized experience and that's why we do assessments.

**Q. Do you have a range, an age range as to when it typically begins?**

**Q. I understand, but my question isn't about an individual. My question is when does it typically begin in biological males.**

ATTORNEY BLOCK: Same objections.

THE WITNESS: Again, this is a very knowable fact-based answer in a population level. It's not information I have in front of me.

BY ATTORNEY BARHAM:

**Q. So you have no --- is it your testimony that you have no information as to when puberty typically begins in biological females?**

ATTORNEY BLOCK: Can I just give a standing objection to questions asking the witness about the effects --- the endocrinology effects of blockers and hormones, so I don't have to make an objection each time?

ATTORNEY BARHAM: Yes.

THE WITNESS: My testimony is I don't want to give an imprecise answer for a question that there is a specific answer to.

BY ATTORNEY BARHAM:

**Q. What is your understanding, as you sit here today, as to when puberty typically begins in males?**

A. The range for typical puberty in males tends to

A. When we talk about the onset of puberty, we're talking about Tanner stage two typically.

**Q. And at what age do those typically arise?**

A. For assigned males at birth or assigned females?

**Q. For biological males.**

ATTORNEY BLOCK: Objection to terminology.

THE WITNESS: So for folks assigned male at birth, again, we're going to see it in that 12-ish range.

BY ATTORNEY BARHAM:

**Q. And Tanner Stage 3, what is that?**

A. Further development. There's tables and charts you would have to look at. I'm not going to be able to use language to describe it in an accurate way.

**Q. And when --- approximately when, what age range does Tanner Stage 3 begin in biological males?**

A. That's not an answer that I can give you.

**Q. And what is Tanner Stage 4?**

A. The same answer is further progression of pubertal changes.

**Q. And do you know what age range that typically begins in biological males?**

A. Same answer as before. That's not an answer I

1 have here.

2 **Q. And would the same answers hold true for Tanner**  
3 **Stage 5? Is that a yes?**

4 A. That's a yes. I forgot that nodding ---.

5 **Q. Yes. You've been pretty good today. I've been**  
6 **impressed.**

7 **Doesn't the position that allowing biological**  
8 **males to play on a girls team if they blocked puberty**  
9 **before it begins create pressure for parents and**  
10 **children to make puberty blocking decision at a young**  
11 **age?**

12 ATTORNEY BLOCK: Objection to form.

13 BY ATTORNEY BARHAM:

14 **Q. Sort of put them in a now or never situation?**

15 A. Of those 500 patients that I have seen, that has  
16 never come up as a concern.

17 **Q. The athletic issue has never come up as a**  
18 **concern?**

19 A. It has not.

20 **Q. Do you think it would --- as a practitioner in**  
21 **the field do you think it would even be ethical for the**  
22 **State of West Virginia to structure its law in a way**  
23 **that puts now or never pressure on parents and children**  
24 **who are dealing with gender dysphoria to decide at an**

1 the camera.

2 THE WITNESS: Is that better?

3 ATTORNEY BLOCK: Yes.

4 THE WITNESS: Can you repeat the  
5 question? I'm sorry.

6 BY ATTORNEY BARHAM:

7 **Q. As someone familiar with the ethical standards**  
8 **of psychiatry, do you think it would be ethical for the**  
9 **State of West Virginia to structure its law in a way**  
10 **that puts now or never pressure on parents and children**  
11 **who are dealing with gender dysphoria to decide at an**  
12 **early age whether to stop the natural development of**  
13 **puberty?**

14 ATTORNEY BLOCK: Objection to form.

15 THE WITNESS: I mean that's a question  
16 that has a testable hypothesis. Does X intervention  
17 lead to this kind of pressure? That's not a study that  
18 I've ever seen nor has it been my clinical experience  
19 that it's been the case.

20 BY ATTORNEY BARHAM:

21 **Q. Would it be ethical to put that kind of pressure**  
22 **on someone under the ethical standards of the field of**  
23 **psychiatry?**

24 ATTORNEY BLOCK: Objection to form and

1 **early age whether to stop the natural development of**  
2 **puberty?**

3 ATTORNEY BLOCK: Objection to form.

4 THE WITNESS: As a child psychiatrist in  
5 this field we're doing individual-based assessments with  
6 the children and families that are in front of us. And  
7 what that means in the context of this question is that  
8 we are assessing all of their different activities,  
9 interests and working with all the systems that we can  
10 to ensure a safe and appropriate set of decisions that  
11 are going to lead to the best outcomes for this  
12 individual child and not a medical emphasis that is  
13 outside of the scope that I can answer.

14 BY ATTORNEY BARHAM:

15 **Q. But you're familiar with the ethical standards**  
16 **of your field.**

17 **Is that correct?**

18 A. I am, yes.

19 **Q. Under those ethical standards would it be**  
20 **ethical for the State to structure its law in a way that**  
21 **puts this kind of now or never pressure on parents and**  
22 **children?**

23 ATTORNEY BLOCK: Objection to form. Also  
24 the witness is in shadow. I can't really see him for

1 foundation?

2 THE WITNESS: It is a very theoretical  
3 question that really doesn't enter into it when we are  
4 one on one with these kids and their families.

5 BY ATTORNEY BARHAM:

6 **Q. I'm not asking about one on one interactions**  
7 **with kids and families. I'm asking in general in theory**  
8 **is it ethical to put that kind of pressure on someone?**

9 ATTORNEY BLOCK: Objection to form and  
10 foundation.

11 THE WITNESS: I'm sorry I can't give a  
12 better answer, but ensuring that a child is making a  
13 decision without coercion is a part of the informed  
14 consent process.

15 BY ATTORNEY BARHAM:

16 **Q. Is it your opinion that it is unreasonable to**  
17 **exclude from female teams biological males who begin**  
18 **undergoing male puberty but are now on puberty blockers?**

19 ATTORNEY BLOCK: Objection to form and  
20 scope.

21 THE WITNESS: Can you repeat the  
22 question?

23 BY ATTORNEY BARHAM:

24 **Q. Is it your opinion that it is unreasonable to**

1 **exclude from female teams biological males who begin**  
 2 **undergoing male puberty but are now on puberty blockers?**

3 A. Is it unethical is the question?

4 **Q. Unreasonable.**

5 A. Unreasonable. I would defer to kind of our  
 6 physiology and endocrinology experts and our medical  
 7 ethics experts in rendering an opinion on that  
 8 specifically.

9 **Q. Is it your opinion that it is harmful to youth's**  
 10 **mental health to be excluded from female teams**  
 11 **biological males who begin undergoing male puberty but**  
 12 **are now on puberty blockers?**

13 A. What I would say is that exclusion as well as  
 14 specific legal exclusion from activities of same-aged  
 15 peers is likely to be harmful for a kid's mental health.

16 **Q. Now, the Act in question does not prevent a**  
 17 **biological male who has gender dysphoria from competing**  
 18 **on the boys team.**

19 **Is that correct?**

20 ATTORNEY BLOCK: Objection to form and  
 21 scope.

22 THE WITNESS: I'd need to know specifics.  
 23 I don't know what you're referring to. I think lots of  
 24 people have different policies around how this actually

1 **Q. So is it harmful to the mental health of a**  
 2 **biological male who is experiencing gender dysphoria to**  
 3 **be excluded from the women's team even if he is on**  
 4 **puberty blockers?**

5 ATTORNEY BLOCK: Objection to form and  
 6 terminology.

7 THE WITNESS: Any potential exclusions  
 8 from a peer-appropriate activity has the potential to  
 9 have negative consequences on the mental health of that  
 10 girl. And again, that's going to be something that on  
 11 an individual basis we are assessing.

12 BY ATTORNEY BARHAM:

13 **Q. And that would be irrespective of whether the**  
 14 **individual is on puberty blockers, begins to undergo**  
 15 **male puberty or not.**

16 **Correct?**

17 A. An individual assessment is going to be  
 18 inherently tailored to wherever an individual is.

19 ATTORNEY BARHAM: Why don't we pause for  
 20 lunch?

21 ATTORNEY BLOCK: Let's go off the record.

22 VIDEOGRAPHER: Going off the record. The  
 23 current time reads 1:24 p.m.

24 OFF VIDEOTAPE

1 works.

2 BY ATTORNEY BARHAM:

3 **Q. I'm asking your understanding of the statute**  
 4 **upon which you're opining.**

5 A. Can you repeat the question, please?

6 **Q. The Act in question does not prevent a**  
 7 **biological male who is experiencing gender dysphoria**  
 8 **from competing on the boys team.**

9 **Correct?**

10 ATTORNEY BLOCK: Objection to form and  
 11 scope.

12 THE WITNESS: So one, I don't know what  
 13 biological male necessarily means.

14 BY ATTORNEY BARHAM:

15 **Q. An individual with XY chromosomes, natal male?**

16 A. So assigned male at birth can have a number of  
 17 reasons why they might not be able to play on the boys  
 18 team, including intensity of gender dysphoria.

19 **Q. But the law does not prevent them from playing**  
 20 **on the boys team.**

21 **Correct?**

22 A. From my read of the law it does not prevent them  
 23 from playing on the boys team. Again, from a mental  
 24 health perspective, their gender dysphoria may.

1 ---  
 2 (WHEREUPON, A SHORT BREAK WAS TAKEN.)

3 ---  
 4 ON VIDEOTAPE

5 VIDEOGRAPHER: Back on the record. The  
 6 current time reads 1:53 p.m.

7 BY ATTORNEY BROOKS:

8 **Q. What does puberty suppression or puberty**  
 9 **blockers do?**

10 ATTORNEY BLOCK: Objection to form and  
 11 scope.

12 THE WITNESS: I think I answered that  
 13 question before. So they suppress the endogenous  
 14 release of testosterone and estrogen as well as some  
 15 other hormones.

16 BY ATTORNEY BARHAM:

17 **Q. How does puberty suppression differ from cross**  
 18 **sex hormones?**

19 ATTORNEY BLOCK: Same objection.

20 THE WITNESS: Totally different  
 21 medication. One suppress hormones and the other is a  
 22 direct hormone itself.

23 BY ATTORNEY BARHAM:

24 **Q. So cross sex hormones are given with the**

**intention of causing development typical to the other sex.**

**Correct?**

A. It depends upon the context in which hormones are used. And again, I would defer for my endocrinology colleagues on the specifics.

**Q. So if cross sex hormones are given to a natal male as part of treatment for gender dysphoria, what is the intention?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: As I understand it, if an assigned male at birth is given cross sex hormones that is estrogen in order to provide the effects of estrogen on the body.

BY ATTORNEY BARHAM:

**Q. And the effects of estrogen on the body are what natal females would naturally experience as a result of puberty.**

**Correct**

A. I mean, that is correct, yes.

**Q. And so if a natal female is given cross sex hormones, she's being given testosterone to create the effects that natal males would naturally experience through puberty.**

A. That's not a question I can speak to. That's a question for the physician or provider who's prescribing that specific medication.

**Q. So after you recommend that a patient receive puberty blocking hormones, what is your continuing involvement in the puberty blocking process?**

A. My continuing involvement really depends upon the individual child and family for the sake of a mental health assessment. For the initiation of puberty suppression it's an assessment for the initiation of puberty suppression. The involvement thereafter is really dependent upon what the individual needs of that child are.

**Q. Do you play any role in continuing to advise whether the patient can continue to receive puberty blocking hormones or come off of them?**

A. It really depends upon the context. If the child is seeking to come off of puberty suppression because of a shift in their understanding of their identity, certainly that's a conversation that I would be involved in. If they are coming off of puberty suppression because they have a sufficient amount of testosterone or estrogen in their system that they are no longer requiring that from a medical purpose, that's

**Correct?**

A. Typically speaking, an assigned female at birth is going to be receiving testosterone and will have the subsequent effects as a result of having testosterone in the bloodstream.

**Q. Maybe I was confused, a natal male who is given cross sex hormones?**

A. You were right.

**Q. I was right, okay. At what Tanner stage do you recommend that a patient begin puberty blocker hormones?**

A. Again, that's going to depend upon an individualized assessment with the family, but never before Tanner Stage 2 of puberty.

**Q. And in what age does Tanner Stage 2 begin again?**

ATTORNEY BLOCK: Asked and answered.

THE WITNESS: I think I answered that question. It really depends upon the person.

BY ATTORNEY BARHAM:

**Q. And typically ---.**

A. And for an assigned male at birth we're talking 12-ish, but again I would refer to my endocrinology colleagues on the specific dates.

**Q. And through what Tanner stage do you recommend that a patient remain on puberty blockers?**

not a discussion that I'm privy to.

**Q. When you are discussing puberty blockers with patients and their parents do you describe them as placing a pause on puberty?**

A. That's not specific language that I use.

**Q. Do you describe them as being reversible?**

A. Again, that's not a language that I use. I'm much more specific in my discussions.

**Q. So on the issue of whether puberty blocking hormones are reversible, what do you tell parents and patients?**

A. I would say, by and large, most of the effects of puberty suppression are reversible.

**Q. And when you say by and large what effects are you referencing?**

A. What I'm referencing is that the literature is still an open book and we are constantly seeking and learning new information. We want to understand what those potential new data tell us about the efficacy, safety, et cetera, of these interventions.

**Q. So when you say they are by and large the effects are reversible, which effects are you referencing are the by and large?**

A. When I say by and large, it's really a caveat to

Page 206

allow for the things that we don't yet know.

**Q. So which effects are reversible?**

A. Virtually all of the effects that we're aware of are reversible.

**Q. When you're discussing puberty blockers with patients and their parents do you describe them as safe?**

A. Safe isn't a binary concept in my world. There is no such thing as anything that is completely safe or unsafe. So we talk about gradations of risk with any intervention.

**Q. So for puberty blockers what are the --- what's the gradation of risk?**

A. It is individualized to the specific needs of the child and the family.

**Q. In general, what is your understanding of the gradations of risk across the board?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I don't have a better answer for you because that's the whole process of doing an informed consent process, is understanding what are the specific risks and benefits and alternatives for that individual child.

BY ATTORNEY BARHAM:

**Q. Are you aware of the literature regarding any**

Page 208

**your practice?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: This is --- the document, as I read it, is a set of guidelines for the practice of care that should be individually applied to each child and family. My practice takes these recommendations and individually applies them to the specific risks, benefits and alternatives for the child sitting in front of me.

BY ATTORNEY BARHAM:

**Q. On the prior page in number 1.4 the Endocrine Society recommends against puberty blocking and gender affirming hormone treatment in prepubertal children. Do you approve the use of puberty blockers before puberty?**

A. I do not.

**Q. You didn't recommend or prescribe any puberty blockers for BPJ.**

**Is that correct?**

A. I have not.

**Q. You did not evaluate BPJ before he started taking puberty blockers.**

**Is that correct?**

A. I have not evaluated her or seen her, these materials.

Page 207

**testing of puberty blocking hormones and the gradations of risks presented in those tests?**

A. I'm not sure what you mean by tests.

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I'm not sure what you mean by testing.

BY ATTORNEY BARHAM:

**Q. Don't medications undergo testing before they can be used?**

A. There's a wide variety of processes by which medications are approved or not approved for certain indications.

ATTORNEY BARHAM: Let's go to Tab 5. I believe that's Exhibit-2.

LAW CLERK WILKINSON: Exhibit-2.

BY ATTORNEY BARHAM:

**Q. It's the Endocrine Society Guidelines from 2017.**

THE WITNESS: Yes.

BY ATTORNEY BARHAM:

**Q. On page 3880 the Endocrine Society states we suggest that clinicians begin pubertal hormone suppression therapy --- pubertal hormone suppression after girls and boys first exhibit physical changes of puberty, Tanner stages G-2/B-2. Is that consistent with**

Page 209

**Q. Is it your opinion that no responsible clinics begin puberty blocking before puberty begins?**

ATTORNEY BLOCK: Objection to form and scope.

THE WITNESS: There's no indication to start puberty blocking agents until Tanner Stage 2.

BY ATTORNEY BARHAM:

**Q. Isn't it true that there have been no Phase I clinical trials to test the safety of GnRH inhibitors for this age group?**

A. That is my understanding, but I would have to specifically review the literature with that question in mind. I'm not familiar --- completely familiar with the phased nomenclature in this context.

**Q. Isn't it true that there have been no Phase I clinical trials to test the safety of GnRH inhibitors for this duration?**

A. Again I would need to find a definition of what you are referring to by Phase I specifically.

**Q. Isn't it true there have been no clinical trials per FDA rules for this use of puberty blockers?**

A. I don't know what is meant by per FDA rules.

**Q. Food and Drug Administration rules?**

A. Yeah. I'm not familiar with what their rules

are. There have been clinical trials of these medications for this purpose.

**Q. Which clinical trials are you referencing?**

A. There are clinical trials through the Dutch clinic. There is also an ongoing clinical trial here in the U.S., a multi-phase study.

**Q. That study is still ongoing.**

**Correct.**

A. That is correct.

**Q. So there are no completed clinical trials in the United States under FDA rules.**

**Correct?**

A. I am not ---.

ATTORNEY BLOCK: Objection to the form.

THE WITNESS: I can't say that I'm familiar with all clinical trials that have ever happened, so that's not a statement I can answer.

BY ATTORNEY BARHAM:

**Q. You're not aware of any, though?**

A. I don't know what is meant by Phase I and what specifically is registered with the FDA for their purposes versus the copious numbers of clinical trials that have happened.

**Q. Are you aware of any clinical trials in the**

current time reads 2:17 p.m.

BY ATTORNEY BARHAM:

**Q. We were looking at Tab 5, which is Exhibit-2, page 3874. About three-quarters down the first column the Endocrine Society indicates, quote, in the future we need more rigorous evaluations of the effectiveness and safety of endocrine and surgical protocols and specifically highlight the need to include a careful assessment of the effect of prolonged delay of puberty in adolescence on bone health, gonadal function and the brain.**

**Do you see that?**

A. I see that, yes.

**Q. Do you agree that more rigorous evaluations of the safety of endocrine and surgical protocols are needed?**

A. I would agree that that's an important goal for all treatments, yes.

**Q. Do you agree that because, as the Endocrine Society indicated here, that these evaluations are needed in the future, that this --- that they have not been done yet?**

A. Well, this is published in 2017. There are ongoing trials that are happening now, and some that

**United States that have been completed regarding the safety of using puberty blockers for gender dysphoria?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Yeah, I'm not sure how I can answer that because I'm not aware of all of the trials that have occurred.

ATTORNEY BLOCK: Counsel, can we have a discussion about the scope of this deposition? I'm happy to have it off the record. I don't want it to influence the witness at all, but this is a rebuttal witness addressing specific issues and it seems that, you know, there are a lot of questions that are just really far outside the scope. So I'd love to have a discussion.

ATTORNEY BARHAM: I'm happy to go off the record.

VIDEOGRAPHER: Going off the record. The current time reads 2:07 p.m.

OFF VIDEOTAPE

---

(WHEREUPON, AN OFF RECORD DISCUSSION WAS HELD.)

---

ON VIDEOTAPE

VIDEOGRAPHER: Back on the record. The

have had at least preliminary data presented at various meetings that have looked at some of these.

**Q. So the issue here is the prolong delay of puberty. You would agree that it's quite different from treating individuals with precocious puberty.**

**Correct?**

ATTORNEY BLOCK: Objection to form and scope.

THE WITNESS: As a non-endocrinologist I wouldn't hazard an opinion on that.

BY ATTORNEY BARHAM:

**Q. Do you treat individuals for precocious puberty?**

A. I do not.

**Q. Do you agree with the Endocrine Society that there have not yet been a study of how the prolonged delay of puberty affects bone health?**

ATTORNEY BLOCK: Objection to form and scope.

THE WITNESS: I don't know if I can answer that in the most accurate way. I know I've seen preliminary data presented at various meetings about impacts on bone health, but I'm not as familiar with the endocrine literature as I am with the mental health literature.

BY ATTORNEY BARHAM:

**Q. Do you agree that there has not yet been a study on the prolonged effect of --- the prolonged delay of puberty affecting gonadal function?**

ATTORNEY BLOCK: Objection to form and scope.

THE WITNESS: Same answer as to the last one.

BY ATTORNEY BARNHAM:

**Q. And that is the same as fertility?**

**Correct?**

A. There has been more study fertility in those populations.

**Q. Do you agree there has not yet been a study on how the prolonged delay of puberty affects the brain?**

A. There are ongoing studies.

**Q. None complete yet?**

A. None that have published thus far that I'm aware of again.

**Q. And when you say there are ongoing studies of bone health, none have published so far that you're aware of.**

**Correct?**

A. I know I have seen data published at various

A. What I would say this was published in 2017, and so we would want to update since then about any literature since then on these potential risks. What I want to do is make sure that the endocrinologist or the adolescent medicine specialist, whoever it is that is prescribing the specific treatment knows how to have those discussions based on the psychiatric needs of the patients that I'm seeing.

**Q. Let's turn to 3872 in this document. The Endocrine Society indicates that the task force followed the approach recommended by the grading of recommendations and assessments, development and evaluation group. The international group with expertise in the development and implementation of evidence based guidelines. Do you see that in the second column?**

A. Yes.

**Q. And in this document they indicate that the use of the phrase we recommend and the number one are strong recommendations --- use the phrase we recommend --- recommendations use the phrase of we suggest in number two.**

**Is that correct?**

A. Correct.

national and international meetings, so I could not answer that question accurately. I think things have been published on bone health, but I'm not familiar with --- I'm not as familiar with the endocrinologic literature as I am the mental health literature.

**Q. Are you aware of any studies that have been completed regarding the prolonged delay of puberty affecting the cognitive, emotional, social and sexual development?**

A. Can you repeat the question?

**Q. Are you aware of any studies that have been completed regarding the prolonged delay --- of how the prolonged delay of puberty affects the cognitive, emotional, social and sexual development?**

A. There have been a number of studies including studies that we have referenced here that have looked at long-term psychosocial outcomes for these kids. So certainly some of those items have been looked at quite extensively. Some have not yet or have studies that are ongoing.

**Q. If the Endocrine Society is indicating that all of this is needed research, why are you --- what do you tell parents about the relative safety of puberty blocking hormones?**

**Q. So the recommendations regarding the use of puberty blockers are based on low quality evidence.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: What I can state is how this particular working group within the Endocrine Society characterized it using the assessment tool and using this assessment tool that is how it was graded for the sake of this set of guidelines.

BY ATTORNEY BARHAM:

**Q. Were you aware of this when you drafted your report?**

A. Yes.

**Q. Do you agree or disagree with this assessment of the quality of the evidence?**

A. Based upon how they did it, I would agree. In the world of child psychiatry this is very common. There is very little that we have in terms of very mainstream standard of care treatments that has anything other than poor quality of evidence based upon using these standards.

ATTORNEY BARHAM: I'm going to hand you what we will mark as Exhibit 31, and that will be Tab 76?

1 THE WITNESS: Thanks.

2 LAW CLERK WILKINSON: You're welcome.

3 ---

4 (Whereupon, Exhibit 31, Label of Lupron,  
5 was marked for identification.)

6 ---

7 BY ATTORNEY BARHAM:

8 **Q. This is the label of Lupron, pharmaceutical**  
9 **label for Lupron. Right at the top of page one, this**  
10 **label indicates that Lupron is approved for puberty**  
11 **blocking or delay for precocious puberty.**

12 **Correct?**

13 A. That is correct.

14 **Q. And precocious puberty is a hormonal imbalance.**

15 **Correct?**

16 A. I think there's a precise terminology for  
17 precocious puberty that involves more than just a  
18 hormonal imbalance.

19 **Q. But it's a malfunction of hormonal controls in**  
20 **the brain?**

21 ATTORNEY BLOCK: Objection to the form.

22 THE WITNESS: My understanding of a  
23 non-endocrinologist is that's initiation of puberty much  
24 earlier than anticipated or expected based upon the

1 A. I do not see where it says that.

2 **Q. 14.2?**

3 A. Yes.

4 **Q. Do you know why the test was weighted towards**  
5 **girls?**

6 ATTORNEY BLOCK: Objection to form and  
7 scope and foundation.

8 THE WITNESS: It would be a mere  
9 supposition on my end.

10 BY ATTORNEY BARHAM:

11 **Q. Is it because precocious puberty is more common**  
12 **in girls?**

13 A. I would defer to an endocrinologist on this  
14 epidemiology of that.

15 **Q. But the goal of using Lupron in this context is**  
16 **to help steer the body into healthy and normal**  
17 **development.**

18 **Correct?**

19 ATTORNEY BLOCK: Objection to form,  
20 scope.

21 THE WITNESS: Generally speaking I would  
22 agree with that.

23 BY ATTORNEY BARHAM:

24 **Q. Prescribing Lupron or other GnRH for gender**

1 history of the family.

2 BY ATTORNEY BARHAM:

3 **Q. So Lupron is inspected and approved by the FDA**  
4 **for safety and efficacy for precocious puberty not for**  
5 **all other possible uses.**

6 **Correct?**

7 A. Correct.

8 **Q. And Lupron was tested only for delaying puberty**  
9 **up until the normal age of puberty.**

10 **Correct?**

11 ATTORNEY BLOCK: Objection to form.

12 THE WITNESS: I'm not familiar with the  
13 literature that was used for gaining the FDA approval  
14 for this indication.

15 BY ATTORNEY BARHAM:

16 **Q. If you turn to section 14.1, 14.1 you'll see**  
17 **that it says that this --- Lupron was tested for monthly**  
18 **administration on 6 males and 49 females.**

19 **Is that correct?**

20 A. That is correct.

21 **Q. And on the next page you'll see it was tested**  
22 **for three months administration on 8 males and 76**  
23 **females.**

24 **Is that correct?**

1 **dysphoria disrupts hormones and developments at an early**  
2 **stage.**

3 **Correct?**

4 ATTORNEY BLOCK: Objection to the form  
5 and scope.

6 THE WITNESS: Again, as a mental health  
7 professional, this would be outside of my area of  
8 expertise to comment on that.

9 BY ATTORNEY BARHAM:

10 **Q. Would you agree that normal pubertal development**  
11 **includes bone growth, such as height?**

12 ATTORNEY BLOCK: Objection to form and  
13 scope.

14 THE WITNESS: Yes, I would.

15 BY ATTORNEY BARHAM:

16 **Q. Would you agree that normal pubertal development**  
17 **can include bone strengthening?**

18 ATTORNEY BLOCK: Objection to form and  
19 scope.

20 THE WITNESS: Specifics of that question  
21 are really outside of my scope of understanding in the  
22 practice that I have.

23 BY ATTORNEY BARHAM:

24 **Q. But in general, you would agree that bones get**

**stronger during puberty, especially for men?**

ATTORNEY BLOCK: Objection to form and scope.

THE WITNESS: My understanding is that the process of bone health is a quite dynamic, not static nor binary process, so it's more complicated than I feel that I can answer that question to.

BY ATTORNEY BARHAM:

**Q. But do bones generally get stronger as puberty progresses?**

ATTORNEY BLOCK: Objection to form and scope.

THE WITNESS: Again, I think it's a more complicated answer than a yes or a no but I'm not ---.

BY ATTORNEY BARHAM:

**Q. Would you agree that normal pubertal development includes brain development?**

A. Yes.

**Q. Each of these things have stopped or decreased by the administration of puberty blockers.**

**Correct?**

A. I don't think we can say that it's been stopped or decreased. There's not a term decreasing brain development that has been studied or referred to in the

been delayed.

**Q. But their development in that regard is not contemporaneous with their peers.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: In my specific hypothetical some of their development is going to be contemporaneous with their peers. Some of it will not be.

ATTORNEY BARHAM: I'm going to show you what we will mark as Exhibit 32. This will be Tab 73.

---

(Whereupon, Exhibit 32, Puberty Blockers Document, marked for identification.)

---

THE WITNESS: Can I ask a clarifying question, it is 2:32 east coast time, not central.

ATTORNEY SWAMINATHAN: Yes.

LAW CLERK WILKINSON: Tab 73.

BY ATTORNEY BARHAM:

**Q. This document is a hand out --- or it's from the --- I'm going to butcher the name, Doernbecher Children's Hospital at OHSU from their gender clinic and about puberty blockers document. At the bottom of page three, this document indicates that researchers have not**

literature as I'm aware of it.

**Q. Slower brain development?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Slower isn't a word that I've used, seen in the literature either.

ATTORNEY TRYON: Travis, can you speak up just a little bit more, please?

ATTORNEY BARHAM: Certainly.

BY ATTORNEY BARHAM:

**Q. Would you agree that normal pubertal development also includes psychosocial development of an adult identity as a sexual being contemporaneous with ones peers?**

A. I would say I would agree with that as an adolescent developmental process, not necessarily as a pubertal developmental process.

**Q. What's the --- what's your distinction between an adolescent pubertal development --- excuse me, an adolescent developmental process and a pubertal developmental process?**

A. As an example, folks who have delayed puberty, so 16-year olds who I have seen that have yet to undergo all stages of puberty nevertheless develop a sense of identity independent of the fact that their puberty has

**finished studying how safe puberty blockers are in the long-term.**

**Do you agree with that?**

A. Yeah, I would agree with that.

**Q. On the next page this document says that because puberty block --- because blocking puberty hormones can weaken your bones, it is best to just take them for just two or three years.**

**Do you agree or disagree?**

A. That is outside of my scope of expertise.

Again, this is a public facing the most like website. I can't be quite certain what the context of this is, but the individualized discussions you're having with patients and families is always going to be more complex than one or two sentences.

**Q. Do you expect to offer any opinion in this case that puberty blockers administered according to your guidelines are safe and reversible?**

A. I don't --- I guess I don't understand the question. I provided my expert testimony and my testimony is focused on the mental health effects of various interventions.

**Q. Okay.**

**Do you anticipate saying anything about the**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p style="text-align: right;">Page 226</p> <p>1 <b>reversibility of puberty blockers?</b></p> <p>2 A. Other than what I have already discussed, I</p> <p>3 don't think so.</p> <p>4 <b>Q. Let's go to tab 5, I think that's Exhibit 2.</b></p> <p>5 <b>And on page 3874, again, about two-thirds down the first</b></p> <p>6 <b>column, the Endocrine Society says we still need to</b></p> <p>7 <b>study the effects of puberty blocking hormones on</b></p> <p>8 <b>gonadal function.</b></p> <p>9 <b>Correct?</b></p> <p>10 A. Yes.</p> <p>11 <b>Q. That refers to hormone secretion.</b></p> <p>12 <b>Correct?</b></p> <p>13 A. Hormone secretion?</p> <p>14 <b>Q. Uh-huh (yes).</b></p> <p>15 A. I'm not sure what you mean by that.</p> <p>16 <b>Q. Gonadal function refers to the achievement of</b></p> <p>17 <b>the production by the gonads of fertile ova or sperm.</b></p> <p>18 <b>Correct?</b></p> <p>19 ATTORNEY BLOCK: Objection to form and</p> <p>20 scope.</p> <p>21 THE WITNESS: I can't speak to the</p> <p>22 author's intent for how they used that language. It's</p> <p>23 broader in scope from my perspective than that.</p> <p>24 BY ATTORNEY BARHAM:</p>                                                | <p style="text-align: right;">Page 228</p> <p>1 ATTORNEY BLOCK: Objection to form.</p> <p>2 THE WITNESS: All risks are graded risk</p> <p>3 an benefits as well as alternatives for each individual</p> <p>4 child.</p> <p>5 BY ATTORNEY BARHAM:</p> <p>6 <b>Q. But if it had an irreversible affect on brain</b></p> <p>7 <b>development that would still be a serious concern,</b></p> <p>8 <b>regardless of the gradations that we would have to</b></p> <p>9 <b>consider and address it?</b></p> <p>10 ATTORNEY BLOCK: Objection to form.</p> <p>11 THE WITNESS: There are a number of</p> <p>12 interventions that lead to irreversible changes that are</p> <p>13 beneficial and are not of concern to safety.</p> <p>14 ATTORNEY BARHAM: All right.</p> <p>15 Do we have Tab 32?</p> <p>16 LAW CLERK WILKINSON: That one I have.</p> <p>17 ATTORNEY BARHAM: This will be Exhibit</p> <p>18 33, Tab 32 just to make it conducive.</p> <p>19 ---</p> <p>20 (Whereupon, Exhibit 33, Endocrine</p> <p>21 Society's Guidelines, was marked for</p> <p>22 identification.)</p> <p>23 ---</p> <p>24 BY ATTORNEY BARHAM:</p>    |
| <p style="text-align: right;">Page 227</p> <p>1 <b>Q. Does it include the achievement of production of</b></p> <p>2 <b>fertile ova or sperm?</b></p> <p>3 A. That is a component, yes.</p> <p>4 <b>Q. What other components do you have in mind for</b></p> <p>5 <b>that term?</b></p> <p>6 A. For gonadal development includes size, shape,</p> <p>7 sexual functioning.</p> <p>8 <b>Q. On page 31, I want to go to --- have we done</b></p> <p>9 <b>Tab 6 yet?</b></p> <p>10 ATTORNEY BARHAM: I want to introduce</p> <p>11 what will be marked as Exhibit 33, this will be Tab 6.</p> <p>12 These are Endocrine Society guidelines from 2009.</p> <p>13 LAW CLERK WILKINSON: I don't think I</p> <p>14 have that.</p> <p>15 ATTORNEY BARHAM: Maybe we do.</p> <p>16 LAW CLERK WILKINSON: Six?</p> <p>17 ATTORNEY BARHAM: Uh-huh (yes).</p> <p>18 LAW CLERK WILKINSON: Uh-uh (no).</p> <p>19 BY ATTORNEY BARHAM:</p> <p>20 <b>Q. We will go back to Tab 5 then, Exhibit 2. Would</b></p> <p>21 <b>you agree that if the administration for puberty</b></p> <p>22 <b>blockers for gender dysphoria has irreversible effects</b></p> <p>23 <b>on brain development, that would be a serious safety</b></p> <p>24 <b>problem?</b></p> | <p style="text-align: right;">Page 229</p> <p>1 <b>Q. And if you look on --- at the end of the</b></p> <p>2 <b>document where it says for more information, it stated</b></p> <p>3 <b>this is a document from the National Institute of Mental</b></p> <p>4 <b>Health.</b></p> <p>5 <b>Correct?</b></p> <p>6 ATTORNEY BLOCK: Objection to form,</p> <p>7 foundation.</p> <p>8 THE WITNESS: I have no idea of what the</p> <p>9 context of this website is or what this is from.</p> <p>10 BY ATTORNEY BARHAM:</p> <p>11 <b>Q. But it gives the National Institute of Mental</b></p> <p>12 <b>Health's website.</b></p> <p>13 <b>Is that correct?</b></p> <p>14 A. It does.</p> <p>15 <b>Q. And it says for more information you can e-mail</b></p> <p>16 <b>the National Institute of Mental Health e-mail address.</b></p> <p>17 <b>Correct?</b></p> <p>18 A. That is correct.</p> <p>19 <b>Q. And that's a part of the National Institute.</b></p> <p>20 <b>Right?</b></p> <p>21 A. It is.</p> <p>22 <b>Q. And the citations it's drawing from articles in</b></p> <p>23 <b>1999 and 2000.</b></p> <p>24 <b>Correct?</b></p> |

1 A. That is correct.  
2 **Q. On page one in the middle column, the article**  
3 **describes gray matter at the thinking part of the brain.**  
4 **Do you agree with that description?**

5 A. I would describe it as a gross  
6 mischaracterization of the complexity of the brain.

7 **Q. What is your understanding of the function of**  
8 **the gray matter?**

9 A. That is one element of it. I think it is a lot  
10 of nuance, I guess is the word that I'm looking for.  
11 It's not characterized by that much of a pithy phrase,  
12 not of a neuropathologist.

13 **Q. The article talks about a second wave of**  
14 **production in gray matter that peaks around age 11 in**  
15 **girls and 12 in boys. And the article refers to that as**  
16 **just prior to puberty. In terms of Tanner stages that**  
17 **would be around Tanner 2 for most boys and girls, would**  
18 **it not?**

19 A. That would be Tanner Stage 1.

20 **Q. That would be Tanner Stage 1. But by 11 or 12**  
21 **you have already --- by age 12-ish in boys, it's typical**  
22 **for puberty blockers to have been administered.**

23 **Correct?**

24 A. To use the language of this article, the

1 **Correct?**

2 A. If that's what it says, yes.

3 **Q. Do you know --- have you conducted any studies**  
4 **to determine the effect of administering puberty**  
5 **blockers during the ordinary years of puberty and how**  
6 **that would impact the ordinary development of brain**  
7 **matter in the brain of a child?**

8 A. I have not, but it kind of sounds like that is  
9 conflating this as a study, which is definitely not.

10 **Q. No, I'm just asking if you had conducted any**  
11 **such studies?**

12 A. I have not.

13 **Q. Are you aware of any such studies?**

14 A. There are studies that are ongoing now.

15 **Q. That are ongoing.**

16 ATTORNEY BARHAM: Okay.

17 I'm going to show you what we marked as  
18 Exhibit 34, this will be Tab 33.

19 ---

20 (Whereupon, Exhibit 34, Article by  
21 Blakemore, et al., was marked for  
22 identification.)

23 ---

24 BY ATTORNEY BARHAM:

1 differences in Tanner stages is caused by the, quote,  
2 surging sex hormones not the other way around. So it's  
3 not about age, but it's the exposure to hormones that  
4 causes the Tanner stages to develop.

5 **Q. Have you made a study yourself about the timing**  
6 **of brain gray matter development and the puberty**  
7 **hormones in causing that development?**

8 A. I have not.

9 **Q. Do you have any reason to doubt the timing and**  
10 **nature of development as set out in this National**  
11 **Institute of Health publication?**

12 ATTORNEY BLOCK: Objection to form and  
13 foundation.

14 THE WITNESS: I only have the context of  
15 this article that you've put in front of me for the  
16 first time and in this article they describe the brain  
17 changes just happening prior to puberty, which is prior  
18 to when we would be initiating any interventions  
19 medically.

20 BY ATTORNEY BARHAM:

21 **Q. And it says though that it is possibly the**  
22 **thickening peaks around 11 or 12, depending on girls and**  
23 **boys and that's possibly related to the influence of**  
24 **surging sex hormones.**

1 **Q. This is an article by Blakemore, et al.,**  
2 **published in 2010, The Role of Puberty in the Developing**  
3 **Adolescent Brain. On page 929, the article states the**  
4 **ages at which these peaks in gray matter volume were**  
5 **observed correspond to the sexually dimorphic ages**  
6 **gonadarche, I'm mispronouncing that, onset which**  
7 **suggests possible interactions between puberty hormones**  
8 **and gray matter development.**

9 **Do you agree or disagree with that statement?**

10 A. I'm not seeing where you're referring to this.

11 **Q. On page 929, first column right above the role**  
12 **of puberty in gray matter development?**

13 A. As stated in this study, the changes were  
14 observed to correspond to the ages which suggest  
15 possible interactions. I have no objection to the idea  
16 that there are possible interactions between puberty  
17 hormones and gray matter development, but again, outside  
18 the field of my expertise.

19 **Q. Okay.**

20 **It also refers to other MRI studies showing a**  
21 **gradual emergence of sexual dimorphisms across puberty.**  
22 **Do you know what sexual dimorphism of the brain means?**

23 A. I do.

24 **Q. What does it mean?**

1 A. Differences that are measurable between folks  
2 assigned female and folks assigned male at birth is  
3 typically how that is described.

4 **Q. On the first page of this document it says**  
5 **throughout adolescence there are changes in the**  
6 **structure and function of the brain, sexual dimorphism**  
7 **in many of these changes suggest possible relationships**  
8 **to puberty.**

9 **This article is saying that the available**  
10 **evidence suggests sex links puberty hormones to play a**  
11 **role in stimulating brain development; do you agree?**

12 ATTORNEY BLOCK: Objection to form.

13 THE WITNESS: Certainly I agree that  
14 exposure to sex hormone is a part of brain development  
15 for all people. We know less about the developing brain  
16 for transgender youth.

17 BY ATTORNEY BARHAM:

18 **Q. Do you agree this includes a aspects of brain**  
19 **development that differ between healthy males and**  
20 **healthy females?**

21 ATTORNEY BLOCK: Objection as to form.

22 THE WITNESS: I don't. I haven't seen  
23 any literature that speaks to that specific question.  
24 BY ATTORNEY BARHAM:

1 A. I typically use language that is more similar to  
2 how they actually described it in this article which is  
3 to say that it may have unknown effects on brain  
4 development.

5 **Q. Okay.**

6 ATTORNEY BARHAM: Let's go to Tab 32,  
7 which we have already looked at and that is Exhibit.

8 LAW CLERK WILKINSON: Exhibit 33.  
9 BY ATTORNEY BARHAM:

10 **Q. Exhibit 33?**

11 ATTORNEY GREEN: Travis, this is Roberta  
12 Green. I'm sorry to interrupt. I wondered if you  
13 wouldn't mind keeping your voice up I'm just having  
14 trouble hearing. No doubt it's me but it'd be great.  
15 Thank you.

16 ATTORNEY BARHAM: It may also be where  
17 I'm located in the room, but I'm getting it from enough  
18 people, so I appreciate the reminder.

19 VIDEOGRAPHER: Counsel, did you say  
20 Exhibit 33.

21 ATTORNEY BARHAM: Exhibit 33.

22 BY ATTORNEY BARHAM:

23 **Q. Page two at the top refers to the gray matter**  
24 **--- or the white matter and how research purports a wave**

1 **Q. Okay.**

2 **Let's go back to Exhibit 2, page 3882?**

3 ATTORNEY BLOCK: What page was that,  
4 Counsel?

5 ATTORNEY BARHAM: 3882.

6 BY ATTORNEY BARHAM:

7 **Q. Under the heading side effects, the article**  
8 **indicates that the primary risk of pubertal suppression**  
9 **in GD, gender incongruent adolescents may include,**  
10 **ellipses, unknown effects on brain development, do you**  
11 **see that?**

12 A. I see that.

13 **Q. And in the first column of 3883 indicates that**  
14 **animal data suggests there may be effects of GnRH**  
15 **analogs on cognitive function.**

16 **Do you see that?**

17 A. I see that.

18 **Q. Cognitive function means the ability to think.**

19 **Correct?**

20 A. That is one aspect of cognitive functioning.

21 **Q. Do you tell parents and patients that the**  
22 **Endocrine Society has indicated that there are unknown**  
23 **effects on brain development related to the use of**  
24 **puberty blocking hormones?**

1 **of white matter growth that begins at the front of the**  
2 **brain in early childhood, moves to the side after**  
3 **puberty, striking growth spurts can be seen from age 6**  
4 **to 13 in areas connecting brain regions specialized for**  
5 **language and understanding special relationships. Ages**  
6 **11, 12 and 13 are sort of the heart and center of**  
7 **puberty.**

8 **Correct?**

9 ATTORNEY BLOCK: Objection to form.

10 THE WITNESS: It depends upon the child.

11 BY ATTORNEY BARHAM:

12 **Q. In general?**

13 ATTORNEY BLOCK: Same objection.

14 THE WITNESS: I don't want it to be like  
15 I'm parsing this out, but it's really important. We  
16 can't apply population based data onto an individual and  
17 make conclusions about it.

18 BY ATTORNEY BARHAM:

19 **Q. But we can assess population-based data as to**  
20 **when puberty is generally occurring and generally it's**  
21 **occurring around the ages of 11 to 13?**

22 A. I would agree with the statement that puberty is  
23 generally occurring within those age ranges, yes.

24 **Q. And that is also approximately when puberty**

**blocking hormones are being prescribed.**

**Is that true?**

A. It depends upon the individual.

**Q. But generally around age 12 is what you indicated earlier.**

**Correct?**

A. It really depends upon the individual. To clarify, it's based upon Tanner stage as one element, age has one element, psychosocial functioning has another, family choices. It's a calculus of the risks, benefits and alternatives that guide when we decide to intervene if we decide to intervene.

**Q. So you would agree that a teenage brain and cognitive development across puberty is a very complicated area and one that's not easily understood.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Yes, adolescent brain development is a complicated phenomenon for sure. I have no objection to that.

BY ATTORNEY BARHAM:

**Q. Is that an area of your professional research and investigation?**

A. Specifically on neuroscience with regard to

**Q. Have you made any systematic studies of suicide among the thousands treated at the Lurie Children's Hospital here in Chicago?**

A. I have a study ongoing.

**Q. Has that study generated any preliminary results yet?**

A. It has not.

**Q. Have you made any systemic studies of suicide among the thousands you've treated at the Gender Variant Youth and Family Network?**

A. That is not a clinical service.

**Q. Are you aware that suicide for any reason is extremely rare among children younger than 15?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I would disagree with that as a statement. It's among one of the top causes of death for children of ages 10 to 15.

BY ATTORNEY BARHAM:

**Q. And what's your basis for saying that?**

A. The CDC data.

**Q. Did you cite that data in your report?**

A. I did not.

**Q. You're not offering an opinion that BPJ faced a high suicide risk unless put on puberty blockers.**

adolescent development, no, it is not.

ATTORNEY BARHAM: Let's go to Tab 8.

THE WITNESS: I need to take another bathroom break.

ATTORNEY BARHAM: Let's just take a break now. Let's go off the record.

VIDEOGRAPHER: Going off the record. The current time reads 2:53 p.m.

OFF VIDEOTAPE

---

(WHEREUPON, A SHORT BREAK WAS TAKEN.)

---

ON VIDEOTAPE

VIDEOGRAPHER: Back on the record. The current time reads 3:00 p.m.

BY ATTORNEY BARHAM:

**Q. Are you an expert on suicide and suicidality?**

A. I guess I don't know exactly how to qualify that response. I know more than most people about suicide and suicidality, yes.

**Q. Have you made any systematic study of suicide among the thousands treated at the NYU Gender and Sexuality Service?**

A. I have not.

**Correct?**

A. I am not.

**Q. Has any responsible health authority or organization made a claim that the use of puberty blockers relate to suicide?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I mean, that's a big list. I don't think any that I'm aware of have made the claim, especially when it comes to causation.

BY ATTORNEY BARHAM:

**Q. In paragraph 19 of your report you refer to gender-affirming hormone therapy and you make similar statements in paragraphs 39, 40, 41 and 42. What do you mean by gender affirming hormone therapy?**

A. Typically speaking when I'm referring to gender-affirming hormone therapy, these are hormones that are aligned with the gender identity.

**Q. So that means the administration of cross sex hormones.**

**Is that correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Yeah. I mean, I think I would call them gender-affirming hormones. That is how typically they are referred to in the literature.

BY ATTORNEY BARHAM:

**Q. So this means that you would administer testosterone to natal females.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I personally would not, but ---.

BY ATTORNEY BARHAM:

**Q. Cross sex hormones or gender-affirming hormones refers to the administration of testosterone to natal females.**

**Correct?**

A. Or assigned females at birth, yes, that's correct.

**Q. And it means the administration of testosterone suppression of estrogen for natal males.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Assigned male at birth, yes.

BY ATTORNEY BARHAM:

**Q. You mean assigned males at birth?**

A. Yes. Is that what I not said? Sorry.

**Q. What is your role in the administration of cross**

A. It's a highly complicated question that depends upon a lot of factors that are above the scope of my testimony here. As an example, there are many adult transgender men who become pregnant despite being on testosterone for many years.

**Q. And what studies are you referencing that support that statement?**

A. I'm not referencing any studies to this. I'm referencing personal experiences.

**Q. Okay.**

**Cross sex hormones cannot cause an adolescent to develop the genitalia associated with his or her --- his or her desired transgender identity.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: That's correct.

BY ATTORNEY BARHAM:

**Q. Cross sex hormones also cannot achieve male height in a natal female.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I would defer to my endocrine colleagues on that answer.

BY ATTORNEY BARHAM:

**sex hormones?**

A. It depends on the child and the family, but my role is most often as a mental health professional who is either doing the assessment or providing care for the co-occurring psychiatric disorders that are present in that individual child.

**Q. Cross sex hormones prevent rather than enable an adolescent from becoming capable of reproducing sexually.**

**Correct?**

ATTORNEY BLOCK: Objection to the form.

THE WITNESS: That's not something that I can answer. That's out of the scope of my expertise.

BY ATTORNEY BARHAM:

**Q. You lack an understanding of the effects of administering cross sex hormones?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I would disagree with that statement.

BY ATTORNEY BARHAM:

**Q. So my question is what is the effect of administering cross sex hormones on an adolescent's ability to develop and become capable of reproducing sexually?**

**Q. Can cross sex hormones change the hip and leg configuration in a natal male to match that of a natal female?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I would defer to my endocrine colleagues on that question.

ATTORNEY BARHAM: Let's go to Tab 77. This is probably new.

LAW CLERK WILKINSON: Yes.

ATTORNEY BARHAM: This is an article by Guss, et al. in 2015, entitled Transgender and Gender Non-Conforming Adolescent Care. This will be Exhibit 35.

---

(Whereupon, Exhibit-35, Article by Guss, et al., was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q. Are you familiar with the authors?**

LAW CLERK WILKINSON: I'm sorry. I gave you the wrong one. Here is the right one.

THE WITNESS: I know Dr. Shumer. And we read something by Katz-Wise earlier. I don't know Carly Guss.

1 BY ATTORNEY BARHAM:

2 **Q. Page four of this document indicates that if a**  
 3 **patient is on cross sex hormones it's important to**  
 4 **remind them that the side effects may be infertility.**

5 **Is that correct?**

6 A. Where are you pointing to?

7 **Q. The top of page four.**

8 A. Yes.

9 **Q. Do you agree with that statement?**

10 A. I agree.

11 **Q. Do you know of any long-term studies that will**  
 12 **change to what extent infertility caused by taking cross**  
 13 **sex hormones can be reversed later in life?**

14 A. There are ongoing studies now, but I'm not aware  
 15 of any that have published anything.

16 **Q. Have you studied the literature regarding mental**  
 17 **health problems in adults resulting from sterility?**

18 ATTORNEY BLOCK: Objection to form.

19 THE WITNESS: I don't know what you mean  
 20 by studied. I don't think probably more than any  
 21 cursory manner.

22 BY ATTORNEY BARHAM:

23 **Q. The use of cross sex hormones to affirm a**  
 24 **transgender identity is an off-label use.**

1 **identification.)**

2 ---

3 BY ATTORNEY BARHAM:

4 **Q. Are you familiar with this study?**

5 A. Certainly not the details of it. This is the  
 6 first time I'm recalling looking at it.

7 **Q. Are you aware of any other studies regarding the**  
 8 **ability of individuals taking cross sex hormones to**  
 9 **become pregnant?**

10 A. There are a number of ongoing studies that are  
 11 looking into those questions, yes.

12 **Q. If you look at Table 3 on page number 36, this**  
 13 **table indicates there were 79 pregnancies among the**  
 14 **respondents who have ever used testosterone.**

15 **Do you see that?**

16 A. Yes.

17 **Q. And there were 342 among those who have never**  
 18 **used testosterone.**

19 **Do you see that?**

20 A. I see that.

21 **Q. But only 15 of these pregnancies occurred after**  
 22 **initiating testosterone. Is that correct? And I'm**  
 23 **referencing page 33 when I say that, at the bottom of**  
 24 **page 33.**

1 **Correct?**

2 ATTORNEY BLOCK: Objection to  
 3 terminology.

4 THE WITNESS: If by off label you mean  
 5 off label for the FDA?

6 BY ATTORNEY BARHAM:

7 **Q. Yes.**

8 A. Yeah, as far as I know. Again, I'm not  
 9 prescribing these medications as a psychiatrist.

10 **Q. Earlier you mentioned that some of your**  
 11 **patients, some trans --- some women --- natal females**  
 12 **who identify as male have been able to become pregnant.**  
 13 **Do you recall that testimony?**

14 A. I did not say anything about my patients, I said  
 15 those were personal experiences.

16 **Q. Personal experiences. I'm sorry. I assumed it**  
 17 **was patients, so thank you for that correction. I would**  
 18 **like to show you Tab 81. This is going to be an article**  
 19 **by Moseson, et al. in 2020, entitled Pregnancy**  
 20 **Intentions and Outcomes, tab 81 for those at home and**  
 21 **Exhibit 36 for the record.**

22 --

23 (Whereupon, Exhibit-36, Article by  
 24 Moseson, et al., was marked for

1 ATTORNEY BLOCK: Where is this on page  
 2 33?

3 ATTORNEY BARHAM: The very last line on  
 4 page 33 extending over onto page 35.

5 THE WITNESS: I see on Table 2 the number  
 6 of pregnancies after initiating testosterone was 15.

7 BY ATTORNEY BARHAM:

8 **Q. So the other 337 of the pregnancies tell us**  
 9 **nothing about the impact of testosterone on female**  
 10 **fertility and the possible impact of birth defects.**

11 **Correct?**

12 A. Well, the question about fertility certainly  
 13 doesn't speak to us being able to understand it more  
 14 based upon the data points. And without reading the  
 15 article I don't know if the author said anything about  
 16 birth defects.

17 **Q. On page 35 it indicates that 2 of the 15 --- or**  
 18 **4 of the 15 pregnancies that started while taking**  
 19 **testosterone half of them ended in miscarriage.**

20 **Correct?**

21 A. Yes.

22 **Q. One ended in abortion and one was not reported.**

23 **Correct?**

24 A. I don't see where that is.

**Q. It's the same line. Two of these four pregnancies ended in miscarriage, parentheses, one ended in abortion in the outcome and testosterone duration for the other four were not reported?**

A. Yes.

**Q. Okay.**

And there is no data given on the other outcome of the other 11 pregnancies. So this article does not document a single live birth to a natal female at any time after taking testosterone.

**Correct?**

ATTORNEY BLOCK: Objection to form. And give him a chance to read, please.

THE WITNESS: I would really have to read the article quite closely to agree with that. I'm not seeing the text in this article to support that. In the Pregnancy Intentions and Outcomes, as I'm reading it, it discusses what the potential outcomes are, but it didn't parse those into who had testosterone before or after, so I'm not sure.

BY ATTORNEY BARHAM:

**Q. Okay.**

Let me shift gears and turn to paragraph 37 of your report. There you indicate --- you state that

BY ATTORNEY BARHAM:

**Q. Tab 120, Exhibit 37, is the Steensma article that you cited in footnote 11 of your report.**

**Is that correct?**

A. That is correct.

**Q. Let's look at Table 1 on page 584. And it gives --- in the first four columns it gives numbers on persistence and desistance among the study subjects. And about halfway down it delineates how many of the persisting boys and girls and desisting boys and girls had a childhood diagnosis of gender identity disorder.**

**Correct?**

A. Correct.

**Q. And it also breaks down how many were subthreshold. I'm presuming that means for gender identity disorder.**

**Correct?**

A. That is correct.

**Q. So according to Table 1, 91.3 of the 23 persisting boys had gender identity disorder.**

**Correct?**

A. Correct.

**Q. So that means about 21 of the 23 persisting boys had that condition.**

there is no evidence supporting Dr. Levine's speculation that allowing prepubertal children to sexually transition puts children on a conveyor belt to becoming transgender adolescents and adults. And you say evidence shows that prepubertal children who are likely to have a stable transgender identity into adolescence are the children who are most likely to articulate a strong and consistent need to socially transition.

**Do you see that?**

A. I see that.

**Q. And in footnote 11 you cite an article by Steensma published in 2013.**

**Is that correct?**

A. That's correct.

ATTORNEY BARHAM: I will show you what we're going to mark as Exhibit 37, Tab 120, and I will also show you Tab 121, which is Exhibit 38.

---

(Whereupon, Exhibit-37, Article by Steensma, was marked for identification.)

(Whereupon, Exhibit-38, Analysis, was marked for identification.)

---

**Correct.**

A. Correct.

**Q. And according to Table 1, 95.8 of the 24 persisting girls had the same diagnosis or 23 of the 24.**

**Correct?**

A. That's correct.

**Q. And according to the same Table, 39.3 of the 56 desisting boys had that diagnosis.**

**Correct?**

A. That is correct.

**Q. So that's 22 of the 56.**

**Correct?**

A. I'll take your word for the math.

**Q. Well, you can see it on Exhibit-121 (sic). On Table 1, 58.3 of the 24 desisting girls had gender identity disorder or 14 of the 24.**

**Correct?**

A. Correct.

**Q. Do you see any reason to dispute the figures set forth on Exhibit --- on Tab 121, Exhibit 39 --- Exhibit 38?**

A. No, I have no reason to ---.

ATTORNEY SWAMINATHAN: I think he is looking at the wrong document.

1 BY ATTORNEY BARHAM:

2 **Q. I'm talking about this.**

3 A. Got it. So this is a transposition from  
4 Table 1?

5 **Q. Correct.**

6 A. I mean, I'm going to have ---.

7 ATTORNEY BLOCK: Just objection. I'm  
8 sorry, can we put on the record what this document is?  
9 Is it a reprint of what's in the Steensma or is it new  
10 analysis that ---?

11 ATTORNEY BARHAM: Exhibit 38 is an  
12 analysis of the Steensma 2013 article that is  
13 Exhibit 37.

14 ATTORNEY BLOCK: Thank you. And is  
15 there an author of the analysis?

16 ATTORNEY BARHAM: I'm sorry. Say that  
17 again.

18 ATTORNEY BLOCK: Is there an author of  
19 this analysis?

20 ATTORNEY BARHAM: Yes, it was me.

21 BY ATTORNEY BARHAM:

22 **Q. So according to the figures that have been**  
23 **calculated from table one of the Steensma article, 80**  
24 **children --- of the 80 children who had gender identity**

1 **disorder, 44 persisted and 36 desisted.**

2 **Is that correct?**

3 ATTORNEY BLOCK: Objection to give the  
4 witness a chance to see it on his own what the figures  
5 are.

6 THE WITNESS: I'm not sure I understand  
7 what your question is.

8 BY ATTORNEY BARHAM:

9 **Q. Of the children with the --- the 80 children who**  
10 **had a diagnosis of gender identity disorder, 44**  
11 **persisted and 36 desisted.**

12 **Is that correct?**

13 A. I would have to do the math myself for me to say  
14 yes to that, but it's about right.

15 **Q. So according to Steensma figures, of the**  
16 **children with the strongest transgender identity as**  
17 **children 55 percent persisted and 45 percent desisted.**

18 **Correct?**

19 ATTORNEY BLOCK: Objection to form.

20 THE WITNESS: Again, I would have to run  
21 those numbers myself in order to --- unless it's  
22 referred to already in the article, but that sounds  
23 about right.

24 BY ATTORNEY BARHAM:

1 **Q. In footnote 12 of your report, paragraph 37, you**  
2 **cite an article by Rae saying for the proposition that**  
3 **socially transitioning before puberty did not increase**  
4 **children's cross gender identification and deferring**  
5 **transgender did not decrease cross gender**  
6 **identification.**

7 **Is that correct?**

8 A. That is correct.

9 ATTORNEY BARHAM: All right.  
10 Let's turn to Tab 108. This will be  
11 Exhibit 39, and it will be an article by Rae, et al.  
12 published in 2019, Predicting Early Childhood Gender  
13 Transitions.

14 ATTORNEY BLOCK: It's 2:22 central time.  
15 So the witness has to take a break at 2:30?

16 THE WITNESS: I can do 2:45.

17 ---

18 (Whereupon, Exhibit 39, Article by Rae,  
19 et al., marked for identification.)

20 ---

21 BY ATTORNEY BARHAM:

22 **Q. Exhibit 39 is the article that you cited in**  
23 **footnote 12 of your report.**

24 **Is that correct?**

1 A. That's correct.

2 **Q. On page 679 the author indicates that**  
3 **replication of this affect is muted preferably from**  
4 **longitudinal study comparing a single group of children**  
5 **before and after transition.**

6 **Correct?**

7 A. That's correct.

8 **Q. And the authors also indicate that they tested a**  
9 **sample skewed by race, class, parental that education**  
10 **and political affiliation that may or may not affect the**  
11 **children that are socially transitioning now or in the**  
12 **future.**

13 **Correct?**

14 A. That is correct.

15 **Q. And they also indicate that follow-up occurred**  
16 **only two years after testing and some of the children**  
17 **who had not transitioned could transition in the future**  
18 **and some who had transitioned could not revert in the**  
19 **future.**

20 **Correct?**

21 A. Correct.

22 **Q. And they indicated that there sample is likely**  
23 **an over estimate of how many gender conforming children**  
24 **in the general population will socially transition.**

**Correct?**

A. Where is that in the article?

**Q. Second column of page 679.**

A. Yes.

**Q. Same column they also indicate that they relied on a convenient sample of individuals recruited through lists and events serving transgender children and gender non-conforming children.**

**Correct?**

A. That is correct.

**Q. Let's go back to Tab 5, which is Exhibit 2. Page 3879, the Endocrine Society indicates that if children have completely socially transitioned they have my greater difficulty returning to the original gender on entering puberty.**

**Is that correct?**

A. That's correct. It says it there, but that's based on supposition.

**Q. Footnote 40 --- reference number 40 supposition --- reference number 40 is an article by Steensma, et al., published in 2011.**

**Are you saying that that's a supposition?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: No, I'm saying that the

**puberty blockers may consolidate gender dysphoria in young people putting them on a lifelong path of biomedical invention.**

**Is that correct?**

ATTORNEY BLOCK: Object is to form.

THE WITNESS: Can you show me where that is on this page?

BY ATTORNEY BARHAM:

**Q. The first column on the second paragraph. The second column.**

ATTORNEY TRYON: Jake, can you scroll down a bit?

THE WITNESS: I would not agree with how you asked that question, I guess. Can you repeat it or clarify?

BY ATTORNEY BARHAM:

**Q. I just was reading what it said. They indicate in this section additionally since almost all of the children treated with puberty blockers proceed to cross sex hormones citing de Vries 2014, concerns have been raised at puberty blockers may consolidate gender dysphoria in young people, putting them on a lifelong path of biomedical interventions?**

A. It's bit of a logical leap and also just

part of that article that refers to the theoretical risk is based not on any data that was collected by the researchers in that study.

BY ATTORNEY BARHAM:

**Q. The Endocrine Society also indicates that the social transition has been found to contribute to the likelihood of persistence.**

**Is that correct?**

A. That is a misstating of Dr. Steensma.

**Q. That is what the Endocrine Society has concluded.**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: That is what they have written here in the article you presented, yes.

ATTORNEY BARHAM: Let's go to Tab 97 number ---.

LAW CLERK WILKINSON: Exhibit 16.

BY ATTORNEY BARHAM:

**Q. Exhibit Number 16, and we are going to be looking at the sixth page of this document. And Dr. D'Angelo, et al. article indicates that since almost all the children treated with puberty blockers proceeded to cross sex hormones concerns have been raised that**

incorrect. The de Vries study specifically was looking at the children in the Amsterdam clinic, which is not broadly applicable to other gender clinics across the rest of the world.

**Q. But you relied upon de Vries 2014 article in your report as well, didn't you?**

A. I agree. Yeah.

**Q. So there are professionals who have raised these concerns and hold the concerns that social transitioning cannot change the outcome for a child.**

**Is that correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I think there's two different questions. The first question is, do I agree with this statement that almost all children treated with puberty blockers proceed to cross sex hormones? That is not data that we have nor does this article point to data other than the Dutch clinic that has a very specific protocol.

The question about whether social transition changes a child's trajectory is a different question. It is a question that the Dutch have raised as a possibility, but has not, I have not seen any literature that provides evidence for that.

BY ATTORNEY BARHAM:

**Q. But you will recognize that there are some researchers in the field who have raised these concerns and do hold these concerns.**

**Correct?**

A. There are researchers in the field who ask these questions, yes.

ATTORNEY BARHAM: Let's go to Tab 38.

ATTORNEY TRYON: How late are we going in this session; until 2:30 or 2:45?

ATTORNEY BARHAM: The witness has indicated he can go to 2:45.

ATTORNEY TRYON: Okay.

ATTORNEY BARHAM: Exhibit 40 is an article by Carmichael, et al. 2021, Short-term Outcomes of Pubertal Suppression in a Selected Cohort of 12 to 15 year old Young People. If you'll turn to page 12.

---

(Whereupon, Exhibit 40, Article by Carmichael, et al., was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q. Are you familiar with this paper?**

A. That is correct.

**Q. Would you agree that the majority of children who receive puberty blockers go on and take cross sex hormones?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: That is not a question that we have an answer to based upon the literature. A majority of patients with gender dysphoria that are prescribe puberty blockers are not involved in clinical care at either the Tavistock clinic or the Amsterdam clinic.

BY ATTORNEY BARHAM:

**Q. Is it --- in your practice, do the majority of children who receive puberty blockers for gender dysphoria go on to take cross sex hormones?**

A. Based upon the demographic of the patients that I'm seeing, particularly in Chicago, yes, but I'm not seeing the younger kids as much as I did in New York.

**Q. So as a practical and ethical matter the decision to put a child on puberty blockers must be considered as equivalent of a decision to put the children on cross sex hormones with all of the considerations and full consent obligations listed in that decision.**

A. I have not read through this paper, yet.

**Q. The lead authors are associated with the Tavistock?**

A. That is correct.

**Q. And that's part of the National Health Services of the UK.**

**Is that correct?**

A. That is correct?

**Q. And it's the leading and most respected clinic in the UK.**

**Correct?**

A. That I can't answer.

**Q. If you'll look at page 12, the authors indicate that one young person decided to stop GnRHa and did not start cross sex hormones due to continued uncertainty and concerns about the side effects of cross sex hormones, the remaining 43 or 98 percent elected to start cross sex hormones.**

**Is that correct?**

A. Correct.

**Q. So the vast majority of these children who received puberty blockers went onto take cross sex hormones.**

**Correct?**

**Correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: No.

BY ATTORNEY BARHAM:

**Q. Why do you say --- why do you disagree?**

A. Inherent in the informed consent process is a specific discussion of the risk benefits and alternatives of a specific intervention. Hormones are not puberty blockers, it's a separate discussion.

**Q. Even though the vast majority according to the research and according to your testimony go onto take cross sex hormones?**

ATTORNEY BLOCK: Objection to form and mischaracterizes testimony.

THE WITNESS: A description of the potential trajectories of development is a part of the discussion in an informed consent process for the engagement with puberty suppression agents. It's not the same as informed consent process discussion around the use of hormones at that time.

BY ATTORNEY BARHAM:

**Q. So when you're having an informed consent discussion surrounding the decision to start puberty blockers, do you discuss with parents and patients the**

**dangers associated with cross sex hormones?**

A. This is going to be very individualized discussions that we have with families. It's a very momentous decision to make this kind of treatment choice. The potential trajectories are all discussed and there's risk to everything. I don't think it is useful to use the term dangers in the context of medical care but it's about weighing risks of interventions but also weighing the risks of non-intervening. And it's appropriate to have those discussions about what those potential outcomes may be with each individual kid.

**Q. How do you get informed consent from a child?**

A. You get assent from a child, but you get informed consent from a parent.

**Q. How do you get --- how can a child even begin to understand the implications of starting puberty blockers and then potentially going to cross sex hormones, the effects that that may have on the fertility when the child is 12-ish?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Well, I have a skewed perspective here because of the work that I do, but there are 12-year-olds who are often much more capable of having that kind of informed decision than many

adults that I have encountered, which is to say it's an individualized assessment based upon multiple things, including the cognitive status of the child, their capacity to engage back and forth and have an open discussion and a realistic discussion about the potential benefits, risks and alternatives in specific intervention.

BY ATTORNEY BARHAM:

**Q. Is it your position that most 12-year-olds have a better understanding or a better capability of making decisions about their long-term fertility than adults?**

A. It is not my position and I will reflect that that was a statement meant in jest, but it does reflect some sense of reality in terms of the maturity level of 12-year-olds, not speaking to the maturity level of most 20-somethings in the world.

ATTORNEY BARHAM: I think this would be a good time to pause for your appointment and give you a few moments before that starts, so we'll go off the record.

VIDEOGRAPHER: Going off the record. The current time reads 3:37 p.m.

OFF VIDEOTAPE

---

(WHEREUPON, A SHORT BREAK WAS TAKEN.)

---

ON VIDEOTAPE

VIDEOGRAPHER: Back on the record the current time reads 4:31 p.m.

ATTORNEY BARHAM: All right. Let's go to Tab 16, which will be Exhibit Number 41.

---

(Whereupon Exhibit 41, Washington Post Article, was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q. This is will be a Washington Post article from January 10, 2022. Are you aware of the 2021/2022 season swimming events surrounding the University of Pennsylvania's swimmer Lia Thomas?**

ATTORNEY BLOCK: Objection to scope.

THE WITNESS: I have not been following closely, but I've heard about it.

BY ATTORNEY BARHAM:

**Q. Okay.**

**On page three of Exhibit 41, the article references that Lia Thomas in her first year in the Women's Division after more than a year of testosterone**

**suppression set the Women's Division record in two events.**

**Do you see that?**

A. I see that, yes.

**Q. And Lia Thomas beat the best time of women's Olympian Torri Huske in the 200 freestyle.**

**Do you see that?**

A. I see that.

ATTORNEY BLOCK: I just want to note an objection to foundation, that there's no URL. This appears to be cut and pasted. So I'm just noting that for the record.

ATTORNEY BARHAM: And I would note For the record that there is an URL at the bottom of page --- at the bottom of each page.

ATTORNEY BLOCK: Thanks. It's not visible from what's on the screen.

ATTORNEY BARHAM: Okay.

Just trying to be clear.

BY ATTORNEY BARHAM:

**Q. Is it your position that it is fair for Lia Thomas to compete in the Women's Division of swimming?**

ATTORNEY BLOCK: Objection to scope.

THE WITNESS: I don't have an opinion on

1 the fairness.

2 BY ATTORNEY BARHAM:

3 **Q. Do you believe that it's beneficial to Lia**  
4 **Thomas' mental health to compete in the Women's**  
5 **Division?**

6 A. I couldn't tell you that unless I had evaluated  
7 Lia Thomas herself.

8 **Q. But it's your opinion as expressed in**  
9 **paragraph 52 of your report that no reasonable mental**  
10 **health professional could conclude that the Act is**  
11 **anything but harmful to the mental health of transgender**  
12 **youth.**

13 **Is that correct?**

14 A. I would say youth as a class, yes, that is  
15 correct, but the specific details of that impact are not  
16 going to be known and I wouldn't care to surmise on it  
17 for a specific individual that is not under my care.

18 **Q. Okay.**

19 **But it's your position that allowing a**  
20 **transgender --- or allowing natal males to compete in**  
21 **the Women's Division if they are gender dysphoric is**  
22 **beneficial to their mental health, in general.**

23 **Correct?**

24 ATTORNEY BLOCK: Objection to terminology

1 A. I have not heard of Iszac Henig until today at  
2 least by name.

3 **Q. Do you see on the first page of this article the**  
4 **article reads Henig, a trans man competing on the**  
5 **women's swimming team at Yale?**

6 A. I see that, yes.

7 **Q. So in this event a biological male identifies as**  
8 **female, Lia Thomas, competed against a biological female**  
9 **who identifies as male, Iszac Henig, in the women's**  
10 **competition?**

11 ATTORNEY BLOCK: Objection can you give  
12 him a chance to read the article. He's never seen or  
13 heard of this before?

14 THE WITNESS: It seems that is what  
15 stipulated in the article.

16 BY ATTORNEY BARHAM:

17 **Q. Okay.**

18 **According to the terminology you prefer, do you**  
19 **consider Henig to be anything other than a man?**

20 ATTORNEY BLOCK: Objection to form.

21 THE WITNESS: I will typically ask the  
22 individuals that I'm working with or engaging with how  
23 they choose to define their own sense of labels. Not  
24 knowing Iszac I can't speak for him.

1 and form.

2 THE WITNESS: In my report, excluding  
3 transgender youth can be harmful to their mental health.  
4 BY ATTORNEY BARHAM:

5 **Q. And when you say excluding them you mean**  
6 **excluding them from competition consistent with their**  
7 **gender identity.**

8 **Is that correct?**

9 A. That is correct.

10 ATTORNEY BARHAM: All right.

11 I want to show you Tab 17 now. This will  
12 be Exhibit-42.

13 ---

14 (Whereupon, Exhibit 42, Out Sports  
15 Article, was marked for identification.)

16 ---

17 BY ATTORNEY BARHAM:

18 **Q. Have you read about Iszac Henig before today?**

19 A. I have not.

20 **Q. This is an article from Out Sports published on**  
21 **January 9th, 2022, by Karleigh Webb entitled Trans**  
22 **swimmers Lia Thomas and Iszac Henig went head-to-head in**  
23 **the pool, each getting wins. Are you aware that Iszac**  
24 **Henig is a biological female who identifies as male?**

1 BY ATTORNEY BARHAM:

2 **Q. Okay.**

3 **But according to the terminology that you've**  
4 **been using Iszac would be an individual assigned female**  
5 **sex at birth and identifying as male.**

6 **Correct?**

7 A. Again, I don't see ---

8 **Q. Henig a trans man?**

9 A. --- a description of his words to describe his  
10 identity, so I can't say how he identifies himself, but  
11 it appears through that that's how --- that is the  
12 implication of the article at least.

13 **Q. In the article it uses masculine pronouns to**  
14 **refer to Henig.**

15 **Correct?**

16 A. Yes.

17 **Q. Do you think it'd beneficial to Henig's mental**  
18 **health to compete on the women's team?**

19 A. Again, I can't answer that unless I had  
20 evaluated Henig myself.

21 **Q. In general, if you have a transgender individual**  
22 **who wants to compete on the team consistent his or her**  
23 **biological sex, do you think it's beneficial to his or**  
24 **her mental health to be allowed to do so?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Again, this is an individualized discussion that you have with patients. With the patients that I've had I have had patients who would be harmed by having to compete with the cohort of kids who were aligned with their sex assigned at birth.

BY ATTORNEY BARHAM:

**Q. I understand your position about kids who are forced to do something, what about kids who want to compete with that same cohort, do you think it's beneficial to allow them to compete as they see fit?**

A. As a mental health professional working with kids and families, it really is an individualized discussion. There is not going to be a specific answer that's universal for all kids.

**Q. Do you believe that if Henig were prevented from competing with the women's team as desired, that it could be harmful to Henig's mental health ---**

ATTORNEY BLOCK: Objection to form.

BY ATTORNEY BARHAM:

**Q. --- possibly?**

A. I can't speak to the specifics about a person that I've never evaluated.

**Q. If it is harmful to someone's mental health to**

**Is that correct?**

A. We're talking specifically about the study participants on perceptive perceptions of conversion therapy.

**Q. But that's what's meant by those conversion efforts.**

**Correct?**

A. Correct.

**Q. In footnote six you cite an article by Turban published in 2020.**

**Is that correct?**

A. That is correct.

ATTORNEY BARHAM: All right. I'm going to show you Tab 113, which will be Exhibit 43.

---

(Whereupon, Exhibit 43, Article by Turban, et al., was marked for identification.)

---

BY ATTORNEY BARHAM:

**Q. This is an article published by Turban, et al. published in 2020, it's entitled Association Between Recalled Exposure to Gender Identity Conversion Efforts**

**be prevented from participating in athletics on a team consistent with their gender identity, could it be harmful to their mental health to be prevented from competing on a team consistent with their biological sex if they so wanted to?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I think there's a whole host of hypotheticals that could potentially be possible.

BY ATTORNEY BARHAM:

**Q. And that is one of them?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: That's possible.

ATTORNEY BARHAM: Okay.

BY ATTORNEY BARHAM:

**Q. In paragraph 34 of your report you write a recent study found people who reported experiencing those conversion efforts were more likely to report an attempted suicide, especially those who reported receiving such therapy in childhood.**

**Do you see that?**

A. I see that.

**Q. And there we are talking about conversion therapy.**

**and Psychological Distress and Suicide Attempts Among Transgender Adults. This is the article that you cited in your report.**

**Is that correct?**

A. That is correct.

**Q. And this is the article cited in footnote six as support for the proposition that studies that found that people who reported conversion efforts are more likely to have reported suicide.**

**Correct?**

A. That's correct.

**Q. On page two of this article the authors --- and by this article I'm referring to Exhibit 43. The authors note that they rely upon data from the National Center for Transgender Quality and its 2015 transgender survey.**

**Correct?**

A. That is correct.

**Q. On page eight of this document, the authors admit that it is cross sectional study designed precludes determination of causation.**

**Correct?**

A. I don't have page numbers. Which one is that?

**Q. It's the one with strengths and limitations at**

1 the heading at the bottom.

2 A. Can you repeat the question?

3 **Q. On page eight, the authors admit that the**  
4 **studies cross-sectional study design precludes**  
5 **determination of causation.**

6 **Correct?**

7 A. That is correct.

8 **Q. The authors also admit that those with worse**  
9 **mental health or internalized transphobia may have been**  
10 **more likely to seek out conversion therapy rather than**  
11 **non GICE therapy suggesting conversion efforts itself**  
12 **were not causative of these poor mental health outcomes.**

13 **Correct?**

14 A. That is what is written, correct.

15 **Q. Okay.**

16 **So this study does not establish a causal link**  
17 **between conversion therapy and suicidality.**

18 **Correct?**

19 A. That is correct.

20 **Q. The authors also admit that they lack data**  
21 **regarding the degree to which GICE occurred.**

22 **Correct?**

23 A. That is correct.

24 **Q. And they also admit that they lacked information**

1 article by Ryan, et al. published in 2010 entitled  
2 Family Acceptance in Adolescence and the Health of LGBT  
3 Young Adults.

4 ---

5 (Whereupon, Exhibit-44, Article by Ryan,  
6 et al., was marked for identification.)

7 ---

8 BY ATTORNEY BARHAM:

9 **Q. This is the article that you cited in footnote**  
10 **seven of your report.**

11 **Correct?**

12 A. That is correct.

13 **Q. On page 206, in the second column, the authors**  
14 **note that they relied on a sample of 245 people.**

15 **Is that correct?**

16 A. That is correct.

17 **Q. Of that sample, only nine percent identified as**  
18 **transgender.**

19 **Correct? That's on page 208.**

20 A. Correct.

21 **Q. That means we're talking about nine people.**

22 **Correct? 245 times nine percent is 22.05.**

23 A. I'll take your math.

24 **Q. On page 210 the authors admit that they cannot**

1 as to what specific modalities were used.

2 **Correct?**

3 A. That is correct.

4 **Q. Turban et al., in 2020 also admits that**  
5 **participants were not recruited via random sampling and**  
6 **thus the sample may not be nationally representative.**

7 **Is that correct?**

8 A. That is correct.

9 **Q. In paragraph 37 you go on to say that**  
10 **conclusions further supported by extensive evidence that**  
11 **rejection of a young person's gender identity by family**  
12 **and peers is the strongest predictor for adverse mental**  
13 **health outcomes.**

14 **Is that correct?**

15 A. That is correct.

16 **Q. And you cite in that article --- you cite in**  
17 **footnote seven an article by Ryan, et al. published in**  
18 **2010.**

19 **Is that correct?**

20 A. I'm not seeing that.

21 **Q. In footnote seven?**

22 A. Oh, in footnote seven, yes.

23 ATTORNEY BARHAM: I'm going to show you  
24 what we will mark as Exhibit-44, which is Tab 114, an

1 **claim that this sample is representative of the general**  
2 **population of LGBT individuals.**

3 **Is that correct?**

4 A. That is correct.

5 **Q. On page 210 to 211 the authors recognize that**  
6 **this is a retrospective study, which, quote, allows for**  
7 **the potential of recall bias in describing specific**  
8 **family reactions to their LGBT identity.**

9 **Correct?**

10 A. That is correct.

11 **Q. And then in footnote seven of your report you**  
12 **also cite an article by Klein and Golub published in**  
13 **2016.**

14 **Correct?**

15 A. That is correct.

16 **Q. All right.**

17 ATTORNEY BARHAM: I'm going to show you  
18 what we will mark as Exhibit 45, which is Tab 15.

19 ---

20 (Whereupon, Exhibit-45, Article by Klein  
21 and Golub, was marked for  
22 identification.)

23 ---

24 BY ATTORNEY BARHAM:

**Q. This is an article by Klein and Golub entitled Family Rejection as a Predictor of Suicide Attempts. This article simply says that family rejection is a predictor of suicide attempts and substance abuse among transgender and gender non-conforming adults.**

**Correct?**

ATTORNEY BLOCK: Objection. Can you point to where you are reading from?

ATTORNEY BARHAM: The title.

THE WITNESS: They identify as a predictor, yes.

BY ATTORNEY BARHAM:

**Q. In fact, the word strongest does not even appear in this article.**

**Is that correct?**

ATTORNEY BLOCK: Objection.

THE WITNESS: I would have to read the whole article.

ATTORNEY BLOCK: Let him read it.

THE WITNESS: The authors note on page 195 on a multi-variant model moderate levels of family rejection were associated with almost twice the odds of attempted suicide and high levels of family rejection were associated with almost three and a half

times the odds of attempted suicide. While there is not any use of the word stronger, I don't see any additional risks that were highlighted in this specific study.

BY ATTORNEY BARHAM:

**Q. Okay.**

**On page 197 stemming over on to 198 the authors admit that they relied on data NTDS that use sampling techniques that were not random and included a homogenous study population that was largely white, educated and employed.**

**Correct?**

A. That is correct.

**Q. Do you agree with them that this limits the generalizability of the article's findings?**

A. I do.

**Q. The authors also admit that the cross sectional nature of the data did not allow us to determine any causal relationship between family rejection and the negative health-related outcomes.**

**Correct?**

A. Correct.

**Q. The authors also indicate that they did not have any information about the timeframe within which family rejection occurred, including what precipitated the**

**event, the severity of the rejection or whether this changed over time.**

**Correct?**

A. Correct.

**Q. Do you agree with them that these factors might have influenced their results?**

A. Sure.

**Q. All right.**

**Let's go to Tab 97, which is Exhibit 16. This article we discussed before, but this reviews the Turban article that you cited in footnote seven of your report.**

**Is that correct?**

A. That is correct.

**Q. Or footnote six of your report. Okay.**

**And in your report you are using the Turban 2020 article to critique the use of what you describe as conversion therapy.**

**Is that correct?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I'm just pulling this up where I have it. As I stated in my report, the Turban article found that people who reported experiencing those conversion efforts were more likely to have reported attempting suicide.

BY ATTORNEY BARHAM:

**Q. So you're using it to critique what you described as conversion therapy.**

**Is that fair?**

A. I think that's fair.

**Q. On page two of Dr. D'Angelo's letter to the editor he notes at the top of the first --- towards the top of the first column that Turban's analysis used data from the 2015 USTS survey of transgender identifying individuals, this survey is convenient sampling methodology which generates lower quality data.**

**Would you agree that convenient sampling generates low quality data?**

A. Convenient sampling generates lower quality data. And then some other statistical method of study design. One of the ways that you want to counteract that potential for low quality of data is to have increased number of participants. The difference of 27,000 participants in this particular survey analysis versus say 100 in another, 40 in another does add a little bit more context to the applicability of these findings.

**Q. Right below that Dr. D'Angelo, et al. notes that the participants were recruited through transgender**

1 advocacy organizations and subjects were asked to pledge  
2 to promote survey among friends and family. This  
3 recruiting method yielded a large but highly skewed  
4 sample. Would you agree that the sample for this survey  
5 was highly skewed?

6 ATTORNEY BLOCK: Objection to form.

7 THE WITNESS: I think we'd have to  
8 understand what specifically you mean by skewed and  
9 skewed in what way. It's hard to know.

10 BY ATTORNEY BARHAM:

11 **Q. The authors go on in Table 1 to demonstrate what**  
12 **they mean by skewing of the data. Upon reviewing their**  
13 **information, would you agree that the sample was skewed?**

14 ATTORNEY BLOCK: Objection to form.

15 THE WITNESS: Again, I'm not sure skewed  
16 in comparative --- comparison to what?

17 BY ATTORNEY BARHAM:

18 **Q. The authors continue on page two by saying that**  
19 **a number of additional data irregularities in the USTS**  
20 **raise further questions about the quality of the data**  
21 **captured by the survey. They talk about how high number**  
22 **of survey participants had not transitioned medically or**  
23 **socially, significant number reported no intention to**  
24 **transition in the future. The information about**

1 they were disqualified from completing the survey. They  
2 note that this failure is a serious oversight.

3 **Do you agree with them that that's a serious**  
4 **oversight?**

5 ATTORNEY BLOCK: Objection to form.

6 THE WITNESS: I would need to look at the  
7 specific survey instructions for the survey in question  
8 to understand the validity of that. I don't see how in  
9 the context of this that folks who detransitioned were  
10 specifically excluded, but ---.

11 BY ATTORNEY BARHAM:

12 **Q. Did you review ---?**

13 A. Can you point to where that --- where in the  
14 original article or the study that those folks are  
15 excluded specifically. I may have missed it.

16 **Q. I don't have the original survey on hand at the**  
17 **moment. If it proved that they were excluded, would you**  
18 **agree that that would be a serious oversight?**

19 ATTORNEY BLOCK: Objection to form.

20 THE WITNESS: It would really depend on  
21 how that was done and what the language was used.  
22 Without seeing it I can't make a comment otherwise.

23 BY ATTORNEY BARHAM:

24 **Q. What if there was no language involved, it was**

1 treatments does not appear to be accurate as a number of  
2 respondents reported the initiation of puberty blockers  
3 after the age 18, which is highly improbable. Further,  
4 the survey has developed special waiting due to  
5 unexpected high proportion of respondents who reported  
6 that they were exactly 18 years old. Do you agree that  
7 these irregularities raise serious questions about the  
8 reliability of the data?

9 A. I think these are all elements that you want to  
10 take into context as you're establishing validity of the  
11 data and the conclusions that could be drawn.

12 **Q. The second column of page two, the authors note**  
13 **that the emphasis on the survey's goals to highlight the**  
14 **injustices suffered by transgender people during the**  
15 **recruitment stage in the introduction of the survey**  
16 **instrument itself made it eligible for reporting adverse**  
17 **experiences due to demand bias.**

18 **Do you agree that this demand bias likely**  
19 **skewed the responses?**

20 A. I wouldn't agree that it likely, but that  
21 implies that we have data that we don't have. It's a  
22 possibility that these authors are raising.

23 **Q. Now, the authors also note that the experience**  
24 **of detransitioners and the sisters were not included, as**

1 just those who indicated that they were either desisting  
2 or detransitioning or not included in the data set?

3 A. I would need to see the context of it in order  
4 to make a judgment on the validity of that structure.

5 **Q. On page four of this document. The authors note**  
6 **that Turban's hypothesis is further weakened by a**  
7 **significant flaw in their data analysis failure to**  
8 **control for individuals pre-GICE exposure mental health**  
9 **exposure status, noting that this is a potential**  
10 **compound and may mask reverse causation.**

11 **Do you have any scientific basis for disputing**  
12 **that concern?**

13 A. Let me review this part of the paper, please.

14 ATTORNEY BLOCK: Just objection. I don't  
15 think he read the full the sentence.

16 THE WITNESS: I have not seen any  
17 literature on specific risks or predictors for  
18 individuals who would be exposed to gender identity  
19 conversion efforts, and so the supposition inherent in  
20 this paragraph that the authors are making that an  
21 individual's underlying poor mental health led to their  
22 experience of gender identity conversion efforts is not  
23 supported by my understanding of the literature.

24 BY ATTORNEY BARHAM:

**Q. Do you have any reason to dispute a potential for a confound or the potential for masking reversed causation that the authors identify here?**

A. As I described, I haven't seen any literature that speaks to this nor has that been my clinical experience.

**Q. On page two of this document the authors note that Turban's conclusions rest on the assumption that they have a valid way of determining whether or not the respondent was exposed to the unethical practice of conversion therapy. Do you agree that this lack of context in detail renders the question incapable of differentiating between ethical non-affirming --- non-affirmative neutral and counters unethical conversion therapy?**

A. I do not.

ATTORNEY BLOCK: Sorry, objection to form.

BY ATTORNEY BARHAM:

**Q. Back on page four the authors note that the failure to control for the subjects' baseline mental health makes it impossible to determine whether the mental health or suicidality of a subject person stayed the same or potentially even improved after the**

**non-affirming encounter. Do you have any scientific basis for disputing this observation?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Again, if we wanted to go back to the Turban study itself and look more specifically at their methodology and their description that would be a more accurate way of getting a potential ups and downs side of this study other than this letter to the editor.

BY ATTORNEY BARHAM:

**Q. But do you have any basis for -- any scientific basis for disputing that observation?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: This question gets to a very specific type of study designed methodology. That is something that typically is done by a data scientist, which is not where my level of expertise is. There are nuances in it. What I would say is in a population as large of a survey that having a denominator as high as they had helps to reduce the chances of confounders like the authors in this letter to the editor are describing as problematic.

BY ATTORNEY BARHAM:

**Q. A little bit later on page five the authors**

**highlight the cross sectional design of the USTS and indicate that presenting a highly confounded association of causation is a serious error.**

**Do you agree that presenting a confounded association as causation is a serious error?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I have not claimed nor do I understand my reading of the Turban, et al. article to claim causation when an association has been found, and in fact, they specifically called out that it was not causative or at least the analysis could not prove it was causative with a cross-sectional design.

BY ATTORNEY BARHAM:

**Q. So when you wrote paragraph 34 of your report and said that a study found that people who reported experiencing these conversion efforts were more likely to have reported attempting suicide, especially those who reported receiving such therapy in childhood, were you suggesting that the conversion efforts caused the suicide attempts?**

A. I believe in my testimony I am saying that there is a relationship between those who are exposed to conversion efforts and those who have described reporting attempting suicide.

**Q. And how would you describe that relationship?**

A. As an association.

**Q. Is association a synonym for correlation?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: It depends on the context, but generally in plain English association and correlation are relative synonyms for one another.

BY ATTORNEY BARHAM:

**Q. In this specific context of your report, when you say that you are reporting an association, were you using association in correlation to synonyms?**

A. As far as I know I was, yeah.

**Q. Have you had patients impacted by not being allowed to play sports consistent with their gender identity?**

A. On occasion, yes.

**Q. Approximately how many such patients?**

A. On the order of less than two or three.

**Q. What sports were those patients participating in?**

A. I do not recall the specific. These were --- the two or three that I had were all in the order of between five, six and seven-year-olds.

**Q. What was your follow-up with each patient?**

1 A. With those particular kids?

2 **Q. Yes.**

3 A. Without having their charts in front of me, it's  
4 hard to expound. My typical process would be  
5 understanding why it's happening, what they need and how  
6 to coordinate with whatever program to help make sure  
7 that the kid gets the support that is going to be most  
8 beneficial to them.

9 **Q. Are you offering an opinion that the State of**  
10 **West Virginia does not have a strong interest in**  
11 **ensuring safe competition for women?**

12 ATTORNEY BLOCK: Objection to form.

13 THE WITNESS: My testimony is about the  
14 mental health impacts. I don't have an opinion on the  
15 state interests of West Virginia in this regard.

16 BY ATTORNEY BARHAM:

17 **Q. Are you offering an opinion that the State of**  
18 **West Virginia does not have a strong interest in**  
19 **ensuring fair competition?**

20 ATTORNEY BLOCK: Objection to form.

21 THE WITNESS: Same answer.

22 BY ATTORNEY BARHAM:

23 **Q. Would you agree that ensuring fairness and**  
24 **safety is an important state interest.**

1 ATTORNEY BLOCK: Objection to form and  
2 scope.

3 THE WITNESS: Same answer.

4 ATTORNEY BARHAM: All right. I believe  
5 those are all my questions for today. I will turn the  
6 floor over to Mr. Tryon.

7 ATTORNEY TYRON: Okay.

8 Here I am.

9 ---

10 EXAMINATION

11 ---

12 BY ATTORNEY TRYON:

13 **Q. My name's David Tryon. I am with the West**  
14 **Virginia Attorney General's Office and represent the**  
15 **State of West Virginia. So we've got about an hour**  
16 **left. Do you want to just keep on going and finish up**  
17 **or would you like to take a break for five minutes**  
18 **before we finish up?**

19 A. I think let's keep going. If I have to take a  
20 break, I'll let you know. I appreciate it.

21 **Q. Okay.**

22 **You bet. Happy to help you out that way again.**  
23 **I just want to follow up, first of all, on a couple of**  
24 **questions about the Turban study, if I may, that we were**

1 **just discussing. And Exhibit 16 I believe was the**  
2 **document that addressed that Turban study.**

3 A. I see Exhibit 16 as the letter to the editor  
4 from D'Angelo, et al.

5 **Q. And that's the one that we were just looking at**  
6 **addressing the Turban study.**

7 **Right?**

8 A. Correct.

9 **Q. So let me just ask you, you did cite the Turban**  
10 **study in your report.**

11 **Right?**

12 A. Yes.

13 **Q. Yeah, and that was to support your opinion.**

14 **Right?**

15 A. That is to support my opinion, yes.

16 **Q. Now, before you used it did you do something to**  
17 **cite check it to see if there were any articles that**  
18 **either challenged it or critiqued it or criticized it?**

19 A. I would say that a routine review of the  
20 literature is a part of my day-to-day practice. This  
21 particular article did not come up in that review.

22 **Q. Okay.**

23 **Is there a way to specifically search for it to**  
24 **see if --- to look at it and then do a search and see**

1 **what other articles are quoted or cited?**

2 A. My guess is there probably is, I'm not aware of  
3 it.

4 **Q. But I think you said you were not aware of the**  
5 **letter which is Exhibit 16 prior to issuing your expert**  
6 **report.**

7 **Is that right?**

8 A. That is correct.

9 **Q. Would it have been helpful to have seen that**  
10 **ahead of time?**

11 A. I think it would have been helpful for me to  
12 feel more prepared in this deposition. I don't think it  
13 would have changed any of my report.

14 **Q. If you had that, would you have investigated**  
15 **those criticisms to see if they were failed criticisms?**

16 A. The authors of the Turban study had raised most  
17 of those criticisms themselves in the context of their  
18 report.

19 **Q. And did you independently look at it and**  
20 **determine if they were --- if that caused you some**  
21 **concerns?**

22 A. Concerns wouldn't be the right word. It's about  
23 weighing the evidence and making sure that we understand  
24 context and applicability. There's nothing in this

1 letter to the editor that changes those demands from my  
2 reading of the Turban article.

3 **Q. So you are saying that this letter in the Turban**  
4 **article --- I'm sorry, you're saying this letter to the**  
5 **editor does not raise any new issues at all than what**  
6 **the Turban study itself raised.**

7 **Is that right?**

8 A. I would have to read through this in a more  
9 detailed manner to say for certain that no single issue  
10 has been addressed. None of which we discussed today  
11 are elements that hadn't been addressed, either by  
12 myself reading the Turban article or by the Turban, et  
13 al. in the article itself.

14 **Q. But you do not raise any of those concerns in**  
15 **your report, do you?**

16 ATTORNEY BLOCK: Objection to form.

17 THE WITNESS: No. No, not specifically.

18 BY ATTORNEY TRYON:

19 **Q. Okay. Fair enough.**

20 **If you can follow your report now, which I'm**  
21 **forgetting which exhibit that is, Exhibit 1. Thank you.**

22 **So first of all, you said you were retained by**  
23 **Counsel for the Plaintiffs as an expert. Can you tell**  
24 **me when you were retained, please?**

1 A. I would have to pull up my invoice to give you  
2 the specific date, and I'm guessing Mr. Block might have  
3 that information at the ready.

4 **Q. Unfortunately, I can't depose him. I would love**  
5 **to, but I don't think he would agree to that. So as**  
6 **best you can recall --- first of all, was it this year**  
7 **or last year?**

8 A. It was this year to the best of my recollection.

9 **Q. Okay.**

10 **Was it after the other expert reports came out**  
11 **or before?**

12 A. I believe I was hired or retained. I don't know  
13 what the correct terminology is so forgive me, after the  
14 development of the additional expert reports. It was  
15 the rebuttal to those reports that led to my being  
16 retained to my recollection.

17 **Q. I'm sorry?**

18 A. From my recollection. And I'm terrible with  
19 dates, so I apologize for that.

20 **Q. In paragraph four, you say --- you explain what**  
21 **you viewed and you mention the reports of Dr. Safer.**  
22 **Does that refer to Dr. Safer's original report that was**  
23 **filed with the Court and his rebuttal report --- strike**  
24 **that.**

1 **Does that --- so he filed something with the**  
2 **Court originally. Did you review that one?**

3 A. It was the original report that I had reviewed.

4 **Q. Okay.**

5 **So let me just be clear. So he filed an**  
6 **original report back in --- last year and then issued a**  
7 **new report in February of this year and then issued a**  
8 **rebuttal report. So a total of three. Did you see all**  
9 **three of those?**

10 A. I would have to see them ---.

11 ATTORNEY BLOCK: Object to form.

12 THE WITNESS: I would have to see them in  
13 front of me to know if it was something that I had read.  
14 I don't know the terminology well enough to know if I  
15 was reading the original report or rebuttal report or  
16 the third type.

17 BY ATTORNEY TRYON:

18 **Q. So one of them was expert report which was**  
19 **issued I believe in February of this year. I believe**  
20 **you saw that one.**

21 A. Again, I would have to see the report in front  
22 of me to know if it was the one I saw.

23 **Q. Okay.**

24 **There was another one which was labeled as**

1 **rebuttal. Do you remember if you saw that one?**

2 A. I would have to go back through my notes. I  
3 don't have it in front of me, so I apologize for not  
4 recalling.

5 **Q. Well, let me ask you this question. Do you**  
6 **remember how many reports you saw from Dr. Safer?**

7 A. All I can say is I remember seeing at least two.

8 **Q. Very good. And Dr. Adkins, how many of her**  
9 **reports did you see?**

10 A. I can't be certain, but I think I also saw two  
11 of hers.

12 **Q. And I'll represent to you that each of them**  
13 **issued a rebuttal report. And did you read their**  
14 **rebuttal reports prior to preparing your rebuttal**  
15 **report?**

16 A. I don't have the documentation in front of me in  
17 terms of when I was spending time on what piece of this  
18 process. That's a part of my notes that are not here  
19 today.

20 **Q. Do you know why you were asked to issue a**  
21 **rebuttal report if Dr. Safer and Dr. Adkins were both**  
22 **issuing rebuttal reports?**

23 ATTORNEY BLOCK: Objection. Just don't  
24 discuss any of the contents of your communications with

1 the attorneys.

2 ATTORNEY TRYON: Correct.

3 THE WITNESS: My understanding was to  
4 rebut the reports of Dr. Levine and Dr. Cantor.

5 BY ATTORNEY TRYON:

6 **Q. Is your rebuttal different than the rebuttals of**  
7 **Dr. Adkins and Dr. Safer?**

8 ATTORNEY BLOCK: Objection to form.

9 THE WITNESS: Yes.

10 BY ATTORNEY TRYON:

11 **Q. Pardon me?**

12 A. Yes.

13 **Q. Does your rebuttal report have any opinions**  
14 **which are different from Dr. Safer and Dr. Adkins'**  
15 **reports?**

16 ATTORNEY BLOCK: Objection to form.

17 THE WITNESS: I think it's hard without  
18 the specific reports in front of me. I know they were  
19 long documents and I was specifically rebutting the  
20 reports of Dr. Levine and Cantor.

21 BY ATTORNEY TRYON:

22 **Q. Do you have any specific reports that are not**  
23 **rebutting Dr. Levine and Dr. Cantor?**

24 A. The process of developing this rebuttal report

1 very gestalt that the clinician uses to rate a child.

2 It's not an instrument that I find clinically useful.

3 **Q. Is it not clinically useful because it doesn't**  
4 **have objective criteria?**

5 A. I wouldn't say it's fair to say that there are  
6 no objective criteria, but there are at times  
7 contradictory objective criteria within the CGAS. And  
8 again I would have to see the CGAS in front of me to  
9 point out those specifics, but there are other  
10 functions, or other ways of measuring outcomes than the  
11 CGAS.

12 **Q. What is an objective criteria? What does that**  
13 **term mean in other words?**

14 ATTORNEY BLOCK: Objection to form.

15 THE WITNESS: I guess what would say is  
16 we would want a psychometrically valid approach for  
17 answering a question, ideally that is of clinical  
18 relevance.

19 BY ATTORNEY TRYON:

20 **Q. Can you just repeat your answer for me? I**  
21 **didn't quite understand it.**

22 A. Probably not the same language. A  
23 psychometrically valid tool that in an ideal world  
24 provides some kind of clinical relevance.

1 was for that specific intent.

2 **Q. So you don't believe you have any original**  
3 **opinions to report; would that be a fair statement?**

4 ATTORNEY BLOCK: Objection to form.

5 THE WITNESS: I'm not --- I guess I'm not  
6 sure what you mean by original opinions.

7 BY ATTORNEY TRYON:

8 **Q. So let's move on. Do you recall the Costa**  
9 **study?**

10 A. Yes, we had reviewed one Costa study earlier.  
11 Can you remind me of the exhibit number?

12 **Q. I believe it's Exhibit 27?**

13 A. All right. Okay.

14 **Q. I believe that during that discussion you**  
15 **referred to the standards in there as being rough or**  
16 **imprecise measure and --- let me get this right, and not**  
17 **objective criteria.**

18 **Do you remember that?**

19 A. I had described the CGAS, the Children's Global  
20 Assessment Scale, as an imprecise measure of children's  
21 functioning.

22 **Q. And you said not having any objective criteria;**  
23 **can you help with that?**

24 A. Yes, it's a scale from zero to a hundred that is

1 **Q. Okay.**

2 **You said psychometrically valid tool.**

3 **Did I get that right?**

4 A. Psychometrically validated tool, yes.

5 **Q. Validated?**

6 A. Yes.

7 **Q. What is that?**

8 A. Essentially you want to understand that the  
9 measure you're using is measuring what it says to  
10 measure and is reliable across multiple domains. The  
11 CGAS has been widely used in research, it's just not my  
12 favorite tool because I don't find it to have that  
13 second domain of having that clinical utility.

14 **Q. Let me ask you to take a look at paragraph 19 of**  
15 **your opinion?**

16 A. I'm looking at it now.

17 **Q. You say at one point it says contrary to the**  
18 **portrayal. Do you see that sentence?**

19 A. I see that, yes.

20 **Q. Contrary to the portrayal in Dr. Levine and Dr.**  
21 **Cantor's reports, gender-affirming treatment also**  
22 **requires a careful and thorough assessment of a**  
23 **patient's mental health, including co-occurring**  
24 **conditions, history of trauma, and substance abuse among**

1 **many other factors. My question for you is with respect**  
 2 **to your language, a careful and thorough assessment, and**  
 3 **I'd like to then know are there psychometrically**  
 4 **validated tools used to do that?**

5 A. There are on occasion, and particularly when  
 6 we're looking at research outcomes for transgender youth  
 7 there are a number of psychometrically validated  
 8 screenings or outcome measures that are used.

9 **Q. What are those?**

10 A. These include most importantly the Utrecht  
 11 Gender Dysphoria Scale, the Body Image Scale,  
 12 historically what's in the Dutch data, the Toronto data,  
 13 and the Costa data and The Tavistock Clinic, all of them  
 14 were participatory in kind of the informal research  
 15 group that agreed to collect the same measures, so these  
 16 included the Achenbach, CBCL, and they use self report.

17 **Q. I'm sorry. What was the first one you said**  
 18 **before Body Image Scale?**

19 A. Utrecht Gender Dysphoria Scale.

20 **Q. Utrecht Gender Dysphoria Scale?**

21 A. Correct.

22 **Q. What is that?**

23 A. It's a measure of the degree and intensity of  
 24 gender dysphoria.

1 **Q. How is it --- what does it look like? Does it**  
 2 **have a series of scale one to ten on different issues or**  
 3 **what is it?**

4 A. It's a series of questions that I'd have to have  
 5 in front of me to give a better job of describing, but  
 6 it provides a rating of --- I can't remember what the  
 7 range is, from zero to somewhere in the low dozens, that  
 8 correlates with the intensity of gender dysphoria.

9 **Q. Is that something that you use in your practice**  
 10 **to diagnose gender dysphoria?**

11 A. It is an element that I have used.

12 **Q. Do you use that with every patient?**

13 A. It is not something that I use with every  
 14 patient. The contents of the Utrecht Gender Dysphoria  
 15 Scale are generally pieces that I'm getting or gathering  
 16 from every clinical encounter without necessarily  
 17 utilizing the specific tool.

18 **Q. This statement, a careful and thorough**  
 19 **assessment, does that have a --- is there a source for**  
 20 **that particular standard?**

21 A. There are a number of sources for this  
 22 particular standard. The general practice of children's  
 23 mental health from my guild in child adolescence  
 24 psychiatry, there are years of training and

1 certification in order for you to have demonstrated a  
 2 careful and thorough assessment. In order to get Board  
 3 Certified I had to do a careful and thorough assessment  
 4 in front of a board of examiners, so this is inherent to  
 5 the practice of mental health.

6 **Q. Is there --- but there is no requirement that**  
 7 **these various standardized tools that you mentioned to**  
 8 **me, these psychometrically valid tools have to be used,**  
 9 **is there?**

10 A. There isn't, and there is not a clinical  
 11 verification that they be used in every instance. For  
 12 the sake of these kind of studies, it's important to  
 13 have these validated tools so we're all speaking the  
 14 same language and that outcomes can be tracked over  
 15 time, but not necessarily in every clinical event is it  
 16 going to be warranted.

17 **Q. If you don't use them in every clinical event,**  
 18 **then how can how can you adequately track something**  
 19 **across patients if you wanted to do a study?**

20 ATTORNEY BLOCK: Objection to form.

21 THE WITNESS: As an example there are a  
 22 number of psychometrically validated tools that cannot  
 23 be administered at every clinical encounter, otherwise  
 24 they would be rendered invalid. So there's a lot of

1 nuance in these specific tools and I think that level of  
 2 nuance is really a clinical judgment based upon  
 3 professional and prevailing standards.

4 BY ATTORNEY TRYON:

5 **Q. Okay.**

6 **So there's no objective measure of someone**  
 7 **other than --- well, let me back up. So different**  
 8 **psychiatrists would come up with different conclusions.**

9 **Is that right?**

10 ATTORNEY BLOCK: Objection to form.

11 THE WITNESS: I don't think that's  
 12 related to what I was speaking about. I think different  
 13 psychiatrists would utilize different instruments to  
 14 provide an assessment, and that's going to change from  
 15 person to person. I can't speak to diagnostic  
 16 reliability for a psychiatrist that I haven't met or  
 17 trained.

18 BY ATTORNEY TRYON:

19 **Q. Let me ask you how long you would normally spend**  
 20 **with a child before --- or adolescent before prescribing**  
 21 **puberty blockers?**

22 ATTORNEY BLOCK: Objection to form.

23 THE WITNESS: There is not going to be a  
 24 single answer to that question. It really is dependent

on the requirements of the assessment, as well as the individual factors of that child and that family.

BY ATTORNEY TRYON:

**Q. Could ten minutes be long enough?**

A. Not in my opinion.

**Q. What about 30 minutes?**

A. Likely not.

**Q. How about an hour?**

A. It would be very atypical in my practice to spend that little time prior to making a recommendation for puberty suppression. I do a much more thorough assessment than an hour.

**Q. So how long would a thorough assessment normally take?**

ATTORNEY BLOCK: Objection to form.

BY ATTORNEY TRYON:

**Q. You said more than an hour I think?**

A. Correct. I would say more than an hour. I think maybe there's a ceiling, but not a roof. What I mean by that is there are certain criteria required in order to make a recommendation for a treatment for gender dysphoria to be offered. Those include a diagnosis of gender dysphoria, a recognition of any co-occurring mental health issues and whether or not

There are circumstances in which patients have been followed for several years by therapists, that can provide a tremendous amount of collateral information including information provided by parents, family members, community providers, et cetera, that can allow more abbreviated assessment for some people.

BY ATTORNEY TRYON:

**Q. Is someone as consistently spending only an hour with one patient, with each patient for recommending puberty blockers, that would look kind of like a rubber stamp recommendation wouldn't it?**

ATTORNEY BLOCK: Objection.

BY ATTORNEY TRYON:

**Q. Assuming that it's happening?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I would have to see the specifics in order to make any kind of comment.

BY ATTORNEY TRYON:

**Q. Isn't it fair for Dr. Levine or Cantor to express concern that in actual practice that may be happening?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I have not seen anywhere in Dr. Cantor or Dr. Levine's report or within the

they are adequately well controlled enough to be able to proceed with care. And a clear understanding of the risks, benefits and alternatives of that treatment. There's no specific timeframe on that as an assessment.

**Q. How many visits would you expect to be adequate for a careful and thorough assessment?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: And I apologize, it's ---

I'm not trying to be evasive. It really is going to depend upon each individual child.

BY ATTORNEY TRYON:

**Q. What about is one enough? Have you ever done it --- given a recommendation for puberty blocker after only one visit for an hour?**

ATTORNEY BLOCK: Compound question.

THE WITNESS: I have never given a recommendation for puberty suppression after a one hour visit personally.

BY ATTORNEY TRYON:

**Q. What's the minimum time that you think is adequate?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: As I said, I don't think it's based on time. It's based about the content.

literature that this is a pervasive thing that is happening.

BY ATTORNEY TRYON:

**Q. Well, it's not tracked at all so we wouldn't know, would we, one way or the other?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: It is a question that could be asked. I don't think it's for me to make suppositions, nor do I think it is for Dr. Cantor and Dr. Levine to make suppositions about the critical care of transgender youth in this context.

BY ATTORNEY TRYON:

**Q. Is there any --- is there any place where you report any central location where you or your clinic report how much time and effort and what your thorough examination is so that it can be tracked?**

A. The site where I'm at now is part of a four-site NIH trial that has published on the specific assessment processes that the kids who are involved in the study engage in.

**Q. How many kids are in that trial?**

A. I'm not a specific participant in the organization of that trial, so I don't have that information in front of me.

**Q. Does your clinic report to that trial?**

A. My gender clinic, the gender clinic within the hospital that I work in, there are many patients who are enrolled in that trial, yes.

**Q. But it's certainly not mandated, right?**

A. No.

**Q. When these careful and thorough assessments are done, what type of documentation should be used for that?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: That's a very contextual question. We have prevailing standards in terms of what should and shouldn't be documented through various professional organizations, but that's going to change from state to state, country to country.

BY ATTORNEY TRYON:

**Q. And what about in the State of West Virginia?**

A. I have no knowledge of documentation requirements in the State of West Virginia.

**Q. How about in the United States in general?**

A. As far as I'm aware, there are no universal recommendations in terms of specifics of how things are documented.

**Q. Are there any organizations like the WPATH or**

**any other organizations that do give recommendations on what documentation to use in America?**

A. WPATH has certainly provided some educational events in terms of best practices in documenting, but these aren't specific guidelines or recommendations. I think it is notable to say that the Dutch clinic in particular has been quite vigorous in their production of research and is quite well respected in the world in terms of how things are structured, and they actually don't even have a letter that their clinicians write and/or see initiation of puberty suppression for gender-affirming hormones.

ATTORNEY TRYON: Jake, if you could bring up the exhibit entitled Adolescent Medicine, Confidential Patient Questionnaire, which has been redacted?

VIDEOGRAPHER: Do you want that marked?

ATTORNEY TYRON: Yes, please, wherever we are at in the next number.

VIDEOGRAPHER: I believe we're at 44.

LAW CLERK WILKINSON: 46.

ATTORNEY SWAMINATHAN: 46.

---

(Whereupon, Exhibit-46, Form, was marked

for identification.)

---

ATTORNEY TRYON: If you could bring that up, Jake.

VIDEOGRAPHER: Yes. Give me one second. I'm just marking that right now. We might have to mark this one physically. The program won't mark it because it's a redacted document.

ATTORNEY TRYON: Okay. Then we'll do that to bring that up. And then, if you could, Jake, just scroll down in this. I just have a couple questions about this form.

THE WITNESS: Okay.

ATTORNEY TRYON: Go onto the next page down.

BY ATTORNEY TRYON:

**Q. Have you ever seen a form like this?**

ATTORNEY BLOCK: Objection to form. No pun intended.

THE WITNESS: Could you be a little more specific? I mean, I've seen --- this is kind of very typical for a lot of intake-type documents in mental health clinics or in medical clinics.

BY ATTORNEY TRYON:

**Q. So you would characterize this as a typical intake form?**

ATTORNEY BLOCK: Objection.

THE WITNESS: I wouldn't characterize it in that way. I have seen typical intake forms that resemble this in some ways.

BY ATTORNEY TRYON:

**Q. Would this be something that you would consider adequate to document a careful and thorough assessment?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Again, without knowing the context of the individual's practice, it's impossible for me to say.

BY ATTORNEY TRYON:

**Q. Is this a form that you would use for careful and thorough assessment of a patient's mental health?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I don't use this form. I can't say whether or not I was in the context this provider was practicing that I wouldn't use this form as part of my assessment.

BY ATTORNEY TRYON:

**Q. Fair enough. Do you use it as a part of your careful thought thorough assessment of the patient's**

1 **mental health, are there any other forms that you expect**  
 2 **to see in the caregiver's file about that patient's**  
 3 **mental health?**

4 A. Not specifically.

5 **Q. This would be adequate?**

6 ATTORNEY BLOCK: Objection to form.

7 THE WITNESS: Again, I can't speak to  
 8 the adequacy of it without understanding the context of  
 9 the rest of the treatment.

10 BY ATTORNEY TRYON:

11 **Q. Is there any certification that you think is**  
 12 **necessary or appropriate for someone to diagnose gender**  
 13 **dysphoria?**

14 A. There is no universal certification process.  
 15 What we have are guidelines and recommendations for  
 16 ensuring that folks for the mental health prospective,  
 17 again, medical professionals are able to diagnose gender  
 18 dysphoria, but from the mental health prospective, it's  
 19 recommended that we are licensed clinical professionals  
 20 that have some, if not an expert level of understanding  
 21 of gender identity issues and having continuing  
 22 education in the field. These are ongoing  
 23 recommendations. I wouldn't say it was the expertise,  
 24 but knowledge about standard of care that's congruent

1 with how other disorders are also treated.

2 **Q. Let me ask you about paragraph 16 of your**  
 3 **report.**

4 **Do you see the last sentence there?**

5 A. Yes.

6 **Q. It says HB-3293 does not affect elementary**  
 7 **students --- elementary school students who are**  
 8 **transgender boys?**

9 A. Yes.

10 **Q. So you previously testified that puberty is ---**  
 11 **starts on the average about age 12 for males.**

12 **Right?**

13 ATTORNEY BLOCK: Objection to form.

14 THE WITNESS: Again, I would defer to our  
 15 --- that's an answerable question based upon national  
 16 data that I don't have in front of me, but 12-ish is,  
 17 yes.

18 BY ATTORNEY TRYON:

19 **Q. And the range would be --- from what I read, the**  
 20 **range is generally between 8 and 14 years old.**

21 **Right?**

22 A. Again, I would defer to my endocrine colleagues,  
 23 but yes, that's --- that's pretty typical.

24 **Q. And you're aware that boys go into Middle School**

1 **as early as 11 years old or sometimes even earlier.**

2 **Right?**

3 A. I can't say that I'm familiar with how each  
 4 state organizes their primary and secondary education  
 5 systems. I'm familiar with how it was in New York and  
 6 Illinois, and that was occasionally the case.

7 **Q. So if an 11-year-old who has not gone through**  
 8 **puberty is in Middle School, then this would definitely**  
 9 **apply to some pre-pubescent children.**

10 **Right?**

11 ATTORNEY BLOCK: Objection to form.

12 BY ATTORNEY TRYON:

13 **Q. I'm sorry, I didn't make that clear. So if**  
 14 **there are prepubescent boys that are in middle school,**  
 15 **then HB-3293 would affect them.**

16 **Right?**

17 A. I would have to put HB-3293 in front of me to  
 18 --- to know specifically. I'd have to refamiliarize  
 19 myself with it, the specifics of it.

20 **Q. I'm sorry to interrupt you.**

21 A. Yeah, I wouldn't want to comment on something I  
 22 don't have in front of me right now.

23 **Q. Okay.**

24 **So just so you know I had to relocate from my**

1 **office to my home, and there's a poodle in here that you**  
 2 **may hear. So forgive if you hear the interruption.**

3 ATTORNEY BLOCK: Objection to the  
 4 poodle.

5 ATTORNEY TRYON: Let me take one second.  
 6 I will be right back.

7 THE WITNESS: Maybe now is a good time  
 8 for bathroom break.

9 ATTORNEY BLOCK: Let's go off the record.

10 VIDEOGRAPHER: Going off the record the  
 11 time reads 5:46 p.m.

12 OFF VIDEO

13 ---

14 (WHEREUPON, A SHORT BREAK WAS TAKEN.)

15 ---

16 ON VIDEO

17 ATTORNEY TYRON: Okay let's go back on  
 18 the record.

19 VIDEOGRAPHER: Back on the record the  
 20 current time reads 5:50 p.m.

21 BY ATTORNEY TRYON:

22 **Q. Let me direct you to paragraph 26 of your**  
 23 **report?**

24 A. Yep.

**Q. So there's the --- let's see, starting with the word prepubertal children who he insists are children with non-conforming gender expression who realize at the onset of puberty that their gender identity is consistent with their sex assigned at birth. Their understanding of their gender identity changes at the onset of puberty, but their gender identity does not. So that's really a circular argument unless there's some objective external way of proving what that child's gender identity actually is, wouldn't you agree?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I think that the research that we have on inherent gender identity is relatively recent and needs a little bit more robust follow-up. What we have are studies of cognition as well as some very limited brain imaging studies that point to some element of gender identity that has an objective criteria to it. These are not studies that are significant enough or have enough participants for us to draw any kind of significant conclusions, but it does speak when paired with clinical experiences of kids who have desisted that the way that they describe their identity is that it is not a fix or a change in their sense of self but more about the expression of their

behaviors and their understanding of how they fit into the world that has changed.

**Q. So as you say it's too early to really know for sure which of these things it is, right?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: What I would say is it's a preponderance of clinical experience and the studies that we do have point to this being much more likely.

BY ATTORNEY TRYON:

**Q. Much more likely, is that your testimony?**

A. Based on my clinical experiences, yes.

**Q. But there's no way that anyone outside of --- there's no objective measurement to make that determination, right?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: The way that I would describe it is that gender dysphoria as a diagnosis includes both identity-based criteria that are objective and are measured through the course of the scales that we talked about earlier, as well as measures of role and behavior and congruence with your body. These are things that are tracked over time in the studies that we have, and when a child desists from that diagnosis of gender dysphoria it is clear at that point that it was

primarily the gender role based behaviors that were leading to this diagnosis as opposed to a change in identity.

BY ATTORNEY TRYON:

**Q. You were freezing up on me, so let me just see if I can understand this by looking at the transcription. If a child explains the reasons why he or she has a different gender identity, that his or her natal sex, the natal sex designation then later says the opposite, there is really no way of telling whether or not it's just the person's gender identity or the understanding of the identity has changed based on that child's or person's statements.**

**Right?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I would say to complicate matters even further, a number of the studies that are used to describe this desistance phenomenon were first carried out under the DSM-IV. On the DSM-IV the diagnosis was gender disorder in childhood. And in that nomenclature, an identity that is incongruent with sex assigned at birth was not one of the required elements. And so there are children who are described in the common parlance as transgender because they met criteria

for what was then gender identity disorder, who nevertheless discussed any identity incongruent with their sex at birth. So that makes it hard to draw firm conclusions about data captured under the DSM-IV.

BY ATTORNEY TRYON:

**Q. And you are familiar with that diagnostic and statistical manual of mental disorders.**

**Right?**

A. I am.

**Q. And you cited it in your reports.**

**Right?**

A. Correct.

**Q. That is a manual to assist in the diagnosis of mental disorders.**

**Right?**

A. That is correct.

**Q. Is there a value of to classifying a condition as a mental disorders?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I don't know if I can offer an expert opinion on that. I have a biased --- talk about a selection bias as a psychiatrist and a mental health professional. I think it's important for us to destigmatize mental illness as much as possible, so

Page 326

1 whatever is going to allow folks access to care, I'm  
2 relatively neutral on placing a value on whether or not  
3 something is a diagnosis or not.

4 BY ATTORNEY TRYON:

5 **Q. A manual does not recommend any treatments, only**  
6 **tools for diagnosis.**

7 **Is that right?**

8 ATTORNEY BLOCK: Objection to form.

9 THE WITNESS: The main goal of DSM 4 for  
10 classifying diagnoses and ensuring stability or  
11 reliability of those diagnoses across practice  
12 locations.

13 BY ATTORNEY TRYON:

14 **Q. That does not recommend or even provide any**  
15 **treatments.**

16 **Right?**

17 A. The text of the DSM often recommends or  
18 describes treatments.

19 **Q. Does it describe treatments for gender**  
20 **dysphoria?**

21 A. The text was recently revised for gender  
22 dysphoria, and so I really want to see the text in front  
23 of me for me to talk about it.

24 **Q. So in the DSM-V you don't know if it has any**

Page 328

1 discrimination. However, there has been literature, I  
2 can't remember the names of the authors or the date of  
3 the study, that look at specific laws that are enacted  
4 to discriminate against LGBT people and impact on both  
5 mental health and medical health, and so those kind of  
6 discrimination laws certainly do have real felt impact  
7 for transgender folks.

8 BY ATTORNEY TRYON:

9 **Q. So are you saying that this sentence is**  
10 **referring to a law such as HB-3293 or not?**

11 A. I think, as I stated, for the sake of this  
12 expert report, the Yhuto reference from 2015 is what I'm  
13 using to craft that statement.

14 **Q. I'm sorry, the what from 2015?**

15 A. Footnote number 21.

16 **Q. What are those profound impacts of mental health**  
17 **that you are referring to?**

18 A. Well, as I mentioned earlier in my report are  
19 correlation between many exposures that transgender  
20 individuals have and increased rates of suicide, self  
21 harm, substance use, exposure to trauma that have  
22 certainly profound negative impacts for the folks who  
23 are experiencing them.

24 **Q. And of those harms that you have just mentioned**

Page 327

1 **recommendations for treatments in it for gender**  
2 **dysphoria?**

3 A. I don't know in the revised text how much was  
4 changed without familiarizing myself with it. And I'm  
5 happy to look at it. It's a quick read, but primarily  
6 the DSM-V as it comes to gender dysphoria is a  
7 description of the phenomenology not a recommendation  
8 for treatments.

9 **Q. And when was it revised?**

10 A. It was just released about a week ago, maybe  
11 two.

12 **Q. Let me ask you to take a look at your report,**  
13 **paragraph 51. You say to the contrary, as noted**  
14 **previously, stigma and discrimination have been shown to**  
15 **have a profoundly harmful impact on the mental health of**  
16 **transgender people and other minority groups. Now, when**  
17 **you say stigma and discrimination, you're not referring**  
18 **specifically to not allowing, as using your term, a**  
19 **transgender girl to participate on a girls sports team**  
20 **to be that type of stigma or discrimination, are you?**

21 ATTORNEY BLOCK: Objection to the form.

22 THE WITNESS: The reference that I  
23 referred to in my report I would want to look at,  
24 because they had an operational term for stigma and

Page 329

1 **are you aware of any of them caused by --- to a child or**  
2 **person who was not --- who was a transgender female not**  
3 **allowed to participate on a girls or woman's athletic**  
4 **team?**

5 A. As I had testified to earlier, I think I said  
6 I've had two or three patients who are excluded from  
7 sports teams, one of which was a child who was assigned  
8 male at birth, who at age six was not allowed to  
9 participate in the sport. I can't remember what support  
10 it was. This was a child who was heckled and kicked out  
11 of the group of friends that were participating in that  
12 sport which led to negative mental health consequences  
13 for that individual child.

14 **Q. What specific --- I presume that's thoughts of**  
15 **suicidality.**

16 **Right?**

17 A. Thankfully at that age they were not.

18 **Q. How did that child adapt to the situation?**

19 A. Well, we worked with the child, the family and  
20 the sports team, to understand what this child may need  
21 and ended up --- I think it was T ball, I think ended up  
22 joining the T ball team.

23 **Q. So how much --- how much of a delay was there**  
24 **between wanting to join the T ball team and being**

1 **allowed to join the T ball team?**

2 A. This was years ago, so I don't recall the  
3 specifics.

4 **Q. Would it be your testimony that any delay at all**  
5 **between the time of identifying for a natal male**  
6 **identifying as a female and participating on a female**  
7 **team would be profoundly harmful?**

8 ATTORNEY BLOCK: Objection to form.

9 THE WITNESS: I have not seen any studies  
10 that have asked that question or could speak to the  
11 duration of time between exclusion from an activity and  
12 the mental health impacts.

13 BY ATTORNEY TRYON:

14 **Q. Is it your position that as soon as the child or**  
15 **person who is a natal male determines or identifies as a**  
16 **female, that that person should be immediately allowed**  
17 **to play on female teams?**

18 ATTORNEY BLOCK: Objection to form and  
19 scope.

20 THE WITNESS: I'm not able to answer that  
21 question. I think that's out of the scope of my  
22 expertise.

23 BY ATTORNEY TRYON:

24 **Q. Let me ask it differently because I didn't ask**

1 **general --- I mean you made a generalized statement here**  
2 **in the last sentence of paragraph 51. So my question**  
3 **is, as it pertains to this generalized statement, is**  
4 **there any delay that would not cause a profoundly**  
5 **harmful impact on the mental health of transgender**  
6 **people if they are denied the opportunity to immediately**  
7 **participate in the sports team of their gender identity?**

8 ATTORNEY BLOCK: Objection to form and  
9 characterization.

10 THE WITNESS: It's a long sentence with a  
11 lot of clauses. I'm trying to --- I'm trying to parse  
12 them all out to make sure that I'm answering this  
13 accurately. As I testified to in my report, there's  
14 evidence of discrimination, stigma and bias leading to  
15 individual harms. The specific manifestation of those  
16 harms are highly individualized and require individual  
17 assessment of each child and family in order to know.  
18 Which is why you can't speak to the specific impacts for  
19 each individual child, but what we know are  
20 population-based data.

21 **Q. Is it your view that if after a psychiatrist or**  
22 **psychologist or appropriate healthcare individual**  
23 **determines that there would be a profoundly harmful**  
24 **impact that healthcare professional should be the one to**

1 **it quite as artfully as I could have. You indicated**  
2 **profoundly harmful or have a profoundly harmful impact.**  
3 **So if a child or adolescent or adult, adult meaning**  
4 **anyone through collegiate age, were to be a natal male**  
5 **and identify as a female and is not allowed to**  
6 **immediately participate on female teams, would that be**  
7 **profoundly harmful, would it have a profoundly harmful**  
8 **impact on their mental health?**

9 A. That would require an individualized assessment  
10 of that child or young adult in order to understand the  
11 potential impacts specific to that individual.

12 **Q. What if they were required to wait a full year,**  
13 **would that be profoundly --- have a profoundly harmful**  
14 **impact on the mental health of that person?**

15 ATTORNEY BLOCK: Objection to form.

16 THE WITNESS: Same answer.

17 BY BY ATTORNEY TRYON:

18 **Q. Well as a general rule, do you have any opinion**  
19 **as a general rule?**

20 ATTORNEY BLOCK: Objection to form.

21 THE WITNESS: General rule of what? I'm  
22 not understanding the question.

23 BY ATTORNEY TRYON:

24 **Q. Let me try again. So is there --- do you have a**

1 **determine whether or not the child should be allowed to**  
2 **participate on a girl's team?**

3 A. I don't have a specific opinion about how sports  
4 administration vary from state to state. I know it's  
5 very different from state to state. What I would say is  
6 from a mental health perspective my goal is to help our  
7 kids access spaces that are going to be health promoting  
8 and build resilience. I think it's important for health  
9 professionals to be involved in the decisions that are  
10 made, but I can't speak to the legislative process  
11 within the scope of my expertise.

12 **Q. Is the mental health of the cisgender females**  
13 **who might be at a disadvantage of the participation of a**  
14 **transgender female on the team, is their mental health**  
15 **important?**

16 ATTORNEY BLOCK: Objection to form.

17 THE WITNESS: I would say first that the  
18 mental health of cisgender children who have  
19 participated in sports is certainly attestable  
20 hypothesis to explore and it's not research that I have  
21 seen, nor that I'm aware that it exists. Beyond that,  
22 you know, my expertise does not extend to this  
23 population as you have asked this question.

24 BY ATTORNEY TRYON:

**Q. So then let me ask that specifically, have you treated any cisgender females that have been upset about transgender females participating on the girls team?**

A. I have treated cisgender girls who have had transgender teammates. I have not treated anybody who has expressed any concern or harm from that.

**Q. Do you acknowledge that there are those cisgender girls who are suffering from psychological harm from that?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I would not acknowledge that. That is not data that I have seen nor has been my personal experience with patients that I have seen or other colleagues who have described this.

BY ATTORNEY TRYON:

**Q. Are you aware that some of Lia Thomas' cisgender teammates are very upset about Lia Thomas participating on the female swimming team?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I haven't read much about Lia Thomas or her teammates prior to today, so I'm not aware of any specifics to that.

BY ATTORNEY TRYON:

**Q. Have you read anything about that incident ---**

**excuse me, that situation?**

A. Well, I've read something today.

**Q. Prior to today?**

A. Which did not mention about teammates being upset. I've heard about it, but I have not read it.

**Q. So you're aware of it?**

A. I'm vaguely aware of it, yes. I've not done any primary research into it.

ATTORNEY BLOCK: Could we get a time check?

VIDEOGRAPHER: It looks like I got about three minutes left.

ATTORNEY TRYON: I speak really fast.

BY ATTORNEY TRYON:

**Q. Well, is there benefits in --- for example, you said that HB --- you've read HB-3293 and you're aware that it does require --- well, first of all, are you aware that HB-3293 does not use the word transgender at all or trans woman or trans girl at all?**

A. I would want to look at it specifically to double check that that's correct, but I would take your word for it.

**Q. And so in HB-3293, it does require that all biological males must --- let me rephrase that, that**

**biological males may not compete on girls teams.**

**Do you understand that?**

A. I don't, because biological male as a term is certainly up for debate.

**Q. Which word would you like to use?**

A. I don't know if there's going to be an answer for that in the context of this particular bill. I think ---.

**Q. How about natal male, does that work?**

A. Sure. We can use that. I would typically use assigned male at birth, but yes.

**Q. Okay.**

**So natal males under this Bill are not allowed to participate on girls sports teams.**

**Do you understand that?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: Yeah. And I apologize I really don't mean to be parsing, if the text of the Bill is biological males, what that just means is that that is a complex term that doesn't have a universal acceptance. But I understand that the goal of the Bill is for folks assigned male at birth, not to participate in women's sports teams, yes.

BY ATTORNEY TRYON:

**Q. If a --- to use your term, a person assigned male at birth is told that that person may not participate on girls sports, and as in so many other things in life, you are told that's the rule and you have to live with it, is there value in learning coping skills to deal with rules that you don't agree with and abide by them?**

ATTORNEY BLOCK: Objection to form.

THE WITNESS: I guess the way I would approach it is that if we look at the data, clinical experiences and from the testimonies of transgender individuals that they face enough on a daily basis stigma discrimination exclusion, that they all would benefit from a healthy development of coping skills. Nowhere in the field of psychiatry is it recommended that we expose people to traumatic events for them to develop coping skills to manage through.

BY ATTORNEY TRYON:

**Q. Well, not to intentionally do so, but there's laws and rules that you made that said you have to live with those rules then it's your position that the rules need to be changed to comply with the wishes of that person?**

ATTORNEY BLOCK: Objection to form.

Page 338

1 THE WITNESS: Again my expert testimony  
2 is rebutting the testimony of Dr. Levine and Cantor. I  
3 can't speak to the specific legislative processes in  
4 terms of the best way for states to approach a complex  
5 issue such as this.

6 ATTORNEY TRYON: I have no further  
7 questions. Thank you for your time I appreciate it.

8 THE WITNESS: Thank you. What is your  
9 poodle's name? Can I ask that off the record?

10 ATTORNEY BLOCK: We don't have any  
11 Redirect questions. Dr. Janssen will review the  
12 transcript.

13 ATTORNEY GREEN: This is Roberta Green on  
14 behalf of WVSSAC. No questions.

15 ATTORNEY MORGAN: This is Kelly Morgan on  
16 behalf of the West Virginia Board of Education and  
17 Superintendant Burch. I don't have any questions.  
18 Thank you.

19 ATTORNEY DENIKER: Dr. Janssen, thank you  
20 for your time today, this is Susan Deniker. I have no  
21 questions.

22 THE WITNESS: Thank you, guys.

23 VIDEOGRAPHER: Going off the record. The  
24 current time reads 6:18 p.m.
